ST4 Telephone User Guide Addendum

Please note that the Flash feature of the telephone is set at 640 mS +/- 100 mS.

The following information supercedes the regulatory information in the 85403MBG01 user guide.

Federal Communications Commission (FCC) Note

The ST4 is designed for connection to a host system. Refer to the system’s installation manual for instructions on connecting a single line telephone.

The ST4 complies with Part 68 of the FCC rules and incorporates FCC-compliant telephone cords, plugs and jacks. The label on the bottom of the telephone contains the FCC registration number. This equipment utilizes a telephone receiver that is Hearing Aid Compatible.

If this equipment is not operating properly, contact Nitsuko America (or an authorized repair facility of Nitsuko America). Do not attempt to make repairs on your own. For information, please contact:

Nitsuko America, Telecom Division
4 Forest Parkway
Shelton, CT 06484
Tel: 203-926-5448

Industry Science Canada Note

The ST4 telephone is designed for connection to a host system. Refer to the system’s installation manual for instructions on connecting a single line telephone.

The Canadian Department of Communications label identifies certified equipment. This certification means that the equipment meets certain telecommunications protective, operational and safety requirements. The Department does not guarantee the equipment will operate to the user’s satisfaction.

Repairs to certified equipment should be made by an authorized Canadian maintenance facility designated by the supplier. Do not attempt to make any repairs on your own. For information please contact:
