INSTALLATION MANUAL

ELECTRONIC MODULAR SWITCHING SYSTEM

KX-T123211D

EASA-PHONE

Panasonic

Please read this manual before connecting the KX-T123211D
Thank you for purchasing the Panasonic Model KX-T123211D, Electronic Modular Switching System (EMSS).

NOTIFY THE TELEPHONE COMPANY

Installation must be performed by a qualified professional installer.

**Notify the Telephone Company**

Before connecting this equipment to any telephone, call the telephone company and inform them of the following:

- Telephone numbers to which the system will be connected
- Make: Panasonic
- Model: KX-T123211D
- FCC Registration No.: See the attach serial No. plate on the unit
- Ringer Equivalence: 0.4B
- Facility Interface Code: 02LS2
- Service Order Code: 9.0F
- Required Network Interface Jack: RJ11

Present FCC Regulations prohibit connecting this unit to a party line, or to a coin operated telephone. Please read the section on “Telephone Company and FCC Requirements and Responsibilities” on page 6-9.

The serial number of this product may be found on the label affixed to the side of the unit. You should note the serial number of this unit in the space provided and retain this book as a permanent record of your purchase to aid in identification in the event of theft.

**MODEL NO.: KX-T123211D**

**SERIAL NO.:**

In this Installation Manual, the model No. KX-T123211D is abbreviated to KX-T123211.

**INSTALLATION (Quick Reference)**

**Frame Ground Connection**
(See page 2-2)

For earth ground, see page 2-2.

**Wall Mounting**
(See page 2-3)

1. Place the templet (included) on the wall to mark the 3 screw positions.
2. Install the 3 screws into the wall.
3. Hook the unit on the screw heads.

**Central Office Line Connection**
(CO1 through 6)
(See page 2-7)

1. Modular jack
2. Use 2-conductor wiring cord
3. To Terminal Board or Modular Jacks from the Central Office (CO).

**Extension Connection**
(Jack number 1 through 16)
(See page 2-8)

1. To use a screw-attach-type 50 pin connector, see page 2-9.

**Rechargeable Battery Installation**
(See page 2-4)

1. Proprietary Telephone
   - 26 AWG: Under 460 feet
   - 24 AWG: Under 750 feet
   - 22 AWG: Under 1180 feet
   - Twisted cable

2. Standard Telephone
   - 26 AWG: Under 2290 feet
   - 24 AWG: Under 3700 feet
   - 22 AWG: Under 5900 feet
   - Twisted cable
Cable Pin Numbers to be connected

- Connection of the Proprietary Telephone
  (4-conductor wiring is required for each extension.)
  Connect the pin number of "T", "R", "D1" and "D2" only.

- Connection of the KX-T123235 (Proprietary Telephone) (6-conductor wiring is required for each extension.)

- Connection of a Standard Telephone
  (2-conductor wiring is required for each extension.)
  Connect the pin number of "T" and "R" only.
Serial Printer

Cables must be shielded and the maximum length is 6.5 feet.

1. To protect the printed circuit board from static electricity, first discharge any body static by touching the metal board.
2. Loosen the screws to remove the metal board.
3. The location of the optional cards for the KX-T123211 is shown in the following.
**OPTION (cont.)**

### Extension Connection (Jack number 17 through 32)

(See page 2-26.)

- Optional Expansion Card
  - KX-T123270 (8 Extension's)
  - KX-T123271 (4 Extension's)

- Jack no. 17 through 24
- Jack no. 25 through 32

To Extensions (Jack number 25 through 28, or 25 through 32)
To Extensions (Jack number 17 through 20, or 17 through 24)

### Central Office Line Connection (CO9 through 12)

(See page 2-31.)

- Optional Expansion Card
  - KX-T123280 (4 CO’s)
  - KX-T123281 (2 CO’s)

- Modular jack

- Use 2-conductor wiring cord

To Terminal Board or Modular Jacks from the Central Office (CO).

### DSS Console Connection (KX-T123240 / KX-T61640)

(See page 2-29.)

- Optional DSS Console Card
  - KX-T123241

- Pair Telephone
- DSS Console

- The DSS Console (KX-T123240 or KX-T61640) needs a paired Telephone (EMSS Proprietary Telephone) for proper operation, because the DSS console cannot work by itself.
- When using the DSS Console, program must be done. See page 3-10.
**Off Premise Extension (OPX) Card (KX-T123285)**

(See page 2-30.)

- Off Premise Extension Card (KX-T123285)
- Connector (24 pin)
- Off Premise Extension Unit KX-T123286
- Power Switch
- OPX-1 OPX-2
- Jack number 32
- Jack number 31

Use 2-conductor wiring cord

- Programming must be done to use this feature.
  Refer to “Off Premise Extension” on page 3-45.

**Direct Inward System Access Card (KX-T123291)**

(See page 2-31.)

- Direct Inward System Access Cards KX-T123291
- DISA-B Card
- DISA-A Card

**Outgoing Message Card (KX-T123292)**

(for Direct Inward System Access)

(See page 2-31.)

- Outgoing Message Card KX-T123292
- Outgoing Message (OGM)

- For how to record Outgoing Message, refer to “Outgoing Message” on page 4-67.
The following optional cards are necessary.

**On-site administration**
- Diagnostic Card KX-T123295

**Remote administration**
- Diagnostic Card KX-T123295
- Direct Inward System Access Cards KX-T123291
- MODEM Card KX-T123296

---

**MODEM Card (KX-T123296)**

(See page 2-32.)

---

**Doorphone Connection**

(See page 2-33.)

Doorphone Adaptor
(KX-T30860D only)

**Battery Adaptor Connection (KX-A26)**

(See page 2-34.)

Battery Adaptor (KX-A26) option

- Consisting of two 12 VDC (24 VDC)

#### STATION PROGRAM CLEAR

- Following programs can be reset to the default data.
  - Auto CO Hunting, Automatic Answering Selection, Intercom Voice Alerting Mode, CO Line Ringing Selection, Call Waiting Tone Selection, F3-One Touch Button Mode Selection.

4 - 66
NAME AND LOCATION

INSTALLATION

Installation

Cautions
- Avoid installing in the following places. (Doing so may result in malfunction, noise, or discoloration.)
  1. In direct sunlight and hot, cold, or humid places. (Temperature range: 32°F-104°F)
  2. Sulfuric gases produced in areas where there are thermal springs, etc. may damage the equipment or contacts.
  3. Places in which shocks or vibrations are frequent or strong.
  4. Dusty places, or places where water or oil may come into contact with the unit.
  5. Near high-frequency generating devices such as sewing machines or electric welders.
  6. On or near computers, telexes, or other office equipment, as well as microwave ovens or air conditioners.

Wiring

Cautions
1. Do not wire the telephone cable in parallel with an AC power source, computer, telex, etc. If the cables are run near those wires, shield the cables with metal tubing or use shielded cables and ground the shields.
2. If cables are run on the floor, use protectors or the like to protect the wires where they may be stepped on. Avoid wiring under carpets.
3. Avoid using the same 120 VAC power supply outlet for computers, telexes, and other office equipment. Otherwise, the KX-T123211's system operation may be interrupted by the induction noise from such equipments.
4. Please use one pair telephone wire for extension connection of (telephone) equipments such as standard telephone, data terminal, answering machine, computer etc., except proprietary telephone (KX-T123230, KX-T123220, KX-T123250 etc.).
To remove the front cover from unit

1. Unscrew the front cover of the unit.
   There are four screws.
2. Open the front cover in the direction of arrow

---

Rechargeable Battery Installation

When a power failure takes place, there is no memory loss except for the camp-on, saved number redial, the last number redial, Call park and Message waiting. During power failure, memory is protected by 21 day rechargeable battery.

1. Connect the battery (included) as shown (Fig.1)
2. Install the battery into the battery compartment. (Fig.2)
   - Replace the battery every 5 years with (P-01H-F2G1). To remove connector, depress the lock to release and slide (pull) apart connector. (Fig3)
CONNECTION

- The Power Switch of the KX-T123211 must be off during wiring.
  After all the wiring are completed, turn the Power Switch ON.
- Mis-Wiring may cause the KX-T123211 to operate improperly.
  Refer to "During Installation" page 6-1 and "During Connection" page 6-2.
- 50 pin configuration and Color coding
  (Refer to page 2-10.)
- Max. length and kind of wire
  (Refer to pages 2-8, 2-29, 2-30 and 2-34.)
- Insertion of Option Card
  (Refer to page 2-25.)
- Connection of printer
  (Refer to page 2-12.)
- If an extension does not operate properly (for example: The LCD of the KX-T123235/KX-T123230/KX-T61631/
  KX-T61630/KX-T30830 does not display properly.), disconnect the telephone from the extension line and then
  connect again, or turn OFF the power switch of the KX-T123211 and then ON again.

This product is equipped with a 3-wire grounding type plug, a plug having a third (grounding) pin. This plug
will only fit into a grounding-type power outlet. This is a safety feature. If you are unable to insert the plug
into the outlet, contact your electrician to replace your obsolete outlet. Do not defeat the purpose of the
grounding-type plug.

In areas of frequent electrical storms and/or power failures, we recommend for additional equipment
protection, surge protectors such as TELESPIKE BLOK MODEL TSB (TRIPPE MFG. CO.), SPIKE BLOK
MODEL SK6-0 (TRIPPE MFG. CO.), Super MAX™ (PANAMAX) or MP1 (ITW LINX).

Paging Speaker 1

Paging Speaker 2

Amplifier

Radio

Printer

AC Surge Protector

120V60Hz

Battery Adaptor KX-A26

Automobil type batteries
- Consisting of two 12VDC (24VDC)

Avoid using the same AC outlet for
office equipment and KX-T123211.
Use dedicated AC outlet only.
When the KX-T130830 is connected to the KX-T123211, enter “DSS Number” or “One Touch Dialing Button” to DSS button. See page 4-61.

- Parallel connections of telephone is impossible.
We recommend that telephone CO jack is used RJ11.

Insert the modular plug of the telephone line cord (2-conductor wiring) into the modular jack on the KX-T123211.

- Mis-connection may cause the KX-T123211 to operate improperly. See "During Installation" page 6-1 and "During Connection" page 6-2 before connecting.
To connect jack number 1 through 8 and 9 through 16, insert connector to the KX-T123211 as shown right.

**Connector type**
50 pin (Amphenol 57JE series or the equivalent)

**Cable Pin Numbers to be connected**
See page 2-10.

- The max. length of the extension line cord (twisted cable) that connects the KX-T123211 and the extension is shown below.

- If a telephone or answering machine with an A-A1 relay is connected to the KX-T123211, set the A-A1 relay switch of the telephone or answering machine to OFF.
- Mis-connection may cause the KX-T123211 to operate improperly.

See "During Installation" page 6-1 and "During Connection" page 6-2 before connecting.
To connect Amphenol 57JE type (screw-attach-type 50-pin connector) to the KX-T123211, follow the procedure below.

1. Loosen the three screws to move the metal bar aside.

2. Pull the Expansion Card (LC#1).

3. The 50-pin connector (JACK) on the Expansion Card has two hook-pins. Remove the upper hook-pin, taking out the screw.

4. To attach the Amphenol 57JE type (PLUG) to the connector, drive the accessory Screw at the upper part, and fasten the accessory Wire Tie around the lower hook-pin and the Amphenol 57JE type, as shown.

5. Replace the Expansion Card (LC#1).

6. To connect to the other Expansion Card (LC#2), repeat the steps 2 to 5.

7. Replace the bar and tighten the screws.
### Cable Pin Numbers to be connected

- **Connection of the KX-T123235 (Proprietary Telephone)**
  - **T**: Tip
  - **D1**: Data 1
  - **P1**: 3 Pair Voice
- **R**: Ring
  - **D2**: Data 2
  - **P2**: 3 Pair Voice

- **Connection of the Proprietary Telephone**
  Connect the only pin number of “T”, “R”, “D1” and “D2”.

### Station wiring (3-pair twisted cabling):

- **Connection of a Standard Telephone**
  Connect the only pin number of “T” and “R”.

---

![Diagram of 50 Pin Connector and Block Terminal](image)
Polarity Sensitive Telephone Connection

If the telephone you are using with the KX-T123211 is polarity sensitive.

1. Connect all extension wiring to the KX-T123211.

2. Confirm that dialing can be done from all the extensions using a tone telephone.

3. If a dialing cannot be done, the polarity between the extension and the KX-T123211 must be reversed.

4. Set the Power Switch on the KX-T123211 to the OFF position.

5. Connect all Central Office (CO) Lines.

6. Confirm that dialing can be done on the following extensions using a tone telephone.
   - Extension of jack number 1--CO1
   - Extension of jack number 2--CO2
   - Extension of jack number 9--CO5
   - Extension of jack number 10--CO6
   - Extension of jack number 17--CO9
   - Extension of jack number 18--CO10

7. If dialing cannot be done, the polarity between the KX-T123211 and the Central Office Line must be reversed.

8. If any extension is changed or replaced, repeat these procedures (from step 1 through step 7).
Serial Printer

Make cables so that the printer may be connected to the KX-T123211 as shown in the chart. Cables must be shielded and the maximum length is 6.5 feet.

- Panasonic data terminal:
  KX-D4910D, KX-D4911, KX-D4920, KX-D4985, etc.
  If you connect this unit to a Panasonic Data Terminal, the Communication Parameter Transmit XON / XOFF on the Data Terminal must be set to the "YES" position.
  For further details, see the Operating Instructions of the Data Terminal.

When using special accessories such as cable, the user should use those specified in this installation manual to comply with the limits for a Class A computing device pursuant to Subpart J of Part 15 of FCC Rules.

The pin configuration of EIA (RS-232C) connector is as follows.

</table>
EIA (RS-232C) SIGNALS:
Frame Ground (FG);
Connects to the unit frame and the earth ground conductor of the AC power cord.

Transmitted Data (TXD); (output)
Conveys signals from the unit to the printer. A "Mark" condition is held unless data or BREAK signals are being transmitted.

Received Data (RXD); (input)
Conveys signals from the printer.

Request To Send (RTS); (output)
This lead is held ON whenever DSR is ON.

Clear To Send (CTS); (input)
An ON condition of circuit CTS indicates that the printer is ready to receive data from the unit. The unit does not attempt to transfer data or receive data when circuit CTS is OFF.

Data Set Ready (DSR); (input)
An On condition of circuit DSR indicates the printer is ready. Circuit DSR ON does not indicate that communication has been established with the printer.

Signal Ground (SG);
Connects to the DC ground of the unit for all interface signal.

Data Terminal Ready (DTR); (output)
This signal line is turned ON by the unit to indicate that it is ON LINE. Circuit DTH ON does not indicate that communication has been established with the printer. It is switched OFF when the unit is OFF LINE.

Data Carrier Detect (DCD); (input)
The ON condition is an indication to data terminal (DTE) that the carrier signal is being received.

---

Communication parameter

1. If the Panasonic printer which is used has a (KX-P11D or KX-P17) board and is connected to the KX-T123211, set the communication parameters below.

<table>
<thead>
<tr>
<th></th>
<th>KX-T123211</th>
</tr>
</thead>
<tbody>
<tr>
<td>KX-P11D</td>
<td>DIP switch</td>
</tr>
<tr>
<td>Word length</td>
<td></td>
</tr>
<tr>
<td>Parity</td>

<td>SW2-8</td>
</tr>
</tbody>
</table>

2. If the Panasonic data terminal is a KX-D4985 or KX-D4920 and is connected to the KX-T123211, the default value of communication parameter is the same as that of the KX-T123211. If the KX-D4910D is connected to the KX-T123211, set the baud rate of the KX-D4910D to 1200 baud, the other default value is the same as that of the KX-T123211.
**Paging Equipment**

- Use an RCA connector.
  - Output impedance: 600Ω
- Use shielded cable.

**External Music Source**

- Use a two-conductor plug (9/64 inch in diameter)
  - Input impedance 5kΩ
  - Input Level -10dBm

- Please use a cord that has an internal resistance of 10Ω
- Adjust the sound level of the music on hold with the Volume control.
The optional cards are following.

OPTION (cont.)

Central Office Line

4 CO Lines (initial)

2, 4 or 6 CO Lines can be added.

- The following optional cards are necessary.
  - To add the 2 CO Lines       Expansion card KX-T123281
  - To add the 4 CO Lines       Expansion card KX-T123280
  - To add the 6 CO Lines       Expansion card KX-T123280 (2 cards)

Extension

16 extensions (initial)

4, 8, 12 or 16 extensions can be added.

- The following optional cards are necessary.
  - To add the 4 extensions      Expansion card KX-T123271
  - To add the 8 extensions      Expansion card KX-T123270
  - To add the 12 extensions     Expansion card KX-T123270
  - To add the 16 extensions     Expansion card KX-T123270 (2 cards)
The DSS console (KX-T123240 or KX-T61640) needs a paired telephone (EMSS Proprietary Telephone) for proper operation, because the DSS console cannot work by itself.

The DSS console lets you dial to the extension by simply pushing the DSS Button.

The programmable feature buttons on the DSS console let you access various features of the KX-T123211 and speed dialing using the CO line in addition to the numbers programmed into the KX-T123211's memory.

An EMSS Proprietary Telephone (such as KX-T123220, KX-T123230, KX-T123235, KX-T123250) is required as the paired telephone for dialing, storing, etc.

The following optional DSS Console and card are necessary.
- DSS Console KX-T123240 (32 DSS's, 16 Feature buttons)
- DSS Console KX-T61640 (16 DSS's, 16 Feature buttons)
- DSS Console Card KX-T123241

When using the KX-T123240 or KX-T61640, programming must be done. Refer to "Paired Telephone Assignment for DSS Console" page 3-10.
This feature enables access system from outside. For example, you can call the desired extension directly by dialing the extension number and the desired CO line directly by dialing the number 9 or trunk group access number, following the regular CO number.

The following optional card is necessary.
- Direct Inward System Access Card KX-T123291.

When execute a remote administration, the following optional card is necessary with DISA cards.
- MODEM Card KX-T123296

If outgoing message is necessary when receive a call from CO line, the following optional card is necessary with DISA cards.
- Outgoing Message Card KX-T123292

Programming must be done to use this feature.
Refer to "CO Mode (Normal / Direct In Line / Direct Inward System Access) Assignment" on page 3-57 and "Direct Inward System Access (DISA)" on page 3-42.

A rotary phone will not function.
Direct Inward System Access (cont.)

Operation

From outside of System

- Dial tone (First dial tone) will be heard.
- If the Outgoing Message Card is installed to KX-T123211, outgoing message will be heard instead of dial tone. (refer to page 2-21)

To call to Extension

- If Security Type is set to None Security or Trunk Security.
  
  Make a call to the line which is beforehand programmed as a DISA Line on the KX-T123211.
  
  Dial tone (First dial tone) will be heard.

To call to Extension

- If Security Type is set to All Security.
  
  Dial extension number (100 through 199)

To call to Extension

- If Security Type is set to None Security.
  
  Dial extension number (100 through 199)

To call to Extension

- If Security Type is set to Trunk Security or All Security.
  
  Dial extension number (100 through 199)

When disconnect CO line after finish CO to CO calling.

Dial "#" You will hear first or second dial tone

Hang up

To access the System

(Remote Administration)

Dial remote security code (70000 through 79999)

- Data Terminal equipment display as follows.

Welcome to KX-T123211 remote administration
ver 2.0 Panasonic CO., LTD

Jan. 1. 1988 12:00 AM

The "HLP" displays command informations

> [ ]

Please refer to the manual "EIA/REMOTE PROGRAMMING MANUAL".

Note

- Dial Security Code or Extension number or CO line access number in 10 seconds after outgoing message is finished or first, second dial tone are heard.
- If Outgoing Message Card is installed and outgoing message is not recorded, Direct Inward System Access (DISA) doesn’t work.
- When operator is registered in System, call to operator automatically and When operator is not registered in System, call to general Extension.
- When dial the wrong security code 3 times, the call is disconnected.
- It is necessary for security code to be programmed beforehand.
- DISA can receive up to 2 calls and can’t receive more than 3 calls at the same time.
Retry Function

When press the "*" button while hearing a ringback tone, reorder tone, busy tone or talking over the telephone, back to the situation of dial tone and you can call again, but you can't retry while calling CO line to extension with DISA.

Example

When Outgoing Message Card is not installed

(If Security Type is set to None Security or Trunk Security.)

Dial to KX-T123211 with DISA.

First dial tone will be heard.

Dial to extension.

When dial the wrong number or call another extension as nobody answers

Press the  button.

(If Security Type is set to All Security.)

Dial to KX-T123211 with DISA.

First dial tone will be heard.

Dial the User Security Code (60000 through 69999).

Second dial tone will be heard.

Dial to extension.

When dial the wrong number or call another extension as nobody answers

Press the  button.

If press the  button in case of as follows, the call will be disconnected.

- While outgoing message is heard.
- While dial tone (1st or 2nd) is heard.
- While Silence after outgoing message is finished.

When Outgoing Message Card is installed and outgoing message is not recorded, the call which is sent to DISA CO is sent to general extension.

Time Over of Receiving Call

When time over of receiving call, the call moves as follows.

When outgoing message is registered.

Dial to KX-T123211 with DISA.

Outgoing message will be heard.

Silence

(If you don’t dial in 10 seconds after outgoing message is finished, or dial the wrong number.)

(When operator is registered in System)

Call the Operator

(When operator is not registered in System)

Reorder Tone will be heard.

If the  button is not pressed in 10 seconds, the call will be disconnected.

If the  button is pressed in 10 seconds, First dial tone will be heard and you can enter.

When Outgoing Message Card is not installed

Dial to KX-T123211 with DISA.

First dial tone will be heard.

(If you don’t dial in 10 seconds)

Reorder Tone will be heard.

If the  button is not pressed in 10 seconds, the call will be disconnected.

If the  button is pressed in 10 seconds, First dial tone will be heard.
Direct Inward System Access (cont.)

To extend the call duration time while calling CO line

- If you call to any outside line using DISA, the KX-T123211 will disconnect the call from the line after 10 minutes. For changing the time, see “CO to CO Duration Time Limit” on page 3-30.
  3 beeps tone will be heard every 5 seconds for 15 seconds before the call is disconnected from the line.
If you press button except the [ ] button in 15 seconds, the call duration time can be extended 5 minutes.
1 beep tone will be heard when button except the [ ] is accepted. For changing the time, see “Direct Inward System Access” on page 3-42.

Outgoing Message

Enable to send outgoing message to the telephone called with DISA.
Refer to page 4-66 as to the registration of outgoing message.

Example
This is ABC company. Would you dial to your desired post? Operator number is 00, Business is 100 and Account’s department is 180.

Operator

If operator is registered in System Program and outgoing message has been recorded, the call is sent to operator automatically.
- When time out
- When the called extension doesn’t answer in 20 seconds.
- When the called extension is set to Do Not Disturb.

Security Code

Security Code is used to protect from abusing system with DISA.

User Security Code
User Security Code is used when dial to extension or CO line with DISA.
- Security code can be set by 3 modes as follows.
  - None Security
    This is the mode in which Security Code is unnecessary when dialing both extension and outside line.
  - Trunk Security
    This is the mode in which Security Code is necessary when dialing an outside line, but unnecessary when dialing an extension.
  - All Security
    This is the mode in which Security Code is necessary when dialing both extension and outside line.
- User Security Code can be set by 4 types.
  - User Security Code 1:60000
  - User Security Code 4:60000
    enable to enter last 4 digits with program mode

Remote Security Code
Remote Security Code is used when Remote Administration is done with DISA.
- Remote Security Code can be set by 1 type.
  - Remote Security code:70000
    enable to enter last 4 digits with program mode

LIST OF TONES

1st dial tone
2nd dial tone
Reorder tone
Busy tone
Ringback tone
Disconnect warning tone
Prolong confirmation tone
OPTION (cont.)

Off Premise Extension (OPX)

Enables a standard telephone installed outside the premise to work as an extension through public or private rate lines (under 6 miles).

![Diagram of KX-T123211, KX-T123286, and standard telephone connected via Under 6 miles, Jack number 32, and Jack number 31]

- The following optional card and unit are necessary.
  - Off Premise Extension (OPX) Card KX-T123285
  - Off Premise Extension (OPX) Unit KX-T123286

- Programming is necessary to use this feature. Refer to "Off Premise Extension" on page 3-45.

- OPX can’t function with Doorphone.
- The Ring Tone from extension or CO line are as follows.

```
[1 sec]
```

Doorphone

The doorphone can be installed to the KX-T123211.

![Diagram of KX-T123211 connected via Doorphone 1 and Doorphone 2]

- The following optional doorphone and adaptor are necessary.
  - Doorphone KX-T30865
  - Doorphone adaptor KX-T30860D (only)
Diagnosis

By using data terminal connected to RS-232C on KX-T123211 or remote data terminal connected to KX-T123211 through MODEM, diagnosis of KX-T123211 system can be done.

Remote Administration

![Remote Administration Diagram]

The following optional cards are necessary.
- Diagnostic Card KX-T123295
- Direct Inward System Access Cards KX-T123291
- MODEM Card KX-T123296

On-Site Administration

![On-Site Administration Diagram]

The following card is necessary.
- Diagnostic Card KX-T123295
KX-T123211's diagnostic feature has two command systems. One is a “Test commands” system which actually executes the diagnostic process, and the other is a “Control commands” system which controls the state of diagnosis.

1. **All components test**
   
   The system consecutively executes test items as following description.

2. **CPU card and system control circuit test**
   
   The system executes the test of i/o circuit, real time clock chip on the CPU card and i/o circuit on each card. This is the basic test on the KX-T123211 system. You should execute this test at first, because, if i/o circuits have defects, the following test items will be meaningless.

3. **Cross point card test**
   
   The system executes the test of DTMF generator and receivers at first, and executes the test of the cross point switch circuits.

4. **CO card test**
   
   This test allows you to check of relays, analogue switches, bell detection circuits CPC/LOOP current detection circuits and bidirectional amplifiers on the CO card no. 1 through no. 3.

5. **Line circuit (LC) card test**
   
   The system executes the test of loop current sources, ringing relays, hook detection circuits and ring trip circuits on each LC card. And it will execute the check of data communication capability on the LC cards and DSS console interface card.

6. **DISA module and OGM card test**
   
   The KX-T123211 system allows you to test the DISA-A card which controls all the DISA system, the DISA-B card which consists of crosspoint switches etc. and the OGM card which consists of voice processors etc.

7. **OPX interface card and unit box test**
   
   Off premise extension (OPX) test allows you to check the OPX interface card which consists of the bi-directional amplifiers and analogue switches, and the OPX unit box which consists of hook detectors, ring trip circuits, loop current sources, ringing generators and so on.

8. **MODEM card test**
   
   This test allows you to check the digital and analogue circuits on the MODEM chip with 300 bps and 1200 bps communication speed. You can use this test on the on-site diagnostic mode only.
1. To protect the printed circuit board from static electricity, first discharge any body static by touching the metal board.

2. Loosen the screws to remove the metal board.

3. The location of the optional cards for the KX-T123211 is shown in the following.

- Insert the optional card with holding a levers of the card into the KX-T123211 surely. Do not touch parts on the card.
OPTION (cont.)

Extension Connection (Jack number 17 through 24)

To add eight extensions (jack number 17 through 24), use the optional expansion card KX-T123270.
To add four extensions (jack number 17 through 20), use the optional expansion card KX-T123271.

1. Insert the expansion card KX-T123270 or KX-T123271 into the KX-T123211.
2. Insert connector to the KX-T123270 or KX-T123271 as shown at right.

Cable Pin Numbers to be connected
See page 2-10.
- Mis-connection may cause the KX-T123211 to operate improperly.
- See "During Installation" page 6-1 and "During Connection" page 6-2 before connecting.

To Extensions (jack number 17 through 20, or 17 through 24)

Extension Connection (Jack number 25 through 32)

To add eight extensions (jack number 25 through 32), use the optional expansion card KX-T123270.
To add four extensions (jack number 25 through 28), use the optional expansion card KX-T123271.

1. Insert the expansion card KX-T123270 or KX-T123271 into the KX-T123211.
2. Insert connector to the KX-T123270 or KX-T123271 as shown at right.

Cable Pin Numbers to be connected
See page 2-10.
- Mis-connection may cause the KX-T123211 to operate improperly.
- See "During Installation" page 6-1 and "During Connection" page 6-2 before connecting.

To Extensions (jack number 25 through 28, or 25 through 32)
Central Office Line Connection (CO 9 through 12)

To add four Central Office Lines (CO 9 through 12), use the optional expansion card KX-T123280.

1. Insert the expansion card KX-T123280 into the KX-T123211.

2. Insert the modular plug of the telephone line cord (2-conductor wiring) into the modular jack on the KX-T123280.

- Mis-connection may cause the KX-T123211 to operate improperly. See “During Installation” page 6-1 and “During Connection” page 6-2 before connecting.

Central Office Line Connection (CO9 and 10)

To add two Central Office lines (CO9 and CO10), use the optional expansion card KX-T123281.

1. Insert the expansion card KX-T123281 into the KX-T123211.

2. Insert the modular plug of the telephone line cord (2-conductor wiring) into the modular jack on the KX-T123281.

- Mis-connection may cause the KX-T123211 to operate improperly. See “During Installation” page 6-1 and “During Connection” page 6-2 before connecting.

To Terminal Board or Modular Jacks from the Central Office (CO).

Use 2-conductor wiring cord
To add four Central Office lines (CO5 through 8), use the optional expansion card KX-T123280.

1. Insert the expansion card KX-T123280 into the KX-T123211.

2. Insert the modular plug of the telephone line cord (2-conductor wiring) into the modular jack on the KX-T123280.

- Mis-connection may cause the KX-T123211 to operate improperly. See "During Installation" page 6-1 and "During Connection" page 6-2 before connecting.
DSS Console Connection (KX-T123240/KX-T61640)

To connect the optional DSS Console (KX-T123240 or KX-T61640), the optional DSS Console card (KX-T123241) is required.

The DSS Console (KX-T123240 or KX-T61640) needs a paired Telephone (EMSS Proprietary Telephone) for proper operation, because the DSS console cannot work by itself. The EMSS Proprietary Telephone (such as KX-T123220, KX-T123230, KX-T123235, KX-T123250) is required as the paired telephone for dialing, storing, etc.

Place the KX-T123240 or KX-T61640 and the paired telephone side by side on your desk.

1. Insert the DSS Console card (KX-T123241) into the KX-T123211
2. Insert the modular plug of the console line cord (4-conductor wiring) into the modular jack on the KX-T123241.

