Your Enterprise Edge M7310 Telephone

Shift button

For using the top function of a dual-memory button.

Display

shows the time, date, call information, and guides you. The lower line of the display is reserved for display button instructions.

Dual-memory buttons

store any two features and/or autodial numbers.

Display buttons

Feature button

starts or ends a feature.

Release button

cancels active calls.

Hold button

Dial pad

Memory and line buttons

are buttons with indicators for one touch dialing, feature operation or line access.

Volume control

Indicators

appear beside lines and features.

Using display buttons

Three display buttons appear directly below the display. When they are active, these buttons are labelled in capital letters on the bottom line of the display. In Enterprise Edge documents, display buttons are shown as underlined, capital letters: for example, OK.

Using Button Inquiry

Check what is programmed on your memory buttons.

1. Release all calls or lines with dial tone.
2. Press **Feature** * 0.
3. Press the button(s) that you want to check and read the display.
4. Press **Feature** when finished.

Adjusting display contrast

Notice

These telephones now conform to the latest standards in relation to the positioning of Q and Z on the number keys. The Q appears on key number 7 and the Z appears on key number 9.

Setting up the telephone

Connecting the cords

ATTENTION Before attempting to carry out **any** work on the telephone, ensure that the line cord is unplugged from the wall socket.

To remove any of the cords, squeeze the release latch on the plug and gently pull the plug from the socket.

Connect the handset cord to the jack labelled with the telephone icon and route the cord as shown.

If you are using a headset, route the cord along the channel in the base and connect the cord to the telephone jack that is marked with the headset icon.

Route the line cord through the stand and connect the cord to the telephone jack that is marked with the jack icon.

Attach the stand using either pair of slots; to raise the back of the telephone to its highest position, use these slots.

Once the above work is complete, plug the line cord back into its wall socket.
