**NOTICE:**
- A Proprietary Telephone is abbreviated as PT.
- A Single Line Telephone is abbreviated as SLT.
- This Operating Instructions does not show complete model number that indicate the country where your models should be used. The model number of your unit is found on the label affixed to the unit.

![MODEL NO. -- -- -- -- --]

(label)
**Important Information**

Satisfactory performance cannot be guaranteed for each combination of host and subsidiary equipment.

‘Prevention of access by user.’ This equipment is intended to be accessible only by authorized personnel. It must be installed in a locked room or similar environment, so that user access is prevented. Failure to prevent such user access will invalidate any approval given to this equipment.
Precautions

• Keep the unit away from heating and electrical noise generating devices such as fluorescent lamps, motors and televisions.

• This unit should be kept free of dust, moisture, high temperature (more than 40°C / 104°F) and vibration, and should not be exposed to direct sunlight.

• Never attempt to insert wires, pins, etc. into the vents or other holes of this unit.

• Do not use benzine, thinner, or the like, or any abrasive powder to clean the cabinet. Wipe it with a soft cloth.

WARNING

THIS UNIT MAY ONLY BE INSTALLED AND SERVED BY QUALIFIED SERVICE PERSONNEL.

WHEN A FAILURE OCCURS WHICH RESULTS IN THE INTERNAL PARTS BECOMING ACCESSIBLE, DISCONNECT THE POWER SUPPLY CORD IMMEDIATELY AND RETURN THIS UNIT TO YOUR DEALER.

DISCONNECT THE TELECOM CONNECTION BEFORE DISCONNECTING THE POWER CONNECTION PRIOR TO RELOCATING THE EQUIPMENT. THEN RECONNECT THE POWER FIRST.

THIS UNIT IS EQUIPPED WITH AN EARTHING CONTACT PLUG. FOR SAFETY REASONS, THIS PLUG MUST ONLY BE CONNECTED TO AN EARTHING CONTACT SOCKET WHICH HAS BEEN INSTALLED ACCORDING TO REGULATIONS.

THE POWER SUPPLY CORD IS USED AS THE MAIN DISCONNECT DEVICE, ENSURE THAT THE SOCKET-OUTLET IS LOCATED/INSTALLED NEAR THE EQUIPMENT AND IS EASILY ACCESSIBLE.

TO PREVENT FIRE OR SHOCK HAZARD, DO NOT EXPOSE THIS PRODUCT TO RAIN OR MOISTURE.

For your future reference

Introduction

Structure of the Manual

This manual consists of the following sections.

Section 1. Operations

Describes the features and their operations. It also provides information about the programming required, conditions and connection references for each feature.

Section 2. Appendix

Provides the Tone/Ring Tone List, LED Indication, Feature Number List and the Telephone Troubleshooting.

Index

Description of the Symbols Mainly Used in this Manual

!! Additional information and conditions.

📰 The feature or program references.

- Turning on the Background Music (BGM) .......................................... 1-80
1.1 Before Operating

What kind of telephone do you use?

In this manual, you will find how to operate the feature depending on the telephone you use. If you use single line devices such as a single line telephone or data terminal, you will follow the steps which enter a feature number. If you use single line devices which do not have a “*” or “#” key, it is not possible to access features that have “*” or “#” in their feature numbers.

If you use a Panasonic proprietary telephone which has a special function button and/or a display, you will follow the button or display operation for easy access. If you use a Panasonic proprietary telephone which does not have a function button, you may change one of the unused buttons to another button. Refer to Section 1.2, “Proprietary Telephone Settings”.

A Panasonic proprietary telephone has Light Emitting Diode (LED) button indicators, so you can see the line conditions according to the lighting patterns. Refer to Section 2.2, “LED Indication”.

Please use the proper operation for your telephone.

Description of the Symbols Used in this Manual

In this manual, many symbols are used. Some of the symbols need explanation. Those are described below.

- Lift the handset, or press the SP-PHONE or MONITOR button (Off-hook).
- Replace the handset, or press the SP-PHONE or MONITOR button (On-hook).
- Number keys on the telephone — depends on the condition.
- Flash the hookswitch on a single line telephone.
- Tones which vary depending on the condition. Refer to “Tone / Ring Tone List” (Section 2.1).

- For proprietary telephone operations, all button illustrations are based on the KX-T7130 model.
- The AUTO ANSWER/MUTE button corresponds to the AUTO ANS/MUTE button on a KX-T7300 series.
- The AUTO DIAL/STORE button corresponds to the AUTO/STORE button on a KX-T7300 series.
1.1 Before Operating

Operating example

Example: “Interrupting an Existing Call (Executive Busy Override)”, Executive Busy Override — Extension

Applicable telephone: A PT (Proprietary Telephone) user can follow the operating steps below.

Applicable telephone: Any Telephone (PT and SLT) user can follow the operating steps below.

**Interrupting an Existing Call (Executive Busy Override)**

**Executive Busy Override — Extension**

Allows you to connect to an existing intercom (extension) call. System Programming is required to use this feature.

**Any Telephone**

If you make an intercom call and while hearing a busy tone

Dial 3. Confirmation tone (optional)

A three-party conference is now established.

**To terminate one party and talk to the other**

**PT**

Press the CO or INTERCOM of the party to remain connected.

Confirmation tone (optional)

• If all three parties are extensions, this operation is not available.

• This feature does not work when “Data Line Security” or “Executive Busy Override Deny” is set at either or both of the other parties.

• When a 2-party call is changed to a 3-party call or vice versa, a confirmation tone is sent to all parties. The tone can be disabled.

• 1.3 Making Calls, “Denying “Interrupting an Existing Call”(Executive Busy Override Deny)”

• 1.7 Useful Features, “Conference (3-party)”

• 1.7 Useful Features, “Data Line Security”

• See the Installation Manual, Section 3, “Executive Busy Override”.

**Additional information**

• If your telephone is not noted in the operation steps (ex. only “PT” is noted and you are using a single line telephone), this means your telephone cannot execute that feature.

• If your telephone can perform several operations for one feature, you can select the method according to your needs.
1.2 Proprietary Telephone Settings

If you use a Panasonic proprietary telephone, you can customize your telephone functions. For example, you can change the initial settings according to your needs or the button functions on your telephone. To program, you need to switch your telephone to the programming mode. During the programming mode, your telephone is busy to outside callers. If you want to make a normal call operation, you must finish the programming mode.

- This feature cannot be used with a single line telephone.
- Be sure the handset is on the cradle and the SP-PHONE button is off.
- To program, set the MEMORY switch on the proprietary telephone to “PROGRAM” or press the PROGRAM button on the KX-T7300 series.

When you enter the Station Programming mode, the display shows the following message as the initial programming mode.

![PITS~PGM NO?](image)

The display also gives you helpful or stored data information related to the programming steps. You can also refer to the “Display Example” in the Appendix (Section 2.4).
- After programming, return the MEMORY switch to the “SET” position or press the PROGRAM button on the KX-T7300 series.
- If you move your desk and change the extension line, reset as desired. The setting will not remain in your telephone but will remain in the previous extension user’s memory.
- During the programming mode, your extension is treated as a busy extension.

To enter the Programming Mode

Be sure the telephone is idle and on-hook.

Set the MEMORY switch to “PROGRAM” on the KX-T7000 series.
OR
Press the PROGRAM button on the KX-T7300 series.

To exit the Programming Mode

When the display shows the initial programming mode:

Programming is completed and the normal call operation resumes.

Set the MEMORY switch to “SET” on the KX-T7000 series.
OR
Press the PROGRAM button on the KX-T7300 series.

When storing data

After pressing the STORE button to store data, you may hear one of the following tones.
- Confirmation tone (1 beep): storage is completed.
- Confirmation tone (2 beeps): the data is the same as the last entry.
- Alarm tone (3 beeps): the entry is not valid.
1.2 Proprietary Telephone Settings

Customizing Your Telephone Functions

You can change the initial settings of your telephone. Check the available items in the list and change the settings, if required.

Preferred Line Assignment — Outgoing

**Idle Line Preference:** You can access any enabled idle outside (CO) line to make a call directly by going off-hook.

**Prime Line Preference:** You can access a programmed outside (CO) line directly by going off-hook.

**No Line Preference:** You cannot access an outside (CO) line by going off-hook. Choose the outside (CO) line.

<table>
<thead>
<tr>
<th>Selection</th>
<th>Programming Input</th>
</tr>
</thead>
<tbody>
<tr>
<td>Idle Line Preference.</td>
<td>1 2 AUTO DIAL STORE</td>
</tr>
<tr>
<td>Prime Line Preference.</td>
<td>1 3 outside (CO) line no. Enter the outside (CO) line number (1 through 6).  AUTO DIAL STORE</td>
</tr>
<tr>
<td>No Line Preference.</td>
<td>1 1 AUTO DIAL STORE</td>
</tr>
</tbody>
</table>

- Setting a new line preference feature will cancel the previous setting.
- The user can override the Idle/Prime Line Preference temporarily to select a specific line. To select it, press the desired line access button (INTERCOM or CO button) before going off-hook or pressing the SP-PHONE/MONITOR button.
- If there are only 3 lines in the system, outside (CO) line numbers 4 through 6 cannot be used.
1.2  Proprietary Telephone Settings

Preferred Line Assignment — Incoming

No Line Preference: When an incoming outside call is received, the extension user must go off-hook and then press the flashing CO button.

Prime Line Preference: When incoming outside calls from the Central Office are received at the same time, you can receive the call on the preferred outside (CO) line first only by going off-hook.

Ringing Line Preference: (default) When an incoming outside call is received, you can receive the call ringing at your telephone by going off-hook.

<table>
<thead>
<tr>
<th>SELECTION</th>
<th>PROGRAMMING INPUT</th>
</tr>
</thead>
<tbody>
<tr>
<td>❑ No Line Preference.</td>
<td>2 1 AUTO DIAL STORE</td>
</tr>
<tr>
<td>❑ Prime Line Preference.</td>
<td>2 3 outside (CO) line no. AUTO DIAL STORE</td>
</tr>
<tr>
<td></td>
<td>Enter the outside (CO) line number (1 through 6).</td>
</tr>
<tr>
<td>❑ Ringing Line Preference.</td>
<td>2 2 AUTO DIAL STORE</td>
</tr>
</tbody>
</table>

• Setting a new line preference feature will cancel the previous setting.
• In “Prime Line Preference” mode, if incoming calls from the Central Office are received at the same time except for the preferred outside (CO) line, you must go off-hook and then press the CO button whose indicator is flashing red quickly.

Outside (CO) Line Ringing Selection

You can select whether the extension will ring or not when an outside call is received at your extension.

<table>
<thead>
<tr>
<th>PROGRAMMING INPUT</th>
</tr>
</thead>
<tbody>
<tr>
<td>3 outside (CO) line no. AUTO DIAL</td>
</tr>
<tr>
<td>Enter the outside (CO) line numbers you want to ring (1 through 6). STORE</td>
</tr>
</tbody>
</table>

• The “Flexible Ringing Assignment” should be set to “Enable”. (See the Installation Manual.)
• When an outside call is received at your extension but does not ring, the CO indicator will flash. If you want to answer the outside call, press the flashing CO button.
1.2 Proprietary Telephone Settings

Intercom Alert Assignment

The intercom alert (tone/voice) at a receiving extension can be selected by programming.

Voice Call: A Voice alert instead of Tone alert is heard through the speaker on the receiving extension.

Tone Call (default): A tone alert (ringing) sounds at the receiving extension.

<table>
<thead>
<tr>
<th>Selection</th>
<th>Programming Input</th>
</tr>
</thead>
<tbody>
<tr>
<td>Voice Call</td>
<td>4 2 AUTO DIAL STORE</td>
</tr>
<tr>

</tr>
</tbody>
</table>

- 1.5 During a Conversation, “Call Waiting”
- 2.1 Tone / Ring Tone List

Proprietary Telephone Setting Data Default Set

Allows you to reset the proprietary telephone settings at an extension to the default settings.

- Preferred Line Assignment — Outgoing (default: No Line Preference)
- Preferred Line Assignment — Incoming (default: Ringing Line)
- Outside (CO) Line Ringing Selection (default: Ring – all outside (CO) lines)
- Intercom Alert Assignment (default: Tone Call)
- Call Waiting Tone Selection (default: Tone 1)

Operation

<table>
<thead>
<tr>
<th>Operation</th>
</tr>
</thead>
<tbody>
<tr>

</tr>
</tbody>
</table>

- This feature also cancels the Handsfree Answerback feature and pressing the AUTO ANSWER/MUTE button in the Room Monitor feature.
1.2  Proprietary Telephone Settings

Customizing the Buttons on Your Telephone

Changing the Flexible Buttons

You can change the flexible buttons on your telephone to certain function buttons. For example, if your telephone has more CO buttons than available outside (CO) lines, you may change the unused CO buttons to One-Touch Dialing buttons, etc.

The 4 types of flexible buttons are as follows:
- **Flexible CO Buttons** (located on a PT only)
- **Flexible DSS Buttons** (located on a DSS Console only)
- **Programmable Feature (PF) Buttons** (located on a PT and DSS Console)
- **Flexible MESSAGE Buttons** (located on a PT except for the KX-T7055)

Check the required operation first. If your telephone is not provided with the button, you can assign the button using this program.

“✓” indicates that the feature is available.

- **To confirm the stored function data**
  Press the button you want to confirm.
- **As to the buttons on your proprietary telephone, please refer to your proprietary telephone manual.**
1.2 **Proprietary Telephone Settings**

**Line Access Buttons**

One of the following 3 types of CO buttons must be used to seize an outside (CO) line when making a call.

- **Group-CO (G-CO) button**
- **Other-CO (O-CO) button**
- **Single-CO (S-CO) button**

- A flexible CO button can be assigned as a Line Access Button (G-CO, O-CO or S-CO) in Proprietary Telephone Settings. Once a flexible CO button is assigned as a Line Access Button, it provides the line status using lighting patterns and color indication. Please refer to “2.2 LED Indication”.
- You can set the G-CO and S-CO buttons on one telephone. Incoming and outgoing calls on the line are shown on the button in the following priority. S-CO > G-CO

**Single-CO (S-CO) Button**

A S-CO button is an outside (CO) line access button. This allows you to access a specific line by pressing a S-CO button. An incoming call can be directed to a S-CO button.

![Single-CO Button](image)

- Only one S-CO button can be assigned to an outside (CO) line.
- The same outside (CO) line can be assigned as a S-CO button and G-CO button.

**Other CO (O-CO) Button**

Outside (CO) lines which are not assigned to S-CO or G-CO buttons can be assigned to a flexible CO button on a proprietary telephone. The assigned button serves as the O-CO button. An incoming call, on assigned outside (CO) lines, arrives at the O-CO button. To make an outside call, you simply press the designated O-CO button.

![Other CO Button](image)
1.2 Proprietary Telephone Settings

**Group-CO (G-CO) Button**

To use outside (CO) lines and a group of outside (CO) lines (outside (CO) line group) efficiently can be assigned to a CO button. This button is referred to as Group-CO (G-CO) button. Any incoming calls from any outside (CO) line in the outside (CO) line group arrive at the G-CO button. To make an outside call, you can access an idle outside (CO) line in the group by simply pressing the assigned G-CO button.

<table>
<thead>
<tr>
<th>PT</th>

</thead>
<tbody>
<tr>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

- Press the programmable button.
- Dial #.
- Enter an outside (CO) line group number (1 through 6).
- Press STORE.

![](image)

- The same line can be assigned as a S-CO button and G-CO button.
- The extension for making and/or receiving calls in outside (CO) line groups must be programmed.
- When your extension is assigned as the incoming call destination for an outside (CO) line, you cannot receive any incoming outside calls unless a G-CO, O-CO or S-CO button associated with the line is assigned.