"DSS" is written on the Card.

Notes:
- Up to 2 KX-T123240's or KX-T61640's can be connected to the KX-T123211. Each console requires its own paired telephone.
- KX-T123240 or KX-T61640 can not be connected in pair with a standard telephone.
- The max. length of the console line cord (twisted cable) that connects the KX-T123211 with the DSS Console is shown below.

When using the KX-T123240 or KX-T61640, program must be done. Refer to "Paired Telephone Assignment for DSS Console" page 3-10.
OFF PREMISE EXTENSION CARD (KX-T123285)

Enables a standard telephone installed outside the premise to work as an extension through public or private lines. To avail of this feature, an optional Off Premise Extension Unit KX-T123286 is necessary aside from KX-T123285.

1. Insert the Off Premise Extension Card KX-T123285 into the KX-T123211.
2. Insert the connector from the KX-T123286 to the Off Premise Extension Card.
3. Insert the modular plug of the Standard Telephone Line (2-conductor wiring) into the modular jack on the KX-T123286.
4. Connect the frame of the KX-T123286 to earth ground properly to protect the unit.
5. Plug in the AC Power cord from the KX-T123286.
6. Turn on the Power Switch on the KX-T123286. The Power indicator will be lit.

Programming must be done to use this feature. Refer to "Off Premise Extension" on page 3-45.

Primary Power Fuse, (800 mA, 250 V) x1: If the Power Indicator light goes off, the Primary Power Fuse must be replaced after remove the cause.
This feature enables to access System from outside of System and then call to extension or outside line. For example, you can call the desired extension directly by dialing the extension number following the regular CO number. Optional KX-T123292 card is necessary to program KX-T123211 to send Outgoing Message when called with this feature.

1. Insert the Direct Inward System Access Cards A and B into the KX-T123211.

"DISA-A" and "DISA-B" are written on each Card.

Outgoing Message Card KX-T123292 (for Direct Inward System Access)

An Outgoing Message can be sent from the KX-T123211 when a call is received using the "Direct Inward System Access" feature.

1. Insert the Outgoing Message Card KX-T123292 into the KX-T123211.

"OGM" is written on the Card.

For how to record Outgoing Message, refer to "Outgoing Message" on page 4-67.
OPTION (cont.)

Diagnostic Card (KX-T123295)

By using the data terminal connected to RS-232C on KX-T123211 or remote data terminal connected to KX-T123211 through MODEM, diagnosis of KX-T123211 system can be done.

Remote administration

- The following optional cards are necessary.
  - Diagnostic Card KX-T123295
  - Direct Inward System Access Cards KX-T123291
  (See page 2-31)
  - MODEM Card KX-T123296
  (See page 2-32)

Data terminal equipment

1. Insert the Diagnostic Card KX-T123295 into the KX-T123211.

“DIAG” is written on the Card.

On-site administration

- The following card is necessary.
  - Diagnostic Card KX-T123295

Data terminal equipment

1. Insert the MODEM Card KX-T123296 into the KX-T123211.

“MODEM” is written on the Card.

MODEM Card (KX-T123296)

This card is necessary for data communication to execute confirmation or registration of System data or diagnosis of the System using remote data terminal equipment.

1. Insert the MODEM Card KX-T123296 into the KX-T123211.
For installing the doorphone, use the Optional Doorphone Adaptor (Use the KX-T30860D only).

**Installation of the doorphone**

1. Loosen the screw to separate the doorphone into 2 halves.

2. Install the lower case to the wall with 2 screws.
   - 2 kinds of screws are included. Please choose according to your wall type. See the followings.

   ![Doorphone installation diagram](image)

   - When the doorphone plate has been fixed to the wall.
   - When you wish to install the doorphone directly to the wall.

3. Connect the wires from the terminal box to the screws located in the upper case.
   - to the terminal box (See page 2-34)

4. Secure both halves together and re-install the screw.

**Installation of the Doorphone Adaptor**

How to install the Doorphone Adaptor into the KX-T123211

1. Connect a 4-conductor modular connector to the doorphone adapter.

   ![Doorphone adaptor diagram](image)

   - 4-conductor wiring is required

2. Install the doorphone adapter into the adaptor compartment.

3. After drawing a CPU Card, insert the adaptor connector into connector on the CPU Card (circuit board).

   ![Diagram of CPU Card and adaptor](image)
Doorphone Wiring

(A) Connect the doorphone adaptor to the terminal box using a 4-conductor modular connector.
(B) Connect the wires of doorphone 1 to the red and green screws of the terminal box.
(C) Connect the wires of doorphone 2 to the yellow and black screws of the terminal box.

- The max. length of the telephone line cord (twisted cable) that connects the KX-T123211 and the doorphone (KX-T30865) is shown below.

Battery Adaptor Connection (KX-A26)

Automobile type batteries which customer supplied is available as a backup power supply of the KX-T123211 to operate all the features in the event of power failure.

For connecting automobile type batteries, use the Optional Battery Adaptor KX-A26.

1. Connect the Battery Adaptor KX-A26 to automobile type batteries.
2. Connect the Battery Adaptor KX-A26 to the Battery Backup Connector of the KX-T123211.
To activate this system, the requirements from telephone company and the customer must be programmed once the Power Switch has been turned on.

### Programming Instructions

1. At extension connected to jack number 01: All system programming changes (example: system clear, toll restriction, system speed dialing entry...) are done through extension connected to jack number 01.

   - Extension connected to jack number 01 must always be a Panasonic model, KX-T123230 or KX-T123235.

2. System Program Switch setting:
   The System Program Switch located on the KX-T123211 must be set to the “PITS” (Proprietary Integrated Telephone System) position while making program change. After all programming changes are completed, return the program switch to the “SET” position.

3. Overlay:
   This overlay is used for programming the system and the program function names are inscribed on this card. Refer to page 3-2.

4. Before system programming, operate the system clear to set to the default data of the program. See page 3-78.

   System Clear:
   - Set the System Program Switch of the KX-T123211 to the “PITS” position.

   1. Dial (99).
      “System Clear” will be displayed.

   2. Press the NEXT button.

   3. Repeat pressing the SELECT button until the “Menu: All Para” is displayed.

   4. Press the MEMORY button to clear system.

5. To return to the initial program mode, press the END button.

- The following parameters are preset as the default data.
  - System parameters
  - CO parameters
  - Extension parameters
  - DSS parameters
  - Speed dial
When the System Program Switch on the KX-T123211 is set to the "PITS" position, the function of the KX-T123230 or KX-T123235 connected to jack number 01 will change as follows.
Example of Programming

1. Turn the Power Switch ON.

2. Set the System Program Switch to "PITS" position.
   The LCD on the KX-T123230 or KX-T123235 will show "SYS-PGM NO ?".
   - Be sure the handset of the extension connected to jack number 01 is in the cradle and the speakerphone button is off.

3. To program automatic line access number 9 and the phone number 987-654-3210 into speed access code 00. (Refer to page 3-5.)

<table>
<thead>
<tr>
<th>KX-T123230 or KX-T123235 at extension connected to jack number 01. (Extension connected to jack number 01 must be a KX-T123230 or KX-T123235.)</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Dial (01) or press the AUTO button. Display .Speed Dialing</td>
</tr>
<tr>
<td>2. Press the NEXT button. Display .Speed NO? →</td>
</tr>
</tbody>
</table>
   | 3. Dial (00) or press the NEXT button. 
     - If nothing is stored in access code "00", 00: Not Stored
     - If already stored the automatic line access number 9 and the phone number 123-456-7890, 00: 9-123-456-789 |
   | 4. ① Dial "9". ② Press " - " button. ③ Dial "987". ④ Press " - " button. ⑤ Dial "654". ⑥ Press " - " button. ⑦ Dial "3210". Display 00: -987-654-3210 |
   | 5. Press the MEMORY button. Display 00: -987-654-3210 |
   | 6. ① To program the next access code, press the NEXT button. ② To program a desired access code, press the SELECT button and dial speed access code. |
   | 7. Repeat steps 4 to 6. |
   | 8. To return to the initial program mode, press the END button. Display SYS-PGM NO ? → |

4. Return the System Program Switch to "SET" position.
   - To make program change, start from the beginning.

If you make a mistake while programming,
1. Press the "END" button.
2. Start programming procedure from the beginning.

   - You will hear a beep after pressing the MEMORY button.
   - The MEMORY indicator light will go on when the MEMORY button is pressed, and then the Indicator light will go out when the NEXT or PREV button is pressed.
Description
Entry of the current day, date and time.

Programming
1. Dial (00).
   “Day/Time Set” will be displayed.

2. Press the NEXT button.
   “’88 Jan.1 FRI” will be displayed and “’88” will blink.

3. Enter the year (last 2 digits) using the dialing button.

4. Press the  button and then repeat pressing the SELECT button until the desired month is displayed.

5. Press the  button and then enter the day with 1 or 2 digits.

6. Press the  button and then repeat pressing the SELECT button until the desired day of the week is displayed.

7. Press the  button. “12:00 AM” will be displayed.

8. Enter the hour with 1 or 2 digits.

9. Press the  button and then enter the minute with 2 digits.

10. Press the  button and then repeat pressing the SELECT button until the desired AM/PM is displayed.

11. Press the MEMORY button.

12. To return to the initial program mode, press the END button.

Condition
- If  button is pressed, the display will return to the previous sequence in the programming step.

- Instantly after pressing the MEMORY button, the new time will start. However, the LCD of extension connected to jack number 01 will display the new time only after the System Program Switch is set to “SET”.
System Speed Dialing Entry

**Description**

100 system phone numbers can be stored with each number capable of storing 32 digits and may be accessed from any extension. Pushing the "#", "*", "PAUSE", "", "FLASH" or "ICM (Secret)" button counts as 1 digit. Refer to "Speed Dialing" on page 4-3.

**Programming**

1. Dial (01) or press the AUTO button. "Speed Dialing" will be displayed.

2. Press the NEXT button. "Speed NO?—" will be displayed.

3. Dial (00 through 99) or press the NEXT button, for speed access code entry.

Example:
When dialing (00) or pressing the NEXT button.
- The LCD will show "00:Not Stored" when nothing is stored in speed access code "00". When the automatic line access number 9 and the phone number 123-456-7890 are stored, "00: 9- 123- 456- 7890" will be displayed.

4. Enter automatic line access number or trunk group number. See page 4-2, regarding automatic selection. See page 3-52 and 4-3, regarding trunk group.
- 9 : automatic line access number
- 81 : access number of trunk group 1
- 82 : access number of trunk group 2
- 83 : access number of trunk group 3
- 84 : access number of trunk group 4
- 85 : access number of trunk group 5
- 86 : access number of trunk group 6
- 87 : access number of trunk group 7
- 88 : access number of trunk group 8

5. Enter the phone number.
- You may enter punctuations in a phone number.
- To erase a wrong entry, press the CLEAR button.
- When you don't want to display the dialed phone number, press the ICM (SECRET) button before and after dialing the phone number. Do not press the ICM button before line access number (9 or 81 through 88) and account code.

Example:
9-123- ICM 456 ICM

press the ICM button

The display shows as follows when programming.

01 : 9-123 [456]

The display shows as follows when dialing.

-123...
6. Press the MEMORY button.
   - The memory indicator will be lit.

7. To advance to the next speed access code, press the NEXT button.
   - To return to the previous speed access code, press the PREV button.
   - To go to the desired speed access code, press the SELECT button and then dial the speed access code.

8. Repeat steps 4 to 7, to program the other phone numbers.

9. To return to the initial program mode, press the END button.

**Conditions**

- Use the "→" or "←" button for scrolling the display.
- Automatic line access number 9 or trunk group access number (81 through 88) must be stored.
- When dialing, the pause is automatically entered after automatic line access number 9 or trunk group access number (81 through 88) has been dialed.
- Continuous use of speed dialing is possible.

**Example:**

```
[AUTO] 01 [AUTO] 02
```

In this case, speed access code "02" should not include the automatic line access number or trunk group access number.

- When dialing, the dialed number will be displayed on the LCD of the KX-T123230 / KX-T123235 / KX-T61631 / KX-T61630 / KX-T30830.
- The limit of the LCD is 16 characters but will scroll all numbers stored.
- To erase all entries, refer to "System Data Clear" on page 3-78.

There is a blank phone number directory on page 7-1.
Example 1) To enter trunk group access number 81 and telephone number 201-392-4669 into speed access code 00.

(01 NEXT 00 81 201-392-4669 MEMORY END)

- Speed access code
- Telephone number
- Trunk group access number

- If punctuation is not entered in a phone number, the LCD will show as below.
  (00 : 812013924669)

2) To enter automatic line access number 9, account code 1234 and telephone number 201-392-4669 into speed access code 02.

(01 NEXT 02 9 * * 1234 201-392-4669 MEMORY END)

- Speed access code
- Telephone number
- Account code
- Automatic line access number

- Refer to “Account code Input mode” page 3-71 and “Account code” page 4-40.

3) To access MCI

(01 NEXT 01 9 123-4567 PAUSE PAUSE 9876 201-348-7000 MEMORY END)

- Speed access code
- MCI number
- Security code
- Telephone number
- PAUSE button
- Automatic line access number

4) To access ITT

(01 NEXT 02 81 765-4321 PAUSE PAUSE 201-348-7000 6789 MEMORY END)

- Speed access code
- ITT number
- Telephone number
- Security code
- PAUSE button
- Trunk group access number

When required to change the dialing mode from the pulse mode to the tone mode. (See page 4-49)

(01 NEXT 02 81 765-4321 * # PAUSE PAUSE 201-348-7000 6789 MEMORY END)

- Pulse mode
- Tone mode
- # button
- * button
Extension Number Assignment

until the desired Jack number (01 through 32) appears

- CDE = 100 : to assign phone number 100
- 199 : to assign phone number 199

default

- 101 is assigned to extension of Jack number 01
- 132 is assigned to extension of Jack number 32

- AB = 01 : to assign to Jack number 01
- 32 : to assign to Jack number 32

Description

Enables programming of a 3 digits extension number (100 through 199) for each extension phone. This provides the freedom to develop a logical extension numbering system by department or by building floor as desired.

Programming

1. Dial (02).
   “Extension No Set” will be displayed.
2. Press the NEXT button.
   “Jack NO ? +” will be displayed.
3. Press the NEXT button or dial the Jack number (01 through 32).
   “Jack 01 : EXT101” will be displayed and “101” will blink.
4. Dial the extension number which is set newly (100 through 199).
   - When dialing (150), the LCD will show “Jack 01 : EXT150” will be displayed.
   - To erase a wrong entry, press the CLEAR button.
5. Press the MEMORY button.
6. To advance to the next jack number, press the NEXT button.
   - To return to the previous jack number, press the PREV button.
   - To go to the desired jack number, press the SELECT button and then dial the jack number.
7. Repeat steps 4 to 6, to program the extension number on the other jack number.
8. To return to the initial program mode, press the END button.
   - The LCD will show the initial program mode, “SYS-PGM NO ? +”.

Conditions

- The extension number that has been already programmed can not be entered. In case programmed extension number is the same as what was previously stored, when the MEMORY button is pressed, three beeps will be heard.
- When the extension number 125 have been already assigned to the jack number 25, for programming to assign the extension number 125 to the jack number 02, after programming to assign the other extension number (100 through 199) to the jack number 25, program to assign the extension number 125 to the jack number 02.

Programming Table

See page 7-3.
Description
Up to 2 of any extensions can be selected as the operator extensions. 00 can be dialed to call operator 1, and 01 can be dialed to call operator 2. “CO Mode (Direct In Line) Assignment (on page 3-57)” can be used to program all incoming calls to be answered by the operator.

Programming
1. Dial (03). “Operator Ext” will be displayed.
2. Press the NEXT button. “Operate NO?—” will be displayed.
3. Press the NEXT button. “OPT1 : Disable” will be displayed and “Disable” will blink.
4. Dial the jack number which is set the operator 1.
   • When you dial (01), “OPT1 : Jack-01” will be displayed.
5. Press the MEMORY button. The LCD will stop blinking.
6. Repeat steps 3 to 5, to program the jack number which is set the operator 2.
7. To return to the initial program mode, press the END button.

Conditions
To clear the jack number which is set the operator, press the CLEAR button at step 4.

Programming Table
See page 7-3.
Description
The extension number paired with the DSS Console (KX-T123240) must be assigned when the DSS Console is used. The jack number of the extension phone is programmed to identify the paired phone. Up to two DSS Consoles can be used for each 32 extension phones. When all incoming calls on outside lines are set (using “CO Mode Assignment” on page 3-57) to ring at the operator extension phone, assigning the DSS Console to the operator extension will make the operator's job much easier.

Programming
1. Dial (04)
   "DSS Assign" will be displayed.
2. Press the NEXT button.
   "DSS NO ? + " will be displayed.
3. Press the NEXT button.
   "DSS 1 : Jack - 01" will be displayed and "01" will blink.
4. Dial the jack number which is paired with the console 1.
5. Press the MEMORY button.
   The LCD will stop blinking.
   ● If console 2 is not connected, proceed to step 9.
6. Press the NEXT button.
   "DSS 2 : Jack - 02" will be displayed and "02" will blink.
7. Dial the jack number which is paired with the console 2.
8. Press the MEMORY button.
   The LCD will stop blinking.
9. To return to the initial program mode, press the END button.

Conditions
● Up to two DSS consoles can be connected.
● The DSS console cannot be connected in pair with a standard telephone.
● Two DSS consoles can't be entered to one jack number.

Example:
If Mr. Jay's secretary has KX-T123230 at extension jack number 10 and it is to use the DSS console (KX-T123240), the console should be connected to the modular jack (marked MJ1) of the DSS card (KX-T123241).
(Paired extension is jack number 10.)
If Mr. Brown's secretary has KX-T123220 at extension jack number 20 and it is to use the DSS console (KX-T123240), the console should be connected to the modular jack (marked MJ2) of the DSS card (KX-T123241).
(Paired extension is jack number 20.)

Programming Table
See page 7-3.
Automatic CO Hold Using DSS Button

until the desired mode appears

With Transfer—default
Without Transfer

[05] NEXT [SELECT] [MEMORY] [END]

Description
Outside calls can be transferred to any extension manually.
- While an extension paired with the DSS Console having a conversation with outside calls, “With Transfer” mode allows you to transfer outside call by only pressing the DSS button of the DSS Console.
- While an extension paired with the DSS Console having a conversation with outside calls, “Without Transfer” mode allows you to transfer outside call by pressing the TRANSFER button and then DSS button of the DSS Console.

Programming Table
See page 7-3.

Programming
1. Dial (05).
   “DSS Mode” will be displayed.
2. Press the NEXT button.
   “With Transfer” will be displayed and blink.
3. Repeat pressing the SFI FCT button to alternate between “With Transfer” and “Without Transfer” to select the desired mode.
4. Press the MEMORY button.
   The LCD will stop blinking.
5. To return to the initial program mode, press the END button.

Day/Night Service Mode

Switching of Service Mode

until the desired mode appears

<table>
<thead>
<tr>
<th>Man</th>
<th>Day/Night service is manually switched</th>
<th>default</th>
</tr>
</thead>
<tbody>
<tr>
<td>Auto</td>
<td>Day/Night service is automatically switched</td>
<td></td>
</tr>
</tbody>
</table>

06 NEXT SELECT MEMORY END

Description

Allows Day/Night service to be selected manually or automatically.

In case of manual switching, refer to "Flexible Night Service" on page 4-38.

In case of automatic switching, set the "Starting Time (Day/Night Service mode)" on page 3-13.

The following features will be switched Day mode or Night mode.

- "Flexible Outward Dialing Assignment" on page 3-53.
- "Flexible Ringing Assignment" on page 3-54.
- "Delayed Ringing Assignment" on page 3-56.
- "CO Mode (Normal/Direct In Line/Direct Inward System Access) Assignment" on page 3-57.
- "Service Class Assignment of Toll Restriction" on page 3-67.
- "Ringing Assignment of Doorphone" on page 3-76.

Programming

1. Dial (06).
   "Day/Night Mode" will be displayed.

2. Press the NEXT button.
   "Mode Change : Man" will be displayed and "Man" will blink.

3. Press the SELECT button to alternate between "Man" and "Auto" to select the desired mode.

4. Press the MEMORY button.
   The LCD will stop blinking.

5. To return to the initial program mode, press the END button.

Conditions

When the Switching of Service Mode (Day/Night Service Mode) is set to "Auto", the present Day/Night Service mode will not change after you finish programming. To change the present mode, manual operation is required. After you select the Starting time (Day/Night Service Mode) on page 3-13, select the present Day/Night mode by "Flexible Night Service" on page 4-38.

Programming Table

See page 7-4.
Starting Time

Until the desired day of the week appears

**AB**
- 1: to start at 1 o'clock for day service
- 9: to start at 9 o'clock for day service (default)
- 12: to start at 12 o'clock for day service

**CD**
- 00: to start at 0 minute (default)
- 59: to start at 59 minutes

until the desired mode appears

- AM (default)
- PM

**EF**
- 1: to start at 1 o'clock for night service
- 5: to start at 5 o'clock for night service (default)
- 12: to start at 12 o'clock for night service

**GH**
- 00: to start at 0 minute (default)
- 59: to start at 59 minutes

until the desired mode appears

- PM (default)
- AM

(To advance to the next day of the week)
Description

If you select the automatic switching mode for day/night service, enter the starting time.
Starting time can be programed for every day of the week. Refer to “Switching of Service Mode (Day/Night Service Mode)” on page 3-12.

Programming

1. Dial (07).
   “Day/Night Time” will be displayed.

2. Press the NEXT button.
   “Day of The Week” will be displayed.

3. Press the NEXT button.
   “Sunday” will be displayed.
   • To advance to the next day.
   Press the NEXT button.
   • To return to the previous day.
   Press the PREV button.

4. Press the SELECT button.
   “Day: 9:00 AM” or “Day: None” will be displayed as the default value and “Day” will blink.

5. Press the “→” button.
   “9” or “None” will blink.
   • If “Day: None” is displayed, press the SELECT button.
   “Day: 9:00 AM” will be displayed.

6. Enter the starting hour for day service using 1 or 2 digits.
   • To set a same mode as last night mode, press the SELECT button and then proceed to step 19.
   • To erase a wrong entry, press the CLEAR button.

7. Press the “←” button.
   “00” will blink.

8. Enter the minutes using 2 digits.

9. Press the “→” button.
   “AM” will blink.

10. Press the SELECT button to alternate between “AM” and “PM” to select the correct setting.

11. Press the MEMORY button.
    The LCD will stop blinking.

12. Press the SELECT button.
    “Night: 5:00 PM” or “Night: None” will be displayed as the default value and “Night” will blink.

13. Press the “→” button.
    “5” or “None” will blink.
    • If “Night: None” will be displayed, press the SELECT button.
    “Night: 5:00 PM” will be displayed.

14. Enter the starting time for night service using 1 or 2 digits.
    • To set a same mode as last day made, press the SELECT button and then proceed to step 19.

15. Press the “→” button.
    “00” will blink.

16. Enter the minutes using 2 digits.

17. Press the “→” button.
    “PM” will blink.

18. Press the SELECT button to alternate between “AM” and “PM” to select the correct setting.

19. Press the MEMORY button.
    The LCD will stop blinking.

20. • To advance to the next day of the week, press the NEXT button.
    • To return to the previous day of the week, press the PREV button.

21. Repeat steps 4 to 20 to program the starting times for each day of the week.

22. To return to the initial program mode, press the END button.

Programming Table

See page 7-4.
Call Hunting

Setting

Description
Enables programming to automatically locate an idle extension within the same extension group as the dialed extension when the dialed extension number is busy. Call Hunting is set by group units. “Extension Group Assignment” (on page 3-66) is used to specify which extensions belong to each group.

Programming
1. Dial (08).
“Hunting Group” will be displayed.

2. Press the NEXT button.
“Group NO ? → ” will be displayed.

3. Press the NEXT button or dial the extension group number (1 through 8).
“Group 1 : Disable” will be displayed and “Disable” will blink.

4. Press the SELECT button to alternate between “Disable” and “Enable”.

5. Press the MEMORY button. The LCD will stop blinking.

6. To advance to the next extension group number, press the NEXT button.
To return to the previous extension group number, press the PREV button.
To go to the desired extension group number, press the SELECT button and then dial the extension group number.

7. Repeat steps 4 to 6, to program the assignment of the other hunting groups.

8. To return to the initial program mode, press the END button.

Conditions
- When you dial “*” instead of pressing the NEXT button at step 3, in case all of 8 groups have been programmed to “Disable”, “Group *: Disable” will be displayed. In case each of 8 groups has been programmed either “Disable” or “Enable”, “Group *: Mixed” will be displayed.

Programming Table
See page 7-4.
Hunting Type

until the desired extension group number (1 through 8) appears.
until the desired hunting type appears
  Terminate : searching for larger jack numbers upward ...... default (all 8 groups)
  Circular : circular searching for other numbers

Discription
Specifies the order in which idle extensions are searched when “Call Hunting” is used.
The “Terminate Mode” searches for idle extensions with a higher order extension than the jack number of the dialed extension, and terminates when the search reaches the highest jack number of extension in the same group. If all higher order numbers are busy, a busy tone will be heard.
The “Circular Mode” searches for any idle extension in the same group.
If all extensions are busy, a busy tone will be heard.
The “Setting (Call Hunting)” on page 3-15 must be set to “Enable” mode for Hunting Type to be used.

Programming
1. Dial (09).
   “Hunting Type” will be displayed.
2. Press the NEXT button.
   “Group NO ? →” will be displayed.
3. Press the NEXT button or dial the extension group number (1 through 8).
   “Group 1 : Terminate” will be displayed and “Terminate” will blink.
4. Press the SELECT button to alternate between “Terminate” and “Circular”.
5. Press the MEMORY button.
The LCD will stop blinking.
6. • To advance to the next extension group number, press the NEXT button.
   • To return to the previous extension group number, press the PREV button.
   • To go to the desired extension group number, press the SELECT button and then dial the extension group number.
7. Repeat steps 4 to 6, to program the hunting Type of the other groups.
8. To return to the initial program mode, press the END button.

Programming Table
See page 7 4.
The selective use of this feature permits restricted dialing to specific stations. A Class of Service can be assigned to a particular station which prohibits or limits that station's dialing ability. The following are the available eight Classes of Service.

<table>

10 NEXT SELECT MEMORY END

Description

Area types specific to local telephone numbers can be selected for toll restrictions. There are three area types available as shown below.

Type A: Toll calls (long distance) .............................................. 1 Area code Exchange code Subscriber number
Local calls Exchange code Subscriber number

Type B: Toll calls (long distance) ..................................................... Area code Exchange code Subscriber number
Local calls Exchange code Subscriber number

Type C: Toll calls (long distance) .............................................. 1 Area code Exchange code Subscriber number
Local calls (charge) Exchange code Subscriber number
Local calls Exchange code Subscriber number

"Service Class Assignment of Toll Restriction" (on page 3-67) should be programmed.
When area type B or C is selected, the selected Exchange Code must be entered using the "Allowable Exchange Code Selection" (on page 3-21) programming.

Programming

1. Dial (10).
   "Area Type" will be displayed.

2. Press the NEXT button.
   "Area Type - A" will be displayed and the "A" will blink.

3. Repeat pressing the SELECT button until the desired type (A, B, C) is displayed.

4. Press the MEMORY button.
   The LCD will stop blinking.

5. To return to the initial program mode, press the END button.

Programming Table

See page 7-5.
Description

"Toll Restriction", if it is programmed, prohibits CO Operator Calls. However, the desired extensions can be permitted to call to CO Operator by programming a boundary number of service class.

CO Operator Calls are allowed at all the extension from service class 1 to the same service class number as the programmed boundary number, but are prohibited at the extensions which has not done the above setting.

Example: If Boundary Class 4 is set for All extension numbers for which service classes 1 to 4 have been assigned, then CO operator calls are allowed, but extensions assigned service class 5 to 8 will be prohibited from placing CO operator calls. (See the table below.)

Programming

1. Dial (11).
   “Operator Class” will be displayed.

2. Press the NEXT button.
   “Boundary Class-1” will be displayed and “1” will blink.

3. Dial the boundary class number (1 through 8).

4. Press the MEMORY button.
   The LCD will stop blinking.

5. To return to the initial program mode, press the END button.

Programming table

See page 7-5.

See “Service Class Assignment of Toll Restriction” on page 3-67.
**Description**

Through programming, Toll restrictions (service classes 1 through 8) set for each extension can be applied to System Speed dialing, too.

In the "Restriction" mode, System Speed dialing is restricted according to the Service Class.

In the "No Restriction" mode, System Speed dialing is not restricted according to the Service Class.

**Programming Table**

See page 7-5.

**Programming**

1. Dial (12).
   
   "Restrict of SSD" will be displayed.

2. Press the NEXT button.
   
   "Restriction" will be displayed and blink.

3. Press the SELECT button to alternate between "Restriction" and "No Restriction" to select the desired mode.

4. Press the MEMORY button.
   
   The LCD will stop blinking.

5. To return to the Initial program mode, press the END button.
Allowable Exchange Code Selection

until the desired memory code number (01 through 20) appears

CDE = exchange code with 3 digits
Nothing is stored ———— default (all 20 memory codes)

AB = (01: memory number 01
12: memory number 20

Description

The exchange code and area code usually differ for local and long distance calls, but in some
when Area Type B or Type C is selected with the
“Area Type Selection” (on page 3-18) programming. When you select these Area Types, you should
register these exchange code as a local number. So these registered exchange codes will allow you to
make a local call. It is therefore necessary to register these Exchange Codes to enable dialing of these
numbers.

Local call Exchange Codes when Type B is selected

Exchange code

“0" or "1"

Local call (charge) Exchange Codes when Type C is selected

Exchange code

l — “0" or "1"

A maximum 20 Exchange Codes can be registered.

Programming

1. Dial (13).
   “Exc. Local Code" will be displayed.

2. Press the NEXT button.
   “Local NO ?” will be displayed.

3. Dial the memory code number (01 through 20) or press the NEXT button.

Example:
When dialing (01) or pressing the NEXT button.
- The LCD will show “Local 01: ... " when
  nothing is stored in memory code number “01”.
  When area code 212 has been stored,
  “Local 01 : 212” will be displayed.

4. Dial the local code, using 3 digits.
- To erase a wrong entry, press the CLEAR button.

5. Press the MEMORY button.
- The memory indicator will be lit.

6. To advance to the next memory code number, press the NEXT button.
- To return to the previous memory code number, press the PREV button.
- To go to the desired memory code number, press the SELECT button and
  then dial the memory code number.

