

Toft Audio Designs may be a new company to the professional audio industry, but the people behind it are seasoned veterans. Toft Audio Designs is dedicated to providing high quality, well engineered professional audio products at a very competitive price. Malcolm Toft, the designer behind the products has an excellent pedigree as a recording engineer with credits like the Beatles 'Hey Jude', David Bowie's 'Space Oddity', and James Taylor's first album just to name a few. While an excellent engineer, Malcolm Toft's ability as a designer of audio products is legendary. Malcolm Toft was the founder of Trident Audio Developments and the designer of the classic 'A' Range, Series 80, TSM, and Series 65 consoles. These consoles from the early 70's are still making hits in today's market. Malcolm's design ability has always been present. His recent 980 console under the MTA banner was a huge success, and found in many professional recording studios all over the world.

### A T C - 2 T o f t A u d i o D e s i g n s

The first product from Toft Audio Designs is the ATC-2 dual channel F.E.T compressor, four band equalizer and mic pre-amplifier.

### F E A T U R E S

- High quality mic pre-amp with selectable 48 volt phantom power, direct instrument input and switchable line input.
- Classic F.E.T compressor with variable attack, release and ratio. V.U. metering shows gain reduction and output level.
- Extremely musical four band equalization with shelving high and low frequencies having switchable turnover points. Two individual swept mid ranges and 50Hz low pass filter.
- Stereo link facility for the two compressors means they can operate individually or as a stereo pair.
- Compact 2U rack mounting unit effectively provides two feature packed recording channels in one conveniently sized rack unit.
- Balanced x-l-r input for mic, balanced x-l-r and jack for line input and line output.
- 1/4" thick anodized aluminum sculptured front panel and solid construction
- Extremely competitive price.