**DSS (Direct Station Selection) Button**

<table>

</tr>
</tbody>
</table>

- Press the programmable button.
- Dial 1.
- Enter an extension number (100 through 199).
- Press STORE.
1.2 Proprietary Telephone Settings

One-Touch Dialing Button

- To store the telephone number of an external party, a line access code (9, 0 or 81 through 86) must be stored as the first digit.
- You can use 0 through 9, *, #, PAUSE and INTERCOM (Secret) as follows.
  - PAUSE: inserts a pause.
  - INTERCOM: conceals all or part of a stored number.
- The number of Personal Speed Dialing numbers corresponds to the number of PF buttons assigned as One-Touch Dialing. (PF buttons are on a proprietary telephone.) You cannot assign both the One-Touch Dialing and Personal Speed Dialing features to the same number. For example, if you assign One-Touch Dialing to the PF 1 button and then Personal Speed Dialing 0, only the Personal Speed Dialing 0 feature will be assigned.

 1.7 Useful Features, “Secret Dialing”

CONF (Conference) Button

- 1.7 Useful Features, “Conference (3-party)”
- 1.7 Useful Features, “Conference, Unattended”
- 1.7 Useful Features, “Conference (5-party)”
1.2 Proprietary Telephone Settings

FWD/DND (Forward/Do Not Disturb) Button

- Press the programmable button. Dial 4. Press STORE.

SAVE Button

- Press the programmable button. Dial 5. Press STORE.

Log-In/Log-Out Button

- Press the programmable button. Dial 8. Press STORE.

Tips:
- 1.6 Before Leaving Your Desk, “Forwarding a Call (Call Forwarding)”
- 1.7 Useful Features, “Rejecting Incoming Calls (Do Not Disturb – DND)”
- 1.3 Making Calls, “Redialing the Saved Number (Saved Number Redial)”
- 1.7 Useful Features, “Joining or Leaving a Call Distribution Group (Log-In/Log-out)”
- See the Installation Manual, Section 3, “Log-In/Log-Out”.
1.2 Proprietary Telephone Settings

Restoring the MESSAGE Button

Allows you to restore the message waiting feature to the MESSAGE button.

![Restoring the MESSAGE Button](image)

Press MESSAGE. Dial 3. Press STORE.

One-Touch Access for System Features

Features that can be accessed using the dialing buttons can also be programmed into memory.

Programming

![Programming](image)

Press the programmable button and dial 2 or press the PF button. Enter the desired feature code. Press STORE.

- If you want to use a programmable feature button as a button for External Feature Access, you can press the FLASH button instead of the feature code. When you press the assigned button, you can access special features (e.g. Call Waiting) offered by a host PBX or Central Office.

To Access

![To Access](image)

Off-hook. Press the programmable button assigned above. Confirmation tone (1 beep)

- Whether the confirmation tone is heard or not depends upon the programmable feature.
1.2 Proprietary Telephone Settings

Display Contrast Adjustment

The CONTRAST selector is used to adjust the display contrast.

![CONTRAST selector diagram]

Adjust the CONTRAST lever to the desired setting (LOW/MID/HIGH).

- This feature is available for a KX-T7330/KX-T7033/KX-T7030/KX-T7130 only.

When Using the Headset

The Panasonic Advanced Hybrid System supports the use of a headset on a proprietary telephone (PT). When you use the headset (optional), you should switch the selection mode first.

![HANDSET/HEADSET selector diagram]

Adjust the HANDSET/HEADSET lever to “HEADSET”.

- This feature is available for a KX-T7330/KX-T7033/KX-T7030/KX-T7130 only.
## 1.2 Proprietary Telephone Settings

### Volume Control — Handset Receiver/Headset/Ringer/Speaker

Allows you to adjust the following volumes as necessary.

#### To adjust the handset receiver volume

**PT**

Adjust the VOLUME Control lever to the desired setting (MAX to MIN) on the KX-T7000 series. OR Press the VOLUME Control buttons on the KX-T7300 series.
1.3 Making Calls

Intercom Calling

Allows you to make a call to another extension.

Using the handset

**Any Telephone**

- Lift the handset.
- Enter the extension number (100 through 199).
- Talk.
- Hang up.

Using the Speakerphone

**PT**

- Press SP-PHONE or INTERCOM.
- Enter the extension number (100 through 199).
- Talk.
- Press SP-PHONE.

Using a DSS (Direct Station Selection) button

**PT**

- Lift the handset or press SP-PHONE/MONITOR.
- Press the flexible button assigned as a DSS button.
- Talk.
- Hang up or press SP-PHONE/MONITOR.

- After dialing an extension number, you will hear one of the following tones.
  - **Ringback tone:** Indicates the destination extension is being called.
  - **Confirmation tone:** Indicates you can perform voice calling (e.g. Paging).
  - **Busy tone:** Indicates the destination extension is busy.
  - **Do Not Disturb (DND) tone:** Indicates the destination extension has set the “Do Not Disturb (DND)” feature.

- An extension number and a name, if programmed, are shown on a display PT during an intercom call.
- You can assign a DSS button on a flexible button in Proprietary Telephone Settings. The stored number can be displayed by pressing the desired DSS button while on-hook.

- 1.2 Proprietary Telephone Settings, “Customizing the Buttons on Your Telephone”, DSS (Direct Station Selection) Button
- 2.1 Tone/Ring Tone List
- See the Installation Manual, Section 3, “Intercom Calling”.

---

Operations
1.3 Making Calls

Calling an Operator (Operator Call)

Allows you to call an operator within the system. One extension can be assigned as an operator.

Any Telephone

![Operator Call](image)

Lift the handset or press SP-PHONE/MONITOR. Dial 0 or 9.

- If an operator is not assigned, this feature is not available and you will hear a reorder tone.
- If the line access number is assigned to “0” by System Programming, the operator call number will be changed to “9”.
- See the Installation Manual, Section 3, “Operator Call”.

Outside Calling

Allows you to make a call to an external party using one of the following line access methods.

1.) Making Outside Calls Using Automatic Line Access
2.) Making Outside Calls Using Individual Line Access
3.) Making Outside Calls Using Outside (CO) Line Group Access

- An outside (CO) line which is not assigned to a CO button cannot be dialed.
- Helpful hints for the Handsfree (speakerphone) operation are noted in the “Handsfree Operation” feature.

- 1.2 Proprietary Telephone Settings, “Customizing the Buttons on Your Telephone”, Single-CO (S-CO) Button, Group-CO (G-CO) Button
- 1.6 Before Leaving Your Desk, “Locking Your Telephone (Electronic Station Lockout)”
- 1.7 Useful Features, “Calling with Account Codes (Account Code Entry)”
- 1.7 Useful Features, “Calling Using Your Privileges at Another Extension (Walking COS)”
- 1.8 Operator / Manager Service Features, “Remote Station Lock”
- See the Installation Manual, Section 3, “Outside Calling”.
- See the Installation Manual, Section 3, “Toll Restriction Override by Extension Password”.
- See the Installation Manual, Section 3, “Toll Restriction — Station Lock Boundary Class”.
- See the Installation Manual, Section 3, “Toll Restriction”.

![Phone Symbols](image)
1.3 Making Calls

Making Outside Calls Using Automatic Line Access

Allows you to select an available outside (CO) line automatically.

<table>
<thead>
<tr>
<th>Any Telephone</th>
</tr>
</thead>
<tbody>
<tr>
<td><img src="image.png" alt="Diagram" /></td>
</tr>
<tr>
<td>Lift the handset or press SP-PHONE/MONITOR.</td>
</tr>
<tr>
<td>Dial 9 or 0.</td>
</tr>
<tr>
<td>Dial tone</td>
</tr>
<tr>
<td>Enter the phone number.</td>
</tr>
<tr>
<td>Talk.</td>
</tr>
<tr>
<td>Hang up or press SP-PHONE/MONITOR.</td>
</tr>
<tr>
<td>• The selected CO indicator light turns green.</td>
</tr>
<tr>
<td>• The display shows the phone number.</td>
</tr>
</tbody>
</table>

If the line access number is assigned to “0” by System Programming, the operator call number will be changed to “9”.

Making Outside Calls Using Individual Line Access

Allows you to select the desired outside (CO) line without dialing the line access code.

<table>
<thead>
<tr>
<th>PT</th>
</tr>
</thead>
<tbody>
<tr>
<td><img src="image.png" alt="Diagram" /></td>
</tr>
<tr>
<td>Lift the handset or press SP-PHONE/MONITOR.</td>
</tr>
<tr>
<td>Press the CO assigned as a Single-CO button.</td>
</tr>
<tr>
<td>Dial tone</td>
</tr>
<tr>
<td>Enter the phone number.</td>
</tr>
<tr>
<td>Talk.</td>
</tr>
<tr>
<td>Hang up or press SP-PHONE.</td>
</tr>
<tr>
<td>• The CO indicator light turns green.</td>
</tr>
<tr>
<td>• The display shows the phone number.</td>
</tr>
</tbody>
</table>

• You may skip off-hook and press the Single-CO (S-CO) button directly.
1.3  Making Calls

Making Outside Calls Using Individual Outside (CO) Line Group Access

Allows you to select an idle line within a designated outside (CO) line group. Through System Programming, outside (CO) lines can be divided into 6 line groups.

PT and SLT

<table>
<thead>
<tr>
<th>CO</th>
<th>For a PT</th>
</tr>
</thead>
<tbody>
<tr>
<td>8</td>
<td>outside (CO) line group no.</td>
</tr>
<tr>
<td></td>
<td>For an SLT</td>
</tr>
</tbody>
</table>

Lift the handset or press SP-PHONE/MONITOR. For a PT: Press the CO assigned as the Group-CO button. For an SLT: Dial 8 and the outside (CO) line group number (1 through 6).

- The CO indicator light turns green.
- The display shows the phone number.

!! • System Programming may be required to perform this feature properly.
• During an outside call, the FLASH button can be used as a External Feature Access button.

Flash

Allows you to disconnect the current call and make another call without hanging up.

PT

While hearing any tone, dialing, or talking

Press FLASH. Enter the phone number. Dial tone

!! • 1.7 Useful Features, “External Feature Access”
• See the Installation Manual, Section 3, “Flash”.

PT • You may press the Group-CO button directly instead of going off-hook and dialing 8 and the outside (CO) line group number.

!! • System Programming may be required to perform this feature properly.
• During an outside call, the FLASH button can be used as a External Feature Access button.

!! • 1.7 Useful Features, “External Feature Access”
• See the Installation Manual, Section 3, “Flash”.

Operations 1-19
1.3 Making Calls

**Handsfree Operation**

Allows you to dial and to talk to the other party without lifting the handset.

**Switching from the handset to handsfree mode**

- **Press SP-PHONE.**
- **Hang up.**
- **Do not replace the handset without pressing the SP-PHONE button first, or the line will be disconnected.**

**Switching from handsfree to the handset mode**

- **Lift the handset.**

**Helpful hints for the Handsfree operation:**

- Use this unit in a quiet room for best performance.
- If you and the other party talk at the same time, parts of your conversation will be lost. To avoid this, talk alternately.
- The handsfree mode is canceled if you do not start dialing within 10 seconds.
- The KX-T7350/KX-T7050/KX-T7055 have MONITOR buttons instead of a SP-PHONE button. It can be used for handsfree dialing, etc., but it cannot be used for a handsfree conversation.
- You can enable the handsfree mode by pressing a CO or INTERCOM button.

See the Installation Manual, Section 3, “Handsfree Operation”.

 operations
1.3 Making Calls

Making Emergency Calls (Emergency Call)

Allows you to dial a pre-assigned emergency number after seizing an outside (CO) line. Up to 5 emergency dial numbers can be stored.

Dialing

• An emergency call is allowed even in the following cases,
  — Account Code – Verify (All, Toll) modes
  — Any toll restriction COS number
  — Electronic Station Lockout
• If your telephone is connected to a host PBX, you must dial the host PBX line access code after the line access code.

• See the Installation Manual, Section 3, “Emergency Call”.

Any Telephone

Lift the handset or press SP-PHONE/MONITOR. Dial the line access code (9, 0 or 81 through 86). Dial tone. Dial the emergency number.

• You may press a CO button instead.
1.3 Making Calls

Dialing by Simply Pressing a Button (One-Touch Dialing)

Allows you to call a number or access a system feature with the touch of a button. This is done by storing an extension number, telephone number or feature number (up to 16 digits) in a One-Touch Dialing button.

Dialing

PT

Lift the handset or press SP-PHONE/MONITOR. Press the flexible button assigned as a One-Touch Dialing button or PF button.

PT

• The destination numbers are stored in Proprietary Telephone Settings.

PT

• You may press a CO button to select a desired outside (CO) line before pressing the One-Touch Dialing button.

PT

• “Speed Dialing”, “One-Touch Dialing” and manual dialing can be used together.

PT

• You can store a number consisting of seventeen digits or more by dividing and storing it into 2 One-Touch Dialing buttons.

PT

• A pause is automatically entered after the stored line access code, 9, 0 or 81 through 86, when dialing.

PT

• To confirm the current status of the button, press the button while on-hook.

PT

• 1.2 Proprietary Telephone Settings, “Customizing the Buttons on Your Telephone”, One-Touch Dialing Button

PT

• See the Installation Manual, Section 3, “One-Touch Dialing”.

1-22 Operations
1.3 **Making Calls**

---

### Dialing with System Speed Dialing (System Speed Dialing)

Allows you to make a call using pre-programmed speed dial numbers. This system supports 100 speed dial numbers which are available to all extension users.

**PT and SLT**

- Lift the handset or press SP-PHONE/MONITOR.
- For a PT: Press AUTO DIAL/STORE.
- For an SLT: Dial \*.
- Enter a system speed dial number (00 through 99).

- **You will not hear a tone.**
- **The AUTO DIAL/STORE indicator lights.**
- **The AUTO DIAL/STORE indicator light turns off.**

---

- System Speed Dial numbers must be stored by System Programming.
- “Speed Dialing”, “One-Touch Dialing” and manual dialing can be used together.
- You may press a CO button or dial a line access code to select a desired outside (CO) line before pressing the AUTO DIAL/STORE button or dialing \*.
- It is possible to cancel toll restriction with this feature (Toll Restriction Override for System Speed Dialing). In this case, System Programming is necessary.
- A System Speed Dial number can be divided when stored.

---

**Example**

If the number is divided and stored in System Speed Dial numbers 01 and 02, Press: [AUTO DIAL/STORE] [0] [1] [AUTO DIAL/STORE] [0] [2].

---

- The dialed number appears on the display.
- A rotary telephone cannot use this feature.
- See the Installation Manual, Section 3, “Toll Restriction for System Speed Dialing”.
- See the Installation Manual, Section 3, “System Speed Dialing”.

---

Additional notes:

- **PT**
- **SLT**
- See the Installation Manual, Section 3, “Toll Restriction for System Speed Dialing”.
- See the Installation Manual, Section 3, “System Speed Dialing”.

---

Operations 1-23
1.3 Making Calls

Dialing with Personal Speed Dialing (Personal Speed Dialing)

Allows you to store up to 10 speed dial numbers at your extension. These numbers are available for your extension only.

Storing a phone number

**Any Telephone**

- Lift the handset or press SP-PHONE/MONITOR.
- Enter the personal speed dial number (0 through 9).
- Enter the desired number.
- Dial #.
- Confirmation tone
- Hang up or press SP-PHONE/MONITOR.

Dialing

**Any Telephone**

- Lift the handset or press SP-PHONE/MONITOR.
- Enter the personal speed dial number (0 through 9).