7. Repeat steps 4 to 6.
8. To return to the initial program mode, press the END button.

Programming Table.
See page 7-5.
Area Code Entry for Class 3

until the desired memory number (01 through 20) appears

CDE = area code with 3 digits
Nothing is stored default (all 20 memory numbers)

Description
For Service Class 3 (see "Toll Restriction" on page 3-17), up to 20 area codes can be selected for use in toll dialing.
All area codes except those entered will be denied.
All the extensions that are programmed for Service Class Selections 3 are assigned to the same area code selection plan.

Programming
1. Dial (14).
   "Cls-3 Area Code" will be displayed.
2. Press the NEXT button.
   "Area NO ? → " will be displayed.
3. Dial the memory number (01 through 20) or press the NEXT button.
   Example:
   When dialing (01) or pressing the NEXT button.
   - The LCD will show "Area-01 : .....
   - When nothing is stored in memory number "01".
   - When area code 212 has been stored, "Area - 01 : 212" will be displayed.
   - To erase a wrong entry, press the CLEAR button.
4. Dial the area code, using 3 digits.
5. Press the MEMORY button.
   - The memory indicator will be lit.
6. To advance to the next memory number, press the NEXT button.
   - To return to the previous memory number, press the PREV button.
   - To go to the desired memory number, press the SELECT button and then dial the memory number.
7. Repeat steps 4 to 6.
8. To return to the initial program mode, press the END button.

Programming Table.
See page 7-5.
**Exchange Code Entry for Class 5**

until the desired memory number (01 through 20) appears

CDE = exchange code with 3 digits
Nothing is stored ........ default (all 20 memory numbers)

<table>
<thead>
<tr>
<th>15</th>
<th>NEXT</th>
<th>NEXT</th>
<th>CDE</th>
<th>MEMORY</th>
<th>END</th>
</tr>
</thead>
</table>

or

| 15 | NEXT | SELECT | CDE | MEMORY | END |

| AB= 01 | memory number 01 for storage of exchange code |
| 20   | memory number 20 for storage of exchange code |

---

**Description**

For Service Class 5 (See "Toll Restriction" on page 3-17), up to 20 exchange codes can be selected for use in local dialing (charged). All exchange codes except those entered will be denied. All extensions programmed for Service Class Selections 5 are assigned to the same exchange code selection plan.

**Programming**

1. Dial (15).
   "Cls-5 Local Code" will be displayed.

2. Press the NEXT button.
   "Local NO ? → " will be displayed.

3. Dial the memory number (01 through 20) or press the NEXT button.

   **Example:**
   When dialing (01) or pressing the NEXT button.
   - The LCD will show "Local 01 : . . . " when nothing is stored in memory number "01".
   - When exchange code 392 has been stored, "Local 01 : 392" will be displayed.

4. Dial the exchange code, using 3 digits.
   - To erase a wrong entry, press the CLEAR button.

5. Press the MEMORY button.
   - The memory indicator will be lit.

6. To advance to the next memory number, press the NEXT button.
   - To return to the previous memory number, press the PREV button.
   - To go to the desired memory number, press the SELECT button and then dial the memory number.

7. Repeat steps 4 to 6.

8. To return to the initial program mode, press the END button.

**Programming Table.**

See page 7-6.
Exchange Code Entry for Class 7

until the desired memory number (01 through 20) appears

\[CDE = \text{exchange code with 3 digits}\]
\[\text{Nothing is stored} \rightarrow \text{default (all 20 memory numbers)}\]

16 \(\text{NEXT}\) \(\text{NEXT}\) \(\text{CDE}\) \(\text{MEMORY}\) \(\text{END}\) 
or

16 \(\text{NEXT}\) \(\text{AB}\) \(\text{CDE}\) \(\text{MEMORY}\) \(\text{END}\)

\[AB=[01]: \text{memory number 01 for storage of exchange code}\]
\[20: \text{memory number 20 for storage of exchange code}\]

Description

For Service Class 7 (See "Toll Restriction" on page 3-17), up to 20 exchange codes can be selected for use in local dialing.

Exchange codes programmed will be denied.

All the extensions that are programmed for Service Class Selections 7 are assigned to the same exchange code selection plan.

Programming

1. Dial (16).
   "Cls-7 Local Code" will be displayed.

2. Press the NEXT button.
   "Local NO ? →" will be displayed.

3. Dial the memory number (01 through 20) or press the NEXT button.
   Example:
   When dialing (01) or pressing the NEXT button.
   \(\bullet\) The LCD will show "Local 01 : .." when nothing is stored in memory number "01".
   When exchange code 392 has been stored. "Local 01 : 392" will be displayed.

4. Dial the exchange code, using 3 digits.
   \(\bullet\) To erase a wrong entry, press the CLEAR button.

5. Press the MEMORY button.
   \(\bullet\) The memory indicator will be lit.

6. \(\bullet\) To advance to the next memory number, press the NEXT button.
   \(\bullet\) To return to the previous memory number, press the PREV button.
   \(\bullet\) To go to the desired memory number, press the SELECT button and then dial the memory number.

7. Repeat steps 4 to 6.

8. To return to the initial program mode, press the END button.

Programming Table.
See page 7-6.
Hold Time Reminder

Description
An alarm tone will be heard at the holding extension to remind that you still has a call on hold. The reminder will sound after 3 minutes but can be changed. There are 9 choices ranging from 1 minute to 9. An alarm tone is heard from the built-in speaker of the proprietary telephone and the handset receiver of the standard telephone. See “List of Tones” on page 6-7.

Programming
1. Dial (17).
   “Auto Hold Alarm” will be displayed.
2. Press the NEXT button.
   “Time: 3 min” will be displayed and “3” will blink.
3. Dial the time number (1 through 9).
4. Press the MEMORY button.
   The LCD will stop blinking.
5. To return to the initial program mode, press the END button.

Conditions
The hold time reminder is activated, even if the hold recall time set is programmed to “Disable”.

Example:
4 minutes= 17 NEXT 4 MEMORY END

Programming Table
See page 7-6.
Hold Recall Time Set

until the desired time appears

- 30sec - default
- 1 min.
- 1.5min.
- 2min.
- Disable

Description

When the handset of the holding extension is replaced on call, you may have the automatic hold recall after the desired time elapses.
The hold recall can be removed or added.

Example:

1.5 minutes = 

Programming Table

See page 7-6.

Programming

1. Dial (18).
   "Hold Recall Time" will be displayed.

2. Press the NEXT button.
   "Time: 30 sec" will be displayed and "30 sec" will blink.

3. Repeat pressing the SELECT button until the desired time (30 sec, 1 min, 1.5 min, 2 min, Disable) is displayed.

4. Press the MEMORY button.
   The LCD will stop blinking

5. To return to the initial program mode, press the END button.
Transfer Recall Time

Description

If a call is transferred to an extension, and the other extension does not answer the transferred call within 30 seconds, the call will return to you. The time may be changed to 2 minutes. Refer to “Call Transfer-To Extension” on page 4-18.

Programming

1. Dial (19).
   “Transfer Recall” will be displayed.

2. Press NEXT button.
   “Time: 30 sec” will be displayed and the “30” will blink.

3. Press the SELECT button to alternate between “2 min” and “30 sec” to select the desired mode.

4. Press the MEMORY button.
   The LCD will stop blinking.

5. To return to the initial program mode, press the END button.

Programming Table

See page 7-6.
## Call Forwarding Starting Time

<table>
<thead>
<tr>
<th>Delay</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>1 ring delay</td>
<td>until the desired time appears</td>
</tr>
<tr>
<td>2 rings delay</td>
<td></td>
</tr>
<tr>
<td>3 rings delay</td>
<td>default</td>
</tr>
<tr>
<td>4 rings delay</td>
<td></td>
</tr>
</tbody>
</table>

### Description

Enables programming the call forwarding delayed start time (after 1, 2, 3, or 4 rings) in case of no receiving the call when the "Call Forwarding-Busy or No Answer" (on page 4-27) feature is set.

### Programming

1. Dial (20).
   
   "Call FWD Delay" will be displayed.

2. Press the NEXT button.
   
   "3 rings delay" will be displayed and will blink.

3. Repeat pressing the SELECT button until the desired time is displayed.

4. Press the MEMORY button.
   
   The LCD will stop blinking.

5. To return to the initial program mode, press the END button.

### Programming Table

See page 7-7.
Pickup Dial Delay Time

until the desired time appears

1sec : dials after 1 second
2sec : dials after 2 seconds
3sec : dials after 3 seconds default
4sec : dials after 4 seconds

Description
Enables programming of the pickup dial (on page 5-18) start time (the delay between picking up the handset and automatic dialing).
The default is 3 sec., which can be changed to 1, 2, or 4 sec.

Programming Table
See page 7-7.

Programming
1. Dial (21).
   "Pickup Dial Time" will be displayed.
2. Press the NEXT button.
   "PUD Time : 3sec" will be displayed and "3" will blink.
3. Repeat Pressing the SELECT button until the desired time (1sec, 2sec, 3sec, 4sec) is displayed.
4. Press the MEMORY button.
The LCD will stop blinking.
5. To return to the initial program mode, press the END button.
CO-to-CO Duration Time Limit

Description
Enable limiting of the time any outside line can be used when "Call Transfer-To Outside Line" (on page 4-19) or "Call Forwarding-To Outside Line" (on page 4-29) is used to forward a outside call to an outside line or when you call to any outside line using DISA.
The default time is 10 min., but this can be changed from 1 minute through 32 minutes.

Conditions
- To erase a wrong entry, press the CLEAR button.

Programming Table
See page 7-7.

Programming
1. Dial (22).
   "CO-CO Dur. Limit" will be displayed.
2. Press the NEXT button.
   "Time : 10 min" will be displayed and "10" will blink.
3. Enter the duration limit with 1 or 2 digits (1 through 32).
4. Press the MEMORY button.
   The LCD will stop blinking.
5. To return to the initial program mode, press the END button.
Station Message Detail Recording (SMDR)

Description
By plugging output unit such as a printer with RS-232C, record of all incoming and outgoing calls, the contents registered in System Programming and System Working Report can be confirmed.

- Information prints out on outside line calls.
  - Starting time of call (Date, time)
  - Extension number
  - CO number
  - Dialed number
  - Duration time of call
  - Account code
  - Transfer mark “→”
  - DISA Security Code

Example of print out

<table>
<thead>
<tr>
<th>Date</th>
<th>Time</th>
<th>EXT</th>
<th>CO</th>
<th>Dial Number</th>
<th>Duration</th>
<th>Code</th>
</tr>
</thead>
<tbody>
<tr>
<td>8/20/88</td>
<td>8:00AM</td>
<td>101</td>
<td>06</td>
<td>1-201-234-5678</td>
<td>00:00'30&quot;</td>
<td>0123</td>
</tr>
<tr>
<td>8/20/88</td>
<td>8:10AM</td>
<td>120</td>
<td>03</td>
<td>(DISA incoming)</td>
<td>00:00'50&quot;</td>
<td></td>
</tr>
</tbody>
</table>

- The previous number of “=” that appears in the dial number indicates the line access number of the Host PBX (See page 3-51.)
- The “*” that appears in front of the Time means that the call is transferred.
- DISA Security Code
  0: No security mode
  1: Security code 1
  2: Security code 2
  3: Security code 3
  4: Security code 4
  5: Remote code
- CO Line number is indicated instead of Extension number when call to CO line by using Direct Inward System Access.

System programming contents are printed out.
- System parameters
- CO parameter
- Extension parameter
- DSS parameter
- Speed Call

System Working Report is printed out.
- Date of record
  - Starting date of recording
  - Date and time printed out

Incoming calls
- Number of incoming calls
- Number of answered calls
- Number of unanswered calls
- Percentage of answer
- Average ring time
- Average duration

Outgoing calls
- Number of access requested
- Number of access succeeded
- Number of access failed
- Percentage of access succeeded
- Average duration

The following features should be set.
- “RS-232C Communication Parameters” on page 3-32.
- “SMDR Parameters” on page 3-35.
- “Incoming/Outgoing Call Selection for printing” on page 3-36.
- “Secret Speed Dial/One Touch Dial Printing” on page 3-36.
- “System Data Dump” on page 3-37.
- “Duration Time Count Start Mode” on page 3-40.

When plugging a printer into the KX-T123211 make sure that the printer power is off.
RS-232C Communication Parameters

(Carriage return for a new line)

until the desired code appears

- CR+LF......... default
- CR

(Baud rate)

until the desired baud rate appears

- 110B
- 150B
- 300B
- 600B
- 1200B ....... default
- 2400B
- 4800B
- 9600B

(Word length)

until the desired length appears

- 7bits .......... default
- 8bits

(Parity)

until the desired mode appears

- None
- Mark ......... default
- Space
- Even
- Odd

(Stop bit length)

until the desired mode appears

- 1 bit .......... default
- 2 bits
Carriage return for a new line
A new line code indicates what type of code is needed for the print head on a printer to move the first character position on the next line.

<table>
<thead>
<tr>
<th>Code</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>CR+LF</td>
<td>when &quot;CR+LF&quot; is required from a printer.</td>
</tr>
<tr>
<td>CR</td>
<td>when &quot;CR&quot; is required from a printer.</td>
</tr>
</tbody>
</table>

CR=Carriage Return
LF=Line Feed.

Baud rate
A baud rate code indicates the data transmission speed from the system to a printer.

<table>
<thead>
<tr>
<th>Baud Rate</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>110 B</td>
<td>when 110 baud is required.</td>
</tr>
<tr>
<td>150 B</td>
<td>when 150 baud is required.</td>
</tr>
<tr>
<td>300 B</td>
<td>when 300 baud is required.</td>
</tr>
<tr>
<td>600 B</td>
<td>when 600 baud is required.</td>
</tr>
<tr>
<td>1200 B</td>
<td>when 1200 baud is required.</td>
</tr>
<tr>
<td>2400 B</td>
<td>when 2400 baud is required.</td>
</tr>
<tr>
<td>4800 B</td>
<td>when 4800 baud is required.</td>
</tr>
<tr>
<td>9600 B</td>
<td>when 9600 baud is required.</td>
</tr>
</tbody>
</table>

Parity
A parity code indicates what type of parity is used to detect an error in a string of bits composing a character.

<table>
<thead>
<tr>
<th>Parity</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>None</td>
<td>when an error checking function is not required from a printer.</td>
</tr>
<tr>
<td>Mark</td>
<td>when a Mark is required from a printer.</td>
</tr>
<tr>
<td>Space</td>
<td>when a Space is required from a printer.</td>
</tr>
<tr>
<td>Even</td>
<td>when an Even is required from a printer.</td>
</tr>
<tr>
<td>Odd</td>
<td>when an Odd is required from a printer.</td>
</tr>
</tbody>
</table>

Word length
A word length code indicates how many bits compose a character.

<table>
<thead>
<tr>
<th>Bits</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>7</td>
<td>when 7 bits are required.</td>
</tr>
<tr>
<td>8</td>
<td>when 8 bits are required.</td>
</tr>
</tbody>
</table>

Stop bit length
A stop bit length code indicates the end of a bit string which composes a character.

<table>
<thead>
<tr>
<th>Bits</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>when one bit is required for end detection.</td>
</tr>
<tr>
<td>2</td>
<td>when two bits are required for end detection.</td>
</tr>
</tbody>
</table>

The default value is the same as that of the Panasonic data terminal, KX-D4985, KX-D4910D, KX-D4911, KX-D4920, etc, except baud rate.
Programming

1. Dial (23). “RS232C Parameter” will be displayed.

2. Press the NEXT button. “NL-Code : CR + LF” will be displayed and “CR + LF” will blink.

3. Press the SELECT button to alternate between “CR + LF” and “CR” to select the desired mode.

4. Press the MEMORY button. The LCD will stop blinking.

5. Press the NEXT button. “Baud Rate : 1200B” will be displayed and the “1200B” will blink.

6. Repeat pressing the SELECT button until the desired baud rate is displayed.

7. Press the MEMORY button. The LCD will stop blinking.

8. Press the NEXT button. “Word Length : 7bit” will be displayed and the “7bit” will blink.

9. Press the SELECT button to alternate between “7bit” and “8bit” to select the desired mode.

10. Press the MEMORY button. The LCD will stop blinking.

11. Press the NEXT button. “Parity : Mark” will be displayed and the “Mark” will blink.

12. Repeat pressing the SELECT button until the desired parity code is displayed.

13. Press the MEMORY button. The LCD will stop blinking.

14. Press the NEXT button. “Stop Bit : 1bit” will be displayed and the “1bit” will blink.

15. Press the SELECT button to alternate between “1bit” and “2bits” to select the desired mode.

16. Press the MEMORY button. The LCD will stop blinking.

17. To return to the initial program mode, press the END button.

Programming Table
See page 7-7.

Conditions

- To return to the previous mode, press the PREV button instead of the NEXT button.
- The following combinations are disallowed.

<table>
<thead>
<tr>
<th>Parity</th>
<th>Word Length</th>
<th>Stop Bit Length</th>
</tr>
</thead>
<tbody>
<tr>
<td>mark</td>
<td>8</td>
<td>2</td>
</tr>
<tr>
<td>space</td>
<td>8</td>
<td>1</td>
</tr>
<tr>
<td>space</td>
<td>8</td>
<td>2</td>
</tr>
</tbody>
</table>

If any of the above disallowed combinations are selected. Warning tone will be heard. Press the NEXT button and then repeat the procedure of programming.
Page length

The page length may be selected to position a title and data on each page. A page length code indicates the number of lines per page. A title will be printed on the first 3 lines of each page.

<table>
<thead>
<tr>
<th>AB</th>
<th>4 lines</th>
</tr>
</thead>
<tbody>
<tr>
<td>66</td>
<td>66 lines default</td>
</tr>
<tr>
<td>99</td>
<td>99 lines</td>
</tr>
</tbody>
</table>

STANDARD CONTINUOUS PAPER (11 inches)

To print data, page length must be longer than skip perforation by 4 or more lines.

Skip perforation

The skip perforation code indicates the number of lines to be skipped. When the print head reaches the line designated, the print head moves to the top position of the next page.

<table>
<thead>
<tr>
<th>CD</th>
<th>0 line default</th>
</tr>
</thead>
<tbody>
<tr>
<td>95</td>
<td>95 lines</td>
</tr>
</tbody>
</table>

Programming

1. Dial (24). “SMDR Parameter” will be displayed.
2. Press the NEXT button. “Page Length : 66” will be displayed and the “66” will blink.
3. Dial (4 through 99) for the page length entry.
4. Press the MEMORY button. The LCD will stop blinking.
5. Press the NEXT button. “Skip Perf : 0” will be displayed and the “0” will blink.
6. Dial (0 through 95) for the skip perforation code entry.
7. Press the MEMORY button. The LCD will stop blinking.
8. To return to the initial program mode, press the END button.

Programming Table

See page 7-0.
**Incoming / Outgoing Call Selection for printing**

until the desired mode appears

- **Outgoing : On** to print outgoing calls — default
- **Outgoing : Off** to stop printing

until the desired mode appears

- **Incoming : On** to print incoming calls — default
- **Incoming : Off** to stop printing

**Description**
It is possible to print outgoing calls or incoming calls or both.

**Programming**
1. Dial (25).
   "Duration Log" will be displayed.
2. Press the NEXT button.
   "Outgoing : On" will be displayed and the "On" will blink.
3. Press the SELECT button to alternate between the "On" and "Off" to select the desired mode.
4. Press the MEMORY button. The LCD will stop blinking.
5. Press the NEXT button.
   "Incoming : On" will be displayed and the "On" will blink.
6. Press the SELECT button to alternate between "On" and "Off" to select the desired mode.
7. Press the MEMORY button. The LCD will stop blinking.
8. To return to the initial program mode, press the END button.

**Programming Table**
See page 7-8.

---

**Secret Speed Dial / One Touch Dial Printing**

until the desired mode appears

- **No Printing** — default
- **Printing**

**Description**
Enables programming to print out secret dialing numbers, even though these secret numbers are not displayed on the LCD during speed dialing ("System Speed Dialing Entry" on page 3-5) or one-touch dialing (on page 4-4) are used.

**Programming**
1. Dial (26)
   "Secret Printing" will be displayed.
2. Press the NEXT button.
   "No Printing" will be displayed and blink.
3. Press the SELECT button to alternate between "No Printing" and "Printing" to select the desired mode.
4. Press the MEMORY button.
   The LCD will stop blinking.
5. To return to the initial program mode, press the END button.

**Programming Table**
See page 7-8.

Operation
To stop the printout :
1. Dial (27).
2. Press the NEXT button.
3. Repeat pressing the SELECT button until Stop Output is displayed.
4. Press the MEMORY button.

To print System Parameters, Speed Dial or All Parameters :
1. Dial (27).
   "System Data Dump" will be displayed.
2. Press the NEXT button.
   "Menu : All Para" will be displayed and "All Para" will blink.
3. Repeat pressing the SELECT button until the desired data dump mode is displayed.
4. Press the MEMORY button.
   SMDR printer will print out.
5. Repeat steps 3 to 4, to print the other data dumps.

To print CO Parameter :
1. Dial (27).
2. Press the NEXT button.
3. Repeat pressing the SELECT button until the "CO Para" is displayed.
4. Press the MEMORY button.
   "CO NO ? →" is displayed.
5. Dial the CO number (01 through 12).
   When dialing (01), "CO NO ? → 01" will be displayed.
6. Press the MEMORY button.
   SMDR printer will print out.
7. Repeat steps 5 to 6, to print the other CO parameter.

To print Extension Parameter :
1. Dial (27).
2. Press the NEXT button.
3. Repeat pressing the SELECT button until the "EXT Para" is displayed.
4. Press the MEMORY button.
   "Jack NO ? +" will be displayed.
5. Dial the jack number (01 through 32).
   When dialing (01), "Jack NO ? + 01" will be displayed.
6. Press the MEMORY button.
   SMDR printer will print out.
7. Repeat steps 5 to 6, to print the other jack number.

To print DSS Parameter :
1. Dial (27).
2. Press the NEXT button.
3. Repeat pressing the SELECT button until the "DSS Para" is displayed.
4. Press the MEMORY button.
   "DSS NO ? +" will be displayed.
5. Dial the DSS number (1 or 2).
   When dialing (1), "DSS NO ? → 1" will be displayed.
6. Press the MEMORY button.
   SMDR printer will print out.
7. Repeat steps 5 to 6, to print the other DSS parameter.

After completing printing, to return to the initial mode :
1. Press the END button.

See page 7-9.
Duration Time Count Start Mode

until the desired time appears

- Instantly
- 5s after dial (default)
- 10s after dial
- 15s after dial

Example:

10 seconds after dialing

\[ 28 \text{ NEXT SELECT MEMORY END} \]

Description

The duration time of the conversation is displayed on the LCD and is printed on the printer.

Program the starting time of the record.

- Instantly after the CO line is captured.
- 5 seconds after the dialing.
- 10 seconds after the dialing.
- 15 seconds after the dialing.

Programming

1. Dial (28).
   "Durat-Time Count" will be displayed.

2. Press the NEXT button.
   "5s after dial" will be displayed and blink.

3. Repeat pressing the SELECT button until the desired time (Instantly, 5s after dial, 10s after dial, 15s after dial) is displayed.

4. Press the MEMORY button.
   The LCD will stop blinking.

5. To return to the initial program mode, press the END button.

Programming Table

See page 7-9.
External Paging Access Tone

until the desired external paging equipment number (1 or 2) appears

until the desired mode appears

- Enable default (external paging 1 and 2)
- Disable

29 NEXT NEXT SELECT MEMORY END

Description
The acknowledge tone that is heard after accessing the external paging equipment can be removed or added at the customer’s request. Refer to “Paging-External” on page 4-25.

Programming

1. Dial (29). “Ext-Pag Ack-Tone” will be displayed.
2. Press the NEXT button. “Pag NO? →” will be displayed.
3. Press the NEXT button. “Pag 1: Enable” will be displayed and “Enable” will blink.
4. Press the SELECT button to alternate between “Enable” and “Disable” to select the desired mode.
5. Press the MEMORY button. The LCD will stop blinking.
6. Repeat steps 3 to 5, to program the access tone of the other external paging equipment.
7. To return to the initial program mode, press the END button.

Example:
To eliminate the access paging tone on external paging 1.

29 NEXT NEXT SELECT MEMORY END

  4 digits (0000 through 9999)
Direct Inward System Access (DISA) is the feature that enables outside line incoming calls to be directed to an extension phone by designating it or to an outside line through the KX-T123211. When programmed, the following contents of DISA can be set up.

- **Control code “*”**
  Sets to ignore the signal of “*” key.

- **Prolong Time**
  Sets duration time of talking past CO-to-CO Duration Time Limit when dialing out on an outside line (2, 3, 4 or 5 minutes)

- **Answer Delay Time**
  Changes the time from receiving a call to answering it. (0, 5, 10 or 15 seconds)

- **Tone Detect**
  KX-T123211 is set whether detect that the call is disconnected after finish having a conversation on CO line with Tone.
  - Enable . . . . detect with Tone.
  - Disable . . . . don’t detect with Tone.

- **Security Type**
  Sets to require or not a Security Code when dialing an extension or outside line.
  - None Security
    This is the mode in which Security Code is unnecessary when dialing both an extension or outside line.
  - Trunk Security
    This is the mode in which Security Code is necessary when dialing an outside line, but unnecessary when dialing an extension.
  - All Security
    This is the mode in which Security Code is necessary when dialing both extension and outside line.

- **Remote Security Code**
  Remote Security Code is used when Remote Administration is done with DISA.

- **User Security Code**
  User Security Code is used when dial to extension or CO line with DISA.
  User Security Code can be set by 4 types.

### Programming

1. Dial (31).
   "DISA Parameters" will be displayed.

2. Press the NEXT button.
   "Control Code “*”" will be displayed.
   - You may repeat pressing the NEXT button until the desired mode (Control code “*”, Prolong Time, Answer Delay Time, Tone Detect, Security Type, Remote Security Code, User Security Code) is displayed.

3. Press the SELECT button.
   "Code “*” : Enable" will be displayed and "Enable" will blink.

4. Press the SELECT button to alternate between "Enable" and "Disable" to select the desired mode.

5. Press the MEMORY button.
   The LCD will stop blinking.

6. Press the NEXT button.
   "Prolg Time" will be displayed.

7. Press the SELECT button.
   "Prolg Time: 6 min" will be displayod and “5” will blink.

8. Repeat pressing the SELECT button until the desired add time (2, 3, 4 or 5 minutes) is displayed.

9. Press the MEMORY button.
   The LCD will stop blinking.

10. Press the NEXT button.
    "Ans. Delay Time" will be displayed.

11. Press the SELECT button.
    "Delay Time: 10 sec" will be displayed and “10” will blink.

12. Press the SELECT button until the desired delay time (0, 5, 10 or 15 seconds) is displayed.

13. Press the MEMORY button.
    The LCD will stop blinking.
14. Press the NEXT button.
   "Tone Detect" will be displayed.

15. Press the SELECT button.
   "Tone Det: Enable" will be displayed and "Enable" will blink.

16. Press the SELECT button to alternate between "Enable" and "Disable" to select the desired mode.

17. Press the MEMORY button.
   The LCD will stop blinking.

18. Press the NEXT button.
   "Security Type" will be displayed.

19. Press the SELECT button.
   "Trunk Security" will be displayed and blink.

20. Repeat pressing the SELECT button until the desired security mode (None Security, Trunk Security or All Security) is displayed.

21. Press the MEMORY button.
   The LCD will stop blinking.

22. Press the NEXT button.
   "Remote Sec. Code" will be displayed.

23. Press the SELECT button.
   "RMT-Code : 70000" will be displayed and "0000" will blink.

24. Dial the code number with 4 digits (0000 through 9999).
   To erase an incorrect entry, press the CLEAR button.

25. Press the MEMORY button.
   The LCD will stop blinking.

26. Press the NEXT button.
   "User Sec. Code" will be displayed.

27. Press the SELECT button.
   "USR-Code 1 : 60000" will be displayed and "0000" will blink.

28. Repeat pressing the SELECT button until the desired user code (1, 2, 3 or 4) is displayed.

29. Dial the code number with 4 digits (0000 through 9999).
    To erase an incorrect entry, press the CLEAR button.

30. Press the MEMORY button.
    The LCD will stop blinking.

31. To return to the initial program mode, press the END button.

Programming Table
   See page 7-10

Conditions
- The Direct Inward System Access (DISA) cards are necessary to program the Remote Security Code and User Security Code.
Off Premise Extension (OPX)

until the desired mode appears

[ ] Disable ........... default
[ ] Enable

32 NEXT SELECT MEMORY END

Description

Enables a standard telephone installed outside the premise to work as an extension in the premise through public or private lines.
Optional Off Premise Extension (OPX) Card KX-T123285 and Unit KX-T123286 are necessary.

Programming

1. Dial (32).
   “OPX Feature” will be displayed.
2. Press the NEXT button.
   “OPX: Disable” will be displayed and “Disable” will blink.
3. Press the SELECT button to alternate between Enable and Disable to select the desired mode.
4. Press the MEMORY button.
   The LCD will stop blinking.
5. To return to the initial program mode, press the END button.

Programming Table

See page 7-11.
description

Allows an extension user to intrude through the speaker into another extension that is in conversation using the handset.
(Thia feature only is available when KX-T123235 sets are used.)

programming

1. Dial (33).
   "OHCA Feature" will be displayed.

2. Press the NEXT button.
   "OHCA: Enable" will be displayed and "Enable" will blink.

3. Press the SELECT button to alternate between Enable and Disable to select the desired mode.

4. Press the MEMORY button.
   The LCD will stop blinking.

5. To return to the initial program mode, press the END button.

programming table

See page 7-11.
Description

KX-T123211 automatically records the working state of System.
The recording starts when the System Working Report is cleared.
Programming this feature enables to clear the record or output the records of working state to SMDR.

Contents Recorded

1. Date of record
   - The date and time cleared.
   - The date and time printed out.

2. Incoming calls
   - The number of incoming calls
   - The number of answered of incoming calls
   - The number of unanswered of incoming calls
   - The ratio of the answered calls to the incoming calls
     \[
     \text{Number of answered calls} \times 100 (\%)
     \]
     \[
     \text{Number of incoming calls}
     \]
   - The average time from receipt of call to answer of the incoming and answered calls
   - The average duration time of talk of the answered calls

3. Outgoing calls
   - The number of access requested
   - The number of access succeeded
   - The number of access failed
   - The ratio of access succeeded
     \[
     \text{Number of access succeeded} \times 100 (\%)
     \]
     \[
     \text{Number of access requested}
     \]
   - The average duration of the dialed calls.

