MS4002 PRODUCT RELEASE

TO: All Telex CCS Dealers

FROM: Mark Gubser

DATE: 08-23-2006

**MS4002
4 Channel Master Station
Part # 90007799000**

I would like to announce the release of the Audiocom® MS4002 4 Channel Master Station. This announcement has been long awaited and we are now ready to begin taking and filling orders. Over the past several months the anticipated production of the MS4002 was complicated by a move of manufacturing facility from Blue Earth, MN to Lincoln, NE. I know this has inconvenienced some dealers and end users, but the delay was necessary in order to complete several in house new product introduction tests. We will be working to reduce the backlog of this product as quickly as possible and will be working to reduce lead times for new orders. I appreciate your understanding as we work through this process.

The MS4002 brings an exciting new product to the Audiocom® family. This 4 Channel Master Station provides the necessary power for your party line system and the flexibility of a user station by simply adding a microphone or headset. The MS4002 has a list of features that include a 4 Amp power supply, Auto-Sensing headset connector (to work with either dynamic or electret headset microphones), VOX (voice activated microphone) and many more. A new brochure that describes the features of the MS4002 is included with this bulletin.

Retail List Price of the MS4002 is: \$1,550.00. Complete price details as shown on page 2 of the Telex Intercom and Headsets Price List – EFFECTIVE March 1, 2006.

If you would like additional information on the Audiocom® series of wired intercom products, please contact one of our Regional Sales Managers or our inside sales representative by calling 1-800-392-3497 x3875.

Best Regards,

Mark Gubser