- You may dial “1*” instead of “#”.

An account code must be stored by pressing “* * *” and entering the account code after the line access code.

You can store an extension number, telephone number, or feature number of up to 16 digits. Valid digits are “0 through 9”.

A pause can be stored by pressing the * key. However, in the account code verify-all, verify-toll and forced modes, “*” is not regarded as a pause.

To store the telephone number of an external party, a line access code (9, 0 or 81 through 86) must be stored as the first digit.

The number of Personal Speed Dialing numbers corresponds to the number of PF buttons assigned as One-Touch Dialing. (PF buttons are on a proprietary telephone.) You cannot assign both the One-Touch Dialing and Personal Speed Dialing features to the same number. For example, if you assign One-Touch Dialing to the PF 1 button and then Personal Speed Dialing 0, only the Personal Speed Dialing 0 feature will be assigned.

A rotary telephone cannot use this feature.

1.2 Proprietary Telephone Settings, “Customizing the Button on Your Telephone”, One-Touch Dialing Button

See the Installation Manual, Section 3, “Personal Speed Dialing”.
1.3 Making Calls

Checking the stored personal speed dialing numbers

<table>
<thead>
<tr>

<th>Lift the handset or press SP-PHONE/MONITOR.</th>
<th>3 ✪</th>
<th>Personal speed dial no.</th>
<th>#</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Dial 3 ✪.</td>
<td>Enter the personal speed dial number (0 through 9).</td>
<td></td>
<td>Dial #.</td>
</tr>
</tbody>
</table>
1.3 Making Calls

Dialing by Simply Going Off-Hook (Pickup Dialing)

Allows you to make an outgoing call by just going off-hook (single line telephone only).

Storing a phone number

<table>
<thead>
<tr>
<th>SLT</th>
<th></th>
<th></th>
<th></th>
<th></th>
<th></th>
<th></th>
<th></th>

<td>Talk.</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

- This feature will not work if you answer an incoming call or retrieve a call on hold.
- Up to 32 digits, consisting of “0 through 9” and “*”, can be stored. The “*” button is used as a PAUSE. However, in the account code verify-all, verify-toll and forced modes, “*” is not regarded as a pause.
- An account code must be stored by pressing “* *” and entering the account code after the line access code.
- During the waiting time after going off-hook, you can call another party and override this feature. You can change the waiting time between going off-hook and connecting with a called line by System Programming.
- A rotary telephone cannot use this feature.

- See the Installation Manual, Section 3, “Pickup Dialing”.

!-26 Operations
1.3 Making Calls

Redialing Automatically (Automatic Redial)

PT users can redial the last number dialed and saved number automatically by going off-hook with the SP-PHONE/MONITOR button and pressing the corresponding button directly. Redial will be automatically repeated the pre-programmed number of times until the called party answers.

- The number of times can be changed by System Programming.
- If another operation is performed during automatic redial, this function will be canceled.
- To cancel automatic redial, press the FLASH button.
- This feature is not available for a KX-T7055.
- A flexible button can be assigned as the SAVE button.

Redialing the Last Number Dialed (Last Number Redial)

Automatically saves the last outside phone number dialed so that you can make a call to the same party later using a simple operation.

- Up to 32 digits can be stored and redialed. This does not include an outside (CO) line access code.
- If you hear a busy tone when attempting to redial, select another line and press the REDIAL button or feature number.
- “*”, “#”, “PAUSE”, and “INTERCOM” (for secret dialing) are counted as 1 digit.
- While calling or during a conversation, pressing the REDIAL button will disconnect the current call and redial the stored number.
- You can check the stored number. Press the REDIAL button while on-hook, and the stored number will be displayed.
1.3 Making Calls

- 1.3 Making Calls, “Redialing Automatically (Automatic Redial)”
- See the Installation Manual, Section 3, “Redial”.

### Redialing the Saved Number (Saved Number Redial)

Allows you to save the current external telephone number during a conversation, so that you can redial the same party later using a simple operation. The saved number can be redialed until another number is stored.

**Storing**

<table>
<thead>
<tr>
<th>PT</th>
<th>During a conversation or while hearing a busy tone</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>AUTO DIAL/STORE.</td>
</tr>
<tr>
<td></td>

</tbody>
</table>

**Dialing**

<table>
<thead>
<tr>
<th>PT</th>
<th>Lift the handset or press SP-PHONE/MONITOR.</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Press SAVE.</td>
</tr>
</tbody>
</table>

- Up to 32 digits can be stored and redialed. This does not include an outside (CO) line access code.
- “*”, “#”, “PAUSE”, and “INTERCOM” (for secret dialing) are counted as 1 digit.
- A flexible button can be assigned as the SAVE button.
- You can check the stored number. Press the SAVE button while on-hook, and the stored number will be displayed.
- You can change the outside (CO) line when dialing. You may press a CO button to select an outside (CO) line directly after going off-hook before pressing the SAVE button.

• 1.2 Proprietary Telephone Settings, “Customizing the Buttons on Your Telephone”.
• 1.3 Making Calls, “Redialing Automatically (Automatic Redial)”
• See the Installation Manual, Section 3, “Redial”.

1-28 Operations
1.3 Making Calls

Sending a Call Waiting Tone to a Busy Extension
(Busy Station Signaling – BSS)

The busy extension that you called will hear the assigned Call Waiting tone and know that you are waiting.

<table>
<thead>
<tr>
<th>Any Telephone</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>If you make an intercom call and hear a busy tone</strong></td>
</tr>
<tr>
<td>2</td>
</tr>
</tbody>
</table>

- To answer from the calling extension, see “Call Waiting” in this manual.
- If you hear a reorder tone when you set this feature, this feature cannot be operated with the called party. This feature is only available if the called extension has set the “Call Waiting” feature.

- 1.5 During a Conversation, “Call Waiting”
- See the Installation Manual, Section 3, “Busy Station Signaling (BSS)”. 
## 1.3 Making Calls

### Making Your Telephone Ring Back Automatically When a Line Becomes Free (Automatic Callback Busy – Camp-On)

Allows you to receive callback ringing when the dialed line becomes idle. When you answer the callback ringing:

- **For an extension:** The called extension starts ringing without dialing.
- **For an outside (CO) line:** The line is seized.

#### Setting

**Any Telephone**

| If you hear a busy tone | Dial 6. | Confirmation tone and reorder tone | Hang up or press SP-PHONE/MONITOR. | Wait for the Camp-On recall. |

#### Answering an intercom recall

**Any Telephone**

| If you hear the telephone ringing | Lift the handset or press SP-PHONE/MONITOR. | • You hear a ringback tone and the called extension rings automatically. |

#### Answering an outside (CO) line recall

**Any Telephone**

| If you hear the telephone ringing | Lift the handset or press SP-PHONE/MONITOR. | Dial tone. | Enter the phone number. |

#### Canceling

**Any Telephone**

| Lift the handset or press SP-PHONE/MONITOR. |

- If you do not answer before four callback ring signals (within 10 seconds), this feature will be canceled.
- See the Installation Manual, Section 3, “Automatic Callback Busy (Camp-On)”.
1.3 Making Calls

Interrupting an Existing Call (Executive Busy Override)

Executive Busy Override — Extension

Allows you to connect to an existing intercom (extension) call. System Programming is required to use this feature.

Any Telephone

If you make an intercom call and while hearing a busy tone

Dial 3. Confirmation tone (optional)

A three-party conference is now established.

To leave the conference

Any Telephone

Hang up or press SP-PHONE.

The other two parties continue their conversation.

To terminate one party and talk to the other

PT

Press the CO or INTERCOM of the party to remain connected.

Confirmation tone (optional)

• If all three parties are extensions, this operation is not available.

• This feature does not work when “Data Line Security” or “Executive Busy Override Deny” is set at either or both of the other parties.
• When a 2-party call is changed to a 3-party call or vice versa, a confirmation tone is sent to all parties. The tone can be disabled.

• 1.3 Making Calls, ‘Denying “Interrupting an Existing Call”(Executive Busy Override Deny)”
• 1.7 Useful Features, “Conference (3-party)”
• 1.7 Useful Features, “Data Line Security”
• See the Installation Manual, Section 3, “Executive Busy Override”.
1.3 Making Calls

Executive Busy Override — Outside (CO) Line

Allows you to connect to an existing outside call or add a third party to your existing conversation.
System Programming is required to use this feature.

PT

Lift the handset or press SP-PHONE/MONITOR.
Press the desired CO whose indicator is lit red.
Confirmation tone (optional)

A three-party conference is now established.

To leave the conference

PT

Hang up or press SP-PHONE/MONITOR.

The other two parties continue their conversation.

To terminate one party and talk to the other

PT

CO or INTERCOM

Press the CO or INTERCOM of the party to remain connected.

Confirmation tone (optional)

• This feature does not work when “Data Line Security” or “Executive Busy Override Deny” is set at the extension engaged in the existing outside call.

• When a 2-party call is changed to a 3-party call or vice versa, a confirmation tone is sent to all parties. Eliminating the tone is programmable.

• 1.3 Making Calls, ‘Denying “Interrupting an Existing Call”’ (Executive Busy Override Deny)
• 1.7 Useful Features, “Conference (3-party)"
• 1.7 Useful Features, “Data Line Security”
• See the Installation Manual, Section 3, “Executive Busy Override”.
1.3 Making Calls

Denying “Interrupting an Existing Call”
(Executive Busy Override Deny)

Allows you to prevent other extension users from interrupting your conversation.

Setting / Canceling

Any Telephone

Lift the handset or press SP-PHONE/MONITOR.

To set: Dial 7330#
To cancel: Dial 7331#

Confirmation tone
Hang up or press SP-PHONE/MONITOR.

• Single line telephone users can dial “0” instead of “#”.

• 1.3 Making Calls. “Interrupting an Existing Call (Executive Busy Override)”, Executive Busy Override — Extension
• 1.3 Making Calls. “Interrupting an Existing Call (Executive Busy Override)”, Executive Busy Override — Outside (CO) Line
• See the Installation Manual, Section 3, “Executive Busy Override”.
1.4 Receiving Calls

Receiving Calls

PT and SLT

Lift the handset or press SP-PHONE.

PT

CO or INTERCOM

Press a rapid flashing CO or INTERCOM.

• The CO or INTERCOM indicator light turns steady green.

!!

• There are 3 types of Line Preference for incoming outside calls (— No Line/Prime Outside (CO) Line/Ringing Line). Each preference can be selected by Proprietary Telephone Settings.

• When receiving an incoming call, you may press the CO or INTERCOM button which is rapidly flashing red and talk (Handsfree mode).

• Helpful hints for the handsfree operation are noted in the “Handsfree Operation” feature.

• 1.2 Proprietary Telephone Settings, “Customizing Your Telephone Functions”, Preferred Line Assignment — Incoming

• 1.3 Making Calls, “Handsfree Operation”

• See the Installation Manual, Section 3, “Receiving Calls”.

!PT
1.4 Receiving Calls

**Handsfree Answerback**

Allows you to answer an intercom call without lifting the handset.

**Setting**

Press AUTO ANSWER/MUTE. When the AUTO ANSWER/MUTE indicator is off

- The AUTO ANSWER/MUTE indicator turns on.

**Canceling**

Press AUTO ANSWER/MUTE. When the AUTO ANSWER/MUTE indicator is on

- The AUTO ANSWER/MUTE indicator light turns off.

- This feature does not work for incoming outside calls or doorphone calls.
- When an outside call is transferred to your extension, this feature is overridden and a ring tone is heard.

- 1.2 Proprietary Telephone Settings, “Customizing Your Telephone Functions”, Intercom Alert Assignment
- 1.7 Useful Features, “Room Monitor”
- See the Installation Manual, Section 3, “Handsfree Answerback”.

---

Operations 1-35
1.4 Receiving Calls

Picking up a Call Ringing at Another Extension (Call Pickup)

Directed Call Pickup

Allows you to answer an incoming call ringing at any other extension.

Any telephone

+ Doorphone calls can be picked up from extensions that are not programmed to answer doorphone calls.
+ You can hear a confirmation tone when the call is picked up. The tone can be disabled.
+ If a ringing extension sets the Call Pickup Deny feature, you will hear a reorder tone.

! 1.4 Receiving Calls, “Picking up a Call Ringing at Another Extension (Call Pickup)”, Denying/allowing your call to be picked up (Call Pickup Deny)

Group Call Pickup

Allows you to answer a call that is ringing at another telephone within your extension group.

Any telephone

• You can pick up an incoming outside, intercom or doorphone call, but you cannot pickup a Camp-On recall and hold recall.
• You can hear a confirmation tone when the call is picked up. The tone can be disabled.
• If a ringing extension sets the Call Pickup Deny feature, you will hear a reorder tone.

! 1.4 Receiving Calls, “Picking up a Call Ringing at Another Extension (Call Pickup)”, Denying/allowing your call to be picked up (Call Pickup Deny)

• See the Installation Manual, Section 3, “Extension Group”.

• See the Installation Manual, Section 3, “Call Pickup”.

1-36  Operations
1.4 Receiving Calls

Call Retrieving from a TAM (Telephone Answering Machine)

Allows you to answer an incoming call received by a TAM. System Programming is required to use this feature.

- When you try to pick up a call and hear a reorder tone, the TAM is not answering the call or the dialed extension is not the TAM extension.
- A TAM number is the 3-digit extension number of the TAM.

Denying/allowing your call to be picked up (Call Pickup Deny)

Allows you to prevent another extension from picking up your calls with the “Call Pickup” feature.

Setting / Canceling

- Single line telephone users can dial “0” instead of “#”.

1.4 Receiving Calls, “Picking up a Call Ringing at Another Extension (Call Pickup)”, Directed Call Pickup
1.4 Receiving Calls, “Picking up a Call Ringing at Another Extension (Call Pickup)”, Group Call Pickup
See the Installation Manual, Section 3, “Call Pickup”.

</tr>
<tr>
<td>Press the CO or INTERCOM which is flashing green slowly.</td>
<td>Flash the hookswitch.</td>
</tr>
<tr>
<td>• The CO or INTERCOM indicator light turns steady green.</td>
<td>• If the handset is replaced, just off-hook to retrieve the call.</td>
</tr>
</tbody>
</table>

- To retrieve a call on hold at another extension, refer to “Retrieving a Call on Hold (Call Hold Retrieve)”.
- If a held call is not retrieved within a pre-determined time (default: 30 sec.), ringing or an alarm tone will be heard (Hold Alarm/Hold Recall). If the hold recall time is set to “Disable”, it will not be recalled.
- If a held outside call is not answered within 30 minutes, it will be automatically disconnected.
- When going off-hook:
  — Before recalling: A dial tone will be heard while the call is on hold. You may dial another telephone number.
  — While recalling: Only the first call on hold will be released and enter the conversation mode.
- You cannot hold a doorphone call.
1.5  **During a Conversation**

- During a 5-party conference, you cannot use this feature.
- With outside calls, you can put multiple calls on hold. However, with intercom calls, you can put only one call on hold.
- If a call is placed on hold for more than the programmed time, ringing or an alarm tone will be heard (Hold Alarm/Hold Recall) and the LCD will flash the following display.
  
  Example:
  
  — When holding extension 111, Mr. Brown: “111: Brown” will flash.
  — When holding outside (CO) line, CO 1: “Call on CO 1” will flash.

- If “Hold-2” or “Hold-3” is assigned by System Programming, you must dial “20” after flashing the hookswitch.
- Only an outside or intercom call can be placed on hold at one time. If you want to hold both calls, use the Call Park feature.