Programming

1. Dial (34).
   "Working Report" will be displayed.

2. Press the NEXT button.
   "Dump Start" will be displayed and blink.

3. Repeat pressing the SELECT button until the desired mode (Dump Start, Dump Stop or SWR Data Clear) is displayed.

4. Press the MEMORY button.
The LCD will stop blinking.

5. Repeat steps 3 and 4, to select another mode.

6. To return to the initial program mode, press the END button.

Programming Table

See page 7-11.
Outside Line Feature

CO Connection Assignment

--- until the desired CO number (01 through 12) appears.

--- until the desired mode appears

- Connect ........default (all 12 CO's)
- Not Connect

<table>
<thead>
<tr>
<th>40</th>
<th>NEXT</th>
<th>NEXT</th>
<th>SELECT</th>
<th>MEMORY</th>
<th>END</th>
</tr>
</thead>
<tbody>
<tr>

</tbody>
</table>

| 40 | NEXT | AB | SELECT | MEMORY | END |

AB = [ ] : to assign the same on all 12 CO's
0 1 : on CO 01
1 2 : on CO 12

Description
You can program which outside line is connected and which one is not connected. When an extension automatically selects an idle outside line, the extension can be connected to it quickly.

Programming
1. Dial (40).
   "CO Connection" will be displayed.
2. Press the NEXT button.
   "CO NO ?" will be displayed.
3. Press the NEXT button or dial the CO number (01 through 12).
   "CO 01 : Connect" will be displayed and "Connect" will blink.
4. Press the SELECT button, to alternate between Connect and Not Connect to select the desired mode.
5. Press the MEMORY button.
   The LCD will stop blinking.
6. [ ] To advance to the next CO number, press the NEXT button.
   [ ] To return to the previous CO number, press the PREV button.
   [ ] To go to the desired CO number, press the SELECT button and then dial the CO number.
7. Repeat steps 4 to 6, to program the mode on the other CO lines.
8. To return to the initial program mode, press the END button.

Conditions
- When you dial "[ ]" instead of pressing the NEXT button at step 3, in case all of 12 CO's have been programmed to "Connect", "CO : Connect" will be displayed. In case each of 12 CO's has been programmed either "Connect" or "Not Connect", "CO : Mixed" will be displayed.

Example:
CO 1 and 2 .............. Connect
CO 3 ....................... Not Connect
1. [40] NEXT NEXT MEMORY
2. NEXT MEMORY
3. NEXT SELECT MEMORY END

Programming Table
See page 7-12.
Dial Mode (DTMF/Pulse/Call Blocking)

**DTMF/Pulse/Call Blocking Selection**

- until the desired CO number (01 through 12) appears
- until the desired dial mode appears
- **DTMF Mode** ............. default (all 12 CO's)
- **Pulse Mode**
- **Call Blocking Mode**

**Description**

Allows the user to select the dialing mode (tone, pulse or call blocking) of each CO (Central Office) line.

- **DTMF Dial Mode**
  The dial signal from the extension (with tone or pulse dial mode) will be converted to TONE. TONE will be transmitted to the Central Office.

- **PULSE Dial Mode**
  The dial signal from the extension (with tone or pulse dial mode) will be converted to PULSE. PULSE will be transmitted to the Central Office.

- **Call Blocking Mode**
  Set this mode on outside lines that can receive both DTMF (Tone) and Pulse dial, but under contract with the Central Office for Pulse dialing only.
  When dialing the outside line using a touch tone telephone, only Pulse dial is sent to the Central Office.

**Programming**

1. Dial (41).
   "CO Dial Mode" will be displayed.
2. Press the NEXT button.
   "CO NO ?+" will be displayed.
3. Press the NEXT button or dial the CO number (01 through 12).
   "CO 01 : DTMF Mode" will be displayed and "DTMF Mode" will blink.
4. Repeat pressing the SELECT button until the desired dial mode is displayed.
5. Press the MEMORY button.
   The LCD will stop blinking.
6. To advance to the next CO number, press the NEXT button.
7. To return to the previous CO number, press the PREV button.
8. To go to the desired CO number, press the SELECT button and then dial the CO number.

**Conditions**

- If the KX-T123211 is connected to the Central Office directly or installed behind a host PBX, which receives both tone and pulse dials, the KX-T123211 must be used only in the tone dial mode.
- If your extension is not a Proprietary telephone but a standard telephone, and the dial tone frequency of CO Lines is 600Hz, the KX-T123211 must be used only for the pulse dialing mode for the CO Lines.

**Programming Table**

See page 7-12.
Description

In “Dial Mode (DTMF/Pulse/Call Blocking) Selection” on page 3-49, when “Pulse Dial Mode” or “Call Blocking Mode” is selected, dial pulse may be speeded up by programming. There are Pulse Low (10pps) and Pulse High (20pps) in the Dial Pulse Speed.

Programming

1. Dial (42). “Pulse Speed” will be displayed.
2. Press the NEXT button. “CO NO ?” will be displayed.
3. Press the NEXT button or dial the CO number (01 through 12). “CO 01 : Low Speed” will be displayed and “Low Speed” will blink.
4. Press the SELECT button to alternate between “Low Speed” and “High Speed”.
5. Press the MEMORY button. The LCD will stop blinking.
6. ● To advance to the next CO number, press the NEXT button.
   ● To return to the previous CO number, press the PREV button.
   ● To go to the desired CO number, press the SELECT button and then dial the CO number.
7. Repeat steps 4 to 6, to program the assignment of the other CO numbers.
8. To return to the initial program mode, press the END button.

Programming Table

See page 7-12.
Description

If KX-T123211 is installed behind a host PBX, the host PBX may require a pause time to access Central Office Lines. This feature enables the host PBX to automatically pause via programming the outward dialing access codes of the host PBX.

Programming

1. Dial (43).
   "Host PBX Access" will be displayed.

2. Press the NEXT button.
   "CO NO ? +" will be displayed.

3. Press the NEXT button or dial the CO number (01 through 12).
   - The LCD will show "CO 01: Not Stored" when nothing is stored in CO 1.
   - When the outside access codes 81,82 has been stored, "CO 01: 81, 82" will be displayed.

4. Enter up to 8 outward access codes each with a maximum of 2 digits, punctuating each code with the "1" button.
   - To erase a wrong entry, press the CLEAR button.

5. Press the MEMORY button.

6. *To advance to the next CO number*, press the NEXT button.
   *To return to the previous CO number*, press the PREV button.
   *To go to the desired CO number*, press the SELECT button and then dial the CO number.

7. Repeat steps 4 to 6 to program each of the CO's of the KX-T123211.

8. To return to the initial program mode, press the END button.

Example:

- Access Codes 81, 82, 83, 9 on CO1

\[
\begin{align*}
43 & \text{NEXT} & 01 & 81 & 82 & 83 & 9 \\
& \text{MEMORY} & \text{END}
\end{align*}
\]

Programming Table

See page 7-12.
Trunk Group Assignment

Description

When outside lines are grouped, an idle line within the trunk group is automatically found and connected when an outside call is placed. A maximum 8 groups can be assigned. For example, if subscribing with multiple telephone service companies, the CO lines can be grouped as shown below by each company.

Trunk Group 1
- CO 1
- CO 2
- CO 3

Telephone Service Company A

Trunk Group 2
- CO 4
- CO 6
- CO 7

Telephone Service Company B

Trunk Group 3
- CO 8
- CO 10
- CO 11

Telephone Service Company C

Refer to “Outward Dialing (Individual Trunk Group Access)” on page 4-3 and “Flexible CO Button (To Assign into Trunk Group Access Button)” on page 4-57.

Programming

1. Dial (44).
   “Trunk Group” will be displayed.

2. Press the NEXT button.
   “CO NO ? →” will be displayed.

3. Press the NEXT button or dial the CO number (01 through 12).
   “CO 01: TRK GRP-1” will be displayed and “1” will blink.

4. Dial the trunk group number (1 through 8).

5. Press the MEMORY button.
   The LCD will stop blinking.

6. To advance to the next CO number, press the NEXT button.
   - To return to the previous CO number, press the PREV button.
   - To go to the desired CO number, press the SELECT button and then dial the CO number.

7. Repeat steps 4 to 6, to program the trunk group number on the other CO lines.

8. To return to the initial program mode, press the END button.

Programming Table

See page 7-13.
Flexible Outward Dialing Assignment

Through programming, you can select which extensions may be used for outward dialing by using the day or night mode of operation.

**Programming**

1. **Dial (45)** for day mode.
   “Day Out CO” will be displayed.
   • Dial (46) for night mode.
   “Night Out CO” will be displayed.
2. Press the NEXT button.
   “CO NO ?” will be displayed.
3. Press the NEXT button or dial the CO number (01 through 12).
   “CO 01 : #01 : Enable” will be displayed.
4. Repeat pressing the \( \Rightarrow \) button until the desired jack number appears, or press the \# button and then dial the jack number.
5. Press the SELECT button to alternate between “Enable” and “Disable” to select the desired mode.
6. Press the MEMORY button.
   The LCD will stop blinking.
7. • To advance to the next jack number, press the \( \Rightarrow \) button.
   • To return to the previous jack number, press the \( \Rightarrow \) button.
   • To go to the desired jack number, press the \# button and then dial the jack number.
8. Repeat steps 5 to 7 to program the assignment of the other jack numbers.
9. • To advance to the next CO number, press the NEXT button.
   • To return to the previous CO number, press the PREV button.
   • To go to the desired CO number, press the SELECT button and then dial the CO number.
10. Repeat steps 4 to 9, to program the assignment of the other CO numbers.
11. To return to the initial program mode, press the END button.

**Programming Table**

See page 7-14 or 7-15.
Description
Through programming, you can select which extensions will ring on incoming calls from the Central Office during the day or night time.

Programming
1. • Dial (47) for day mode.
   "Day In CO" will be displayed.
• Dial (48) for night mode.
   "Night In CO" will be displayed.
2. Press the NEXT button.
   "CO NO ? " will be displayed.
3. Press the NEXT button or dial the CO number (01 through 12).
   "CO 01 : #01 : Enable" will be displayed.
   jack number
4. Repeat pressing the button until the desired jack number appears, or press the button and then dial the jack number.
5. Press the SELECT button to alternate between "Enable" and "Disable" to select the desired mode.
6. Press the MEMORY button.
The LCD will stop blinking.

7. • To advance to the next jack number, press the button.
• To return to the previous jack number, press the button.
• To go to the desired jack number, press the button and then dial the jack number.
8. Repeat steps 5 to 7, to program the assignment of the other jack numbers.
9. • To advance to the next CO number, press the NEXT button.
• To return to the previous CO number, press the PREV button.
• To go to the desired CO number, press the SELECT button and then dial the CO number.
10. Repeat steps 4 to 9, to program the assignment of the other CO numbers.
11. To return to the initial program mode, press the END button.

Programming Table
See page 7-16 or 7-17.
Example:

- Company XYZ would like incoming calls from the Central Office during the day mode to be received at the following zone.

<table>
<thead>
<tr>
<th>Zone</th>
<th>Jack no. of Extension</th>
<th>Programming CO no.</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>01, 02</td>
<td>01</td>

<tr>
<td>C</td>
<td>05, 06</td>
<td>03</td>
</tr>
</tbody>
</table>

Programming

1. 47 NEXT # * SELECT MEMORY

   All CO numbers have been set to "Disable" on all jack numbers.

2. ( NEXT or SELECT 01 ) SELECT MEMORY

   CO number 01 has been set to "Enable" on jack number 01.

3. (  or # 02 ) SELECT MEMORY

   CO number 01 has been set to "Enable" on jack number 02.

4. ( NEXT or SELECT 02 ) # 03 SELECT MEMORY

   CO number 02 has been set to "Enable" on jack number 03.

5. (  or # 04 ) SELECT MEMORY

   CO number 02 has been set to "Enable" on jack number 04.

6. ( NEXT or SELECT 03 ) # 05 SELECT MEMORY

   CO number 03 has been set to "Enable" on jack number 05.

7. (  or # 06 ) SELECT MEMORY

   CO number 03 has been set to "Enable" on jack number 06.

8. END

Conditions

- When an operator is not set and OGM card is installed, program the CO line which is set with DISA to ring on any extensions.
### Description

The ringing start time during the day can be delayed on a designated extension(s) when an incoming call is received from the CO. The CO line that you want to delay the ring start time during the day or night mode can be selected through the programming.

### Programming

1. **Dial (49) for day mode.**
   - "Day Delayed CO" will be displayed.
2. **Dial (50) for night mode.**
   - "Night Delayed CO" will be displayed.
3. Press the NEXT button.
   - "CO NO ? →" will be displayed.
4. Press the NEXT button or dial the CO number (01 through 12).
   - "CO 01 : #01 : Immdly" will be displayed.
5. Repeat pressing the button until the desired jack number appears, or press the button and then dial the jack number.
6. Repeat pressing the SELECT button until the desired mode is displayed.
7. Press the MEMORY button.
   - The LCD will stop blinking.
8. Repeat steps 5 to 7, to program the assignment of the other jack numbers.
9. **To advance to the next CO number, press the NEXT button.**
10. **To return to the previous CO number, press the PREV button.**
11. **To go to the desired CO number, press the SELECT button and then dial the CO number.**

CO Mode (Normal/Direct In Line/Direct Inward System Access) Assignment

Selecting the "Normal" or "DISA" mode

AB = 51: Day Mode
52: Night Mode

until the desired CO number (01 through 12) appears.

until the Normal or DISA mode appears
Normal: default (all 12 CO's)
DIL
DISA

CD = * : to assign the same on all 12 CO's
0 1 : on CO 01
1 2 : on CO 12

Selecting the "DIL" mode

AB = 51: Day Mode
52: Night Mode

until the desired CO number (01 through 12) appears.

until the DIL mode appears
Normal: default (all 12 CO's)
DIL
DISA

EF = [0 1]: jack number 01
3 2 : jack number 32

CD = * : to assign the same on all 12 CO's
0 1 : on CO 01
1 2 : on CO 12

Description
The Outside line mode can be set to the "Normal" mode, "Direct In Line (DIL)" mode or the "Direct Inward System Access (DISA)" mode during the day or night mode.

- Normal mode
  Enables outside line incoming calls to be received to assigned extension.

- Direct In Line (DIL) mode
  Enables all outside line incoming calls to be directed to a specific extension phone (e.g., the assigned operator extension) By programming an outside line to the jack number of the corresponding extension phone, all incoming calls on that outside line will be received at the assigned extension phone. The call can be accepted by simply picking up the receiver.

- Direct Inward System Access (DISA) mode
  Enables outside line incoming calls to be directed to an extension phone by designating it or to an outside line through KX-T123211. Programming of "Direct Inward System Access" on page 3-42 is necessary.
Programming

■ Selecting the "Normal" mode or the "DISA" mode

1. • Dial (51) for day mode.
   "CO Day/Mode" will be displayed.
• Dial (52) for night mode.
   "CO Night/Mode" will be displayed.

2. Press the NEXT button.
   "CO NO ? →" will be displayed.

3. Press the NEXT button or dial the CO number (01 through 12).
   "CO 01 : Normal" will be displayed and "Normal" will blink.

4. Press the SELECT button until the "Normal" or "DISA" mode is displayed.

5. Press the MEMORY button.
The LCD will stop blinking.

6. • To advance to the next CO number, press the NEXT button.
   • To return to the previous CO number, press the PREV button.
   • To go to the desired CO number, press the SELECT button and then dial the CO number.

7. Repeat steps 4 to 6, to program the assignment of the other CO numbers.

8. To return to the initial program mode, press the END button.

■ Selecting the "DIL" mode

1. • Dial (51) for day mode.
   "CO Day/Mode" will be displayed.
• Dial (52) for night mode.
   "CO Night/Mode" will be displayed.

2. Press the NEXT button.
   "CO NO ? →" will be displayed.

3. Press the NEXT button or dial the CO number (01 through 12).
   "CO 01 : Normal" will be displayed and "Normal" will blink.

4. Press the SELECT button until the "DIL" mode is displayed.
   "CO 01 : DIL : Jack-" will be displayed.

5. Dial the jack number (01 through 32).

6. Press the MEMORY button.
The LCD will stop blinking.

7. • To advance to the next CO number, press the NEXT button.
   • To return to the previous CO number, press the PREV button.
   • To go to the desired CO number, press the SELECT button and then dial the CO number.

8. Repeat steps 4 to 7, to program the assignment of the other CO numbers.

9. To return to the initial program mode, press the END button.

Programming Table
See page 7-22.
Example:

- Company XYZ would like incoming calls from Central Office during the day mode to be received by operators 1 and 2.
  - Operator 1 has been connected to jack number 01.
  - Operator 2 has been connected to jack number 02.

<table>
<thead>
<tr>

</tr>
<tr>
<td>2</td>
<td>03, 04</td>
</tr>
</tbody>
</table>

1. \text{ST NEXT} (\text{NEXT} or 01) \text{SELECT} 01 \text{MEMORY} \ldots \text{Extension jack number 01 only has been set to receive all incoming calls through CO 01.}

2. (\text{NEXT} or \text{SELECT} 02) \text{SELECT} 01 \text{MEMORY} \ldots \text{Extension jack number 01 only has been set to receive all incoming calls through CO 02.}

3. (\text{NEXT} or \text{SELECT} 03) \text{SELECT} 02 \text{MEMORY} \ldots \text{Extension jack number 02 only has been set to receive all incoming calls through CO 03.}

4. (\text{NEXT} or \text{SELECT} 04) \text{SELECT} 02 \text{MEMORY} \ldots \text{Extension jack number 02 only has been set to receive all incoming calls through CO 04.}

5. \text{END}
Pause Time Assignment

until the desired CO number (01 through 12) appears.

until the desired time appears

- 1.5 sec
- 2.5 sec
- 3.5 sec default (all 12 CO's)
- 4.5 sec

**Description**

The KX-T123211 may require a pause time to access Central Office Line or computer accessed line.

The pause time may be changed to 1.5sec, 2.5sec, 3.5sec or 4.5sec.

**Programming**

1. Dial (53).
   "Pause Time" will be displayed.

2. Press the NEXT button.
   "CO NO ? →" will be displayed.

3. Press the NEXT button or dial the CO number (01 through 12).
   "CO 01 : 3.5sec" will be displayed and 3.5sec will blink.

4. Repeat pressing the SELECT button until the desired time (1.5sec, 2.5sec, 3.5sec, 4.5sec) is displayed.

5. Press the MEMORY button.
   The LCD will stop blinking.

6. To advance to the next CO number, press the NEXT button.
   - To return to the previous CO number, press the PREV button.
   - To go to the desired CO number, press the SELECT button and then dial the CO number.

7. Repeat steps 4 to 6, to program the assignment of the other CO numbers.

8. To return to the initial program mode, press the END button.

**Programming Table**

See page 7-23.
Hookswitch Flash Timing

Description

The timing of the hookswitch flash signal must be within the requirements from your Central Office. There are four choices available: 0.3, 0.6, 0.9, or 1.2 seconds.

Programming

1. Dial (54).
   "Flash Time Set" will be displayed.

2. Press the NEXT button.
   "CO NO ? →" will be displayed.

3. Press the NEXT button or dial the CO number (01 through 12).
   "CO 01 : 600ms" will be displayed and "600ms" will blink.

4. Repeat pressing the SELECT button until the desired value is displayed.

5. Press the MEMORY button.
   The LCD will stop blinking.

6. To advance to the next CO number, press the NEXT button.
   • To return to the previous CO number, press the PREV button.
   • To go to the desired CO number, press the SELECT button and then dial the CO number.

7. Repeat steps 4 to 6, to set the hookswitch timing of the other CO's.

8. To return to the initial program mode, press the END button.

Example:

0.3 sec on all 12 CO's =

Programming Table

See page 7-23.
Description
To detect that an outside party has hung up and then terminated the outside line (after a conversation, conference etc.) a CPC signal is needed. CPC signal detection time can be removed or changed at customer's request.

Programming
1. Dial (55).
   "CPC Detection" will be displayed.
2. Press the NEXT button.
   "CO NO? →" will be displayed.
3. Press the NEXT button or dial the CO number (01 through 12).
   "CO 01: N=42" will be displayed and "42" will blink.
4. Dial the CPC Signal Detect Time number (00, 01, 06 through 75).
5. Press the MEMORY button.
   The LCD will stop blinking.
6. To advance to the next CO number, press the NEXT button.
   To return to the previous CO number, press the PREV button.
   To go to the desired CO number, press the SELECT button and then dial the CO number.
7. Repeat steps 4 to 6, to program the detect time of the other CO number.
8. To return to the initial program mode, press the END button.

Programming Table
See page 7-23.

Disconnect Time

until the desired CO number (01 through 12) appears

until the desired disconnect time appears

1.5 sec—default (all 12 CO's)

4.0 sec

56 NEXT [SELECT MEMORY END

or

SELECT

56 NEXT AB SELECT MEMORY END

AB = * : to assign the same on all 12 CO's

0 1 : on CO 01

1 2 : on CO 12

Description

A certain amount of time is needed for an outside call to be released, this is necessary so that a new call may be attempted after disconnecting with the previous call. There are two choices available, 1.5 and 4.0 seconds. The time you select must be longer than the requirements from your Central Office or host PBX.

Programming

1. Dial (56).
   "Disconnect Time" will be displayed.

2. Press the NEXT button.
   "CO NO ? →" will be displayed.

3. Press the NEXT button or dial the CO number (01 through 12).
   "CO 01:1.5 sec" will be displayed and "1.5" will blink.

4. Press the SELECT button to alternate between 1.5 sec and 4.0 sec.

5. Press the MEMORY button.
   The LCD will stop blinking.

6. ● To advance to the next CO number, press the NEXT button.
   ● To return to the previous CO number, press the PREV button.
   ● To go to the desired CO number, press the SELECT button and then dial the CO number.

7. Repeat steps 4 to 6, to set the disconnect time for the other CO's.

8. To return to the initial program mode, press the END button.

Example:

● 4.0 sec on all 12 CO's =

   56 [NEXT [* SELECT MEMORY END

Programming Table

See page 7-24.
**Automatic Designated CO Line Access**

until the desired CO number (01 through 12) appears

until the desired mode

- **Enable** — default (all 12 CO's)
- **Disable**

57 NEXT NEXT SELECT MEMORY END

or

57 NEXT AB SELECT MEMORY END

**AB=**

- ×: to assign the same on all 12 CO's
- 01: on CO 01
- 12: on CO 12

---

**Description**

Through programming, you can select which CO Line is accessed automatically when you dial 9 to use the “Automatic Line Access” feature or you use the “Auto CO Hunting” feature.

**Programming**

1. Dial (57).
   - “Accessed W/ "9"" will be displayed.
2. Press the NEXT button.
   - “CO NO? ->” will be displayed.
3. Press the NEXT button or dial the CO number (01 through 12).
   - “CO 01: Enable” will be displayed and “Enable” will blink.
4. Press the SELECT button to alternate between “Enable” and “Disable” to select the desired mode.
5. Press the MEMORY button.
   - The LCD will stop blinking.
6. ● To advance to the next CO number, press the NEXT button.
   ● To return to the previous CO number, press the PREV button.
   ● To go to the desired CO number, press the SELECT button and then dial the CO number.
7. Repeat steps 4 to 6, to program the assignment of the other CO’s.
8. To return to the initial program mode, press the END button.

**Programming Table**

See page 7-24.
Extension Feature

Extension Group Assignment

until the desired jack number (01 through 32) appears.

A= 1 : extension group 1 ------ default (all 32 jacks)

8 : extension group 8

Description
Enables grouping of extension numbers by department or floor by all extension numbers into a maximum of 8 separate extension groups. Each group has access to the "Paging Group" (on page 4-25), "Call Hunting" (on page 3-15), and "Dial Call Pickup" (on page 4-11) functions.

Programming
1. Dial (60).
   "Extension Group" will be displayed.

2. Press the NEXT button.
   "Jack NO ? + " will be displayed.

3. Press the NEXT button or dial the jack number (01 through 32).
   "#01 : EXT GRP-1" will be displayed jack number

4. Dial the extension group number (1 through 8).

5. Press the MEMORY button.
   The LCD will stop blinking.

6. ● To advance to the next jack number, press the NEXT button.
   ● To return to the previous jack number, press the PREV button.
   ● To go to the desired jack number, press the SELECT button and then dial the jack number.

7. Repeat steps 4 to 6, to program the assignment of the other jack numbers.

8. To return to the initial program mode, press the END button.

Conditions
● When you dial "*" instead of pressing the NEXT button at step 3, in case all of 32 jack numbers have been programmed to extension group 1, "# *:EXT GRP-1" will be displayed.
   In case each of 32 jack numbers has been programmed from extension group 1 to extension group 8, "# *: Mixed" will be displayed.

Programming Table
See page 7-25.
**Service Class Assignment of Toll Restriction**

\[
\begin{align*}
\text{AB} & = 61 : \text{Day Mode} \\
& = 62 : \text{Night Mode} \\
& \quad \quad \text{until the desired jack number (01 through 32) appears.}
\end{align*}
\]

\[
\begin{align*}
C & = 1 : \text{service class 1 \quad default (all 32 jacks)} \\
& = 8 : \text{service class 8}
\end{align*}
\]

\[
\begin{align*}
\text{DE} & = * : \text{to assign the same on all 32 jack numbers} \\
& = 01 : \text{on jack number 01} \\
& = 32 : \text{on jack number 32}
\end{align*}
\]

**Description**

Used to prohibit selected extensions from making long distance calls during the day or night mode.

Toll restriction can help eliminate telephone abuse and contribute to saving telephone costs.

There are eight service classes available for each extension.

“Area Type Selection” on page 3-18 should be set.

To allow or deny dialing an Operator Call, see “CO Operator Call-Boundary Class” on page 3-19.

- For service class 3, up to 20 area codes can be selected for use in toll dialing. See "Area Code Entry for Class 3" on page 3-22.

- For service class 5, up to 20 exchange codes (charged) can be selected for use in local dialing (charged). See "Exchange Code Entry for Class 5" on page 3-23.

- For service class 7, up to 20 exchange codes can be selected for no use in local dialing. See "Exchange Code Entry for Class 7" on page 3-24.

- For an area that uses Area code type as the exchange code, up to 20 exchange codes can be selected for use in local dialing. See "Allowable Exchange Code Selection" on page 3-21.

### Programming

1. **Dial (61) for day mode.**
   
   "Day Toll Restrct" will be displayed.
   
   **Dial (62) for night mode.**
   
   "Nig Toll Restrct" will be displayed.

2. Press the NEXT button.
   
   "Jack NO ? → " will be displayed.

3. Press the NEXT button or dial the jack number (U1 through 32).
   
   "#01 : Class-1" will be displayed and "1" will blink.

4. Press the service class number (1 through 8).

5. Press the MEMORY button.
   
   The LCD will stop blinking.

6. To advance to the next jack number, press the NEXT button.
   
   To return to the previous jack number, press the PRCV button.
   
   To go to the desired jack number, press the SELECT button and then dial the jack number.

7. Repeat steps 4 to 6, to program the assignment on the other jack numbers.

8. To return to the initial program mode, press the END button.

### Programming Table

See pages 7-25 and 7-26.
Description
Each extension can be programmed by name and will be displayed on the display when making or receiving intercom calls.

Programming
1. Dial (63).
   "Extension Name" will be displayed.
2. Press the NEXT button.
   "Jack NO ? ➔" will be displayed.
3. Press the NEXT button or dial jack number (01 through 32).
   "#01 : " will be displayed.
4. To program the extension name,
   ① Dial (0 through 9, * or #)
   ② Press the SELECT button until the desired letter appears.
   ③ Repeat steps ① and ②, to program the desired name.
5. Press the MEMORY button.
The LCD will stop blinking.
6. To advance to the next jack number, press the NEXT button.
   To return to the previous jack number, press the PREV button.
   To go to the desired jack number, press the SELECT button and then dial the jack number.
7. Repeat steps 4 to 6, to program the other extension names of jack numbers.
8. To return to the initial program mode, press the END button.

11. Press the SELECT button four times. ................................ \( \#01: \) Brown

12. MEMORY END

There is a phone number directory on page 7-1
Description
This feature gives each message of the SMDR to an account code of the called or calling party. This feature has two modes “Forced” and “Option”. In the “Forced” mode, the account code must be entered every time extension user dials. In the “Option” mode, the account code may be entered when a record is needed. Refer to “Account Code” page 4-40.

Programming
1. Dial (64).
“Call Accounting” will be displayed.
2. Press the NEXT button.
“Jack NO?→” will be displayed.
3. Press the NEXT button or dial the jack number (01 through 32).
“#01: Option” will be displayed and the jack number
“Option” will blink.
4. Press the SELECT button to alternate between “Option” and “Forced” to select the desired mode.
5. Press the MEMORY button.
The LCD will stop blinking.
6. • To advance to the next jack number, press the NEXT button.
• To return to the previous jack number, press the PREV button.
• To go to the desired jack number, press the SELECT button and then dial the jack number.
7. Repeat steps 4 to 6, to program the account code of the other jack numbers.
8. To return to the initial program mode, press the END button.

Programming Table
See page 7-26.
Call Transfer To Outside Line

until the desired jack number (01 through 32) appears.

until the desired mode appears

[ Disable default (all 32 jack numbers) ]

[ Enable ]

65 NEXT NEXT SELECT MEMORY END

or

65 NEXT AB SELECT MEMORY END

Description

Through programming, you can select whether an extension can transfer an intercom or outside call to another outside line manually.

Programming

1. Dial (65).
   "Transfer to CO" will be displayed.

2. Press the NEXT button.
   "Jack NO ? → " will be displayed.

3. Press the NEXT button or dial the jack number (01 through 32).
   "#01 : "Disable" will be displayed and "Disable"
   ---- jack number
   will blink.

4. Press the SELECT button to alternate between "Enable" and "Disable" to select the desired mode.

5. Press the MEMORY button.
   The LCD will stop blinking.

6. ● To advance to the next jack number, press the NEXT button.
   ● To return to the previous jack number, press the PREV button.
   ● To go to the desired jack number, press the SELECT button and then dial the jack number.

7. Repeat steps 4 to 6, to program the assignment of the other jack numbers.

8. To return to the initial program mode, press the END button.

Programming Table

See page 7-27.
Call Forwarding To Outside Line

Description

“Call Forwarding To Outside Line” (on page 4-29) enable for each extension.

Programming

1. Dial (66).
   “CO Forward” will be displayed.

2. Press the NEXT button.
   “Jack NO ?” will be displayed.

3. Press the NEXT button or dial the jack number (01 through 32).
   “#01 : Disable” will be displayed and “Disable” will blink.

4. Press the SELECT button to alternate between “Enable” and “Disable” to select the desired mode.

5. Press the MEMORY button.
   The LCD will stop blinking.

6. ● To advance to the next jack number, press the NEXT button.
   ● To return to the previous jack number, press the PREV button.
   ● To go to the desired jack number, press the SELECT button and then dial the jack number.

7. Repeat steps 4 to 6 to program the assignment of the other jack numbers.

8. To return to the initial program mode, press the END button.

Programming Table

See page 7-27.
Executive Override

until the desired jack number (01 through 32) appears

\[\begin{array}{l}
\text{Disable} \quad \text{default (all 32 jack numbers)} \\
\text{Enable} \\
\end{array}\]

67 NEXT NEXT SELECT MEMORY END

or

67 NEXT AB SELECT MEMORY END

\[AB= \begin{array}{l}
\times : \text{to assign the same on all 32 jack numbers} \\
01 : \text{on jack number 01} \\
32 : \text{on jack number 32} \\
\end{array}\]

Description

Through programming, allows an extension user to intrude into another extension or CO line that is in conversation with an outside party or inside party.
Refer to “Executive Override (Barge-In) on page 4-9.

Programming

1. Dial (67).
   “Busy Override” will be displayed.

2. Press the NEXT button.
   “Jack NO ? → ” will be displayed.

3. Press the NEXT button or dial the jack number (01 through 32).
   “\#01: Disable” will be displayed and “Disable” jack number will blink.

4. Press the SELECT button to alternate between “Enable” and “Disable” to select the desired mode.

5. Press the MEMORY button.
The LCD will stop blinking.

6. ● To advance to the next jack number, press the NEXT button.
   ● To return to the previous jack number, press the PREV button.
   ● To go to the desired jack number, press the SELECT button and then dial the jack number.

7. Repeat steps 4 to 6, to program the assignment of the other jack numbers.

8. To return to the initial program mode, press the END button.

Programming Table

See page 7-27.
**Description**

This feature can call to the extension that is setting the Do Not Disturb by programming. Refer to "Do Not Disturb Override" on page 4-32.

**Programming**

1. Dial (68).
   "DND Override" will be displayed.

2. Press the NEXT button.
   "Jack NO ? → " will be displayed.

3. Press the NEXT button or dial the jack number (01 through 32).
   "#01 : Disable" will be displayed and "Disable" will blink.

4. Press the SELECT button to alternate between "Enable" and "Disable" to select the desired mode.

5. Press the MEMORY button.
   The LCD will stop blinking.

6. To advance to the next jack number, press the NEXT button.
   To return to the previous jack number, press the PREV button.
   To go to the desired jack number, press the SELECT button and then dial the jack number.

7. Repeat steps 4 to 6, to program the assignment of the other jack numbers.

8. To return to the initial program mode, press the END button.

**Conditions**

This feature allows you to ring an extension that is set for the "Do Not Disturb" mode.

**Programming Table**

See page 7-28.
Doorphone Feature

**Ringing Assignment of Doorphone**

![Diagram of Doorphone Feature]

**Description**

Allows each extension to be programmed for receiving calls from up to 2 doorphones during the day or night mode.

(Doorphone is an option.)

**Programming**

1. ● Dial (70) for day mode.
   "Day Door Phone" will be displayed.
   ● Dial (71) for night mode.
   "Night Door Phone" will be displayed.

2. Press the NEXT button.
   "Door NO ? " will be displayed.

3. Press the NEXT button or dial the doorphone number (1 or 2).
   "DP-1: #01 : Enable" will be displayed.

4. Repeat pressing the button until the desired jack number appears, or press the button and then dial the jack number.

5. Press the SELECT button to alternate between "Enable" and "Disable" to select the desired mode.

6. Press the MEMORY button.
   The LCD will stop blinking.

7. ● To advance to the next jack number, press the button.
   ● To return to the previous jack number, press the button.
   ● To go to the desired jack number, press the button and then dial the jack number.

8. Repeat steps 5 to 7, to program the assignment of the other jack numbers.

9. Repeat steps 3 to 8, to program the assignment of the other doorphone.

10. To return to the initial program mode, press the END button.

**Programming Table**

See pages 7-28 and 7-29.
Call on Hold for Standard Telephone

until the desired mode appears

<table>
<thead>
<tr>
<th>Hold-1</th>
<th>Flash hookswitch only</th>
<th>default</th>
</tr>
</thead>
<tbody>
<tr>
<td>Hold-2</td>
<td>Flash hookswitch and dial 20</td>
<td></td>
</tr>
</tbody>
</table>

Description

If the following happens frequently with a standard telephone, program the HOLD MODE 2.

- Nobody answers when you receive a call.
- A CO line is busy although nobody is using the line.
- The Trunk (CO) Indicator of the system unit does not turn off even after you hang up.

If a call is not terminated reliably after you hang up, the above-mentioned cases are caused. To avoid these problems, program the HOLD MODE 2. Every call will be terminated reliably except those calls that you dialed 20 after flashing the hook-switch in this mode.

The following operation is changed when "Hold-2" mode is set.

- Call Park (on page 5-4)
- Call on Hold (on page 5-4)
- Conference (on page 5-5)
- Call Waiting (on page 5-5)
- Call Splitting (on page 5-6)
- Call Transfer (on page 5-6)
- Paging And Transfer (on page 5-8)
- External Feature Access (on page 5-9)
- Account Code (on page 5-10)

Programming

1. Dial (91) "Option 1" will be displayed.
2. Press the NEXT button. "Hold-1" will be displayed and blink.
3. Press the SELECT button to alternate between "Hold-1" and "Hold-2" to select the desired mode.
4. Press the MEMORY button. The LCD will stop blinking.
5. To return to the initial program mode, press the END button.

Programming Table

See page 7-29.

- Flexible Night Service
- Executive Override Deny
- Station Lock
- Timed Reminder

DSS parameters
- DSS button of the DSS Console
- Feature button of the DSS Console

Speed dial
- Speed access codes (00 through 99) in which phone numbers are stored may be preset.
Programming

To set System Parameters, Speed Dial or All Parameters to the default data:

1. Dial (99).
   "System Clear" will be displayed.

2. Press the NEXT button.
   "Menu : All Para" will be displayed and "All Para" will blink.

3. Repeat pressing the SELECT button until the desired data mode is displayed.

4. Press the MEMORY button.
   The LCD will stop blinking.

5. Repeat steps 3 to 4, to clear the other system data.

To set CO Parameter to the default data:

1. Dial (99).

2. Press the NEXT button.

3. Repeat pressing the SELECT button until the "CO Para" is displayed.

4. Press the MEMORY button.
   "CO NO ? друг" is displayed.

5. Dial the CO number (01 through 12).
   When dialing (01), "CO NO ? друг 01" will be displayed.

6. Press the MEMORY button.
   The LCD will stop blinking.

7. Repeat steps 5 to 6, to clear the other CO parameter.

To set Extension Parameter to the default data:

1. Dial (99).

2. Press the NEXT button.

3. Repeat pressing the SELECT button until the "EXT Para" is displayed.

4. Press the MEMORY button.
   "Jack NO ? друг" is displayed.

5. Dial the jack number. (01 through 32)
   When dialing (01), "Jack NO ? друг 01" will be displayed.

6. Press the MEMORY button.
   The LCD will stop blinking.

7. Repeat steps 5 to 6, to clear the other extension parameter.

To set DSS Parameter to the default data:

1. Dial (99).

2. Press the NEXT button.

3. Repeat pressing the SELECT button until the "DSS Para" is displayed.

4. Press the MEMORY button.
   "DSS NO ? друг" is displayed.

5. Dial the DSS number (1 or 2).
   When dialing (1), "DSS NO ? друг 1" will be displayed.

6. Press the MEMORY button.
   The LCD will stop blinking.

7. Repeat steps 5 to 6, to clear the other DSS parameter.

After completing clearing, and to return to the initial mode:

1. Press the END button.
When you connect EMSS PROPRIETARY TELEPHONE (KX-T61631, KX-T61630, KX-T61620, KX-T61650, KX-T30830, KX-T30825, KX-T30820 or KX-T30850) to the KX-T123211 system, change the programming of CO button or DSS button to have them operate properly.

The default of CO button or DSS button is assigned as following.

- In case of KX-T61631, KX-T61630, KX-T61620 and KX-T61650,
  - CO button on which "CO1" is printed —— CO1 Line
  - CO button on which "CO2" is printed —— CO2 Line
  - CO button on which "CO3" is printed —— CO3 Line
  - CO button on which "CO4" is printed —— CO4 Line
  - CO button on which "CO5" is printed —— CO5 Line
  - CO button on which "CO6" is printed —— CO6 Line

- In case of KX-T30830, KX-T30825, KX-T30820 and KX-T30850,
  - CO button on which "CO1" is printed —— CO1 Line
  - CO button on which "CO2" is printed —— CO2 Line
  - CO button on which "CO3" is printed —— CO3 Line

- In case of KX-T30830 only,
  - DSS button on which "DSS11" is printed —— Extension no. of Jack no. 01
  - DSS button on which "DSS12" is printed —— Extension no. of Jack no. 02
  - DSS button on which "DSS13" is printed —— Extension no. of Jack no. 03
  - DSS button on which "DSS14" is printed —— Extension no. of Jack no. 04
  - DSS button on which "DSS15" is printed —— Extension no. of Jack no. 05
  - DSS button on which "DSS16" is printed —— Extension no. of Jack no. 06
  - DSS button on which "DSS17" is printed —— Extension no. of Jack no. 07
  - DSS button on which "DSS18" is printed —— Extension no. of Jack no. 08

Change the default of CO button or DSS button by the programming of "Flexible CO Button" or "Flexible DSS Button".

**Flexible CO Button**

- "To change into other CO button" on page 4-57
- "To assign into trunk group access button" on page 4-57
- "To change into DSS button" on page 4-58
- "To change into one touch dialing button" on page 4-58
- "To change into message waiting button" on page 4-59
- "To change into other all CO button" on page 4-59

**Flexible DSS Button (KX-T30830 only).**

- "To change into other DSS button" on page 4-61
- "To change into one touch dialing button" on page 4-61
- "To change into message waiting button" on page 4-62
Examples

The outside lines of KX-T123211 are connected 8 CO's from Central Office (CO). Extension No 105 (Jack No. 05) is set up beforehand by System Programming as followings.

System Programming
- Flexible Outward Dialing Assignment (Both Day and Night Mode) CO1 through CO7 are “Enable” CO8 is “Disable”.
- Flexible Ringing Assignment (Both Day and Night Mode) CO1 through CO7 are “Enable” CO8 is “Disable”.
- Trunk Group Assignment
  - Trunk Group 1: CO1, CO2, CO3
  - Trunk Group 2: CO4, CO5, CO6
  - Trunk Group 3: CO7, CO8

Case 1

If you connect KX-T30820 at Extension 105 (Jack No. 05) and set the CO button of KX-T30820 as shown in Fig.1, Outgoing calls and Incoming calls in Extension 105 (Jack No. 05) are operated as followings.

Outgoing calls:
- Pressing CO3 Button: Access CO3 Line
- Pressing CO4 Button: Access CO4 Line
- Pressing CO5 Button: Access CO5 Line
- Dialing 9 1 (Trunk group 1): Access only CO3 Line
- Dialing 8 2 (Trunk group 2): Access only CO4 and CO5 Lines
- Dialing 8 3 (Trunk group 3): No access CO Line
- You cannot dial through CO1 Line, CO2 Line and CO6 Line through CO8 Line

Incoming calls:
- The calls which reaches through the CO3 Line through CO5 Line can be received.
- The calls which reaches through the CO1 Line, CO2 Line, CO6 Line through CO8 Line can not be received but can be received with Directed Call Pickup or Direct Inward System Access.

The CO Line which is not assigned to the CO Button cannot be dialed or received.
If you connect KX-T30820 at Extension 105 (Jack No. 05) and set the CO button of KX-T30820 as shown in Fig. 2, Outgoing calls and Incoming calls in Extension 105 (Jack No. 05) are operated as followings.

![Diagram of KX-T123211 and KX-T30820](image)

**Change**
- **KX-T123211**
  - CO1
  - CO2
  - CO8

**Extension no. 105**
- Trunk Group 1
- Trunk Group 2
- Trunk Group 3
- ICM

**Outgoing calls:**
- Pressing CO Button which can access to Trunk group 1
  - Access CO1 Line through CO3 Line
- Pressing CO Button which can access to Trunk group 2
  - Access CO4 Line through CO6 Line
- Pressing CO Button which can access to Trunk group 3
  - Access only CO7 Line
- Dialing **[8][1]** (Trunk Group 1) Access CO1 Line through CO3 Line
- Dialing **[8][2]** (Trunk Group 2) Access CO4 Line through CO6 Line
- Dialing **[8][3]** (Trunk Group 3) Access only CO7 Line

**Incoming calls:**
- The calls which reaches through the CO1 Line through CO7 Line can be received.
- The calls which reaches the CO8 Line cannot be received.

If you connect KX-T123211 at Extension 105 (Jack No. 05) and set the CO Button of KX-T30820 as shown in Fig. 3, Outgoing calls and Incoming calls in Extension 105 (Jack No. 05) are operated as followings.

![Diagram of KX-T123211 and KX-T30820](image)

**Change**
- **KX-T123211**
  - CO1
  - CO2
  - CO8

**Extension no. 105**
- Trunk Group 1
- Other all CO's
- ICM

**Outgoing calls:**
- Pressing CO Button which can access to Trunk group 1
  - Access CO1 Line through CO3 Line
- Pressing CO4 Button
  - Access CO4 Line
- Pressing CO Button which can access to other all CO Line
  - Access CO5 Line through CO7 Line
- Dialing **[8][1]** (Trunk Group 1) Access CO1 Line through CO3 Line
- Dialing **[8][2]** (Trunk Group 2) Access CO4 Line through CO6 Line
- Dialing **[8][3]** (Trunk Group 3) Access only CO7 Line

**Incoming calls:**
- The calls which reaches through the CO1 Line through CO7 Line can be received.
- The calls which reaches the CO8 Line cannot be received.

---

**Case 2**

**Case 3**
OPERATION OF EMSS PROPRIETARY TELEPHONES  
(KX-T123235, KX-T123230, KX-T123220, KX-T123250, KX-T61631, KX-T61630, KX-T61620, KX-T61650, KX-T30830, KX-T30825, KX-T30820, KX-T30850)

To operate this system, after making program changes, set the System Program Switch located on the KX-T123211 (Electronic Modular Switching System) to the SET position.

Making Calls

When the unit is unused, Liquid Crystal Display will show the month, day and the present time.

### Inter Office Calling (Intercom)

<table>
<thead>
<tr>
<th>Using the Handset</th>
<th>Hands-free</th>
</tr>
</thead>
<tbody>
<tr>
<td>Lift handset</td>
<td>Press SP-PHONE</td>
</tr>
<tr>
<td>Dial extension number (100 through 199)</td>
<td>Dial extension number (100 through 199)</td>
</tr>
<tr>
<td>Talk</td>
<td>Talk</td>
</tr>
<tr>
<td>Hang up</td>
<td>Prop SP-PHONE</td>
</tr>
</tbody>
</table>

- You may press the ICM (Intercom) button instead of the first SP-PHONE button.

#### Description
Station to station dialing within the KX-T123211 system.

#### Operation
**Using the handset**
1. Lift the handset.
2. Dial the extension number (100 through 199).
3. Start talking
4. Hang up upon completion of the conversation.

**Hands-free**
1. Press the SP-PHONE or ICM button.
2. Dial the extension number (100 through 199).
3. Start talking
4. Press the SP-PHONE button again after completion of the conversation.

#### When changing CO button into DSS (Direct Station Selection) button ;
1. Lift the handset or press SP-PHONE.
2. Press CO which has been changed into DSS.

#### Conditions
- The extension number is set below. Through programming, you may change the extension number to other number. See the page 3-8.

Default:

- 101: is assigned to extension of jack number 01
- 132: is assigned to extension of jack number 32

- When a called party has the KX-T123230 / KX-T123235 / KX-T61631 / KX-T61630 / KX-T30830 equipped with an LCD, the extension number of the calling party will be displayed on the LCD of the called party.

- The extension number of the calling party will be displayed on the LCD of the KX-T123230 / KX-T123235 / KX-T61630 / KX-T30830 / KX-T61631.

- The ICM indicator will be lit green while using the unit.

- The KX-T123250, KX-T61650 or KX-T30850 will not function for hands-free mode but can hear the other party's voice in the on-hook mode.
### Outward Dialing

</tbody>
</table>
Individual Trunk Group Access

- Lift handset or press SP-PHONE.
- Dial "8".
- Dial trunk group number (1 through 8).
- Wait for C.O.
- Dial phone number.
- Talk.
- Hang up handset or press SP-PHONE.

You may press the CO button instead of dialing 8 and trunk group number (1 through 8). In this case, you must assign the trunk group access number to the CO button. To assign, see “Flexible CO button” on page 4-57.

Description
Each extension can automatically select an idle CO line within the same trunk group. Through programming, 12 CO lines can be divided up to 8 groups. See the page 3-52.

Operation
1. Lift the handset or press the SP-PHONE button.
2. Dial (8) and the trunk group number (1 through 8) or press the CO button which is changed into trunk group access number.
3. Dial tone from the CO (Central Office) will be heard.
4. Dial the phone number.
5. Start talking.
6. Hang up or press the SP-PHONE button.

Conditions
- The CO line which is not assigned to the CO Button cannot be dialed.
- The CO lines that is assigned to the trunk group are set below.
  
  Default;
  CO 1 is assigned to Trunk group 1.
  CO 2 is assigned to Trunk group 2.
  CO 3 is assigned to Trunk group 3.
  CO 4 is assigned to Trunk group 4.
  CO 5 is assigned to Trunk group 5.
  CO 6 is assigned to Trunk group 6.
  CO 7 is assigned to Trunk group 7.
  CO 8 through CO 12 are assigned to Trunk group 8.

Each extension can access a new CO line without hanging up.

While having a conversation,

- The original conversation will be terminated and a new CO line will be accessed.

Description
There are 100 memory locations of system speed dialing available. A maximum of each memory location is 32 digits.

For programming, refer to “System Speed Dialing Entry” on page 3-5.

Operation
1. Lift the handset or press the SP-PHONE button.
2. Press the AUTO button.
3. Dial the speed access code (00 through 99).
   - You may press the CO button to select the CO line directly after lifting the handset or press the SP-PHONE button.

Conditions
- The dialed number will be displayed on the LCD of the KX-T123230 / KX-T123235 / KX-T61631 / KX-T61630 / KX-T30830.
- Continuous use of speed dialing is possible.
  ex. [AUTO] [0] [0] [AUTO] [0] [1]
- Chaining together two or more memory locations.
- Combinations of speed dialing, one touch dialing and manual dialing is possible.
One Touch Dialing

Programming

- Be sure the handset is in the cradle and the SP-PHONE or MONITOR button is OFF.
- Set the MEMORY switch of the Proprietary telephone to "PROGRAM".

Storage

| Press PROGRAMMABLE FEATURE | Dial "9" | Dial phone number | Press MEMORY |

- You may dial 81 through 88 instead of 9.
  9 - - - An extension automatically selects an idle line within the CO line enable to call.
  81 through 88 - - - An extension selects a trunk group designated.
  9 or 81 through 88 must be dialed for storage.

To Correct an Error while Programming

| TRANSFER | CLEAR (TRANSFER) |

- After pressing the CLEAR button, reprogram the correct number.
- The TRANSFER button is used as the CLEAR button.

To Erase after Programming

| Press PROGRAMMABLE FEATURE | Press CLEAR (TRANSFER) | Press MEMORY |

- The TRANSFER button is used as the CLEAR button.

To Change a Stored Number

Repeat "Storage" above.

To Confirm a Stored Number

Repeat programming the same number into the same station.

Dialing

- You may press the CO button to select the CO line directly after lifting the handset or pressing the SP-PHONE button.

Description

There are 12 memory locations for automatic dialing available. (KX-T123230, KX-T123235, KX-T123220, KX-T61631, KX-T61630, KX-T61620, KX-T30830, KX-T30820, KX-T30820)

There are 3 memory locations for automatic dialing available. (KX-T123250,KX-161650, KX-T30850 )

Up to 16 digits can be stored into each of the 12 or 3 memory locations. The "#", "#", """, "FLASH", "PAUSE" and "ICM (Secret)" button can be registered as 1 digit.

- For your convenience, program private phone numbers into the KX-T123230, KX-T123225, KX-T123220, KX-T123250, etc.
Programming

Be sure the handset is in the cradle and the SP-PHONE or MONITOR button is OFF.

1. Set the MEMORY switch to “PROGRAM”. “PITS-PGM NO ? →” will be displayed.

2. Press a programmable feature button. The LCD will show “M01/P : Not Stored” when nothing is stored in the programmable feature button “1”.

When automatic line access number 9 and telephone number 123-4567-7890 has been stored, “M01/P : 9-123-4567-” will be displayed.

3. Enter the line access number.
   9: automatic line access number
   81: access number of trunk group 1
   82: access number of trunk group 2
   83: access number of trunk group 3
   84: access number of trunk group 4
   85: access number of trunk group 5
   86: access number of trunk group 6
   87: access number of trunk group 7
   88: access number of trunk group 8

4. Enter the phone number.
   • You may enter punctuations in a phone number. The SAVE button is used as the “-” button.
   • To erase a wrong entry, press the CLEAR button. The TRANSFER button is used as the CLEAR button.
   • When you don’t want to display the dialed phone number on the LCD in One Touch Dialing, press the ICM button before and after dialing the phone number that you want to keep secret. Do not press the ICM button before line access number (9 or 81 through 88).

Example:

```
9-123  [ICM] 456  [ICM]
```

The display shows the following when programming.

```
M01/P : 9-123[456]
```

The display shows the following when dialing.

```
-123...
```

5. Press the MEMORY button. The MEMORY indicator will be lit.

6. Repeat steps 2 to 5, to program on other programmable feature button.

7. After programming all the numbers, return the MEMORY switch to the “SET” position. The MEMORY indicator will go out.

Dialing

1. Lift the handset or press the SP-PHONE button.

2. Press a programmable feature button.
   • You may press the CO button to select the CO line directly after lifting the handset or press the SP-PHONE button.

Conditions

• Use the “→(FWD/DND)”, or “←(CONF)” button for scrolling the display from side to side.

• The dialed phone number will be displayed on the LCD of the KX-T123230 / KX-T123235 / KX-T61631 / KX-T61630 /KX-T30830. The dialed phone number can be kept secret by not being displayed also.

• The combinations of speed dialing, one-touch dialing and manual dialing is possible.

• The line access number (9) or trunk group access number (81 through 88) should be stored.

• Continuous use of one touch dialing is possible.

Example:

```
[PROGRAMMABLE FEATURE 1]
[PROGRAMMABLE FEATURE 2]
```

In this case, programmable feature button “2” should not include the line access number or trunk group access number.

• When dialing, the pause is automatically entered after line access number (9) or trunk group access number (81 through 88) are stored.

• Features that can be accessed by using the dialing button also can be programmed into memory.

Refer to “One Touch Access for System Features” page 4-52.

Examples:

Automatic line access number 9 and phone number 123-4567 into the programmable feature button “1”.

Programming:

Set the MEMORY switch to “PROGRAM” position.

Dialing

Lift the handset.
Press [PROGRAMMABLE FEATURE 1]
• You may press the CO button to select the CO line directly after lifting the handset.
**Calling Doorphone**

**Calling doorphone 1**

- Lift handset or press SP-PHONE
- Dial "311"

**Calling doorphone 2**

- Lift handset or press SP-PHONE
- Dial "312"

**Description**

You can call the doorphone within the KX-T123211 system.

**Operation**

Dialing to the doorphones
1. Lift the handset or press the SP-PHONE button.
2. Dial (311) for calling doorphone 1.
   Dial (312) for calling doorphone 2.
   "Door Phone-1" or "Door Phone-2" will be displayed.
3. Wait for the confirmation tone and then start talking.
4. Hang up or press the SP-PHONE button after completion of the conversation.

**Conditions**

- The features, for instance, hold, transfer and so on, can not be activated by the doorphone.
- Up to two doorphones (KX-T30865) can be connected to the KX-T123211.

---

**Operator Call**

- Lift handset or press SP-PHONE
- Dial "0"
- Dial "0" or "1" ("0": for Operator 1, "1": for Operator 2)

**Description**

You can call the operator within the KX-T123211 system.
This feature is required to be set beforehand in the KX-T123211.
For programming, see page 3-9.

**Operation**

1. Lift the handset or press the SP-PHONE button.
2. Dial (0).
3. Dial (0) for calling the operator 1.
   Dial (1) for calling the operator 2.
- In case one operator is programmed, you have only to dial 0.

---

**Distinctive Dial Tone**

**Description**

A distinctive dial tone will be heard from the handset if the extension user has previously activated a special feature.

**Conditions**

There are two types of dial tones.

- **Dial tone 1**: ordinary dial tone

- **Dial tone 2**: when any of the following features are activated:
  - Pickup Dial
  - Do not Disturb.
  - (only a standard telephone)
  - Dial Call Pickup Deny
  - Data Line Security
  - Call Forwarding
  - Absent Message Capability
  - Station Lock
  - Message Waiting
  - BGM
  - Timed Reminder

---

1 sec

4-6
**When a Line is Busy**

**Automatic Call Back Busy (Camp-on)**

**Description**

If the extension you have dialed is busy, or outside line (CO line) you have selected is busy, the call will be automatically called back to you when the extension or the outside line (CO line) becomes free using this function.

This feature is also known as camp-on.

**Operation**

**Setting**

1. Lift the handset or press the SP-PHONE button.
2. For intercom calls, dial the extension number.
   For outside calls, press the CO button or dial (9 or 81 through 88).
3. Dial (6) after a busy tone is heard.
4. Wait for the confirmation tone.
   Example: “Call back CO 01” or “Call back Ext 105” will be displayed.
5. Hang up or press the SP-PHONE button.

**When hearing a recall for camp-on**

Lift the handset or press the SP-PHONE button.

- When using an intercom call, you will hear the ring back tone.
- When using an outside call, you will hear the CO dial tone.

**Conditions**

- Lifting the handset (or pressing the SP-PHONE button) during the camp-on mode will cause the camp-on feature to be cancelled.
- An extension may be the recipient of more than one call back busy, the call backs will be executed in the order of their arrival.
- If a call back is not answered at the original extension within 10 seconds, the call back will be cancelled.
**Last Number Redial**

**Description**
The last phone number dialed on an outgoing call (CO line) can be redialed.

**Operation**
1. Lift the handset or press the SP-PHONE button.
2. Press the REDIAL button.
   - You may press the CO button to select the CO line directly after lifting the handset or pressing the SP-PHONE button.
   - You may dial 8 and the trunk group number (1 through 8) to select the trunk group directly after lifting the handset or pressing the SP-PHONE button.

**Conditions**
- Up to 32 digits can be stored and redialed.
  - The '*' or '#', or 'PAUSE' button can be registered as 1 digit.
  - When using the KX-T123235, one pressing of the REDIAL button:
    - When using the handset; redial once
    - When using hands-free; redial up to 15 times (Automatic Redialing) within 10-minutes.
    - To cancel automatic redialing, press the FLASH button.
- When calling or while in the conversation mode, pressing the REDIAL button will cause the redial to operate after about 3 seconds.

---

**Busy Station Signaling**

**Description**
If the extension you have dialed is busy, you can inform the extension that another intercom call is waiting by three beeps.

If the extension you have dialed is KX-T123235, you can inform the extension through the speaker.

See “Off Hook Call Announcement” on page 4-23.

**Operation**
1. Lift the handset or press the SP-PHONE button.
2. Dial the extension number (100 through 199).
3. When you will hear a busy tone, dial (1) and wait for an answer.

**Conditions**
- To answer your signal, see “Call Waiting” on page 4-20.
- If the other party is setting “Call Waiting Tone-From Extension Deny” on page 4-43 or is using a data terminal equipment, you may not be able to use this feature. A reorder tone is heard after dialing 1.
Executive Override (Barge-In)

### Description

Allows an extension user to intrude into another extension that is in conversation with an outside or inside party.

For use of this feature, the extension is required to be set for this feature beforehand in the KX-T123211. For programming, see page 3-74.

### Operation

1. Lift the handset or press the SP-PHONE button.
2. Dial the extension number.
3. When you hear a busy tone, dial (2).

   A 3-party conference will now be established.

**To terminate conference**

Replace the handset back on hook or press the SP-PHONE button.

- The other two parties will be directly connected together and can converse with each other. (Intercom calls and intercom to outside are OK.)

**To terminate one caller and talk to the other**

- If the conference parties are one outside caller and one extension:
  - To talk to the outside party, press the CO button.
  - To talk to the extension party, press the ICM button.

### Conditions

- If the other party is using data equipment or is set for "Executive Override Deny-Extension" on page 4-33, you can not intrude into the other party that is in conversation. A reorder tone is heard after dialing 2.

### into CO

**Description**

Allows an extension user to intrude into a CO line in use.

For the use of this feature, the extension is required to be set for this feature beforehand in the KX-T123211. For programming, see page 3-74.

**Operation**

1. Lift the handset or press the SP-PHONE button.
2. Press the CO button on which you want to intrude.

   A 3-party conference is now established.

**To terminate conference**

Replace the handset back on hook or press the SP-PHONE button.

- The other two parties will be directly connected together and can converse with each other. (Intercom to outside is OK, outside to outside is impossible.)

If you want to leave the conference, press the CONF button instead of SP-PHONE button and if you want to join the conference again, press the flashing (in groups of 2) CO button.

**To terminate one caller and talk to the other caller.**

- To talk to the outside party, press the CO button.
- To talk to the extension party, press the ICM button.

**Conditions**

- If the other party is setting "Data Line Security" on page 4-42, you can not intrude into the other party that is in conversation.
Receiving Calls

**Answer**

| Lift handset | Or | Press SP-PHONE |

**Operation**

- When receiving an intercom call, you may press the ICM button whose indicator is flashing quickly and talk. (Hands-free mode)
- When receiving an outside call, you may press the CO button whose indicator is flashing red quickly and talk. (Hands-free mode)
- When the “Automatic Answering Selection” feature (on page 4-56) is selected “No Line Preference-Incoming” in the extension and outside call reaches, lift the handset and then press the CO button whose indicator is flashing (red color) quickly.
- When the “Automatic Answering Selection” feature (on page 4-55) is selected “Prime Line Preference-Incoming” in the extension and any incoming calls from the Central Office are received at the same time except preferred CO line, you must lift the handset and then press the CO button whose indicator is flashing (red color) quickly.

**Conditions**

An extension can not receive the call through the CO line which is not assigned to the CO button. Therefore, if the extension user wants to receive the CO call, the CO line is required to be assigned to the CO button. To assign the CO line to the CO button, there are 3 ways as follows.

- Way to change into other CO button (on page 4-57)
- Way to assign to trunk group access button (on page 4-57)
- Way to change into other all CO numbers which are not assigned to CO button (on page 4-59)

**Automatic Answer-Intercom**

**Setting**

<table>
<thead>
<tr>
<th>AUTO ANS</th>
<th>MUTE</th>
</tr>
</thead>
<tbody>
<tr>
<td>Press AUTO ANS (indicator will be lit)</td>
<td></td>
</tr>
</tbody>
</table>

**To cancel**

<table>
<thead>
<tr>
<th>AUTO ANS</th>
<th>MUTE</th>
</tr>
</thead>
<tbody>
<tr>
<td>Press AUTO ANS (indicator will go out)</td>
<td></td>
</tr>
</tbody>
</table>

**Description**

Allows an extension user to answer an intercom call in the automatic hands-free mode without any operation when receiving an intercom call.

**Operation**

1. For setting, press the AUTO ANS button. The AUTO ANS indicator will be lit.
2. For cancellation, press the AUTO ANS button again. The AUTO ANS indicator will go out.

**Conditions**

- This feature is required to be set beforehand while the unit is not in use.
- The KX-T123250, KX-T01650 or KX-T30850 will not function for Automatic Answer.
### Dial Call Pickup

**Description**
An extension user can answer any ringing extension within their own extension group.

**Operation**
1. Lift the handset or press the SP-PHONE button.
2. Dial (40) and wait for the confirmation tone.
3. Start talking.

**Conditions**
- Dial Call Pickup will work for incoming calls (intercom, outside and doorphone) but will not work for camp-on recall and hold recall.
- If a ringing extension is outside the extension group or is in the dial call pickup denied mode, then a reorder tone will be heard through the use of this feature.
- Refer to “Extension Group Assignment” on page 3-66.
- Dial Call Pickup can use with the present call placed on hold.

### Directed Call Pickup

**Description**
An extension may answer an incoming call that is ringing at another extension regardless of the extension group.

**Operation**
1. Lift the handset or press the SP-PHONE button.
2. Dial (4) and then the extension number (100 through 199) at which call is ringing.
3. Wait for confirmation tone and then start talking.

**Conditions**
- It is possible to answer calls outside your assigned extension group.
- Directed Call Pickup can be used with the present call placed on hold.

**Example:**
Mr Brown’s extension number is 110. He is now out of the office. Mark receives the call instead of Mr Brown with the telephone on his desk (extension 120).

```
That extension no. is 110....

dial 4 and the extension No. 110

Hello! I'm sorry, Mr. Brown is not here.
```
Call Park

To park a call

1. Press the HOLD button.
2. Dial "2".
3. Dial the parking station number (20 through 29).
4. Hang up or press the SP-PHONE button.

If a busy tone is heard after the parking station number is dialed, dial only last 1 digit of the other parking station number (0 through 9).

To retrieve a parked call at any extension

1. Lift the handset or press the SP-PHONE button.
2. Dial "5".
3. Dial the parking station number (20 through 29).

Description

Extension user can place up to ten calls in the park zones. Allows any extension user to retrieve the parked call (intercom or outside) at any extension.

Operation

To park a call

1. You are in conversation with an internal or outside party.
2. Press the HOLD button.
3. Dial (2).
4. Dial the parking station number (20 through 29).
   - When dialing (20), "Call Prked at 20" will be displayed.
   - A confirmation tone will be heard.
   - If a busy tone is heard, dial only last 1 digit of the other parking station number (0 through 9).
5. Hang up or press the SP-PHONE button.

To retrieve a parked call at any extension

1. Lift the handset or press the SP-PHONE button at any extension.
2. Dial (5).
3. Dial the parking station number (20 through 29) on which the call is parked.
4. Wait for the confirmation tone and then start talking.

Conditions

- Up to ten calls can be parked.
- If a parked call is not retrieved by an extension within 3 minutes, a hold time reminder will be sounded at the extension who placed the call on hold.
  - There are 9 choices ranging from 1 to 9 minutes for the hold time reminder.
  - For programming, see the page 3-25.

Example:

Mark is talking with extension 130 on his desk, and then moves to another room placing the call park.
He resumes the conversation using another extension.

Press the HOLD button, dial [2], dial [20] (parking station number), hang up and then go to Mr. Jay's office.

Dial [5] and the parked station number.
Calling from Doorphone

1. Press the doorphone button 1 second.
2. Wait for the other party's voice after hearing the confirmation tone and then start talking.

To answer a doorphone

Lift the handset or press the SP-PHONE button.

Conditions
- If calls from doorphones are not answered within 15 seconds, the calls will be cancelled.
- Ring from doorphone.
- Each extension has been programmed beforehand for receiving from doorphones. See "Ringing Assignment from Doorphone" on page 3-76.
- When you press a Dial button while talking with a doorphone, the DTMF tone will be sent to the doorphone.

Distinctive Ring Tone

Description
A different ringing pattern is used to distinguish intercom calls from incoming outside calls.

Operation
None

Conditions
Incoming outside calls (including outside hold recall)

Intercom calls (including intercom hold recall)

Doorphone calls

Recall for camp-on
While Having a Conversation

Call on Hold

To leave a call on hold:

- Press the HOLD button.
- Confirmation tone of 2 beeps will be heard.

To retrieve:

(Outside calls on hold)
- At the holding extension
  - Press CO
  - Flashing slowly in green
- From another extension
  - Press CO
  - Flashing slowly in red

(Intercom call on hold)
- At the holding extension
  - Press ICM
  - (flashing slowly)
- From another extension
  - Dial "5"
  - Dialed holding extension number

Description

If you wish to leave your phone unattended but want the caller you are in conversation with to wait, call on hold may be used. Outside or intercom calls may be on hold. Calls on hold can be released by other extensions.

Operation

1. You are in conversation with an outside or internal party.
2. Press the HOLD button.
   - The indicator of CO or ICM button which is on hold will flash slowly (green color).
   - The confirmation tone of 2 beeps will be heard.

To Retrieve at the holding extension,
press the CO or ICM button (flashing green).
- The indicator light will return to a steady green.

To Retrieve from another extension,
- Press the CO button (flashing slowly in red).
- Or dial (5) and then the extension (100 through 199) or CO (301 through 312) number of the phone on which the call was placed on hold.

- Calls on hold will be recalled after 30 seconds or 1 minute or 1 minute and 30 seconds or 2 minutes, once handset is replaced (or the SP-PHONE button is pressed).
- If hold recall time is set to “Disable”, it will not be recalled.
- Refer to “Hold Recall Time Set” on page 3-26.

- If a call is placed on hold for more than 3 minutes, a hold time reminder will be sounded and the LCD flashes the following displays.
  - When holding the extension 101; Mr. Brown:
    - The display of “101: Brown” will flash.
  - When holding the Outside line; CO 01:
    - The display of “Call on CO 01” will flash.
  - The call will be terminated automatically after 30 minutes.
  - A hold time reminder is sounded through the built-in speaker of the extension.
  - There are 9 choices ranging from 1 minute to 9 minutes in the hold time reminder.
  - For programming, see the page 3-25.

- The hold time reminder is activated, even if the hold recall time set is programmed to “Disable”.

- When lifting the handset (or press the SP-PHONE button):
  - before recalling - - - - A dial tone will be heard with the call on hold.
  - You may dial another phone number.
  - while recalling - - Only the first call on hold will be released and entered into the conversation mode.

Conditions

- An Intercom call can not be on hold more than two.
- Outside calls can be on hold all CO’s.

## Description

Intercom or outside calls left on exclusive hold can not be released by any extension other than the phone which has left the call on exclusive hold.

## Conditions

- An Intercom call can not be on hold more than two.
- Outside calls can be on hold all CO's.
- Calls on hold will be recalled after 30 seconds or 1 minute or 1 minute and 30 seconds or 2 minutes, once handset is replaced (or the SP-PHONE button is pressed). If hold recall time set is set to “Disable”, will not be recalled. Refer to “Hold Recall Time Set” on page 3-26.
- If a call is left on hold for more than 3 minutes, a hold time reminder will be sounded, and the call will be terminated automatically after 30 minutes. A hold time reminder is sounded through the built in speaker of the extension. There are 9 choices ranging from 1 to 9 minutes for the hold time reminder. For programming, see the page 3-25.
- The hold time reminder is activated, even if the hold recall time set is programmed to “Disable”.
- When lifting the handset (or press the SP-PHONE button):
  - before recalling ... A dial tone will be heard with the call on hold. You may dial another phone number.
  - while recalling ... Only the first call on hold will be released and entered into the conversation mode.
Conference

Description
Allows for a three party conference, (2-outside / 1-inside) (1-outside / 2-inside) or (3-inside).

Operation
1. Press the CONF button, to leave the first party on hold.
2. Dial the number of the second party.
   If the second party does not answer, press the CO button of the outside party concerned, or the ICM button to return to the first party.
3. After the second party answers, press the CONF button.
   A 3 party conference is now established.
Example:
“Ext 102 & CO 02” will be displayed.

To terminate one caller and talk to the other caller.
• If both the conference parties are on outside lines.
  Press the CO button to talk to the desired party.
• If the conference parties are an outside caller and an extension caller:
  To talk to the outside party, press the CO button.
  To talk to the extension party, press the ICM button.

To leave the other two parties on hold at the same time.
Press the HOLD button.
• In case the other two parties are on the extension, the other two parties cannot be left on hold.

Conditions
• Pressing a CO button which is out of conference, allows you to exit from the conference and to access an outside party and the other parties to be connected together.
  If the other parties are outside ones, they are disconnected.
  If the other parties are on the outside and extension, they are connected.
• When both the conference parties are on the extension, even if anyone of the conference parties press the ICM button, a three party conference is gone on.
Description
Allows an extension user that is in conversation with an outside party to make a three party conference by having another extension join into the conversation.

Operation
1. You are in conversation with an outside party.

2. Inform another extension user to join into the conversation by word of mouth.

3. Press the CO button that you are using, and the CO indicator of the other extensions will quickly flash (green color) for 5 seconds.

4. When another extension user that want to join into the conversation presses the CO button whose indicator is quickly flashing (green color) within 5 seconds, a confirmation tone will be heard at another extension.
   3 party conference is now established.
   (1-outside / 2-inside)

To terminate conference. (1-outside/2-inside)
Replace the handset back on hook or press the SP-PHONE button.

- The other two parties will be directly connected together and can converse with each other.

Conditions
- After an extension user presses the CO button, the indicator of the other extension will flash for only 5 seconds.
Pressing of the CO button again will add another 5 seconds.

To terminate one caller and talk to the other caller.
To talk to the outside party, press the CO button.
To talk to the extension party, press the ICM button.
Call Transfer - To Extension

To transfer a call after the other extension answers

1. Press the TRANSFER button.
2. Dial number of extension (100 through 199) to which the call is transferred.
3. For Unscreened call transfer, replace the handset or press the SP-PHONE, FLASH, CO or DSS button. For Screened call transfer, wait for new party to answer and announce call, then replace the handset or press the SP-PHONE, FLASH, CO or DSS button.

To retrieve the Call

If the other extension does not answer the transferred call within 30 seconds after the call has been transferred, the call will return to you. In this case:

- Lift handset to return to the calling party.

Description
Outside or intercom calls may be transferred to any extension manually.

Operation
1. You are engaged in a call (outside or intercom).
2. Press the TRANSFER button.
3. Dial number of extension (100 through 199) to which the call is transferred.
4. For Unscreened call transfer, replace the handset or press the SP-PHONE, FLASH, CO or DSS button. For Screened call transfer, wait for new party to answer and announce call, then replace the handset or press the SP-PHONE, FLASH, CO or DSS button.

To change the party to whom a call is transferred before hanging up

Press the CO or ICM button whose indicator is flashing slowly to retrieve the call, then repeat the procedure of Call Transfer.

Conditions
- Upon recall to the transferring extension, if the call is not answered within 30 minutes it will be terminated.
- When busy, you may access the other extension by dialing 1 (Busy station signaling) or dialing 2 (Executive Override) and hang up. Also you may return to the calling party by pressing the CO or ICM button whose indicator is flashing slowly (green color).
- The time that the call returns to you when the transferred call is not answered can be changed from 30 seconds to 15 seconds. For changing, see page 3-27.
**Call Transfer - To Outside Line**

**To transfer a call after the outside party answers.**

1. Press the TRANSFER button.
2. Press CO.
3. Dial phone number.
4. Announce and wait for an answer.
5. Hang up. press SP-PHONE, DSS or other CO.

**To transfer a call without announcing to the outside party.**

1. Press the TRANSFER button.
2. Press CO.
3. Dial phone number.
4. Hang up. press SP-PHONE, DSS or other CO.

**Description**

Outside or intercom calls may be transferred to any outside line manually. This feature is required to be set beforehand in the KX-T123211. For programming, see page 3-72.

**Operation**

1. You are engaged in a call (outside or intercom).
2. Press the TRANSFER button.
3. Press the CO button to which the call is transferred.
4. Dial the phone number to which the call is transferred.
5. For Unscreened call transfer, replace the handset back on hook or press the SP-PHONE, DSS or other CO button except CO button which the call transferred.

**Conditions**

- If outside call is transferred to any outside line, the KX-T123211 will disconnect the call from the line after 10 minutes. For changing the time, see “CO to CO Duration Time Limit” on page 3-30. 3 beeps tone will be heard every 5 seconds for 15 seconds before the call is disconnected from the line.
- If the outside call is transferred to another outside line through the KX-T123211, the KX-T123211 may not disconnect both lines after the calling party or called party hangs up the calling party line or called party line (central office exchange) does not release a CPC (Calling Party Control) signal to the line. However the KX-T123211 will disconnect the line after the time that you have programmed.
- If you want to join the transferred call, press the flashing (in groups of 2) CO button and if you want to leave the conference, press the CONF button.

**To change the party to whom a call is transferred before hanging up**

Press the CO button whose indicator is flashing slowly to retrieve the call, then repeat the procedure of Call Transfer.
Call Waiting

To terminate the original call and talk to the new caller.

1. You will hear a call waiting tone (3 beeps).
2. Press the CO or ICM button whose indicator is quickly flashing. The original call is now terminated.
3. Start talking.

To leave the original call on hold and talk to the new caller.

- If both original call and new call are intercom calls:
  (The ICM indicator will change into quickly flashing when the new call is reached.)
1. You will hear a call waiting tone.
2. Press the HOLD button for placing a conversation on hold.
3. Consult with the new caller.
4. Press the CO or ICM button whose indicator is flashing slowly to terminate the second call and to return to the original call.

Description
Call waiting tone during a conversation indicates there is a new incoming CO line call or Intercom call.
This feature has been set beforehand in the extension. See page 4-43.
There are Tone 1 and Tone 2 in the Call Waiting Tone.
For changing Tone 1 into Tone 2, see "Call Waiting Tone Selection" on page 4-64.

Operation
To terminate the original call and talk to the new caller.
1. You will hear a call waiting tone (3 beeps).
2. Press the CO or ICM button whose indicator is quickly flashing. The original call is now terminated.
3. Start talking.

To leave the original call on hold and talk to the new caller.
- If both original call and new call are intercom calls:
  (The ICM indicator will change into quickly flashing when new call reaches.)
1. You will hear a call waiting tone (3 beeps).
2. Press the HOLD button for placing a conversation on hold.
3. Consult with the new caller.
4. Press the CO or ICM button whose indicator is quickly flashing.
5. Press the CO or ICM button whose indicator is flashing slowly to terminate the second call and to return to the original call.

Conditions
- If a call waiting tone is heard and the CO or ICM indicator does not flash, this tone indicates a call waiting tone by your telephone company. In this case, see "Call Waiting-Outside Line" on page 4-39.
Call Splitting — Between CO and Intercom

Description

Allows an extension user to alternate between a CO party and an intercom party.

Operation

1. Press the HOLD button to leave the first party on hold.

2. Dial the second party.

3. Consult with the second party.

4. Press the HOLD button to leave the second party on hold.

5. Press the CO or ICM button whose indicator is flashing slowly.

6. Consult with the first party.

7. Press the HOLD button to leave the first party on hold.

8. Press the ICM or CO button whose indicator is flashing slowly.

9. Consult with the second party.

10. Repeat step 4 to 9.

Conditions

- To release the call splitting mode, press the CO or ICM button without pressing the HOLD button. Conversation will be terminated and call on hold will be returned into conversation.
**Call Splitting — Intercom**

<table>
<thead>
<tr>
<th>HOLD</th>
<th>Dial Consult</th>
<th>Consult with 1st party</th>
</tr>
</thead>
<tbody>
<tr>
<td>Press HOLD to leave 1st party on hold</td>
<td>2nd party</td>
<td>1st party on hold</td>
</tr>
</tbody>
</table>

**Operation**

1. Press the HOLD button to leave the first party on hold.
2. Dial the second party.
3. Consult with the second party.
4. Press the HOLD button to leave the second party on hold.
5. Consult with the first party.
6. Press the HOLD button to leave the first party on hold.
7. Repeat step 3 to 6.

**Conditions**

- To release the call splitting mode, press the ICM button instead of the HOLD button. Conversation will be terminated and call on hold will be returned into conversation.

---

**Mute Operation**

**To enable**

Be sure the SP-PHONE indicator is on.

![MUTE indicator](AUTO_ANS MUTE)

- The MUTE indicator will flash.

**To cancel**

![MUTE indicator](AUTO_ANS MUTE)

- The MUTE indicator will go out.

**Description**

Use when you do not want your voice to be heard by the other party.

**Operation**

**To enable**

Be sure the SP-PHONE indicator is on.

- Press the MUTE button.
- The MUTE indicator will flash.

**To cancel**

Press the MUTE button again.
- The MUTE indicator will go out.

**Conditions**

- This feature can be activated only in the speakerphone mode.
- This feature can not be activated while using the headset.
**Off Hook Call Announcement (OHCA)**

You will hear voice announcement of a second call and talk.

**Description**
While you have conversation using the handset, this feature allows an extension user to intrude through the speaker of the KX-T123235.

As to the operation of extension user, “Busy Station Signaling” on page 4-8. This feature is available the KX-T123235 only.

**Operation**
While having a conversation using the handset;

1. You will hear voice announcement of a second call.
2. Consult with the second party.

**Conditions**
- This feature can not be activated while in the speaker phone mode.

---

**Switching between Using Handset and Hands-free**

**To Use the Handset**
While having a conversation using speakerphone

Lift handset

**To Use the Hands-free**
While having a conversation using the handset

Press SP-PHONE
Hang up handset

**Description**
You may choose the handset or hands-free.

**Operation**

**To use the handset**
While having a conversation using speakerphone;

- lift the handset.

**To use hands-free**
While having a conversation using the handset;

1. Press the SP-PHONE button.
2. Hang up the handset.

- When the other party finds it difficult to hear your voice:
  - Lower the sound level using the SPEAKER VOLUME CONTROL or speak louder.

- Absorbing echoes:
  - Use in a room which has curtains or carpeting.

- To avoid lost conversations:
  - If some part of the conversation is lost while talking, speak alternately.
Paging

Paging All Extensions and External

To access

Lift handset or press SP-PHONE
Dial “33 ×”

Confirmation tone of 1 beep will be heard
Page
Wait for an answer and talk

Page will be heard from the built-in speaker of proprietary telephone and external paging equipment.

Description

Allows paging to all extensions and external paging equipment at the same time. The page can only be heard from each proprietary telephone (KX-T123230, KX-T123235, KX-T123220 or KX-T123250, etc).

Operation

To access paging:

1. Lift the handset or press the SP-PHONE button.
2. Dial (33 ×) and wait for confirmation tone (one beep).
   “Paging All” will be displayed.
   • You may dial (32 ×) instead of (33 ×).
4. Wait for an answer and talk.

Conditions

• When an extension is in use, that extension cannot gain access to paging.
• When any extension is using the paging (all extensions, group or external), you cannot access to paging.
Description

Allows paging to one of eight extension groups. The page can only be heard from each proprietary telephones (KX-T123230, KX-T123220 or KX-T123250 etc).

Operation

To access paging:
1. Lift the handset or press the SP-PHONE button.
2. Dial (33).
3. Dial the extension group number (1 through 8).
   A confirmation tone (one beep) will be heard.
4. Start paging.
5. Wait for an answer and talk.

Conditions
- If an extension is in use, that extension will not gain access to paging.
- Refer to "Extension Group Assignment" on page 3-66.

Description for External Paging

Allows access to external paging equipment.

Operation

To access external paging:
1. Lift the handset or press the SP-PHONE button.
2. Dial (32).
3. Dial the external paging number (0 through 2) and wait for confirmation tone (one beep).
   0: for external paging 1 and 2
   "Extrnl Page 1 & 2" will be displayed.
   1: for external paging 1
   "Extrnl Page 1" will be displayed.
   2: for external paging 2
   "Extrnl Page 2" will be displayed.
4. Start paging.
   When the page is answered, one beep will be heard. Start talking.

Conditions
- If external paging access tone is set to "Disable", confirmation tone from external paging equipment will not be heard after accessing the external paging.
  Refer to "External Paging Access Tone" on page 3-41.
Paging And Transfer

To transfer a call to the paged person

1. You are in conversation.

2. Press the TRANSFER button.

3. Dial (330) for paging all extensions.
   Dial (331) for paging extension group 1.
   Dial (332) for paging extension group 2.
   Dial (333) for paging extension group 3.
   Dial (334) for paging extension group 4.
   Dial (335) for paging extension group 5.
   Dial (336) for paging extension group 6.
   Dial (337) for paging extension group 7.
   Dial (338) for paging extension group 8.
   Dial (320) for external paging 1 and 2.
   Dial (321) for external paging 1.
   Dial (322) for external paging 2.
   Dial (33 × or 32 ×) for paging all extensions and external.

   • Wait for confirmation tone.

4. Start paging.

5. Wait for an answer.

6. Hang up or press the SP-PHONE FLASH, DSS or CO button.

Paging — Answer

Description
A page from the built-in speaker or external paging equipment can be answered from any extension.

Operation
To answer a page through the built-in speaker;

1. Lift the handset or press the SP-PHONE button.

2. Dial (43) and wait for confirmation tone (one beep).

3. Start talking.

To answer an external page

1. Lift the handset or press the SP-PHONE button.

2. Dial (42).

3. Dial the external paging number (1 or 2) and wait for confirmation tone (one beep).
   “1” for external paging 1.
   “2” for external paging 2.

Conditions
• If a call and CO number has been paged and transferred, you may answer by pressing the CO button whose number has been paged and indicator is flashing slowly (red color), instead of dialing 43, 421 or 422.
# Use of Other Features

## Call Forwarding – All Calls / Busy or No Answer

### Setting

<table>
<thead>
<tr>
<th>Feature</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>All Calls</strong></td>
<td>Lift handset or press SP-PHONE, Press FWD/DND (F3), Dial “1”, Dial extension number to whom the call is forwarded, Dial “#”, Hang up or press SP-PHONE</td>
</tr>
<tr>
<td><strong>Busy or No Answer</strong></td>
<td>Lift handset or press SP-PHONE, Press FWD/DND (F3), Dial “2”, Dial extension number to whom the call is forwarded, Dial “#”, Hang up or press SP-PHONE</td>
</tr>
</tbody>
</table>

### Operation

#### Setting

1. Lift the handset or press the SP-PHONE button.
2. Press the FWD/DND (or F3) button.
3. To forward all calls, dial (1).
4. Dial the number of the extension to which the calls are to be forwarded (100 through 199).
5. Press the (#) button. A confirmation tone will be heard. “FWD (All) Ext 102” or “FWD (B/ NA) Ext 102” will be displayed.
6. Hang up or press the SP-PHONE button. The FWD/DND indicator will flash.

---

**Description**

**All Calls**

All intercom calls to your extension can be automatically forwarded to any extension within the system.

For outside calls to your extension, if your extension is set to the Direct In Line (DIL) or call is the CO line which is programmed to the DISA, the outside calls can be automatically forwarded to any extension within the system.

For programming to the DIL or DISA mode, see page 3-57.

**Busy or No Answer**

If your extension is busy or does not answer the call within 3 rings (“Call Forwarding Starting Time” on page 3-28 can change from 3 rings to 1 ring, 2 rings or 4 rings), intercom calls to your extension can be automatically forwarded to any extension within the system.

For outside calls to your extension, if your extension is set to the Direct In Line (DIL) or call is the CO line which is programmed to the DISA, the outside calls can be automatically forwarded to any extension within the system.

- The programmable feature (F3 only) button of the KX-T123250, KX-T61650, KX-T30825 or KX-T30850 can also be used for “Call Forwarding” if programming is done beforehand in the extension. For programming, see page 4-65.
To cancel
1. Lift the handset or press the SP-PHONE button.
   The indicator light of the FWD/DND button will be off.

2. Press the FWD/DND (or F3) button.

3. Dial (0).

4. Dial the (#) button.
   A confirmation tone will be heard.
   “FWD/DND Cancel” will be displayed.

5. Hang up or press the SP-PHONE button.

Conditions
- Do Not Disturb is cancelled when call forwarding is established.

- Recall for camp-on and Hold recall are not forwarded.

- The tone (busy tone or do not disturb tone etc.) the caller receives depends on the condition of the forwarded extension.

- An extension can not accommodate more than one forwarded extension.
  At each time of newly setting “Call Forwarding”, a destination (forwarded extension code) will be renewed.
  Old entry will be canceled.

- If extension A is forwarding all calls to extension B and B is forwarding all calls to C, if any extension calls A, they will be connected to B and can not be connected to C.
  Call Forwarding can be connected to only 1st forwarded extension.

- A extension can not accommodate more than one forwarded extension.

Conditions
- Do Not Disturb is cancelled when call forwarding is established.

- Recall for camp-on and Hold recall are not forwarded.

- The tone (busy tone or do not disturb tone etc.) the caller receives depends on the condition of the forwarded extension.

- An extension can not accommodate more than one forwarded extension.
  At each time of newly setting “Call Forwarding”, a destination (forwarded extension code) will be renewed.
  Old entry will be canceled.

- If extension A is forwarding all calls to extension B and B is forwarding all calls to C, if any extension calls A, they will be connected to B and can not be connected to C.
  Call Forwarding can be connected to only 1st forwarded extension.

- A extension can not accommodate more than one forwarded extension.

| Lift handset or press SP-PHONE | FWD/DND | OPER 0 | Dial “0” | Dial “#” | Hang up or press SP-PHONE |

Description

Intercom calls to your extension can be automatically forwarded to any outside line. For outside calls to your extension, if your extension is set to the Direct In Line (DIL) or call is the CO line which is programmed to the DISA, the outside calls can be automatically forwarded to any outside line. For programming to the DIL or DISA mode, see page 3-57.

This feature is required to be set beforehand in the KX-T123211. For programming, see page 3-73.

The programmable feature (F3 only) button of the KX-T123250, KX-T61650, KX-T30825 or KX-T30850 can also be used for “Call Forwarding” if programming is done beforehand in the extension. For programming, see page 4-65.

Operation

Setting

1. Lift the handset or press the SP-PHONE button.
2. Press the FWD/DND (or F3) button.
3. Dial (3).
4. Dial (9).
- You may dial 81 through 88 instead of 9.
- An extension can automatically select an idle line within the CO line enable to call.
- 81 through 88. An extension can select a trunk group designated.
5. Dial the phone number of the outside line to which the calls are forwarded.
6. Dial (#).
   A confirmation tone will be heard.
   “FWD (All) All COs” or “FWD (All) CO G1” will be displayed.
7. Hang up or press the SP-PHONE button.
   The FWD/DND indicator will flash.

To cancel

1. Lift the handset or press the SP-PHONE button.
   The indicator light of the FWD/DND button will be off.
2. Press the FWD/DND (or F3) button.
3. Dial (0).
4. Dial (9).
   A confirmation tone will be heard.
   “FWD/DND Cancel” will be displayed.
5. Hang up or press the SP-PHONE button.

Conditions

- Do Not Disturb is cancelled when call forwarding is established.
- Recall for camp-on and Hold recall are not forwarded.
- The phone number to whom the call is forwarded is used from 0 to 9 and pause except * and #. A maximum of phone number is 32 digits (Automatic line access number 9 or trunk group access number 81 through 88 are included).
- If outside call is forwarded to any outside line, the KX-T123211 will disconnect the call from the line after 10 minutes. For changing the time, “CO to CO Duration Time Limit” on page 3-30. 3 beeps tone will be heard every 5 seconds for 15 seconds before the call is disconnected from the line.
- The calling parties line (central office exchange) does not release a CPC (Calling Party Control) signal to the line.
- However the KX-T123211 may not disconnect both lines after the calling party hangs up if the calling parties line (central office exchange) does not release a CPC (Calling Party Control) signal to the line.
**Dial Call Pickup Deny**

**Setting**

1. Lift the handset or press the SP-PHONE button.
2. Dial (721#).
   - Wait for a confirmation tone.
   - “C.Pickup Deny” will be displayed.
3. Hang up or press the SP-PHONE button.

To cancel,

1. Lift the handset or press the SP-PHONE button.
2. Dial (720#).
   - Wait for a confirmation tone.
   - “C.Pickup Allow” will be displayed.
3. Hang up or press the SP-PHONE button.

**Description**

Allows you to prohibit any other extension user from answering calls directed to you.

**Conditions**

While your extension is in the “Dial Call Pickup Deny” mode, you can place or receive outside or intercom calls.
**Description**

Each extension can be individually programmed for not receiving intercom call or outside calls. The programmable feature (F3 only) button of the KX-T123250, KX-T61650, KX-T30825 or KX-T30850 can also be used for “Do Not Disturb” if programming is done beforehand in the extension.

For programming, see page 4-65.

**Operation**

**Setting**

1. Lift the handset or press the SP-PHONE button.
2. Press the FWD/DND (or F3) button.
3. Dial (4).
4. Dial (#).
   “Do Not Disturb” will be displayed.
   Wait for a confirmation tone.
5. Hang up or press the SP-PHONE button.

The indicator of FWD/DND button will be lit.

**To cancel**

1. Lift the handset or press the SP-PHONE button.
   The indicator of FWD/DND button will go out.
2. Press the FWD/DND (or F3) button.
3. Dial (0).
4. Dial (#).
   “FWD/DND Cancel” will be displayed.
   Wait for a confirmation tone.
5. Hang up or press the SP-PHONE button.

**Conditions**

- When “Do Not Disturb” is entered, “Call Forwarding” will be canceled.
- “Do Not Disturb” does not prevent the extension from recalling for on-hold and camp-on.
- If calling party use the “Do Not Disturb Override” feature, the call will receive the extension that is setting the “Do Not Disturb”.

See the “Do Not Disturb Override” on page 4-32.
**Do Not Disturb Override**

Lift handset or press SP-PHONE

Dial extension number (100 through 199)

Do not disturb tone is heard

Dial "1"

Ring back tone is heard and wait for answer

**Description**

This feature can dial to the extension that is set for the Do Not Disturb. This feature is required to be set beforehand in the KX-T123211. For programming, see page 3-75.

**Operation**

1. Lift the handset or press the SP-PHONE button.
2. Dial the extension number (100 through 199).
3. Do not disturb tone is heard.
4. Dial (1) and after a ring back tone is heard, wait for an answer.

**Conditions**

- When the line is busy after dialing (1), busy tone will be heard. In this case, the extension user can use Camp-on (Automatic Call Back Busy) mode.

---

**Saved Number Redial**

**Programming**

When the called line is busy or while you are speaking on the CO Line:

- Press AUTO
- Press SAVE

**Dialing**

- Lift handset or press SP-PHONE
- Press SAVE

**Description**

The desired phone number on an outgoing call to CO line can be stored and then redialed.

**Programming**

While you are speaking on the CO line or when the called party is busy.

1. Press the AUTO button.
2. Press the SAVE button.
   - The phone number can not be stored even if you press the AUTO and SAVE buttons after you hang up.

**Dialing**

1. Lift the handset or press the SP-PHONE button.
2. Press the SAVE button.
   - You may press the CO button to select the CO line directly after lifting the handset or press the SP-PHONE button.

**Conditions**

- Up to 32 digits can be stored and redialed.
- When using the KX-T123235, one pressing of the SAVE button;
  - When using the handset; redial once
  - When using hands-free; redial up to 15 times (Automatic Redialing) within 10-minutes. To cancel automatic redialing, press the FLASH button.
- The KX-T123250, KX-T61650, KX-T30825 or KX-T30850 will not function for Saved Number Redial.

Dial "751 #"

Hang up or press SP-PHONE

**Message 2. “Gone Home”**

Lift handset or press SP-PHONE

Dial "752 #"

Hang up or press SP-PHONE

**Message 3. “At Ext 1 2 3”**

Lift handset or press SP-PHONE

Dial "753"

Hang up or press SP-PHONE

**Message 4. “Back at 10:23 AM”**

Lift handset or press SP-PHONE

Dial "754"

Enter hour (01 through 12)

Enter minute (00 through 59)

Dial “0” or “1” for AM

Dial “1” for PM

Hang up or press SP-PHONE

**Message 5. “Out Until 10/23”**

Lift handset or press SP-PHONE

Dial "755"

Enter month (01 through 12)

Enter day (01 through 31)

Dial “#”

Hang up or press SP-PHONE

**Message 6. “In a Meeting”**

Lift handset or press SP-PHONE

Dial "756 #"

Hang up or press SP-PHONE
Description
Absent messages (Message 1 through 6) which are programmed can be informed to calling party. Programming can be done at any telephone (either proprietary telephones or standard telephones).
When a caller using the proprietary telephone with LCD dials the extension in which the message is programmed, it will be displayed on the LCD.

Operation
Setting
Message 1. “Will Return Soon”
1. Lift the handset or press the SP-PHONE button.
2. Dial (751#)
3. Hang up or press the SP-PHONE button.
Message 2. “Gone Home”
1. Lift the handset or press the SP-PHONE button.
2. Dial (752#)
3. Hang up or press the SP-PHONE button.
Message 3. “At Ext. 123”
1. Lift the handset or press the SP-PHONE button.
2. Dial (753)
3. Dial the extention number. (100 through 199)
4. Dial (#)
5. Hang up or press the SP-PHONE button.
Message 4. “Back at 10:23 AM”
1. Lift the handset or press the SP-PHONE button.
2. Dial (754)
3. Enter the hour (01 through 12)
4. Enter the minute (00 through 59)
5. Dial (0) or (1).
   Dial (0) for AM.
   Dial (1) for PM.
6. Dial (#)
7. Hang up or press the SP-PHONE button.
Message 5. “Out Until 10/23”
1. Lift the handset or press the SP-PHONE button.
2. Dial (755)
3. Enter the month. (01 through 12)
4. Enter the day. (01 through 31)
5. Dial (#)
6. Hang up or press the SP-PHONE button.
Message 6. “In a Meeting”
1. Lift the handset or press the SP-PHONE button.
2. Dial (756#)
3. Hang up or press the SP-PHONE button.

Conditions
- The absent message will be displayed on the LCD of the calling party in case of following.
- When a calling party dials an extension that is programmed for absent Message.
- When the extension is busy.
- When the extension is set the Do Not Disturb.

To cancel
1. Lift the handset or press the SP-PHONE button.
2. Dial (750#)
   “Message Cancel” will be displayed.
3. Hang up or press the SP-PHONE button.
Message Waiting

Setting

To call you from the extension where the message is left.

Lift handset or press SP-PHONE
Press MESSAGE
Talk

To cancel the message at the extension where the message is left.

Lift handset or press SP-PHONE
Dial "70#"
Hang up or press SP-PHONE

Description

If the intercom extension you have dialed is busy or does not answer, you can inform the called extension that there is a message which have to be informed. It will be indicated by the MESSAGE indicator. This feature also can be set after your call is answered in the automatic hands-free mode. If the called extension is not provided with the MESSAGE button, you can not leave the message. To change the CO, or DSS button into the message waiting button, see page 4-59 or 4-62.

Operation

Setting

1. Lift the handset or press the SP-PHONE button.
2. Dial the extension number (100 through 199).
3. Press the MESSAGE button.
   A confirmation tone (one beep) will be heard. The MESSAGE Indicator of the called party will be lit.
4. Hang up or press the SP-PHONE button.

To call the extension which sent the message from the extension where the message is left.

1. Lift the handset or press the SP-PHONE button
2. Press the MESSAGE button.
   The MESSAGE Indicator will go out.
3. Start talking

To cancel the message at the extension where the message is left.

1. Lift the handset or press the SP-PHONE button
2. Dial (70#)
   The MESSAGE Indicator will go out.
3. Hang up or press the SP-PHONE button.
   • All Messages will vanish.

Conditions

• This feature will not function with a standard telephone.
• Each extension can receive up to eight messages.

• If the MESSAGE Indicator does not go out after calling the extension which is left the message, it means that another message is left. In case of having received multiple messages, Dialing is done in order of receipt. But the extension to dial can be selected with Proprietary Telephone with LCD. When the Message button is pressed with the handset on the cradle and the SP-PHONE button off, name who left the message or extension number is displayed. During it is displayed, press the Message button again. Repeat it until the desired name or extension number appears. When the desired name or extension number appears, lift the handset and press the Message button.
Flexible Night Service

(Extension jack number 01 only)

**To enable night service:** (To disable day service)

- Lift handset or press SP-PHONE
- Dial "782 #"
- Hang up or press SP-PHONE

**To disable night service:** (To enable day service)

- Lift handset or press SP-PHONE
- Dial "781 #"
- Hang up or press SP-PHONE

**Description**

Normal system operation is set for day time mode. Night service allows for outward dialing and incoming ringing assignments etc. to be rearranged via programming. Night service is enabled or disabled through extension jack number 01 using this feature, at any time.

Without activating this feature, the day/night services are automatically switched at predetermined time (9:00 AM and 5:00 PM each day of the week for default time) by the internal clock if the “Switching of Service Mode” in Day/Night Service Mode is selected to the “AUTO” mode in the KX-T123211. Refer to “Switching of Service Mode” on page 3-12 and “Starting Time” on page 3-13 in Day/Night Service Mode.

The following features will be switched “Day Mode” or “Night Mode”:

- “Flexible Outward Dialing Assignment” on page 3-53.
- “Flexible Ringing Assignment” on page 3-54.
- “CO Mode (Normal/DIL/DISA) Assignment on page 3-57.
- “Delayed Ringing Assignment” on page 3-56.
- “Service Class Assignment of Toll Restriction” on page 3-67.
- “Ringing Assignment of Doorphone” on page 3-76.

**Operation**

1. Lift the handset or press the SP-PHONE button of extension of jack number 01.
2. Dial (782 #) and wait for a confirmation tone.
   Night service is enabled.
   “Night Mode” will be displayed.
3. To return to day service, dial (781 #) and wait for a confirmation tone.
   “Day Mode” will be displayed.
4. Hang up or press the SP-PHONE button.

**When the proprietary telephone with an LCD is not used, the present mode selected will be shown by pressing the “#” button.**
External Feature Access

Call Waiting - Outside Line

Will hear a call waiting tone

Press FLASH

Consult with new caller while original call is on hold

Press FLASH

Consult with original caller while 2nd call is on hold

If the calling party on hold hangs up, the line is terminated.

Description

Allows an extension user to access features of the central office or host PBX. (example: call waiting feature can be supplied by central office.) The external feature (e.g. call waiting feature) can only be accessed when engaged on an outside call.

Operation

The following example shows you one of the procedures.

Call Waiting - Outside Line

1. While having a conversation, another party calls and a call waiting tone is heard.

2. Press the FLASH button.
   - The original call is placed on hold and the new call can be answered.

3. Press the FLASH button again.
   - The original caller can be spoken to again and the new call is placed on hold.
   - If the calling party on hold hangs up, the line is terminated.

Condition

- “Flash” can be stored into memory in the same way as “Storage” on page 4-4.

- You may access some features of host PBX using the Flash button. If KX-T123211 is connected to host PBX and flash operation is required, follow the procedure of flash operation which is required in the host PBX.
Making a Call

- Lift handset or press SP-PHONE
- Press CO
- Press FWD/DND (F3)
- Dial account code
- Wait for C.O. dial tone
- Dial phone number

Account code is 4 digits.

Receiving a Call

If you want to record a calling party's account code in the SMDR, follow the below-mentioned procedure.

Within 30 seconds of finishing your conversation or while having a conversation,

- Dialing the account code must be done before hanging up.

Option Mode

- Making or Receiving a Call

If you want to record a calling or called party's account code in the SMDR, follow the below-mentioned procedure.

Within 30 seconds of finishing your conversation or while having a conversation,

- Dialing the account code must be done before hanging up.
Description
This feature gives each message of the SMDR an account code of the called or calling party.

Station Message Detail Recording (SMDR) is a cost saving feature that records all incoming and outgoing calls through the CO line.

This feature has two modes “Forced” and “Option”.

In the “Forced” mode, the account code must be entered every time the extension user dials.

In the “Option” mode, the account code may be entered when a record of the account code is needed.

When setting to the “Forced” mode, see page 3-71.

The programmable feature (F3 only) button of the KX-T123250, KX-T61650, KX-T30825 or KX-T30850 can also be used for “Account Code” if programming is done beforehand in the extension.

For programming, see page 4-65.

Operation

Forced mode

Making a Call
1. Lift the handset or press the SP-PHONE button.
2. Press the CO button.
   The FWD/DND Indicator will flash.
3. Press the FWD/DND (or F3) button.
   “Enter ACCNT Code” will be displayed.
   The FWD/DND Indicator will light.
   Intermittent tone is heard.
4. Dial the account code.
   Account code must be 4 digits.
   CO dial tone will be heard.
5. Dial the phone number.

- You may dial 9 or 81 through 88 instead of pressing the CO button.

Receiving a call
If you want to record a calling party’s account code in the SMDR, follow the below-mentioned procedure.

Within 30 seconds of finishing your conversation or while having a conversation, the FWD/DND Indicator will flash.

1. Press the FWD/DND (or F3) button.
   “Enter ACCNT Code” will be displayed.
   The FWD/DND Indicator will light.

2. Dial the account code.
   Account code must be 4 digits.
   - Dialing the account code must be done before hanging up.

Option Mode

Making or Receiving a Call
If you want to record a calling or called party’s account code in the SMDR, follow the below-mentioned procedure.

Within 30 seconds of finishing your conversation or while having a conversation,

1. Press the FWD/DND (or F3) button.
   “Enter ACCNT Code” will be displayed.
   The FWD/DND Indicator will light.

2. Dial the account code.
   Account code must be 4 digits.
   - Dialing the account code must be done before hanging up.

Conditions
- Account code must be 4 numerical digits except for the “#” and “*” button.
- If you enter the wrong account code, press the FWD/DND button and enter the correct code.

If account codes are programmed with telephone numbers for one touch dialing or system speed dialing, you need not to dial an account code when making a call.

Program as follows.

| WX | Y | 9 | * | * | Account code (4 digits) | Telephone number |
Data Line Security

Description
This feature provides security when transmitting data through an extension of the KX-T123211. Executive override, call waiting tone and hold time reminder tone from the KX-T123211 are prohibited in this mode.

Conditions
- The parallel connection of the proprietary telephone and a data terminal equipment is impossible.

Operation

Setting
1. Lift the handset or press the SP-PHONE button.
2. Dial (7301#)
   "Data Mode On" will be displayed.
   A confirmation tone will be heard.
3. Hang up or press the SP-PHONE button.

To cancel
1. Lift the handset or press the SP-PHONE button.
2. Dial (7300#).
   "Data Mode Off" will displayed.
   A confirmation tone will be heard.
3. Hang up or press the SP-PHONE button.
Call Waiting Tone — From CO / Extension Deny

**Description**

During a conversation, a call waiting tone will be heard when a third party on an outside line or intercom calls you. Call waiting tone can be removed at customer's request. Default is “Allow” mode. Refer to “Call Waiting” on page 4-20.

**Operation**

To deny CO call waiting tone

1. Lift the handset or press the SP-PHONE button.
2. Dial (7310 #).
   “CW (CO) Off” will be displayed.
   A confirmation tone will be heard.
3. Hang up or press the SP-PHONE button.

To allow CO call waiting tone

1. Lift the handset or press the SP-PHONE button.
2. Dial (7321 #).
   “CW (EXT) On” will be displayed.
   A confirmation tone will be heard.
3. Hang up or press the SP-PHONE button.

To deny extension call waiting tone

1. Lift the handset or press the SP-PHONE button.
2. Dial (7320 #).
   “CW (EXT) Off” will be displayed.
   A confirmation tone will be heard.
3. Hang up or press the SP-PHONE button.

To allow extension call waiting tone

1. Lift the handset or press the SP-PHONE button.
2. Dial (7321 #).
   “CW (EXT) On” will be displayed.
   A confirmation tone will be heard.
3. Hang up or press the SP-PHONE button.
DSS Console (KX-T123240 or KX-T61640)

DSS (Direct Station Select) Button

Inter Office Calling (Intercom)

Transfer of Outside Calls to any Extension

Programmable Feature Button

Programming

- Be sure the handset is in the cradle and the SP-PHONE button is OFF.
- Set the MEMORY switch of a pair telephone (Proprietary telephone) to "PROGRAM".

Storage

Press DSS

Hang up or press SP-PHONE

While having a conversation

Press DSS

Anno nce and wait for an answer

Hang up or press SP-PHONE

To Correct an Error while Programming

- After pressing the CLEAR button, reprogram the correct number.
- The TRANSFER button is used as the CLEAR button.

To Change a Stored Number

Repeat "Storage" left side.

To Erase after Programming

- The TRANSFER button is used as the CLEAR button.

Example:

Paging All Extensions (Dial 330).

[Console] [Pair telephone] [Pair telephone] [Pair telephone]

Press PROGRAMMABLE FEATURE

Dial "330"

Press MEMORY

Dialing

[Console] [Pair telephone] [Pair telephone]

Lift handset or press SP-PHONE

Press PROGRAMMABLE FEATURE

9 or 81 through 88 must be dialed for storage.
Description

- **DSS (Direct Station Select) Button:** makes the dialing to the extensions very easy. You can reach the extension party by simply pushing the DSS Button.

- **Programmable Feature Button:** let you access various features of KX-T123211 and speed dialing using the CO line in addition to the numbers programmed into the KX-T123211's memory.

Operation

**DSS (Direct Station Select) Button**

Inter office Calling (Intercom)

1. Lift the handset or press the SP-PHONE button of pair telephone.
2. Press the DSS button of Console.
3. Start talking.
4. Hang up or press the SP-PHONE button after completion of the conversation.

Transfer of Outside Calls to any Extension

1. You are in conversation.
2. Press the DSS button (Console) to which the call is transferred.
3. Wait for Intercom party to answer and announce call, then replace the handset or press the SP-PHONE button.

**Programmable Feature Button**

**Programming**

- Be sure the handset is in the cradle and the SP-PHONE button is OFF.
- Set the MEMORY switch of a pair telephone (Proprietary telephone) to "PROGRAM".

**One Touch Dialing**

1. Press a programmable feature button of Console.
2. Enter the line access number.
   9: automatic line access number.
   81: access number of trunk group 1
   88: access number of trunk group 8
3. Enter the phone number.
4. Press the MEMORY button.
5. Repeat steps 1 to 4, to program on other programmable feature button.

To Confirm a Stored Number

Repeat programming the same number into the same station.

When the MEMORY button is pressed, a beep will be heard.
- two beeps — The entry is the same as what was previously stored.
- one beep — The entry is different from the one that was previously stored.
Repeat the procedure of programming.

**One Touch Access for System Features**

Example:

Paging All Extensions (Dial 330)
1. Press the programmable feature button of Console.
2. Dial (330).
3. Press the MEMORY button of pair telephone.

After programming all the numbers, return the MEMORY switch to "SET".

**Dialing**

1. Lift the handset or press the SP-PHONE button of pair telephone.
2. Press the programmable feature button of Console.

**Conditions**

Refer to "One Touch Dialing" page 4-4 and "One Touch Access for System Features" page 4-52.
**Electronic Station Lock**

### To lock

1. Lift the handset or press the SP-PHONE button.
2. Dial (77).
3. Dial the lock code.
   - Lock code must be 3 digits (100 through 999)
4. Dial the same lock code again.
5. Dial (#)
   - "Locked : 301" will be displayed.
6. Hang up or press the SP-PHONE button.

### To unlock

1. Lift the handset or press the SP-PHONE button.
2. Dial (77).
3. Dial the lock code.
4. Dial (#).
   - "Unlocked" will be displayed.
5. Hang up or press the SP-PHONE button.

### Description

Locking an extension prohibits another user from dialing on an outside line until unlocked.

### Conditions

- When dialing to an outside line using a locked extension, reorder tone will be heard.
  - "Restricted" will be displayed.

- LOCK code must be 3 numerical digits except for the "#" and "*" button.
**Station Status Check**

- Be sure the handset is in the cradle and the SP-PHONE button is off.

  Press the following button which you want to confirm

**Proprietary Telephone**

- **REDIAL**
  - Press

- **SAVE**
  - Press

- **NO.**
  - Press

- **PROGRAMMABLE FEATURE**
  - Press

- **FWD/DND**
  - Press

- **MESSAGE**
  - Press

- **CO**
  - Press

- **NO.**
  - Press

**DSS Console**

- **NO.**
  - Press

- **PROGRAMMABLE FEATURE**
  - Press

**Description**

You can confirm your station status on the LCD.

**Operation**

- Be sure the handset is in the cradle and the SP-PHONE button is off.

  Press the button which you want to confirm.

- **REDIAL button**
  - If telephone number 123-456-7891-2345 has been stored, “123-456-7891-12&” will be displayed.

- **SAVE button**
  - If telephone number 456-7891 has been stored, “456-7891” will be displayed.

- **PROGRAMMABLE FEATURE button**
  - If telephone number 123-4567 has been stored, “123-4567” will be displayed.

- **FWD/DND button**
  - If Do Not Disturb has been set, “Do Not Disturb” will be displayed.
  - If Call Forwarding - All calls has been set at extension no. 101, “FWD (All) Ext 101” will be displayed.
  - If Call Forwarding - Busy or No Answer has been set at extension no. 101, “FWD (B/NA) Ext 101” will be displayed.

- **If Call Forwarding - To Outside Line has been set to trunk group 1, “FWD (All) CO G1” will be displayed.**

- **DSS button**
  - If Brown has been stored at extension no. 102 ; “102 : Brown” will be displayed.

- **MESSAGE WAITING button**
  - If a message from extension 102, Brown has been stored ; “102 : Brown” will be displayed.

- **CO button**
  - If CO button has been changed into the one touch dialing button, “9-123-4567” will be displayed.

**Conditions**

- When the display of the contents stored exceeds 17 characters, the mark “&” will be displayed at the right end of the LCD.
Timed Reminder

**Setting**

1. Lift the handset or press the SP-PHONE button.
2. Dial (76).
3. Enter the hour with 2 digits (01 through 12).
4. Enter the minute (00 through 59).
5. Dial the “0” or “1”.
   - 0 : for AM
   - 1 : for PM
6. Dial the “1” or “2”.
   - 1 : When the time comes, an Alarm tone sounds and the setting is automatically cleared after it.
   - 2 : An Alarm tone sounds every day at the preset time.
7. Dial (#).
8. Hang up or press the SP-PHONE button.

**To cancel**

1. Lift the handset or press the SP-PHONE button.
2. Dial (762#).
3. Hang up or press the SP-PHONE button.

**Description**

If a time is set, an Alarm tone will sound at the preset time.

**Programming**

**Setting**

1. Lift the handset or press the SP-PHONE button.
2. Dial (76).
3. Enter the hour with 2 digits (01 through 12).
4. Enter the minute (00 through 59).
5. Dial the “0” or “1”.
   - 0 : for AM
   - 1 : for PM
6. Dial the “1” or “2”.
   - 1 : When the time comes, an Alarm tone sounds and the setting is automatically cleared after it.
   - 2 : An Alarm tone sounds every day at the preset time.
7. Dial (#).
8. Hang up or press the SP-PHONE button.

**To cancel the setting**

1. Lift the handset or press the SP-PHONE button.
2. Dial (762#).
3. Hang up or press the SP-PHONE button.

**To confirm the setting time**

1. Lift the handset or press the SP-PHONE button.
2. Dial (763#).
3. Hang up or press the SP-PHONE button.

**Example:**

If 10:10 AM has been stored, the LCD will show below.

"Alarm 10 : 10 AM" ... only one day
"Alarm 10 : 10 AM + " ... every day

**Conditions**

- Proprietary telephone equipped with LCD only can be used to confirm.
- Multiple times can not be set at the same time.
- Setting a new time clears the preset time.
- When the preset time comes, an Alarm tone sounds for 30 seconds.
**Pulse/Tone Conversion**

**Description**
When the dialing mode is required to change a pulse mode to a tone mode in one dialing sequence, this feature is used. (e.g., computer-accessed long distance service)

**Operation**
1. Dial the phone number. (pulse mode)
2. Dial (*#)
3. Dial the phone number. (tone mode)

**Conditions**
- When you dial using this feature, you must use the line set to a pulse mode. Phone number after dialing "* # " will change to tone mode.

**Example:** Computer-accessed long distance service
- Local access telephone number of the alternate long distance service company 765 - 4321,
  Authorization no.0123456.
- Long distance no. 543 - 210 - 9876
- Pulse mode is required by local access telephone number of the alternate long distance service company.
- Service of MCI, SPRINT, METRO or other systems is used.

The DSS buttons which correspond to the extensions on the system will light up during incoming CO ring if:
- The extension is programmed to ring.
- A standard telephone is connected to that extension.
- No telephone is connected with that extension.

To turn off the indicators (DSS buttons) change the setting of Flexible Ringing Assignment to "Disable" (see page 3-54).
**Power Failure Transfer**

**Description**
In the event of a power failure each CO will be connected to assigned extension.
- CO1 will be assigned to extension of jack number 01.
- CO2 will be assigned to extension of jack number 02.
- CO5 will be assigned to extension of jack number 09.
- CO6 will be assigned to extension of jack number 10.
- CO9 will be assigned to extension of jack number 17.
- CO10 will be assigned to extension of jack number 18.

**Operation**
- If extension of jack number 01, 02, 09, 10, 17 and 18 is connected with a KX-T123230, KX-T123235, KX-T61631, KX-T61630 or KX-T30830, the Power failure switch on the KX-T123230, KX-T61631, KX-T61630 or KX-T30830 must be set to the "ON" position during power failure. If dialing cannot be done, set the Dialing mode switch to other position (TONE or PULSE).

**Conditions**
- During power failure, all features are lost except for incoming and outgoing CO calls from extensions of jack number 01, 02, 09, 10, 17 and 18.
- If extensions of jack number 01, 02, 09, 10, 17 and 18 are connected with a KX-T123220, KX-T123250, KX-T61620, KX-T61650, KX-T30825, KX-T30820 or KX-T30850, disconnect the unit and connect a KX-T123230, KX-T61631, KX-T61630, KX-T30830 or a standard telephone.
- There is no memory loss except for the camp-on, saved number redial, the last number redial, Call park and Message Waiting during power failure, memory is protected by 21 day rechargeable battery. Rechargeable battery is good for 5 years.

- Automobile type batteries which are customer supplied is available as a backup power supply of the KX-T123211 to operate all the features in the event of power failure. Refer to page 2-34.
  For connecting automobile type batteries, use the Optional Battery Adaptor KX-A26.

  Automobile type batteries
  [Consisting of two 12 VDC (24 VDC)]

**Duration Time of Call Display**

**Description**
The elapsed time (from dialing to replacing the handset) on originating an outside call will be displayed.

**Operation**
None

**Conditions**
- When intercom calls, the duration time of conversation is not displayed.
- Refer to "Duration Time Count Start Mode" on page 3-40.

**Lockout**

**Description**
If a handset of standard telephone remains off hook or is disconnected at the other end, a reorder tone will be heard. When "Calling Party Control (CPC) Signal" mode is set to "Disable", the reorder tone will not be heard. (see page 3-62)

**Operation**
None

**Conditions**
- The party whose handset remains off-hook will hear a reorder tone to indicate that the call is disconnected.

**Mixed Station Dialing**

**Description**
Any telephone instrument, whether (KX-T123230, KX-T123235, KX-T123220, KX-T123250, KX-T61631, KX-T61630, KX-T61620, KX-T61650, KX-T30820, KX-T30825, KX-T30830, KX-T30850 for exclusive use), standard rotary phone (10 pps, 20pps), or standard touch tone phone, may be used as an extension of the KX-T123211.

**Operation**
None
Station Programming

One Touch Access for System Features

To Program

## Flexible CO Button

### To Change into Other CO Button

- Be sure the handset is in the cradle and the SP-PHONE button is off.
- Set the MEMORY switch of the proprietary telephone to “PROGRAM”.

<table>
<thead>
<tr>
<th>CO</th>
<th>OPER 0</th>
<th>Dial “0”</th>
<th>Dial CO number which is set newly (01 through 12)</th>
<th>AUTO</th>
<th>Press MEMORY</th>
</tr>
</thead>
</table>

- After programming all CO buttons, return the MEMORY switch to the “SET” position.

### Description

Allows each CO button to change into CO number which is different from printed CO number.

### Operation

1. Be sure the handset is in the cradle and the SP-PHONE button is off.
2. Set the MEMORY switch of the proprietary telephone to “PROGRAM”.
3. Press CO button which you want to change into different CO button.
   When pressing CO 1 button, “CO-01” will be displayed.
4. Dial (0).
   “CO-” will be displayed.
5. Dial the CO number which is set newly (01 through 12).
   When dialing (02), “CO-02” will be displayed.
6. Press the MEMORY button.
7. After programming all CO buttons, return the MEMORY switch to the “SET” position.

### To Assign into Trunk Group Access Button

- Be sure the handset is in the cradle and the SP-PHONE button is off.
- Set the MEMORY switch of the proprietary telephone to “PROGRAM”.

<table>
<thead>
<tr>
<th>CO</th>
<th>#</th>
<th>Dial # trunk group number (1 through 8)</th>
<th>AUTO</th>
<th>Press MEMORY</th>
</tr>
</thead>
</table>

- After programming all CO buttons, return the MEMORY switch to the “SET” position.

### Description

Allows each CO button to change into the trunk group access number (81 through 88).

### Operation

1. Be sure the handset is in the cradle and the SP-PHONE button is off.
2. Set the MEMORY switch of the proprietary telephone to “PROGRAM”.
3. Press the CO button which you want to change into trunk group access number.
4. Dial (#).
5. Dial the trunk group number (1 through 8).
6. Press the MEMORY button.
7. After programming all CO buttons, return the MEMORY switch to the “SET” position.
### Flexible CO Button (cont.)

#### To Change into DSS Button

**Setting**
- Be sure the handset is in the cradle and the SP-PHONE button is off.
- Set the MEMORY switch of the proprietary telephone to “PROGRAM”.

<table>
<thead>
<tr>
<th>CO</th>
<th>Dial “1”</th>
<th>Dial extension number (100 through 199)</th>
<th>MEMORY</th>
</tr>
</thead>
</table>

- After programming all CO buttons, return the MEMORY switch to the “SET” position.

#### Description

Allows each CO button to change into the DSS (Direct Station Selection) button. DSS button can be used instead of dialing an extension number.

#### Operation

**Setting**
- Be sure the handset is in the cradle and the SP-PHONE button is off.
- Set the MEMORY switch of the proprietary telephone to “PROGRAM”.

1. Press the CO button which you want to change into DSS button.
   - When pressing CO 1 button, “CO-01” will be displayed.
2. Dial (1).
   - “EXT-” will be displayed.

   - When dialing (120), “EXT-120” will be displayed.
4. Press the MEMORY button.
5. After programming all CO buttons, return the MEMORY switch to the “SET” position.

#### Dialing (Inter Office Calling)

1. Lift the handset or press the SP-PHONE button.
2. Press the CO button which has been changed into DSS.

---

#### To Change into One Touch Dialing Button

**Setting**
- Be sure the handset is in the cradle and the SP-PHONE button is off.
- Set the MEMORY switch of the proprietary telephone to “PROGRAM”.

<table>
<thead>
<tr>
<th>CO</th>
<th>“ABC”</th>
<th>“WXYZ”</th>
<th>Phone number</th>
</tr>
</thead>
</table>

- You may dial 81 through 88 instead of 9.

