NMP-530

NETWORK MEDIA PLAYER

FOR DIGITAL SIGNAGE APPLICATIONS

Dynamic Digital Signage.

ViewSonic's NMP-530 Network Media Player connects to any display through HDMI, S-video, component or composite inputs, instantly creating a digital signage display. The NMP-530 is a cost effective solution because it eliminates the need for a PC at every display and is IP-enabled so you can remotely control, schedule and manage multiple devices from virtually anywhere within your network or the Internet. The small form factor allows for inconspicuous installation in tight spaces. It's powerful enough to deliver smooth playback of high-definition video and Flash™ content. The NMP-530 is equipped to handle many layers of high-quality graphics, text, and video and is a cost-effective solution especially when the network and displays are already installed. From Multimedia® Flash to HTML, and from video to still pictures, it's all available and easy to present with the NMP-530 Network Media Player.*

MAKE YOUR MESSAGE COME ALIVE

> **Network ready for easy installation**
  Easily integrates into existing network, supports a wide variety of digital display components and multi-vendor networks.

> **Local storage**
  2GB of native storage and USB ports allow more content downloads during non-peak network hours.

> **Easy audio and video streaming with content-rich video and graphics**
  Display dynamic and captivating content with the included Macromedia Flash 6. Decodes MPEG-1/2/4, WAV audio/video formats.

> **Versatile content presentation**
  Display unique or consistent content on displays throughout the network. Show content in landscape or portrait mode, and in single or multiple zones on each display within the network.

> **Web-based user interface and built-in browser**
  Change network, video and browser settings, even install firmware upgrades through the NMP-530. The built-in web browser lets users renders HTML content and plays Macromedia Flash applications.

> **Lower total cost of ownership (TCO)**
  Eliminates local/remote PCs. Offers simplified cabling and installation and easy-to-use software.

> **Easy, flexible device management**
  Remotely manage display and network information through the user-friendly web interface, Telnet, Tivella Administration Server (TAS) or Cisco management software.