- 1.5 During a Conversation, “Retrieving a Call on Hold (Call Hold Retrieve)”
- 1.5 During a Conversation, “Placing a Call in System Parking Area (Call Park)”
- 1.7 Useful Features, “Conference (5-party)”
- See the Installation Manual, Section 3, “Hold”.

**Placing a Call on Hold Exclusively (Exclusive Hold)**

Prevents other extension users from retrieving your held call. Only the user who held the call can retrieve it.

**Placing a call on exclusive hold**

**PT**

**During a conversation**

- The CO or INTERCOM indicator light flashes green moderately.
- The current call is placed on exclusive hold.

Press HOLD. Press HOLD again.

- The CO or INTERCOM indicator light flashes green slowly.
- The current call is placed on hold.

**Retrieving a call on exclusive hold**

**PT**

- The CO or INTERCOM indicator light turns steady green.
- The held call is released.

Press the CO or INTERCOM which is on exclusive hold.
1.5 **During a Conversation**

- During a 5-party conference, you cannot use this feature.
- If a held call is not retrieved within a pre-determined time (default: 30 sec.), ringing will be heard (Hold Recall).
- If an outside call is placed on hold and not retrieved within 30 minutes, it will be automatically disconnected.
- With outside calls, you can put multiple calls on exclusive hold. However, with intercom calls, you can put only one call on exclusive hold.

- 1.5 During a Conversation, “Placing a Call on Hold (Call Hold)”
- 1.7 Useful Features, “Conference (5-party)”
- See the Installation Manual, Section 3, “Hold”.

### Retriving a Call on Hold (Call Hold Retrieve)

Allows you to retrieve a call that has been placed on hold by another extension.

- “Call Park” and “Exclusive Hold” cannot be retrieved by this feature.
- You can hear a confirmation tone when the call is retrieved by entering the feature number.

- 1.5 During a Conversation, “Placing a Call on Hold (Call Hold)”
- See the Installation Manual, Section 3, “Hold”.

1-40 *Operations*
1.5 **During a Conversation**

### Placing a Call in System Parking Area (Call Park)

Allows you to place a held call into a system parking area. You can release from the parked call to perform other operations. The parked call can be retrieved by any extension user. Up to 10 calls can be parked.

#### PT and SLT

**During a conversation**

- **For a PT:** Press HOLD.
- **For an SLT:** Flash the hookswitch.

Dial `22`.

**Confirmation tone**

and dial tone

Enter a parking zone number (0 through 9).

**Parking zone no.**

- **If you hear a busy tone,** it indicates the specified parking zone is unavailable.
- **You do not need to redial the feature number to change the parking zone.** Just enter the parking zone number while hearing the busy tone.

**Retrieving a parked call**

- **Lift the handset or press SP-PHONE/MONITOR.**
- **Dial `52`**
- **Enter a parking zone number (0 through 9) where the call is parked.**

**Confirmation tone**

and dial tone

**You can talk to the party.**

- **If there is no held call,** you will hear a reorder tone.

---

- **If a parked call is not retrieved within a pre-determined time (default: 30 seconds), ringing will be heard (Hold Recall).**
- **If a parked call is not retrieved within 30 minutes, it will be automatically disconnected.**
- **This feature is useful when you want to hold more than one intercom call with a PT, or more than one intercom or outside call with an SLT.**
- **During a 5-party conference, you cannot use this feature.**

- **1.7 Useful Features, “Conference (5-party)”**
- **See the Installation Manual, Section 3, “Call Park”**
1.5  During a Conversation

Transferring a Call to an Extension (Call Transfer – to Extension)

Allows you to transfer a received call to another extension. There are 2 ways.  
**Screened Call Transfer:** The destination confirms the transfer before sending.  
**Unscreened Call Transfer:** The line is released after transferring the call without confirmation.

### Screened Call Transfer

#### PT and SLT

- **During a conversation**
  - For a PT: Press TRANSFER.
  - For an SLT: Flash the hookswitch.
  - Enter the destination extension number (100 through 199).
  - Wait for an answer.
  - Ring tone and dial tone

- **Confirmation**
  - The other party is placed on hold.

- **Hang up or press SP-PHONE.**

#### Unscreened Call Transfer

#### PT and SLT

- **During a conversation**
  - For a PT: Press TRANSFER.
  - For an SLT: Flash the hookswitch.
  - Enter the destination extension number (100 through 199).
  - Hang up or press SP-PHONE/MONITOR.

- **Confirmation**
  - The other party is placed on hold.

- **Ring back tone**
  - Ringing starts at the destination extension.
1.5 During a Conversation

**Call Transfer using a DSS button**

Allows you to perform a Screened or Unscreened Call Transfer by using a DSS button. There are 2 operations, depending on whether or not One-Touch Transfer* is set.

* One-Touch Transfer allows you to hold an outside call and transfer it to an extension by pressing one key. This feature provides automatic hold and transfer, without pressing the TRANSFER button. System Programming is required to use this function.

**“With Transfer” mode**

During a conversation

- Press the flexible button assigned as the DSS button.
- The other party is placed on hold and the destination extension is called immediately.

**“Without Transfer” mode**

During a conversation

- Press TRANSFER.
- Press the flexible button assigned as the DSS button.

- If the destination extension does not answer the call within a pre-determined time (default: 30 sec.), the call will return to you (Transfer Recall).
- If there is no answer within 30 minutes after “Transfer Recall” starts, the line will be disconnected.
- When the dialed extension is busy, you may access the extension by dialing “2” (Busy Station Signaling) or “3” (Executive Busy Override) and going on-hook.
- If you want to return to the held call, press the TRANSFER button or corresponding CO or INTERCOM button before the destination extension answers.
- A flexible CO button can be assigned as a DSS button.
- To use “One-Touch Transfer”, System Programming is required.
- During a 5-party conference, you cannot transfer a call.
- If you want to return to the held call, flash the hookswitch before the destination extension answers.
- If “Hold-3” is assigned in System Programming, you must dial “20” after flashing the hookswitch.

- 1.2 Proprietary Telephone Settings, “Customizing the Buttons on Your Telephone”, DSS (Direct Station Selection) Button
- See the Installation Manual, Section 3, “Call Transfer – to Extension”.
1.5 During a Conversation

Transferring a Call to an Outside (CO) Line
(Call Transfer – to Outside (CO) Line)

Allows you to transfer a received call to an external party. System Programming is required to execute this feature.

Press TRANSFER. Enter the phone number where calls will be transferred.

During a conversation

Press TRANSFER. Confirmation tone and dial tone
Press a CO or enter a line access code (9, 0 or 81 through 86).

CO
line access code

Enter the phone number where calls will be transferred.

phone no.

Wait for an answer. Announce. Hang up or press SP-PHONE.

• The call is transferred.

• The current call is placed on hold.

!!

PT

• If a CPC or reverse signal is sent to an outside (CO) line before the assigned time limit, a call between two external parties will be disconnected.

PT

• If a call between two external parties is established, an alarm tone is sent to both parties 15 seconds before the assigned time limit (default: 10 min.). “Hold Recall” is sent to the transferring extension 50 seconds before time out.

PT

• If you want to return to the held call, press the TRANSFER button or corresponding CO or INTERCOM button before the destination party answers.

PT

• If you want to join the conversation after transferring the call, press the corresponding CO button. A conference call is established.

PT

• To change the party where the call is transferred before hanging-up, press the CO button whose indicator is flashing slowly to retrieve the call, then repeat the Call Transfer procedure.

• See the Installation Manual, Section 3, “Call Transfer – to Outside (CO) Line”.

Operations
1.5 During a Conversation

**Call Waiting**

During a conversation, a Call Waiting tone informs you that there is a call waiting. You can answer the second call by disconnecting the first call or placing it on hold.

**Setting / Canceling for outside calls**

**Any Telephone**

Lift the handset or press SP-PHONE/MONITOR.  To set: Dial 7311#. To cancel: Dial 7310#.

- Confirmation tone and dial tone
- Hang up or press SP-PHONE/MONITOR.

• Single line telephone users can dial “0” instead of “#”.

**Setting / Canceling for intercom calls**

**Any Telephone**

Lift the handset or press SP-PHONE/MONITOR.  To set: Dial 7321#. To cancel: Dial 7320#.

- Confirmation tone and dial tone
- Hang up or press SP-PHONE/MONITOR.

• Single line telephone users can dial “0” instead of “#”.

**To talk to the new caller by terminating the current call**

**PT**

While hearing a Call Waiting tone

Press the flashing CO or INTERCOM.

Hang up. Talk to the new caller.

• The current call is disconnected.

**SLT**

While hearing a Call Waiting tone

Lift the handset. Talk to the new caller.

• The current call is disconnected.
1.5 During a Conversation

To talk to the new party by holding the current call

<table>
<thead>
<tr>
<th>PT</th>
<th>SLT</th>
</tr>
</thead>
<tbody>
<tr>
<td>While hearing the Call Waiting tone and the CO or INTERCOM indicator is flashing rapidly</td>
<td></td>
</tr>
<tr>
<td>Press HOLD.</td>
<td>Press the flashing CO or INTERCOM.</td>
</tr>
<tr>
<td>Talk to the new caller.</td>
<td></td>
</tr>
<tr>
<td>• The current call is placed on hold.</td>
<td>• The current call is placed on hold.</td>
</tr>
</tbody>
</table>

— If both the current call and new call are extension calls, you do not have to press the INTERCOM button.

- The default is “OFF”.
- When Call Waiting is enabled, a Call Waiting tone is sent to the user under the following conditions.
  1) When an outside call (except a doorphone call) is received, or
  2) When another extension executes the “Busy Station Signaling (BSS)” feature.
- Setting “Data Line Security” temporarily cancels this feature.
- You can change the desired Call Waiting tone (Tone 1 or Tone 2).
- If a Call Waiting tone is heard and the CO or INTERCOM indicator does not flash, this tone indicates Call Waiting from the Central Office. In this case, see “External Feature Access”.
- If “Hold-2” or “Hold-3” is assigned in System Programming, you must dial “20” after flashing the hookswitch.
- You cannot transfer the new call while holding the current call. If you want to do so, first park call the original call using the Call Park feature; then hang up; then take the new call.

- 1.2 Proprietary Telephone Settings, “Customizing Your Telephone Functions”, Call Waiting Tone Selection

- 1.7 Useful Features, “External Feature Access”
- See the Installation Manual, Section 3, “Call Waiting”.

1-46 Operations
1.5 During a Conversation

**Call Splitting**

Allows you to talk to two different parties alternately. If a call is received while you are already on the line, you can place the current call on hold and have a conversation with the other party.

**Having a conversation while another call is on (exclusive) hold**

### PT

**Between one extension and one outside line**

- Press HOLD.
- Press CO or INTERCOM.

- Repeating these operations (steps 1 and 2) alternates between the callers.

**Between two outside lines**

- Press HOLD.
- Press CO.

- Repeating these operations (steps 1 and 2) alternates between the callers.

**Between two extensions**

- Press HOLD.

- Pressing the HOLD button alternates between the callers.

### SLT

Flash the hookswitch.

- The first held call is released.
- Flashing this switch alternates between the callers.

- This feature does not work during a doorphone call or paging.
- During a 5-party conference, you cannot use this feature.

- 1.5 During a Conversation, “Placing a Call on Hold (Call Hold)”
- 1.5 During a Conversation, “Placing a Call on Hold Exclusively (Exclusive Hold)”
- See the Installation Manual, Section 3, “Call Splitting”.
1.5 **During a Conversation**

**Paging**

Allows you to make a voice announcement to several people at the same time. Your message is announced over built-in speakers of proprietary telephones and/or the external pager. The paged person can answer your page from any telephone. You can also transfer a call after paging or denying to be paged.

**All extensions**

Allows you to make a voice announcement to all extensions.

<table>
<thead>
<tr>
<th>Any Telephone</th>
</tr>
</thead>
<tbody>
<tr>
<td>Lift the handset or press SP-PHONE/MONITOR.</td>
</tr>
<tr>
<td>Dial 30.</td>
</tr>
<tr>
<td>Confirmation tone</td>
</tr>
<tr>
<td>Announce.</td>
</tr>
<tr>
<td>Wait for an answer.</td>
</tr>
<tr>
<td>Talk.</td>
</tr>
</tbody>
</table>

**Group**

Allows you to select an extension group and make a voice announcement. The announcement can only be heard through the extensions’ built-in speakers.

<table>
<thead>
<tr>
<th>Any Telephone</th>
</tr>
</thead>
<tbody>
<tr>
<td>Lift the handset or press SP-PHONE/MONITOR.</td>
</tr>
<tr>
<td>Dial 33.</td>
</tr>
<tr>
<td>Dial the group number (1 through 8).</td>
</tr>
<tr>
<td>Confirmation tone</td>
</tr>
<tr>
<td>Announce.</td>
</tr>
<tr>
<td>Wait for an answer.</td>
</tr>
<tr>
<td>Talk.</td>
</tr>
</tbody>
</table>

**External**

Allows you to make a voice announcement over the external pager.

<table>
<thead>
<tr>
<th>Any Telephone</th>
</tr>
</thead>
<tbody>
<tr>
<td>Lift the handset or press SP-PHONE/MONITOR.</td>
</tr>
<tr>
<td>Dial 34.</td>
</tr>
<tr>

</tr>
</tbody>
</table>
1.5 During a Conversation

All extensions & External

Allows you to make a voice announcement to all extensions. Your message is announced over the built-in speakers of proprietary telephones (PT) and the external pager.

Any Telephone

- Lift the handset or press SP-PHONE/MONITOR.
- Dial 33.
- Confirmation tone
- Announce.
- Wait for an answer.
- Talk.

- You may dial “339” instead of “33×”.

- If the pager is in use, a busy tone will be heard.
- The paged extension users hear a confirmation tone before the voice announcement.
- You can hear a confirmation tone from the external pager (External Pager Confirmation Tone) at the paged side before the voice announcement. The tone can be disabled.
- You can hear a confirmation tone before making the voice announcement.
- More than one person cannot use the paging feature at the same time.
- You cannot page extensions which have set the DND or Paging-Deny feature, or which are in use.

- If an outside call has been paged and transferred, you can answer the call by pressing the corresponding CO button whose indicator is flashing slowly.

Answering a Page

Allows you to answer an announced page at any extension within the system.

Any Telephone

- Lift the handset or press SP-PHONE/MONITOR.
- Dial 43.
- Confirmation tone
- Talk.

- You can hear a confirmation tone when the page is answered.
- If an outside call has been paged and transferred, you can answer the call by pressing the corresponding CO button whose indicator is flashing slowly.

• 1.7 Useful Features, “Rejecting Incoming Calls (Do Not Disturb — DND)”
• See the Installation Manual, Section 3, “Paging”.

Operations 1-49
1.5 During a Conversation

Transferring after paging (Paging and Transfer)

You can transfer a call using the paging function (All Extensions, Group, External, or All Extensions & External).

**PT and SLT**

**During a conversation**

- **For a PT:** Press TRANSFER.
- **For an SLT:** Flash the hookswitch.

Dial tone

- Confirmation tone
- Wait for an answer. Announce.

• The other party is placed on hold.

For all extensions: Dial 330.
For an extension group: Dial 331 through 338.
For external: Dial 34
For all extensions & external: Dial 33 or 339.

• You may dial “339” instead of “33*”.

Hang up or press SP-PHONE/MONITOR.

• The held party and the paged extension are connected and can start a conversation.

- If the external paging access tone is set to “Disable”, a confirmation tone from the external paging equipment will not be heard after accessing external paging. Refer to System Programming, “External Paging Access Tone”.

- **SLT** • If “Hold-3” is assigned in System Programming, you must dial “20” after flashing the hookswitch.
1.5  During a Conversation

Paging Deny

A page sent to a built-in speaker can be denied by any extension in the system.

Setting / Canceling

<table>
<thead>
<tr>
<th>PT</th>
<th>Lift the handset or press SP-PHONE/MONITOR.</th>
<th>To set: Dial 7341#. To cancel: Dial 7340#.</th>
<th>Hang up or press SP-PHONE/MONITOR.</th>
</tr>
</thead>
<tbody>
<tr>
<td>7 3 4 0</td>
<td>To set.</td>
<td>To cancel.</td>
<td>7 3 4 1</td>
</tr>
</tbody>
</table>

Turning off the Microphone (Microphone Mute)

Allows you to turn off the microphone so you can consult privately with others in the room. You will still be able to hear the other party.

Setting

During a conversation in the handsfree mode

- The AUTO ANSWER/MUTE indicator light flashes red slowly.

Press AUTO ANSWER/MUTE.

Canceling

When microphone mute is established

- The AUTO ANSWER/MUTE indicator light turns off.

Press AUTO ANSWER/MUTE.

• This feature is only available during a handsfree conversation.

• See the Installation Manual, Section 3, “Microphone Mute”. 

Operations 1-51
1.6 Before Leaving Your Desk

Forwarding a Call (Call Forwarding)

Automatically transfers incoming calls to another extension or to an external destination. The following types are available.

<table>
<thead>
<tr>
<th>Type</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>All Calls</td>
<td>All incoming calls are forwarded to another extension.</td>
</tr>
<tr>
<td>Busy or No Answer</td>
<td>All incoming calls are forwarded to another extension when you do not answer or when your extension is busy.</td>
</tr>
<tr>
<td>To Outside (CO) Line</td>
<td>All incoming calls are forwarded to an outside (CO) line.</td>
</tr>
<tr>
<td>Follow Me</td>
<td>Allows you to set “Call Forwarding — All Calls” feature from another extension.</td>
</tr>
</tbody>
</table>

**Note:** You can also set Voice Mail as the forwarding destination. Refer to “Voice Mail Integration” in this manual.

- To cancel the Call Forwarding features, refer to “Cancel” in this feature.
- Call Forwarding can only be extended to one target telephone. For example, extension A is forwarded to extension B, and if extension B tries to set Call Forwarding to extension C, an alarm tone is heard and the setting is rejected.
- If extension B has already set Call Forwarding to extension C, and extension A tries to set Call Forwarding to extension B, the setting will be also rejected.

• If the destination extension has already set “Do Not Disturb”, you cannot forward any calls to the extension.
• There should be at least one extension that can receive calls in the same UCD group.
• When a UCD extension which sets “Call Forwarding” function receives a call, the call will not be forwarded and the system will search for an idle extension in the UCD group first. But if the UCD extension is the last one that can receive the call, it will be forwarded to the assigned extension by “Call Forwarding”.
• Setting a new “Call Forwarding” function (All Calls, Busy or No Answer, etc.) cancels any other “Call Forwarding” functions or the “Do Not Disturb (DND)” function.
• If your entry is valid, confirmation tone 1 (1 beep) is sent. If your entry is the same as previously programmed data, confirmation tone 2 (2 beeps) is sent. Refer to the “Tone List” in the Appendix (Section 2).
• You can call the original extension from the Call Forwarding destination extension (for example, Boss Secretary).
• Camp-On recall and Hold recall are not forwarded.
1.6 Before Leaving Your Desk

- A flexible CO button on a proprietary telephone which is not provided with FWD/DND button can be assigned as the FWD/DND button.
- The lighting patterns of the FWD/DND button are as follows.
  - Off: Both functions are not set.
  - Red: DND mode
  - Flashing red slowly: FWD mode
- You can check the assignment by pressing the FWD/DND button while on-hook.

- 1.2 Proprietary Telephone Settings, “Customizing the Buttons on Your Telephone”, FWD/DND Button
- 1.7 Useful Features, “ Rejecting Incoming Calls (Do Not Disturb — DND)”
- 1.7 Useful Features, “Voice Mail Integration”
- See the Installation Manual, Section 3, “Call Forwarding”.

All Calls

You can re-direct all of your calls to another extension.

Setting

<table>
<thead>
<tr>
<th>PT and SLT</th>
</tr>
</thead>
<tbody>
<tr>
<td>Lift the handset or press the SP-PHONE/MONITOR button.</td>
</tr>
<tr>
<td>For a PT: Press FWD/DND. For an SLT: Dial 71.</td>
</tr>
<tr>
<td>Dial 1. Enter the destination extension number (100 through 199).</td>
</tr>
<tr>
<td>Dial #. Confirmation tone and dial tone</td>
</tr>
<tr>
<td>Hang up or press the SP-PHONE/MONITOR button.</td>
</tr>
</tbody>
</table>

- You may press the flexible button assigned as the FWD/DND button instead.
- The FWD/DND indicator light flashes red slowly.
- Single line telephone users can dial “0” instead of “#”. 

Operations 1-53
1.6 Before Leaving Your Desk

Busy or No Answer

You can forward your calls to another extension when your extension is busy or if you do not answer the call within a pre-determined time.

Setting

**PT and SLT**

- Lift the handset or press the SP-PHONE/MONITOR button.
- For a PT: Press FWD/DND. For an SLT: Dial 71.
- Dial 2. Enter the destination extension number (100 through 199).
- Dial #.
- Dial 7 for an SLT. Dial 1 for a PT.
- Lift the handset or press the SP-PHONE/MONITOR button.

• You may press the flexible button assigned as the FWD/DND button instead.

• The FWD/DND indicator light flashes red slowly.
• Single line telephone users can dial “0” instead of “#”.

PT • “Voice Call” and “Handsfree Answerback” do not work when Call Forwarding — Busy or No Answer is set.

SLT • 1.2 Proprietary Telephone Settings, “Customizing Your Telephone Functions”, Intercom Alert Assignment

To Outside (CO) Line

You can forward calls to an external party.
System Programming is required to execute this feature.

Setting

**PT and SLT**

- Lift the handset or press SP-PHONE/MONITOR.
- For a PT: Press FWD/DND. For an SLT: Dial 71.
- Dial 3. Enter the line access code (9, 0 or 81 through 86).
- Enter the phone number.
- Dial #.
- Dial 3 for an SLT. Dial 1 for a PT.
- Lift the handset or press SP-PHONE/MONITOR.

• The FWD/DND indicator light flashes red slowly.
1.6 Before Leaving Your Desk

- If an incoming outside call is forwarded to an outside (CO) line, the “Outside-to-Outside (CO-to-CO) Line Call Duration Time” is applied to the call and the line will be disconnected when it expires (default: 10 min.). An alarm tone is sent to both parties 15 seconds before the assigned duration time limit.
- Up to 32 digits (including the line access code) can be programmed.
- If a CPC or reverse signal is sent to an outside (CO) line before the assigned duration time limit, a call between two external parties will be disconnected.
- This feature cannot be used for incoming outside calls from lines assigned as “Normal”, by System Programming.
- In the account code verify-all, verify-toll and forced modes, an account code must be stored by pressing “∗∗” and entering the account code after the line access code (“∗” is not regarded as a pause).

Follow Me

You can set the “Call Forwarding” feature from the destination extension. This is useful if you forget to set “Call Forwarding — All Calls” before you leave your desk.

Setting

**PT and SLT**

**At the destination extension**

- Lift the handset or press the SP-PHONE/MONITOR button.
- For a PT: Press FWD/DND.
- For an SLT: Dial 71.
- Enter your extension number (100 through 199).
- Dial #.
- For a PT: Press FWD/DND.
- For an SLT: Dial 71.
- Dial 5.
- Confirmation tone and dial tone
- Hang up or press the SP-PHONE/MONITOR button.

- You may press the flexible button assigned as the FWD/DND button instead.
- The FWD/DND indicator light flashes red slowly.
- Single line telephone users can dial “0” instead of “#”.

**Operations**

1-55
1.6 Before Leaving Your Desk

Cancel

There are two canceling methods for “Call Forwarding”. The canceling depends on the Call Forwarding type that has been assigned.

Canceling Call Forwarding at your (original) extension

For a PT: Press FWD/DND.
For an SLT: Dial 71.
Dial 0. Dial #.
Lift the handset or press SP-PHONE/MONITOR.
Hang up or press SP-PHONE/MONITOR.

- You may press the flexible button assigned as the FWD/DND button instead.
- The FWD/DND indicator light turns off.
- Single line telephone users can dial “0” instead of “#”.

Canceling Call Forwarding at the destination extension — “Follow Me (All Calls)” only

For a PT: Press FWD/DND.
For an SLT: Dial 71.
Dial 8. Enter your extension number.
Dial #. Confirmation tone and dial tone
Lift the handset or press SP-PHONE/MONITOR.
Hang up or press SP-PHONE/MONITOR.

- You may press the flexible button assigned as the FWD/DND button instead.
- The FWD/DND indicator light turns off at your extension.
- Single line telephone users can dial “0” instead of “#”.

• You may press the flexible button assigned as the FWD/DND button instead.
• Single line telephone users can dial “0” instead of “#”.

Canceling Call Forwarding at the destination extension — “Follow Me (All Calls)” only
1.6 Before Leaving Your Desk

Locking Your Telephone (Electronic Station Lockout)

Allows you to lock your extension so that other users cannot make outside calls from your extension.

**Locking**

**Any Telephone**

- Lift the handset or press SP-PHONE/MONITOR.
- Dial 77.
- Enter a 4-digit lock code (0000 through 9999) twice.
- Dial #.
- Confirmation tone and dial tone
- Hang up or press SP-PHONE/MONITOR.

• Single line telephone users can dial “0” instead of “#”.

**Unlocking**

**Any Telephone**

- Lift the handset or press SP-PHONE/MONITOR.
- Dial 77.
- Enter the same lock code you used to lock the extension.
- Dial #.
- Confirmation tone and dial tone
- Hang up or press SP-PHONE/MONITOR.

• Single line telephone users can dial “0” instead of “#”.

- If another user tries to access an outside (CO) line from a locked extension, the user will hear a reorder tone and for PT users “Restricted” is shown on the display. However, calls can be made at a locked extension depending on system programming. System programming determines which COS number applies to calls at the locked extension.
- An extension assigned as an operator or manager can cancel this function for all extensions (Electronic Station Lockout — CANCEL ALL).
- “Remote Station Lock Control” overrides this feature. If the operator or manager sets Remote Station Lock on the extension you have already locked, you cannot unlock it.
- The lock code must be 4 digits except for the “#” and “ ” buttons.
- You can make intercom calls and receive intercom or outside calls at a locked extension.
- You can make outside calls depending on the toll restriction class.

**important**

Operations
1.7 Useful Features

Conference (3-party)

During a 2-party conversation, you can add a third party to make a 3-party conference. The maximum number of extensions and outside (CO) lines in a conference can be changed by System Programming.

Establishing a conference

**PT**

**During a 2-party conversation**

- Press CONF.
- Enter the phone number of the third party.
- Talk to the third party.
- Press CONF.

A 3-party conference is now established.

- The CONF indicator light turns steady red.
- The corresponding CO or INTERCOM indicator light turns green.

- You must dial the line access code (9, 0 or 81 through 86) as the first digit when calling an external party.

- The current party is placed on hold.
- The CONF indicator light flashes red slowly.

**SLT**

**During a 2-party conversation**

- Flash the hookswitch.
- Enter the phone number of the third party.
- Talk to the third party.
- Flash the hookswitch.
- Dial 3.

A 3-party conference is now established.

- You must dial the line access code (9, 0 or 81 through 86) as the first digit when calling an external party.

- The other party is placed on hold.
1.7 Useful Features

To leave the conference

Any telephone

Hang up or press SP-PHONE.

• The other two parties may continue their conversation.
• If the other two parties are both outside (CO) lines, they will be disconnected.

To talk to the original party while holding the third party

SLT

Flash the hookswitch.
Confirmation tone (optional)
Talk to the original party.

To terminate one party and talk to the other

PT

Press the CO or INTERCOM of the party to remain connected.
Confirmation tone (optional)
Talk.

• A conversation with the desired party is established and the other party is disconnected.

• A conference call can also be established by “Executive Busy Override”.
• When a 2-party call is changed to a 3-party call or vice versa, a confirmation tone is sent to all parties. The tone can be disabled.
• Pressing a CO button which is not in the conference allows you to exit from the conference, leaving the other two parties connected unless they are both outside (CO) lines. If the other parties are both outside (CO) lines, they will be disconnected.
• If the third party does not answer, press the CO button or INTERCOM button to return to the second party.
• To change a 3-party conference to a 5-party conference, refer to “Conference (5-party)”.
• You can return to the original party before the third party answers by flashing the hookswitch.
• If “Hold-2” or “Hold-3” is assigned in System Programming, you must dial “20” after flashing the hookswitch.
1.7 Useful Features

- 1.2 Proprietary Telephone Settings, “Customizing the Buttons on Your Telephone”, CONF (Conference) Button
- 1.3 Making Calls, “Interrupting an Existing Call (Executive Busy Override)”, Executive Busy Override — Extension
- 1.3 Making Calls, “Interrupting an Existing Call (Executive Busy Override)” Executive Busy Override — Outside (CO) Line”
- 1.7 Useful Features, “Conference, Unattended”
- See the Installation Manual, Section 3, “Conference (3-party)”.

Conference, Unattended

When you are in a conference with two outside parties, you can leave the conference call allowing the other two parties to continue their conversation.

To establish an Unattended Conference

During a conversation with two outside parties

Press CONF to leave the conference.

- An outside-to-outside (CO-to-CO) line call between the other two parties is established.

To return to the conference

Press the CO flashing green moderately.

- System programming is required to execute this feature.
- During a 5-party conference, you cannot use this feature.
- When an Unattended Conference is established, an alarm tone is sent to both outside parties 15 seconds before the assigned time limit (default: 10 min.). “Hold Recall” is activated at the extension that leaves the conference 50 seconds before the time out. The call is disconnected when the time out expires unless the extension returns to the conference.
- For example, if you are on-hook and hear “Hold Recall” during the Unattended Conference mode, the display will show “CO 2 & CO 3” for 50 seconds before the time out.

- 1.7 Useful Features, “Conference (3-party)”
- See the Installation Manual, Section 3, “Conference (3-party)”.

Operations 1-61
1.7 Useful Features

Conference (5-party)

Allows you to establish a 5-party conference. The members of a conference may be up to 5 extensions, or 3 extensions and 2 outside (CO) lines.

Establishing a conference

1. Lift the handset or press SP-PHONE/MONITOR.
2. Dial 22×.
3. Enter the phone number of the first party.
4. Talk to the first party.
5. Press CONF.
6. Enter the phone number of the next party.
7. Talk.
8. Press CONF.
9. Repeat these steps.
10. A 5-party conference is now established.

- The CONF indicator flashes red slowly.
- The current call is placed on hold in the parking zone automatically.
- The CONF indicator turns on red.
- The current call is placed on hold in the parking zone automatically.
1.7 Useful Features

To change to a 5-party conference during a 3-party conference

**During a 3-party conversation**

- Press HOLD.
- Dial 22×.
- Enter the phone number of the fourth party.
- Talk.
- Press CONF.

- The current call is placed on hold in the parking zone automatically.

- The other two parties are placed on hold.

- Press CONF.
- Enter the phone number of the fifth party.
- Talk.
- Press CONF.

- The CONF indicator light turns red.

- The current call is placed on hold in the parking zone automatically.

A 5-party conference is now established.
1.7 Useful Features

- System programming is required to execute this feature.
- Up to 2 outside (CO) lines can join a conference.
- When a 5-party conference is changed to a 4-party conference, a confirmation tone is sent to all parties. The tone can be disabled.
- A 3-party conference between 3 extensions cannot be changed to a 5-party conference. (The HOLD button cannot be used.)
- When a 5-party conference is established, a confirmation tone is sent to all parties. The tone can be disabled.
- More than one 5-party conference cannot be established at the same time.
- The Unattended Conference and Executive Busy Override features are not available during a 5-party conference.
- During a 5-party conference, the Call Park feature cannot be used by another extension.
- If parked calls are not retrieved within 5 minutes during a 5-party conference, ringing or an alarm tone will be heard (Call Park Recall).
- When the extension who started the 5-party conference goes on-hook, the 5-party conference is terminated.
- When an incoming call is received, a Call Waiting tone is heard. You can answer the call after leaving the conference by going off-hook.
- This feature cannot be used with a single line telephone.

- 1.3 Making Calls, “Interrupting an Existing Call (Executive Busy Override)”
- 1.5 During a Conversation, “Call Waiting”

1.7 Useful Features

Leaving a Message Notification (Message Waiting)

When the called extension is busy or does not answer your call, you can leave a notification so that the called party may call you back.

As a message receiver, the MESSAGE button light lets you know that a call has been received. If you receive notification, you can call back the original party by a simple operation. This feature is available only for proprietary telephones with MESSAGE buttons.

Leaving a message notification

### Any Telephone

- Lift the handset or press SP-PHONE/MONITOR.
- Dial 701.
- Enter the extension number (100 through 199) where the calls will be left.
- Dial #.
- Confirmation tone and dial tone
- Hang up or press SP-PHONE/MONITOR.

- Single line telephone users can dial “0” instead of “#”.

### PT

- Press MESSAGE twice.
- Enter the extension number (100 through 199) where you left a message.
- Dial #.
- Confirmation tone and dial tone
- Hang up or press SP-PHONE/MONITOR.

Canceling a message notification

### Any Telephone

- Lift the handset or press SP-PHONE/MONITOR.
- Dial 702.
- Enter the extension number (100 through 199) where you left a message.
- Dial #.
- Confirmation tone and dial tone
- Hang up or press SP-PHONE/MONITOR.

- Single line telephone users can dial “0” instead of “#”.

### Canceling using the MESSAGE button

- Lift the handset or press SP-PHONE/MONITOR.
- Enter the extension number (100 through 199) where you left a message.
- Press MESSAGE twice.
- Confirmation tone and dial tone
- Hang up or press SP-PHONE/MONITOR.
1.7 **Useful Features**

Checking and Selecting a message notification by the message receiver

If there is a message, the message waiting lamp (MESSAGE indicator) light will be on.

**PT**

*When the telephone is idle and on-hook*

- MESSAGE
- Press MESSAGE repeatedly until the desired message appears.

- The stored messages are shown on the display in the order they were received.

Calling back the message notification sender

**PT**

- Lift the handset or press SP-PHONE/MONITOR.
- Press MESSAGE.
- Talk.

- If you have more than one message at your extension, the line connects you to the selected message sender.
- The message is cleared after the conversation.

Clearing all message notifications by the message receiver

**PT**

- Lift the handset or press SP-PHONE/MONITOR.
- Dial 700.
- Dial #.
- Hang up or press SP-PHONE/MONITOR.

- All messages are cleared.

- Each extension can have a maximum of 8 simultaneous messages. If you try to set the ninth message, you will hear a reorder tone.

- If the MESSAGE indicator does not go out after calling the extension which left the message, another message is waiting.

- If multiple message notifications are left at your extension, call back is executed in the order received.

- If you select a specific message to call back, the other call backs will be executed in the order received, starting with the one selected.

  (e.g.) 5 → 6 → 7 → 8 → 1 → 2 → 3 → 4

- 1.2 Proprietary Telephone Settings, “Customizing the Buttons on Your Telephone”, Restoring the MESSAGE Button
- See the Installation Manual, Section 3, “Message Waiting”.

---
1.7 Useful Features

Calling with Account Codes (Account Code Entry)

An account code is used to identify outside calls for accounting and billing purposes. The account code is appended to the “Station Message Detail Recording (SMDR)” call record. For incoming outside calls, account codes are not required. For outgoing outside calls, account codes are often required. You can enter account codes in the following 4 modes.

Verify - All mode: You must always enter the pre-assigned account code.
Verify - Toll mode: You must always enter the pre-assigned account code. You can enter your extension password so that you can override toll restriction.
Option mode: An account code can be entered when a record of the account code is required. It can be any number.
Forced mode: You must always enter an account code. It can be any number.

Making calls with account codes except in the Option mode

PT and SLT

![Diagram showing account code and phone number entry]

Making calls with account codes in the Option mode and receiving calls

PT

During a conversation or while hearing a reorder tone after the other party hangs up (within 30 seconds)

Press FWD/DND.

Enter an account code (4 digits).

• You can keep talking.
1.7 Useful Features

- In the Verify-All and Verify-Toll modes, you must always enter a pre-assigned account code.
- You do not need to make an account code entry when receiving incoming calls.
- You can clear and re-enter a number by pressing “* *” or the FWD/DND button while entering an account code.
- An account code can be stored into Memory Dialing (“One-Touch Dialing”, “Pickup Dialing”, “System/Personal Speed Dialing”, “Call Forwarding — to Outside (CO) Line”). The sequence to enter an account code into Memory Dialing is as follows.
- [Feature Number] [Line Access Code] [* *] [Account Code] [Phone Number]
- If an entered account code does not match the pre-assigned account code in the verify-all mode or the verify-toll mode, when making an outside call, a reorder tone is heard.
- An account code has 4 digits (0 through 9). FLASH, PAUSE, etc. cannot be used.

- 1.8 Operator/Manager Service Features, “Extension Password Set (Manager only)”
- See the Installation Manual, Section 3, “Station Message Detail Recording (SMDR)”.
- See the Installation Manual, Section 3, “Account Code Entry”.
- See the Installation Manual, Section 3, “Toll Restriction Override by Extension Password”.
1.7 Useful Features

Rejecting Incoming Calls (Do Not Disturb — DND)

Allows you to prevent other parties from disturbing you. Your extension will not receive intercom or outside calls.

Setting / Canceling

- A calling extension that has “Do Not Disturb (DND) Override” enabled can override your extension when the “Do Not Disturb (DND)” mode is set.
- DND also inhibits for paging.
- If the Call Forwarding feature has already been set, setting the DND feature will cancel Call Forwarding.
- The Timed Reminder alarm and Hold Recall features override this feature.
- A flexible CO button on a proprietary telephone which is not provided with FWD/DND button can be assigned as the FWD/DND button.
- If the “Do Not Disturb (DND)” mode is set, you can still answer a call by pressing the CO button.
- The lighting patterns of the FWD/DND button are as follows.
  - Off: Both functions are not set.
  - Red: DND mode
  - Flashing red slowly: FWD mode

• Single line telephone users can dial “0” instead of “#”.

1.2 Proprietary Telephone Settings, “Customizing the Buttons on Your Telephone”, FWD/DND Button
1.6 Before Leaving Your Desk, “Forwarding a Call (Call Forwarding)”
1.7 Useful Features, “Calling an Extension which Denies Receiving Calls (Do Not Disturb Override)”
See the Installation Manual, Section 3, “Do Not Disturb (DND)”.

Operations 1-69
1.7 Useful Features

Calling an Extension which Denies Receiving Calls (Do Not Disturb Override)

Allows you to call an extension even though the “Do Not Disturb — DND” feature is set. System Programming is required to use this feature.

Any Telephone

If you make an intercom call and hear a Do Not Disturb (DND) tone

![Diagram]

- DND tone
- Dial 2.
- Wait for an answer.

- If you hear a reorder tone after dialing 2, the “Do Not Disturb Override” feature is not set at your extension.
- If you hear a busy tone after dialing 2, the line is busy. You can use the Automatic Callback Busy feature.

- 1.7 Useful Features, “Rejecting Incoming Calls (Do Not disturb — DND)”
- See the Installation Manual, Section 3, “Do Not Disturb (DND)”. 
1.7 Useful Features

Secret Dialing

Allows you to conceal all or part(s) of a “System Speed Dialing number” or “One-Touch Dialing number” assigned to a flexible button, both which normally appear on the display.

Press INTERCOM before and after the part you wish to conceal.

<PT Display Example>

• A secret code, “[” or “]” (pressing the INTERCOM button), are counted as 1 digit.
• You can conceal one or more parts of a telephone number.
• If the phone number “9-1-[201]-431-21xx” has been stored, the display will show the following when the call is made.

PT

• You can program whether to print out the concealed number(s) on the SMDR or not by System Programming.
• Do not press the INTERCOM button before a line access number (9, 0 or 81 through 86).

PT

• 1.2 Proprietary Telephone Settings, “Customizing the Buttons on Your Telephone”, One-Touch Dialing Button
• 1.3 Making Calls, “Dialing by Simply Pressing a Button (One-Touch Dialing)”
• 1.3 Making Calls, “Dialing with a System Speed Dialing Button (System Speed Dialing)”
• See the Installation Manual, Section 3, “Secret Dialing”.

Operations 1-71
1.7 Useful Features

## Alarm Setting (Timed Reminder)

You can receive a ringback at your telephone to remind you of a meeting or appointment. Either one time or daily (everyday until canceled) is available at a pre-set time. At home, you can also use this feature as a wake-up call.

### Setting

**Any Telephone**

1. Lift the handset or press SP-PHONE/MONITOR.
2. Dial 76.
3. Enter the hour (01 through 12).
4. Enter the minute (00 through 59).
5. For AM: Dial 0.
6. For PM: Dial 1.
7. Dial #.
8. Hang up or press SP-PHONE/MONITOR.

- **Single line telephone users can dial “0” instead of “#”.**

- **1** An alarm will be heard at the preset time and then the setting is cleared.
- **2** An alarm will be heard daily at the preset time until the setting is changed or canceled.

### Canceling

**Any Telephone**

1. Lift the handset or press SP-PHONE/MONITOR.
2. Dial 762#.
3. Confirmation tone and dial tone
4. Hang up or press SP-PHONE/MONITOR.

- **Single line telephone users can dial “0” instead of “#”.**
1.7 Useful Features

Checking the set time (with a display PT only)

<table>
<thead>
<tr>
<th>PT</th>
<th></th>
<th></th>
</tr>

<tbody>
<tr>
<td><img src="image3" alt="Image" /></td>
</tr>
<tr>
<td>Lift the handset.</td>
</tr>
<tr>
<td>• Pressing any key also stops the alarm.</td>
</tr>
</tbody>
</table>

- Be sure the system clock is set correctly.
- The alarm continues for 30 seconds.
- If you receive an incoming call during the alarm, ringing starts after the alarm stops.
- If the alarm is set to sound during a conversation, the alarm will start after the conversation.
- If you set a new time, the preset time will be cleared.

- See the Installation Manual, Section 3, “Timed Reminder”.

!!

Dial 763#. Lift the handset or press SP-PHONE/MONITOR. Hang up or press SP-PHONE/MONITOR.
1.7 Useful Features

Time (Day/Night/Lunch) Service

This system supports the Day, Night and Lunch modes. The system operation for originating and receiving calls can be different in the day, night and lunch modes. “Time Service” can only be set by the operator and manager. For a PT user, even if your extension is not assigned as the operator or manager, you can use your display to check the current mode.

Confirming the current mode (with a display PT only)

![Diagram]

- The Day/Night/Lunch mode is automatically switched at a predetermined time (default: 9:00 a.m. for every day, 5:00 p.m. for every night), if the automatic mode is selected.

- 1.8 Operator/Manager Service Features, “Time(Day/Night/Lunch) Service Setting”
- See the Installation Manual, Section 3, “Time (Day/Night/Lunch) Service”.
1.7 Useful Features

Joining or Leaving a Call Distribution Group (Log-In/Log-Out)

Allows you to assign the Log-In mode or Log-Out mode within a hunting, DISA ring or UCD group. When in the Log-Out mode, you can leave the group temporarily, preventing hunting calls from being sent to your extension. The lighting patterns of the Log-In/Log-Out button on a proprietary telephone and status are as follows.

Off: Log-In mode
Red: Log-Out mode

Log-In / Log-Out (Using the Log-In/Log-Out button)

Lift the handset or press SP-PHONE/MONITOR. Press the flexible button assigned as the Log-In/Log-Out button. Confirmation tone and dial tone Hang up or press SP-PHONE/MONITOR.

• The indicator light turns off in Log-In mode or turns steady red in Log-Out mode.

Log-In / Log-Out (Using the feature number)

Any Telephone

Lift the handset or press SP-PHONE/MONITOR. For Log-In mode: Dial 7360#. For Log-Out mode: Dial 7361#. Confirmation tone and dial tone Hang up or press SP-PHONE/MONITOR.

• Single line telephone users can dial “0” instead of “#”.

• The default is “Log-In” mode.
• There should be at least one extension in the group that is in the Log-In mode.
• When in the Log-Out mode, the last extension in a UCD group cannot leave the group.
• The Log-In/Log-Out button can be assigned to a flexible CO button.

1.2 Proprietary Telephone Settings, “Customizing the Buttons on Your Telephone”, Log-In/Log-Out Button

• See the Installation Manual, Section 3, “Station Hunting”.
• See the Installation Manual, Section 3, “Direct Inward System Access (DISA)”.
• See the Installation Manual, Section 3, “Uniform Call Distribution (UCD)”.
• See the Installation Manual, Section 3, “Log-In/Log-Out”.

Operations 1-75
## 1.7 Useful Features

### Room Monitor

Allows you to monitor a room through a proprietary telephone with an AUTO ANSWER/MUTE button (AUTO ANS/MUTE button on a KX-T7300 series). The proprietary telephone you want to monitor should be prepared for monitoring beforehand. You can also monitor through a doorphone. You can use a proprietary telephone with an AUTO ANSWER/MUTE button (AUTO ANS/MUTE button on a KX-T7300 series) and single line telephone with a MUTE button for monitoring.

#### Setting a monitor by PT

<table>
<thead>
<tr>
<th>PT</th>

<td></td>
<td></td>
</tr>
</tbody>
</table>

- The doorphone access tone can be eliminated by System Programming.
- System Programming is required to monitor through a PT.
- The access tone will not be sent to the monitored PT. The paging tone will also not be sent to the monitored PT.
- This feature is not available for the KX-T7350, KX-T7050 and KX-T7055.

- See the Installation Manual, Section 3, “Room Monitor”.
- See the Installation Manual, Section 3, “Doorphone Call”.

### Data Line Security

Your extension can be protected against interruptions from the “Call Waiting”, “Hold Alarm”, and “Executive Busy Override” features. Data communication devices, such as computers and facsimiles, can operate uninterrupted.

#### Setting / Canceling

- Single line telephone users can dial “0” instead of “#”.

- 1.3 Making Calls, “Interrupting an Existing Call (Executive Busy Override)”, Executive Busy Override — Extension
- 1.3 Making Calls, “Interrupting an Existing Call (Executive Busy Override)”, Executive Busy Override — Outside (CO) Line
- 1.5 During a Conversation “Call Waiting”
- See the Installation Manual, Section 3, “Data Line Security”.
- See the Installation Manual, Section 3, “Hold”.

---

Advanced Operations
1.7 Useful Features

**Parallel Connection of a Proprietary Telephone and Single Line Telephone (Paralleled Telephone Connection)**

Any extension connected to extension jacks 01 through 16 can be connected in parallel with a proprietary telephone and a single line telephone. In the event of a power failure, CO1 and CO4 can be accessed using the single line telephones that are connected in parallel with the proprietary telephones to extension jacks 01 and 09 respectively. If the extension receives a call, ringing will be heard from the proprietary telephone and the single line telephone. You can answer the call by using either the proprietary telephone or the single line telephone. An answering machine, facsimile, MODEM (personal computer), etc., can be connected instead of a single line telephone.

System Programming is required to enable this feature.

- A proprietary telephone LCD will show you a single line telephone is in use.
- The following features will not work with a single line telephone connected in parallel with a proprietary telephone:
  - Call Splitting
  - External Feature Access
  - Account code input
  - Conference
  - Pickup dialing
- A single line telephone connected in parallel with a proprietary telephone cannot make a call in the following cases:
  - The proprietary telephone is set to the BGM mode.
  - The proprietary telephone is receiving a page through the built-in speaker.
  - The proprietary telephone is set to the PROGRAM mode.
- A single line telephone connected in parallel with a proprietary telephone will not ring in the following cases:
  - The proprietary telephone is set to Handsfree Answerback.
  - The proprietary telephone is set to “Voice Call” in the Intercom Alert Assignment.

- See the Installation Manual, Section 3, “Paralleled Telephone Connection”.

**Mixed Station Dialing**

Any telephone, either a KX-T7033/KX-T7030/KX-T7020/KX-T7050/KX-T7055/KX-T7330/KX-T7320/KX-T7350/KX-T7130, single line rotary phone (10 pps, 20 pps) or single line touch tone telephone, may be used as an extension for the system.
1.7 Useful Features

External Feature Access

Allows you to access special features (e.g. Call Waiting) offered by a host PBX or Central Office. This feature is effective only during an outside call. You can access the feature by using either the FLASH button or the feature number.

Using the FLASH button

**PT**

**During a conversation with an outside party**

Press **FLASH**. Enter the desired service code.

- The current call is placed on hold.

Using the feature number

**SLT**

**During a conversation with an outside party**

Flash the hookswitch. **6** Enter the desired service code.

- The current call is placed on hold.

**PT**

- A “Flash Time” must be assigned as required by the host PBX, or outside (CO) line.
- You may access some features of the host PBX using the FLASH button. If the system is connected to a host PBX and the flash operation is required, follow the flash operation procedure which is required by the host PBX.
- FLASH button also allows you to disconnect the current call and make another call without hanging up by System Programming. You can also assign a flexible button for the flash button.

- 1.2 Proprietary Telephone Settings, “Customizing the Buttons on Your Telephone”, One-Touch Access for System Features
- 1.3 Making Calls, “Flash”
- See the Installation Manual, Section 3, “External Feature Access”.
1.7 Useful Features

Self-Extension Number Confirmation (KX-T7330/KX-T7030/KX-T7130/KX-T7033 only)

Allows you to display your jack and extension number.

To program, set the MEMORY switch on the proprietary telephone to “PROGRAM” or press the PROGRAM button on the KX-T7300 series.

![Diagram](image.png)

- Be sure the handset is on the cradle and the SP-PHONE button is off.
- After programming, return the MEMORY switch to the “SET” position or press the PROGRAM button on the KX-T7300 series.
- You can confirm your Self-Extension Number by pressing “* *” while on-hook.

See the Installation Manual, Section 3, “Self-Extension Number Confirmation (KX-T7330/KX-T7030/KX-T7130/KX-T7033 only)”.

Turning on the Background Music (BGM)

You can listen to background music through the built-in speaker of the telephone. An external music source, such as a radio, must be connected. The music stops whenever a call comes in or when you go off-hook.

Setting / Canceling

![Diagram](image.png)

- See the Installation Manual, Section 3, “Music on Hold/Background Music (BGM)”.
1.7 Useful Features

**Extension Button Confirmation**
(KX-T7330/KX-T7030/KX-T7130/KX-T7033 only)

You can confirm the values stored in the button using the LCD.

**Checking**

Press the button you want to confirm.

**Operations** 1-81
1.7 Useful Features

Canceling the Feature Settings (Station Feature Clear)

Allows you to reset the following station features to the default settings.

a) Absent Message Capability
b) Automatic Callback Busy (Camp-On)
c) Background Music (BGM)
d) Call Forwarding
e) Call Pickup Deny
f) Call Waiting
g) Data Line Security
h) Do Not Disturb (DND)
i) Executive Busy Override Deny
j) Log-In/Log-Out
k) Message Waiting – (All messages will be erased.)
l) Pickup Dialing – (The stored telephone number will be erased.)
m) Paging-Deny
n) Room Monitor
o) Timed Reminder
p) Voice Mail Integration

Clearing the current feature settings

Any Telephone

- Lift the handset or press SP-PHONE/MONITOR.
- Dial 79#.
- Confirmation tone
- Hang up or press SP-PHONE/MONITOR.

* Single line telephone users can dial “0” instead of “#”.

See the Installation Manual, Section 3, “Station Feature Clear”.

Alternate Calling — Ring/Voice (Voice to Ring only)

“Voice Call” (through the built-in speaker) which is set at the called party’s extension can be switched to “Tone Call” (ringing). This feature must be set beforehand at the called party’s extension. Refer to Proprietary Telephone Settings (Section 1.2). A rotary phone cannot be used.

Any Telephone

- Off-hook.
- Enter an extension number.
- Confirmation tone (1 beep)
- Dial *
- Ring back tone

See the Installation Manual, Section 3, “Alternate Calling — Ring/Voice (Voice to Ring only)”. 
1.7 Useful Features

Doorphone Call

Allows you to have a conversation with a visitor at your doorphone. Up to 4 doorphones can be connected to the system.

Calling an extension from a doorphone

Any Doorphone

Press the Doorphone button for 1 second. Wait for an answer and talk.

Answering a doorphone call

Any Telephone

When you hear the doorphone ring tone at the extension:

Lift the handset or press SP-PHONE/MONITOR.

Calling a doorphone

Any Telephone

Lift the handset or press SP-PHONE/MONITOR. Dial 31. Enter a doorphone number (1 through 4). Confirmation tone. Talk.

- An optional doorphone/door opener card and doorphones are necessary for this feature.
- If you do not answer an incoming doorphone call within 15 or 30 seconds, the call will be canceled.
- You must program the extensions which can receive calls from each doorphone for the day, night and lunch modes.
- Any extension user can call a doorphone.
- The Call Waiting feature is not available with doorphone calls.
- Doorphone 1 and Doorphone 2 cannot receive calls simultaneously. When one is in use, an extension user cannot have a conversation with the other. This is the same for Doorphone 3 and Doorphone 4.
- Doorphones can also be used for the Room Monitor feature.

- 1.7 Useful Features, “Room Monitor”
- See the Installation Manual, Section 3, “Doorphone Call”.
1.7 Useful Features

Door Opener

Allows you to unlock the door from your telephone.
Up to 4 door openers can be connected to the system.

To unlock the door from an assigned extension

Any Telephone

Lift the handset or press SP-PHONE/MONITOR.
Dial 55.
Enter a door opener number (1 through 4).
Confirmation tone
Hang up or press SP-PHONE/MONITOR.

* The door is left unlocked for 5 seconds (default).

To unlock the door while talking to the doorphone

PT and SLT

For a PT: Dial 5.
For an SLT: Flash the hookswitch and dial 5.
Hang up or press SP-PHONE/MONITOR.

* The door is left unlocked for 5 seconds (default).

* An optional doorphone/door opener card is necessary for this feature.
* If you dial 5 again while the door is open, the door will stay open for another 5 seconds (default).
* You can program the extensions which can open the doors for the day, night and lunch modes.
* You can modify the door opener timer in System Programming.
* The door opener will open the door, even if a doorphone is not installed.

* See the Installation Manual, Section 3, “Door Opener”.

!!
1.7 Useful Features

Voice Mail Integration

Allows you to use a Voice Processing System to forward your calls to a mailbox in the system. A caller can leave a message in your mailbox. If you use a proprietary telephone which has a MESSAGE button, the button light will turn on to let you know you have messages. If you use a single line telephone, dial tone 3 will let you know you have messages when you go off-hook.

If this feature is enabled, the system automatically sends the Follow-on ID to the Voice Mail Port before connecting the caller. You must choose one of the following two settings for the Follow-on ID format.

Setting A: only sends the extension number to the Voice Mail Port.
Setting B: sends “#6” followed by the extension number. “#6” is used by a Panasonic KX-Voice Processing System to force the VPS port into voice mail service.

The setting depends on the format required by your voice processing system.

Setting

<table>
<thead>
<tr>
<th>PT and SLT</th>
<th>setting no.</th>
<th>Dial #</th>
<th>Confirmation tone and dial tone</th>
<th>Hang up or press SP-PHONE/MONITOR.</th>

<td>For a PT: Press FWD/DND.</td>
<td>Dial the setting number. For setting A: Dial 91. For setting B: Dial 92.</td>
<td>Single line telephone users can dial “0” instead of “#”.</td>
<td></td>
</tr>
<tr>
<td>For an SLT: Dial 71.</td>
<td>#</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Listening to a stored message

You can listen to the messages stored in your mailbox easily. There are two operations to play back messages.

Using the Message Waiting (MESSAGE) button

- You can listen to the stored message by following the Voice Mail prompts.
1.7 Useful Features

By manual dialing

Any Telephone

![Voice Mail extension no.]

Lift the handset or press SP-PHONE/MONITOR.
Enter the Voice Mail extension number.

- When you use an SLT, you will hear dial tone 3 if there are messages.
- You can listen to the stored message by following the Voice Mail prompts.

Canceling

PT and SLT

![FWD/DND]

Lift the handset or press SP-PHONE/MONITOR.

For a PT: Press FWD/DND.
For an SLT: Dial 71.

Dial 90#.

Hang up or press SP-PHONE/MONITOR.

- Single line telephone users can dial “0” instead of “#”.
- You may press the flexible button assigned as the FWD/DND button instead.

- To forward your calls to your mailbox by the Call Forwarding feature, you have to set “Call Forwarding — All Calls” or “Call Forwarding — Busy or No Answer”.
  The setting is as follows.
  [Off-hook] [FWD/DND or 71] [91# or 92#] (after hearing a confirmation tone and dial tone) [FWD/DND or 71] [1 (All Calls) or 2 (Busy or No Answer)] [Voice mail extension number] [#] [On-hook]
  The canceling is as follows.
  [Off-hook] [FWD/DND or 71] [90#] (after hearing a confirmation tone and dial tone) [FWD/DND or 71] [0#] [On-hook]

- A flexible button can be assigned as the FWD/DND button.
- You will hear dial tone 3 if there are messages in your mailbox when you go off-hook.
  When you access voice mail, you have to listen to all of the new messages. If you do not listen to all of the messages, dial tone 3 will be eliminated and you will not know there are messages in your mailbox the next time you go off-hook.

- 1.2 Proprietary Telephone Settings, “Customizing the Buttons on Your Telephone”, FWD/DND Button, Restoring the Message Button
- 1.6 Before Leaving Your Desk “Forwarding a Call (Call Forwarding)”, All Calls, Busy or No Answer
- See the Installation Manual, Section 3, “Intercept Routing”.
- See the Installation Manual, Section 3, “Voice Mail Integration”.
1.7 Useful Features

Calling Using Your Privileges at Another Extension (Walking COS)

Allows you to use your calling privileges (TRS — Class of Service) at another extension. You may override restrictions which may be set at the extension.

Making a call

Any Telephone

At another extension

Lift the handset or press SP-PHONE/MONITOR.
Dial 7*. Dial your extension password.
Enter your extension number (100 through 199).
Dial #. Confirmation tone and dial tone
Enter the phone number.

- You must dial a line access code (9, 0 or 81 through 86) or press the CO button when calling an external party.

- TRS Class of Service (COS) is used to define the feature. Each extension is assigned a TRS COS number.
- If your extension is assigned to the Account Code — Forced or Verify – All mode, you must enter the account code before the line access code.
- A rotary telephone cannot use this feature.

- SLT

- 1.8 Operator/Manager Service Features, “Extension Password Set (Manager only)”
- See the Installation Manual, Section 3, “Toll Restriction Override by Extension Password”.
- See the Installation Manual, Section 3, “Walking COS”.

Operations 1-87
### 1.7 Useful Features

#### Ringing Pattern Selection

A different ringing pattern is used to distinguish intercom calls from incoming outside calls.

- You can select the ringing pattern as follows in System Programming.
  - Outside (CO) line: 3 patterns (A, B or C)
  - Extension: 3 patterns (A, B or C)
  - Doorphone: 4 patterns (A, B, C or D)

### Distinctive Dial Tone

A distinctive dial tone will be heard from the handset if the extension user has previously activated a certain feature.

Dial Tone 1: Ordinary dial tone

Dial Tone 2: When any of the following features are activated.
- Absent Message Capability
- Back Ground Music (BGM) (only a proprietary telephone)
- Call Forwarding
- Call Pickup Deny
- Data Line Security
- Do Not Disturb (DND)
- Electronic Station Lockout
- Message Waiting (only a proprietary telephone)
- Pickup Dialing (only a single line telephone)
- Timed Reminder

Dial Tone 3: When performing Account Code Entry and answering a Timed Reminder call. Also sounds when going off-hook with an SLT which has a message in a Voice Processing System.

- 2.1 Tone / Ring Tone List
- See the Installation Manual, Section 3, “Ringing Pattern Selection”.

- 2.1 Tone / Ring Tone List
- See the Installation Manual, Section 3, “Distinctive Dial Tone”.

1-88 Operations
1.7 Useful Features

Power Failure Transfer

During a power failure, each outside (CO) line will be connected to an assigned extension.
- Outside (CO) line 1: extension jack 01
- Outside (CO) line 4: extension jack 09

- During a power failure, all features cannot be used except for incoming and outgoing outside calls from extension jacks 01 and 09.
- If extension jacks 01 and 09 are connected to proprietary telephones, disconnect the units and connect single line telephones.
- Automobile type batteries, which are customer supplied, are available as a system back up power supply to operate all the features during a power failure.
- The batteries can be connected directly to the unit. For more information, refer to the Installation Manual.

- See the Installation Manual, Section 3, “Power Failure Transfer”.

Lockout

If one party in a conversation goes on-hook, both parties will be disconnected from the speech path automatically. A reorder tone is sent to the off-hook party before it is disconnected. No operation is necessary.
1.8 **Operator / Manager Service Features**

The system supports one operator and one manager. Any extension can be appointed as the operator and extension jack 01 is appointed as the manager. System Programming is required to assign the operator. They can perform the following features.

1) Date and Time Setting
2) Electronic Station Lockout — CANCEL ALL
3) Timed Reminder, Remote (Wake-Up Call)
4) Outgoing Message (OGM)
5) Remote Station Lock
6) Time (Day/Night/Lunch) Service Setting
7) Extension Password Set (Manager only)

---

### Date and Time Setting

When the current time setting is wrong, you can adjust it by the following procedure.

**Setting**

<table>
<thead>
<tr>
<th>PT</th>
<th>year</th>
<th>month</th>
<th>day</th>
<th>day of the week</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>0</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Dial 0. Enter the year (last 2 digits). Enter the month (01 through 12). Enter the day (01 through 31). Enter the day of the week.

0: For Sun 1: For Mon 2: For Tue 3: For Wed 4: For Thu 5: For Fri 6: For Sat

Enter the hour (01 through 12). Enter the minute (00 through 59). Dial 0 or 1. For AM: Dial 0. For PM: Dial 1. Press AUTO DIAL/STORE.

- The STORE indicator light turns on.

- Be sure the handset is on the cradle and the SP-PHONE button is off.
- To program, set the MEMORY switch on the proprietary telephone to “PROGRAM” or press the PROGRAM button on the KX-T7300 series.
- After programming, return the MEMORY switch to the “SET” position or press the PROGRAM button on the KX-T7300 series.

- See the Installation Manual, Section 3, “Date and Time Setting”.

---

![](image)
1.8 Operator / Manager Service Features

Electronic Station Lockout — CANCEL ALL

You can cancel Electronic Station Lockout at all extensions.

**Setting**

- Be sure the handset is on the cradle and the SP-PHONE button is off.
- To program, set the MEMORY switch on the proprietary telephone to “PROGRAM” or press the PROGRAM button on the KX-T7300 series.
- After programming, return the MEMORY switch to the “SET” position or press the PROGRAM button on the KX-T7300 series.

See the Installation Manual, Section 3, “Station Lock”.

Timed Reminder, Remote (Wake-Up Call)

The operator or manager can remotely set or cancel the Timed Reminder of a desired extension.

**Setting**

- Lift the handset or press SP-PHONE/MONITOR.
- Dial 764.
- Dial the desired extension number (100 through 199).
- Dial #.
- Enter the minute (00 through 59).
- For AM: Dial 0.
- For PM: Dial 1.
- For a one time alarm*1: Dial 1.
- For a daily alarm*2: Dial 2.
- Dial #.
- Confirmation tone
- Enter the hour (01 through 12).
- Dial 76.
- Hang up or press SP-PHONE/MONITOR.

*1 An alarm will be heard at the preset time and then the setting is cleared.
*2 An alarm will be heard daily at the preset time until the setting is changed or canceled.
1.8 Operator / Manager Service Features

Canceling

Lift the handset or press SP-PHONE/MONITOR.

Dial 764.

Dial the desired extension number (100 through 199).

Dial #.

Confirmation tone and dial tone

Dial 762#.

Confirmation tone

Hang up or press SP-PHONE/MONITOR.

Checking the time setting (with a display PT only)

Lift the handset or press SP-PHONE/MONITOR.

Dial 764.

Dial the desired extension number (100 through 199).

Dial #.

Confirmation tone and dial tone

Dial 763#.

Confirmation tone

Hang up or press SP-PHONE/MONITOR.

• 1.7 Useful Features, “Alarm Setting (Timed Reminder)”
• See the Installation Manual, Section 3, “Timed Reminder”.

Operations
1.8 **Operator / Manager Service Features**

### Outgoing Message (OGM)

The operator or manager can record or play back the outgoing message. This is played when a caller accesses the DISA or UCD feature. Two Outgoing Messages (OGM 1 and OGM 2) are available for DISA 1, DISA 2, UCD and UCD-END.

To program, set the MEMORY switch on the proprietary telephone to “PROGRAM” or press the PROGRAM button on the KX-T7300 series.

#### Recording a message

**PT**

2. Lift the handset.
3. Dial 0 for both OGM 1 and OGM 2.
4. Dial 1 for OGM 1.
5. Dial 2 for OGM 2.
6. Record a message (up to 30 seconds).
7. Press AUTO DIAL/STORE.

**Confirmation tone**

- The STORE indicator light turns off. Recording starts after the confirmation tone.
- The STORE indicator light turns steady red.
- If you exceed the time (30 seconds), recording is stopped automatically.

#### Playing back a message

**PT**

2. Dial 3 for OGM 1.
3. Dial 4 for OGM 2.
4. Press AUTO DIAL/STORE.

**Confirmation tone**

- The STORE indicator light turns off.
- The message is played back and the counter starts.
- The STORE indicator lights.

- Be sure the handset is on the cradle and the SP-PHONE button is off.
- After programming, return the MEMORY switch to the “SET” position or press the PROGRAM button on the KX-T7300 series.

- See the Installation Manual, Section 3, “Direct Inward System Access (DISA)”.  
- See the Installation Manual, Section 3, “Uniform Call Distribution (UCD)”.  
- See the Installation Manual, Section 3, “Outgoing Message (OGM)”.  

---

*Operations* 1-93
1.8 Operator / Manager Service Features

Remote Station Lock

The operator or manager can remotely lock or unlock a desired extension. You can lock outside calls.

**Locking**

PT

Lift the handset or press SP-PHONE/MONITOR. Press the flexible button assigned as the Station Lock button.

• The Station Lock button indicator turns red.

**Unlocking**

PT

Lift the handset or press SP-PHONE/MONITOR. Press the Station Lock button whose indicator lights red.

• The Station Lock button indicator turns off.

• This feature overrides the “Electronic Station Lockout” feature. If “Electronic Station Lockout” has already been set by the extension user and this feature is set afterwards, the extension user cannot cancel the lock. Only the operator or manager can cancel the lock.
• Extension passwords must be assigned to the operator and manager extensions beforehand.
• An extension user can make a call at the locked extension depending on system programming. System programming determines which COS number applies to a call at the locked extension.

⚠️

• 1.6 Before Leaving Your Desk, “Locking Your Telephone (Electronic Station Lockout)”
• See the Installation Manual, Section 3, “Station Lock”.
Time (Day/Night/Lunch) Service Setting

This system supports the day, night and lunch modes. The system operation for originating and receiving calls can be different in the day, night and lunch modes. Toll restriction can be programmed to prevent unauthorized toll calls for each mode.

Changing Day, Night or Lunch mode in manual or automatic mode

- **For Manual-Day mode:** Dial 781# or press the DSS button assigned as the Day button.
- **For Manual-Night mode:** Dial 782# or press the DSS button assigned as the Night button.
- **For Manual-Lunch mode:** Dial 783# or press the DSS button assigned as the Lunch button.

Confirmation tone and dial tone

* The assigned button indicator turns on.

Canceling the manual Day, Night or Lunch mode and returning to the automatic mode

- **For manual-day mode:** Dial 781# or press the DSS button assigned as the Day button.
- **For manual-night mode:** Dial 782# or press the DSS button assigned as the Night button.
- **For manual-lunch mode:** Dial 783# or press the DSS button assigned as the Lunch button.

Confirmation tone and dial tone

* The assigned button indicator turns on.

Confirming the current mode (with a display PT only)

- **When the telephone is idle:** Press #.

* The display shows the current mode for 3 seconds.
The day/night/lunch mode can be changed either automatically at a predetermined time (default: 9:00 a.m. for every day, 5:00 p.m. for every night) or manually at any time by System Programming.

Even if the automatic mode has been selected by System Programming, the operator or manager can change the day, night and lunch modes manually.

The following programs have separate day, night and lunch programming.

1) Delayed Ringing Assignment
2) Door Opener Assignment
3) Doorphone Ringing Assignment
4) Flexible Outward Dialing Assignment
5) Flexible Ringing Assignment
6) Outside (CO) Line Mode
7) TRS – Class of Service (COS) Assignment

If the lunch mode is set using feature number 783# in the automatic mode, the mode will not be changed until the lunch mode is canceled using feature number 780#. The day and night modes are automatically changed at the programmed time even if feature number 780# is not entered.

Feature number 780# is not accepted in the manual mode.

One of the day, night or lunch button indicators on the DSS console lights red to display the current mode.

If the day, night or lunch mode is changed manually in the automatic changing mode and the manager starts System Programming, the manual setting will be canceled after System Programming is completed. It will return to the automatic day, night or lunch mode.

1.7 Useful Features, “Doorphone Call”
1.7 Useful Features, “Door Opener”
See the Installation Manual, Section 3, “Direct In Line (DIL)”.
See the Installation Manual, Section 3, “Toll Restriction”.
See the Installation Manual, Section 3, “Time (Day/Night/Lunch) Service”.
1.8 Operator / Manager Service Features

Extension Password Set (Manager only)

The manager can assign a password to each extension. The assigned password can be used for the Toll Restriction Override by Extension Password and Walking COS features.

Setting

Be sure the handset is on the cradle and the SP-PHONE button is off.
To program, set the MEMORY switch on the proprietary telephone to “PROGRAM” or press the PROGRAM button on the KX-T7300 series.
After programming, return the MEMORY switch to the “SET” position or press the PROGRAM button on the KX-T7300 series.
The extension number is displayed in the order of the jack number when you press the NEXT or PREV button.
In the Account Code Verify–Toll mode, you should not assign similar numbers as the emergency call codes. For example, if “911” is assigned as an emergency code, and you assign “9111” as an extension password, the system regards the entered number, “9111”, as the emergency code.
To erase an incorrect entry, press the CLEAR (TRANSFER) button and enter a new number.

You may enter the pre-assigned extension password (4 digits) of extension jack 01 instead of the system password.

1.7 Useful Features, “Calling Using Your Privileges at Another Extension (Walking COS)”
See the Installation Manual, Section 3, “Extension Password/System Password”.
See the Installation Manual, Section 3, “Toll Restriction Override by Extension Password”.
See the Installation Manual, Section 3, “Walking COS”.

Operations 1-97
1.9  **DSS Console Features**

With a Direct Station Selection (DSS) Console, model KX-T7340 and KX-T7040, you can make or transfer calls and access system features with the touch of a button. The DSS Console must be connected to a Panasonic Advanced Hybrid System and paired with a PT. System Programming is required to designate the extension jacks of the DSS Console. With a paired telephone, you can carry out the following operations using the DSS Console.

- Direct access to an extension (Direct Station Dialing)
- Quick access to an external party (One-Touch Dialing)
- Quick access to a system feature (One-Touch Access for System Features)
- Easy transfer to an extension (Call Transfer)
- Quick access to the day mode (Time (Day/Night/Lunch) Service) (Operator/Manager only)
- Quick access to the night mode (Time (Day/Night/Lunch) Service) (Operator/Manager only)
- Quick access to the lunch mode (Time (Day/Night/Lunch) Service) (Operator/Manager only)
- Quick setting of the Remote Station Lock Control (Remote Station Lock Control) (Operator/Manager only)

- The KX-T7340/KX-T7040 and Proprietary Telephone (PT) should be placed side by side on your desk.
- A single line telephone cannot be utilized with the KX-T7340/KX-T7040.
- For System Programming, please refer to the Installation Manual.

**Initial Settings**

PF buttons are provided with no default settings, while each DSS button has a default setting as follows.
- DSS 01–24: extension numbers 101–124
- DSS 25–32: no default settings

To meet your various needs, DSS buttons can be changed to other function buttons. Every DSS or PF button can be assigned to another extension number, telephone number or feature number by Initial Settings.

- Be sure the handset is on the cradle and the SP-PHONE button is off.
- To program, set the MEMORY switch on the proprietary telephone to “PROGRAM” or press the PROGRAM button on the KX-T7300 series.
- After programming, return the MEMORY switch to the “SET” position or press the PROGRAM button on the KX-T7300 series.
- As to the buttons on your DSS Console, please refer to your DSS Console manual.
1.9 **DSS Console Features**

### Extension Number Assignment

You can assign a desired number to a DSS button.

**PT and DSS Console**

[DSS Console]  [Paired telephone]  [Paired telephone]  [Paired telephone]

- Press the desired DSS button.
- Dial 1.
- Enter the desired extension number (100 through 199).
- Press AUTO DIAL/STORE.

Repeat these steps to program numbers for other DSS buttons.

### One-Touch Dialing Assignment

You can assign a DSS or PF button as a One-Touch Dialing button. The number can be an extension number or a telephone number. Up to 16 digits can be stored in each memory location.

**PT and DSS Console**

[DSS Console and Paired telephone]  [Paired telephone]  [Paired telephone]  [Paired telephone]

- Press the desired DSS button (on the DSS Console) and dial 2 (on the paired telephone), or press the PF button (on the DSS Console).
- Enter the desired number.
- Press AUTO DIAL/STORE.

* When you assign an outside phone number, you must enter a line access code first.

### One-Touch Access Assignment for System Features

You can assign a desired feature to a DSS or PF button.

**PT and DSS Console**

[DSS Console and Paired telephone]  [Paired telephone]  [Paired telephone]  [Paired telephone]

- Press the desired DSS button (on the DSS Console) and dial 2 (on the paired telephone), or press the PF button (on the DSS Console).
- Enter the desired feature number.
- Press AUTO DIAL/STORE.

* If you wish to access the “Paging — All extensions” feature, enter feature number 330.
1.9 **DSS Console Features**

**Day, Night and Lunch Buttons Assignment (Operator/Manager only)**

You can assign a DSS button as the Day, Night or Lunch button. Simply pressing the assigned button sets the day, night or lunch mode.

![Diagram showing buttons for Day, Night, and Lunch modes]

- Press the desired DSS button.
- Press AUTO DIAL/STORE.

**Station Lock Button Assignment (Operator/Manager only)**

You can assign the Station Lock button to a DSS button for the remote station lock control feature.

![Diagram showing steps to assign Station Lock button]

**To cancel after programming**

- Press the DSS or PF button which you wish to cancel.
- Press AUTO DIAL/STORE.

*The number is canceled.*
1.9 **DSS Console Features**

- DSS buttons can be changed to any of the following function buttons by Initial Settings.
  a) *Another DSS Button* (Every DSS button can be assigned to another extension number.)
  b) One-Touch Dialing Button
  c) Day Button (Operator/Manager only)
  d) Night Button (Operator/Manager only)
  e) Lunch Button (Operator/Manager only)
  f) Station Lock Button (Operator/Manager only)
- PF buttons can be changed to One-Touch Dialing buttons by Initial Settings.
- When the STORE button is pressed after programming, you will hear beep tones as follows.
  — 1 beep: The entry is different from the one that was stored previously.
  — 2 beeps: The entry is the same as the previously stored one.
- You can check the stored data by pressing the desired button while on-hook. The data will be displayed.

- 1.2 Proprietary Telephone Settings, “Customizing the Buttons on Your Telephone”,
  DSS Button,
  One-Touch Dialing Button

---

**Direct Station Dialing**

An extension can be called and accessed, by simply pressing a DSS button. The BLF shows if the extension is engaged.

---

**One-Touch Dialing**

The stored number is dialed automatically by pressing a programmed DSS or PF button.
1.9 DSS Console Features

**One-Touch Access for System Features**

You can access system features by pressing a programmed DSS or PF button.

**Without Transfer**

A call can be transferred to an extension using a DSS button.

**Call Transfer**

**Without Transfer**

**With Transfer**

An outside call can be transferred to an extension using a one-touch operation. The One-Touch Transfer function must be set by System Programming.

2.5 **Troubleshooting**

**If a power failure occurs...**

Your system enables a conversation between a specific outside (CO) line and extension (Power Failure Transfer) and supports system data backup.

**Power Failure Transfer**

A specific extension can be automatically connected to a specific outside (CO) line. This provides outside (CO) line calls between the following extension and outside (CO) line.

- Outside (CO) line 1 is connected to extension jack 01.
- Outside (CO) line 4 is connected to extension jack 09.

- All other conversations will be disconnected during a power failure.
- Proprietary telephones (PT) cannot be used during a power failure. A single line telephone will work in the event of a power failure. Connect the single line telephone to the above jack.
- When power is restored after a power failure, your system automatically restarts, maintaining as much of the previous system data as possible.

<tbody>
<tr>
<td>Nothing is heard in the handsfree mode.</td>
<td>The “Headset” mode is selected.</td>
<td>When the headset is not used, set the mode to “Handset”. Refer to “When Using the Headset” in Proprietary Telephone Settings.</td>
</tr>
</tbody>
</table>
| The unit does not ring. | • An outside (CO) line number is not programmed.  
• The Ringer Volume is set to “OFF”. | • To program outside (CO) line numbers, refer to the Installation Manual.  
• Increase the Ringer Volume. Refer to “Volume Control” in Proprietary Telephone Settings. |
| The display flashes the following message. | The system internal clock is not working properly. | Consult with an authorized Panasonic Factory Service Center. |