- After programming all CO buttons, return the MEMORY switch to the “SET” position.

#### Description

Allows each CO button to change into the one touch dialing button.
Up to 16 digits can be stored into each of the 12 CO buttons.

#### Operation

- Be sure the handset is in the cradle and the SP-PHONE button is off.
- Set the MEMORY switch of the proprietary telephone to “PROGRAM”.

1. Press the CO button which you want to change into one touch dialing.
   - When pressing CO 1 button, “CO-01” will be displayed.
2. Dial (2).
3. Dial (9).
   - You may dial 81 through 88 instead of 9.
4. Press the MEMORY button.
5. After programming all CO buttons, return the MEMORY switch to the “SET” position.
6. For dialing, refer to “One Touch Dialing” on page 4-4.
**Flexible CO Button (cont.)**

### To Change into Other All CO Button

- Be sure the handset is in the cradle and the SP-PHONE button is off.
- Set the MEMORY switch of the proprietary telephone to “PROGRAM”.

1. Press CO which you want to change into other all CO button
2. Dial "3"
3. Press the MEMORY button

After programming all CO buttons, return the MEMORY switch to the “SET” position.

**Description**

Allows CO button to change into all CO numbers which are not assigned to CO button.

**Operation**

- Be sure the handset is in the cradle and the SP-PHONE button is off.
- Set the MEMORY switch of the proprietary telephone to “PROGRAM”.

1. Press the CO button which you want to change into other all CO numbers.
   When pressing CO 1 button, “CO-01” will be displayed.
2. Dial "3".
   “Other CO key” will be displayed.
3. Press the MEMORY button.
4. After programming all CO buttons, return the MEMORY switch to the “SET” position.

### To Change into Message Waiting Button

- Be sure the handset is in the cradle and the SP-PHONE button is off.
- Set the MEMORY switch of the proprietary telephone to “PROGRAM”.

1. Press CO 1 button.
2. Dial "3"
3. Press the MEMORY button.

After programming CO 1 button, return the MEMORY switch to the “SET” position.

**Description**

Allows only CO 1 button to change into the message waiting button except the KX-T123230, KX-T123220, KX-T123250 and KX-T30830.

**Operation**

- Be sure the handset is in the cradle and the SP-PHONE button is off.
- Set the MEMORY switch of the proprietary telephone to “PROGRAM”.

1. Press CO 1 button.
2. Dial "3".
3. Press the MEMORY button.
4. After programming CO 1 button, return the MEMORY switch to the “SET” position.
5. For operation, refer to “Message Waiting” on page 4-37.
Intercom Voice Alerting Mode

- Be sure the handset is in the cradle and the SP-PHONE button is off.
- Set the MEMORY switch of the proprietary telephone to "PROGRAM".

Setting (Voice Alerting Mode)

```
GHI 4  ABC 2  AUTO
```
Dial "42" Press MEMORY

To cancel (Setting Tone Alerting Mode)

```
GHI 4  1  AUTO
```
Dial "41" Press MEMORY

- After programming "Intercom Voice Alerting Mode", return the MEMORY switch to the "SET" position.

To answer

When an intercom call reaches

- Voice alerting is heard
- Lift handset or press SP-PHONE
- Talk

Description

The intercom alerting mode (tone/voice) at a receiving extension can be selected through programming.

VOICE... Voice alerting instead of Tone alerting is heard through the speaker on the receiving extension.

TONE... Tone alerting (ringing) sound at the receiving extension.

Operation

- Be sure the handset is in the cradle and the SP-PHONE button is off.
- Set the MEMORY switch of the proprietary telephone to "PROGRAM".

Setting (Voice Alerting Mode)

1. Dial (42).
   - "Voice Call" will be displayed.
2. Press the MEMORY button.

To cancel (Setting Tone Alerting Mode)

1. Dial (41).
   - "Tone Call" will be displayed.
2. Press the MEMORY button.

To answer

1. When an intercom call reaches, voice alerting is heard.
2. Lift the handset or press the SP-PHONE button.
3. Start talking.

Conditions

This feature will not function with a standard telephone.
### Flexible DSS Button

- Be sure the handset is in the cradle and the SP-PHONE button is off.
- Set the MEMORY switch of the proprietary telephone (KX-T123250, KX-T61650 or KX-T30850) to "PROGRAM".

- PRS 7
  - Dial "7"
- Dial "1" or "2"
  - Press MEMORY
    - "1": for Programmable feature
    - "2": for DND/FWD/Account code
- After programming the F3 button, return the MEMORY switch to the "SET".

Description

3 programmable feature (F1, F2, F3) buttons are provided with the proprietary telephones, KX-T123250, KX-T61650 and KX-T30850, and 5 programmable feature buttons are provided with the KX-T30825, and only "F3" button can be changed from programmable feature button to call forwarding (see page 4-27 for operation)/do not disturb (see page 4-31)/account code (see page 4-40) button.

- dial1 mode ..... programmable feature function
- dial2 mode ..... call forwarding / do not disturb / account code function

Condition

- F3 button of KX-T30825 is as follows.

Programming

- Be sure the handset is in the cradle and the SP-PHONE button is OFF.
- Set the MEMORY switch of the proprietary telephone (KX-T123250, KX-T61650, KX-30825 or KX-T30850) to "PROGRAM".

1. Dial (7).
2. Dial (1) for programmable feature function or dial (2) for call forwarding /do not disturb/account code function.
3. Press the MEMORY button.

- After programming the F3 button, return the MEMORY Switch to the "SET" position.
Station Program Clear

• Be sure the handset is in the cradle and the SP-PHONE button is off.
• Set the MEMORY switch of the proprietary telephone to "PROGRAM".

Dial "#"   Dial "*"   Press MEMORY

• After clearing, return the MEMORY switch to the "SET" position.

Description

- Pressing (# * MEMORY) will reset station programs on an extension to the default data.
- Auto CO Hunting
  Prime Line Preference-Outgoing
  Idle Line Preference-Outgoing
- Automatic Answering Selection
  Prime Line Preference-Incoming
  No Line Preference-Incoming
- Intercom Voice Alerting Mode
- CO Line Ringing Selection
- Call Waiting Tone Selection
- F3-One Touch Button Mode Selection

Operation

• Be sure the handset is in the cradle and the SP-PHONE button is off.
• Set the MEMORY switch of the proprietary telephone to "PROGRAM".
  1. Dial (#).
  2. Dial (*).
  3. Press the MEMORY button.
• After clearing, return the MEMORY switch to the "SET" position.

Cancellation of Electronic Station Lock
(Extension connected to jack number 01 only)

• Be sure the handset is in the cradle and the SP-PHONE button is off.
• Set the MEMORY switch of the proprietary telephone to "PROGRAM".

Dial "8"   Press MEMORY

• After canceling the Electronic Station Lock, return the MEMORY switch to the "SET" position.

Description

You can cancel the Electronic Station Lock of all extensions. This feature only is done through extension connected to jack number 01.

Operation

• Be sure the handset is in the cradle and the SP-PHONE button is off.
• Set the MEMORY switch of the proprietary telephone to "PROGRAM".
  1. Dial (8).
  2. Press the MEMORY button.
• After canceling the Electronic Station Lock, return the MEMORY switch to the "SET" position.
Outgoing Message
(Extension connected to jack number 01 only)

- Be sure the handset is in the cradle and the SP-PHONE button is off.
- Set the MEMORY switch of the proprietary telephone to “PROGRAM”.

To record
- Dial “9”
- Lift handset
- Dial “2”
- Give message
- Press MEMORY

- Message which is recorded is played back automatically after press the MEMORY button.

To play back only
- Dial “9”
- Dial “1”
- Will hear message

- After recording or confirming, return the MEMORY switch to the “SET” position.

Description
Enables recording of message that answers calls on the CO line set to “DISA” mode.
The record time is max. 31 seconds. One message can be recorded.

Programming
- Be sure the handset is in the cradle and the SP-PHONE button is off.
- Set the MEMORY switch of the proprietary telephone to “PROGRAM”.

To record
1. Dial (9).
   “Outgoing Message” will be displayed.
2. Lift the handset
3. Dial (2) and then give the message.
   “Record : 00” will be displayed and then count will start.
4. When finished, press the MEMORY button.
   “Playback : 00” will be displayed and message that was recorded is played back automatically.

To play back only
1. Dial (9)
   “Outgoing Message” will be displayed.
2. Dial (1)
   “Playback : 00” will be displayed
   Message is played back and then count will start.
- After recording or confirming, return the MEMORY Switch to the “SET” position.

Condition
- If you exceed the max. time of recording (31 seconds), Recording is automatically stopped and Playback is started.
- Optional Outgoing Message Card and Direct Inward System Access Cards are necessary.
- If a power failure takes place for about 10 days, OGM will vanish. Then “Record OGM” will be displayed and blink on the LCD of the extension connected to jack no. 1. Please record OGM again.
**Making Calls**

### Inter Office Calling  
*Intercom*  
(see page 4-1)

**Description**
Station to station dialing within the KX-T123211 system.

**Operation**
- Lift handset
- Dial extension number (100 through 199)

### Outward Dialing  
(see page 4-2)

#### Automatic Line Access
**Description**
Each extension can automatically select an idle line within the CO (Central Office) line enable to call.

**Operation**
- Lift handset
- Dial “9” Wait for Dial phone C.O. dial tone number

#### Individual Trunk Group Access
**Description**
Each extension can automatically select an idle CO line within the same trunk group. Through programming, 12 CO lines can be divided up to 8 groups. See the page 3-52.

**Operation**
- Lift handset
- Dial “8” Dial trunk group number (1 through 8)
- Wait for C.O. dial tone

### Speed Dialing  
(see page 4-3)

**Description**
There are 100 memory locations of system speed dialing available.

**Operation**
- Lift handset
- Dial “*” Dial speed access code (00 through 99)
- There is no need to access a CO line.
- A rotary phone will not function for speed dialing.
- Continuous use of speed dialing is impossible.

### Calling Doorphone  
(see page 4-6)

**Description**
You can call the doorphone within the KX-T123211 system.

**Operation**
- Doorphone 1
  - Lift handset
  - Dial “311”
- Doorphone 2
  - Lift handset
  - Dial “312”

### Operator Call  
(see page 4-6)

**Description**
You can call the operator within the KX-T123211 system.  
This feature is required to be set beforehand in the KX-T123211. For programming, see page 3-9.

- Lift handset
- Dial “0” or “1”  
  - "0": for Operator 1  
  - "1": for Operator 2  

- In case one operator is programmed, you have only to dial 0.
When a Line is Busy

Automatic Call Back Busy
(Camp-on) (see page 4-7)

Description
If the extension you have dialed is busy, or outside line (CO line) you have selected is busy, the call will be automatically called back to you when the extension or the outside line becomes free using this function.

This feature is also known as camp-on.

Operation

For Outside Calls

Dial extension number (100 through 199)

For Intercom Calls

Dial extension number (100 through 199)

When hearing a ring back

- When making an intercom call, you will hear a ring back tone.
- When making an outside call, you will hear the dial tone from the CO.

- A call back busy cannot be activated on an extension which has a call on hold.

Busy Station Signaling
(see page 4-8)

Description
If the extension you have dialed is busy, you can inform the extension that another intercom call is incoming with three beeps.

If the extension you have dialed is KX-T123235, you can inform the extension through the speaker.

Operation

Dial extension number (100 through 199)

Last Number Redial
(see page 4-8)

Description
The last phone number dialed on an outside line (CO line) can be redialed.

Operation

Lift handset

- You may dial "80" instead of pressing the "#" button.
When a Line is Busy (cont.)

Executive Override (Barge-In) (see page 3-74)

Description
Allows an extension user to intrude into another extension that is in conversation with an outside or inside party. This feature is required to be set beforehand in the KX-T123211. For programming see page 3-74.

Operation

- Lift handset
- Dial extension number (100 through 199)
- You will hear a busy tone
- Dial "2" A 3-party Conference is now established

- If the other party is using data equipment or is set for "Executive Override Deny-Extension on page 5-15, you can not intrude into the other party that is in conversation. (A recorder tone is heard after dialing 2.)

Receiving Calls

Answer (see page 4-10)

Operation

- Lift handset

Dial Call Pickup (see page 4-11)

Description
An extension user can answer any ringing extension within their own extension group.

Operation

- Lift handset
- Dial "40"

Directed Call Pickup (see page 4-11)

Description
An extension may answer an incoming call that is ringing at another extension regardless of the extension group.

Operation

- Lift handset
- Dial "4"
- Dial ringing extension number (100 through 199)
### Receiving Calls (cont.)

#### Call Park (see page 4-12)

**Description**
An extension user can place up to ten calls in the park zones. This allows any extension user to retrieve a parked call (intercom or outside) at any extension.

**Operation**

**To Park a Call**

- **Flash hookswitch**
- **Confirmation tone**
- **Dial “2”**
- **Dial parking station number (20 through 29)**

- **Confirmation tone**
- **Hang up**

- If a busy tone is heard after the parking station number is dialed, dial only the last 1 digit of another parking station number (0 through 9).
- Do not depress the hookswitch for more than one second, or party will be disconnected.

When the “Call on Hold for Standard Telephone” on page 3-77 is placed in the “Hold-2” mode, dial “20” after flashing of the hookswitch in addition to the above procedure. If any number except “20” is dialed, the party will be disconnected.

**To Retrieve a Parked Call at Any Other Extension**

- **Lift handset**
- **Dial “5”**
- **Dial parking station number (20 through 29)**

#### Doorphone (see page 4-13)

**Operation**

- This feature is required to be set beforehand in the KX-T123211. For programming, see page 3-16.
- Off Premise Extension (OPX) does not receive call from the doorphone.

### While Having a Conversation

#### Call on Hold (see page 4-14)

**Description**
If you wish to leave your phone unattended but want the caller you are in conversation with to wait, call on hold may be used. Intercom or outside calls may be on hold.

**Operation**

**To Place a Call on Hold**

- **Flash hookswitch**
- **Confirmation tone of 2 beeps will be heard**

- Do not depress the hookswitch for more than one second, or the party will be disconnected.

When the “Call on Hold for Standard Telephone” on page 3-77 is placed in the “Hold-2” mode, dial “20” after flashing of the hookswitch. If any number except “20” is dialed, the party will be disconnected.

**To Cancel**

- **Flash hookswitch**

**To Retrieve a Call on Hold from Another Extension**

- **Lift handset**
- **Dial “5”**
- **Dial holding extension number (100 through 199)**

- In case held call is outside call, you may dial “53” and then held CO line number (01 through 12).
While Having a conversation (cont.)

**Conference (see page 4-16)**

**Description**
Allows for a three party conference, (2-outside/1-inside) (1-outside/2-inside) or (3-inside).

**Operation**

Flash hookswitch

Dial 2nd party number

Consult with 2nd party

Flash hookswitch

3-party conference now established.

Dial "3"

When the “Call on Hold for Standard Telephone” on page 3-77 is placed in the “Hold-2” mode, dial “20” after first flashing of the hookswitch in addition to the above procedure. If any number except “20” is dialed, the first party will be disconnected.

**To leave one caller on Hold and Talk to the Other Caller**

Flash hookswitch

2nd party on hold 1st party in consultation

**Call Waiting (see page 4-20)**

**Description**
Call Waiting tones during a conversation indicates there is a new incoming outside call or Intercom call. This feature has been set beforehand in the extension.

**Operation**

3 beeps

Will hear a call waiting tone

Flash hookswitch

Hang up

Lift handset

Consult with new caller while 1st party is on hold

- If you use the hold button of a standard telephone, the above-mentioned feature will not function.
- To terminate the original call and return to the 2nd call, hang up and then lift the handset. (You need not flash the hookswitch.)

When the “Call on Hold for Standard Telephone” on page 3-77 is placed in the “Hold-2” mode, dial “20” after first flashing of the hookswitch in addition to the above procedure. If any number except “20” is dialed, the first party will be disconnected.
### While Having a Conversation (cont.)

#### Call Splitting (see page 4-21)

**Description**

Allows the station user to alternate between two parties, intercom and outside.

**Operation**

<table>
<thead>
<tr>
<th>Action</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Flash</td>
<td>Dial second party</td>
</tr>
<tr>
<td>Flash</td>
<td>Consult with 2nd party while 1st party is on hold</td>
</tr>
<tr>
<td>2nd party</td>
<td>Flash</td>
</tr>
<tr>
<td>1st party</td>
<td>Flash</td>
</tr>
<tr>
<td>Hold</td>
<td>1st party on hold</td>
</tr>
<tr>
<td>Consultation</td>
<td>2nd party on hold</td>
</tr>
</tbody>
</table>

When the “Call on Hold for Standard Telephone” on page 3-77 is placed in the “Hold-2” mode, dial “20” after first flashing of the hookswitch in addition to the above procedure. If any number except “20” is dialed, the first party will be disconnected.

#### Call Transfer (see page 4-18)

**Description**

Outside or intercom calls may be transferred to any extension manually. A call can not be transferred to outside line.

**Operation**

**To Transfer After the Other Extension Answers**

<table>
<thead>
<tr>
<th>Action</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Flash</td>
<td>Dial extension number</td>
</tr>
<tr>
<td>Extension</td>

**To Transfer without Announcing the Other Extension**

<table>
<thead>
<tr>
<th>Action</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Flash</td>
<td>Dial extension number</td>
</tr>
<tr>
<td>Hang up</td>
<td></td>
</tr>
</tbody>
</table>

When the “Call on Hold for Standard Telephone” on page 3-77 is placed in the “Hold-2” mode, dial “20” after flashing of the hookswitch in addition to the above procedure. If any number except “20” is dialed, the party will be disconnected.

To Retrieve the Call

If the other extension did not answer the transferred call within 30 seconds after the call has been transferred, the call will return to you. In this case:

- While the ring back is hearing,
  - The time that the call returns to you when the transferred call is not answered can be changed from 30 seconds to 15 seconds.
  - For changing, see page 3-27.

**To change the party to whom a call is transferred before hanging up**

<table>

5-6
**Paging**

**Paging All Extensions and External (See page 4-24)**

**Description**
Allows paging all extensions and external paging equipment.

**Operation**

- **To access**
  - Lift handset
  - Dial "33 *"
  - Confirmation tone of 1 beep will be heard

- **Page**
  - Wait for an answer and talk

- You may dial (32*) instead of (33*).

**Paging All Extensions (See page 4-24)**

**Description**
Allows paging all extensions.

**Operation**

- **To access**
  - Lift handset
  - Dial "330"
  - Confirmation tone of 1 beep will be heard

- **Page**
  - Wait for an answer and talk

- Paging will be heard only from the built-in speaker of KX-T123235, KX-T123230, KX-T123220, KX-T123250, etc. It will not be heard from the built-in speaker of a standard telephone.

**Paging Group (see page 4-25)**

**Description**
Allows paging to one of eight extension groups.

**Operation**

- **To access**
  - Lift handset
  - Dial "33"
  - Dial extension group number (1 through 8)
  - Confirmation tone
  - Page
  - Wait for an answer and talk
### Paging (cont.)

#### Paging-External (see page 4-25)

**Description**
- Allows access to external paging equipment.

**Operation**

**To Access**

<table>
<thead>
<tr>
<th>Lift handset</th>
<th>Dial &quot;32&quot;</th>
<th>Dial external paging number</th>
</tr>
</thead>
</table>

- Confirmation tone
- **Wait for an answer and talk**

- **External paging number**
  - "0": for external paging equipments 1 and 2.
  - "1": for equipment 1.
  - "2": for equipment 2.

- Paging will be heard from external paging equipment.
- Up to two external paging equipment can be connected to the KX-T123211.

#### Paging-Answer (see page 4-26)

**Description**
- A page from the built-in speaker or external paging equipment can be answered from any extension.

**Operation**

**To Panning from Built-in Speaker**

<table>
<thead>
<tr>
<th>Lift handset</th>
<th>Dial &quot;43&quot;</th>
<th>Confirmation tone of 1 beep will be heard</th>
</tr>
</thead>
</table>

- **Talk**

**To Panning from External Equipment**

<table>
<thead>
<tr>
<th>Lift handset</th>
<th>Dial &quot;42&quot;</th>
<th>Dial external paging number</th>
</tr>
</thead>
</table>

- **Confirmation tone**
- **Talk**

- **External paging number**
  - "1": for external paging 1.
  - "2": for external paging 2.

#### Paging And Transfer (see page 4-26)

**Operation**

**To Transfer a Call to the Paged Person**

<table>
<thead>
<tr>
<th>Flash hookswitch to place a call on hold</th>
<th>Dial &quot;330&quot;</th>
<th>Confirmation tone</th>
</tr>
</thead>
</table>

- **Talk**
- **Confirmation tone**
- **Wait for an answer and hang up**

- **You may dial 331 through 338, 320 through 332, 32 ∗ or 33 ∗ instead of 330.**

**When the “Call on Hold for Standard Telephone” on page 3-77 is placed in the “Hold-2” mode, dial “20” after flashing of the hookswitch in addition to the above procedure. If any number except “20” is dialed, the party will be disconnected.**
Use of Other Features

Do Not Disturb Override
(see page 4-32)

Description
Allow you to dial to the extension on which Do Not Disturb is set. This feature is required to be set beforehand in the KX-T123211. For programming, see page 3-75.

External Feature Access
(see page 4-39)

Description
Allows extension user to access features of the central office or host PBX. (example: call waiting feature can be supplied by the central office.)
- This external feature (call waiting) can only be accessed when on an outside call.
- The following example shows you one of the procedures.

Operation

Call Waiting-Outside Line

| While in conversation | Will hear a call waiting tone | Flash hookswitch | Dial "6"

Switching to Tone Alerting
(see page 4-34)

Description
"Voice alerting" (through built-in speaker) that is established at the called party's extension, can be switched to "Tone alerting" (ringing).
- This feature is required to be set beforehand at the called party's extension. For programming, see page 4-60.
- A rotary phone will not function.

Operation

Switching to Tone Alerting

| Wait until a confirmation tone is heard | Press "*" | Ring back tone |

- You should press "*" button within 10 seconds after the dialing.

When the "Call on Hold for Standard Telephone" on page 3-77 is placed in the "Hold-2" mode, dial "20" after the first flashing of the hookswitch in addition to the above procedure. If any number except "20" is dialed, the original call will be disconnected.
**Description**

This feature gives each message of the SMDR an account code of the called or calling party.

Station Message Detail Recording (SMDR) is a cost-saving feature that records all incoming and outgoing calls through the CO line.

This feature has two modes: "Forced" and "Option". In the "Forced" mode, the account code must be entered every time the extension user dials. In the "Option" mode, account code may be entered when a record of the account code is needed. When setting to the "Forced" mode, see page 3-71.

**Operation**

**Forced Mode**

- **Making a Call**
  - Lift handset
  - Dial "9"
  - Dial "*"
  - Dial telephone number
  - Account code is 4 digits.

- You may dial 81 through 88 instead of dialing 9.

- **Receiving a Call**
  - If you want to record a calling party's account code in the SMDR, follow the below-mentioned procedure:
    - Within 30 seconds after calling party hangs up,
    - You may dial 49 instead of pressing the "#" and "*" buttons.
    - Account code requires 4 numerical digits except for the "#" and "*" buttons.
    - If you enter a wrong account code, press the "#" and "*" button and enter the correct code.

- **Option Mode**
  - **Making or Receiving a Call**
    - If you want to record a calling or called party's account code in the SMDR, follow the below-mentioned procedure.
    - Within 30 seconds after calling or called party hangs up,
    - You may dial 49 instead of pressing the "#" and "*" buttons.
    - Account code requires 4 numerical digits except for the "#" and "*" buttons.
    - If you enter a wrong account code, press the "#" and "*" button and enter the correct code.
Use of Other Features (cont.)

You may dial "0" instead of pressing the "#" button.

**Do Not Disturb (see page 4-31)**

**Description**
Each extension can be individually prohibited from receiving intercom and outside calls.

**Operation**

**Setting**

- Lift handset
  - Dial "714#"
- Hang up

**To Cancel**

- Lift handset
  - Dial "710#"
- Hang up

---

**Dial Call Pickup Deny (see page 4-30)**

**Description**
Allows you to prohibit any other extension user from answering calls directed to you.

**Operation**

**Setting**

- Lift handset
  - Dial "721#"
- Hang up

**To Cancel**

- Lift handset
  - Dial "720#"
- Hang up
Use of Other Features (cont.)

**Call Forwarding-All Calls**
(see page 4-27)

**Description**
All intercom calls to your extension can be automatically forwarded to any extension within the system.
For outside calls to your extension, if your extension is programmed for the Direct In Line (DIL) or the call is the CO line which is programmed for the DISA, the outside calls can be automatically forwarded to any extension within the system.
For programming of the DIL or DISA mode, see page 3-57.

**Operation**

**Setting**

- Lift handset
- Dial "711"
- Dial extension number (100 through 199)
- Dial "#" Hang up

**To Cancel**

- Lift handset
- Dial "710#"
- Hang up

**Call Forwarding-Busy/No Answer**
(see page 4-27)

**Description**
If your extension is busy or do not answer a call within 3 rings, all intercom calls to your extension can be automatically forwarded to any extension within the system.
For outside calls to your extension, if your extension is programmed for the Direct In Line (DIL) or the call is the CO line which is programmed for the DISA, the outside calls can be automatically forwarded to any extension within the system.
1 ring or 2 rings or 4 rings by programming (see page 3-28).

**Operation**

**Setting**

- Lift handset
- Dial "712"
- Dial extension number
- Dial "#" Hang up

**To Cancel**

- Lift handset
- Dial "710#"
- Hang up
Use of Other Features (cont.)

Call Forwarding-To Outside Line (see page 4-29)

Description
Intercom calls to your extension can be automatically forwarded to any outside line. For outside calls to your extension, if your extension is programmed for the Direct In Line (DIL) or the call is the CO line which is programmed for the DISA, the outside calls can be automatically forwarded to any outside line. For programming of the DIL or DISA mode, see page 3-57. This feature is required to be set beforehand in the KX-T123211. For programming, see page 3-73.

Operation

<table>
<thead>
<tr>
<th>Setting</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>

</thead>
<tbody>
<tr>
<td>Lift handset</td>
<td>Dial &quot;710#&quot;</td>
</tr>
</tbody>
</table>

If outside call is forwarded to any outside line, the KX-T123211 will disconnect the call from the line after 10 minutes. For changing the time, see "CO to CO Duration Time Limit" on page 3-30.

3 beeps tone will be heard every 5 seconds for 15 seconds before the call is disconnected from the line.

Absent Message Capability (see page 4-35)

Description
Absent message (Message 1 through 6) which are programmed can informed to an inside calling party.
Programming can be done at any telephone (either proprietary telephones or standard telephones).
When a caller using the proprietary telephone with LCD dials the extension in which the message is programmed, the message will be displayed on the LCD.

Operation

Dial "1#" Hang up

To Allow Extension Call Waiting Tone
Lift handset Dial "73" Dial "2"

Dial "1#" Hang up

Executive Override
Deny-Extension (see page 4-33)

Description
Allows you to prohibit another extension user from intruding into your conversation with an outside or inside party.
For programming of the intrusive extension, see "Executive Override" on page 3-74.
Default is "Allow".

Operation
To Deny Executive Override
Lift handset Dial "73" Dial "1"

Dial "0#" Hang up

To Allow Executive Override
Lift handset Dial "73" Dial "2"

Dial "1#" Hang up
Use of Other Features (cont.)

**Electronic Station Lock**
(see page 4-46)

**Description**
Locking an extension prohibits the other user from dialing to an outside line using it until unlocked, such as when leaving your seat for a while.

**Operation**

**To lock**

- Lift handset
- Dial "77"
- Dial lock code (000 through 999)
- Dial some lock code again
- Dial "#" Hang up

**To unlock**

- Lift handset
- Dial "77"
- Dial lock code
- Dial "#" Hang up

- Lock code must be 3 numerical digits except for the "#" and "*" button.

**Timed Reminder**
(see page 4-48)

**Description**
If a time is set, an alarm tone will sound at the preset time.

**Operation**

**Setting**

- Lift handset
- Dial "70"
- Dial hour (01 through 12)
- Enter minute (00 through 59)
- Dial "0" or "1"
- Dial "1" or "2"
- Dial "0" : for AM
- "1" : for PM
- "1" : only one day
- "2" : every day
- Dial "#" Hang up

**To Cancel**

- Lift handset
- Dial "762#"

**To stop the Alarm tone**

- Lift handset
Use of Other Features (cont.)

Data Line Security
(see page 4-42)

Description
This feature provides security when transmitting data through an extension of the KX-T123211. Executive override, Call waiting tone and Hold time reminder tone from the KX-T123211 are prohibited in this mode.

Operation
Setting

Lift handset  Dial "73"  Dial "0"

Dial "1#"  Hang up

To Cancel

Lift handset  Dial "73"

Dial "0"  Dial "0#"

Hang up

Station Feature Clear
(see page 4-49)

Description
Dialing (79#) will reset the following station Features on an extension to the default data.
- Call Forwarding
- Data Line Security
- Dial Call Pickup Deny
- Do not Disturb
- Call Waiting Tone From CO / Extension Deny
- Pick up Dial
- Absent Message Capability
- Executive Override Deny
- Timed Reminder

Operation

Lift handset  Dial "79#"  Hang up

KX-T123211

Data terminal provided with the telephone equipment.

Standard Telephone

Data terminal unprovided with the telephone equipment

- This mode cannot prevent external call waiting tone from coming into KX-T123211 system. We recommend that this mode is established on a line which has no special telephone company services.
Use of Other Features (cont.)

Pickup Dial

Description
Picking up the handset automatically dials a programmed phone number.

Operation

To Program

<table>
<thead>
<tr>
<th>Lift handset</th>
<th>Dial “742”</th>
<th>Dial extension number</th>
</tr>
</thead>
</table>

To dial “#”

Hang up

- You may dial 9 or 81 through 88 and phone number instead of extension number.
- 9... An extension automatically selects an idle line within the CO line enable to call.
- 81 through 88... An extension selects a trunk group designated.

To Enable or Disable

To enable pickup dial

<table>
<thead>
<tr>
<th>Lift handset</th>
<th>Dial “741#”</th>
<th>Hang up</th>
</tr>
</thead>
</table>

To disable pickup dial

<table>
<thead>
<tr>
<th>Lift handset</th>
<th>Dial “740#”</th>
<th>Hang up</th>
</tr>
</thead>
</table>

To Dial

Pickup handset for 3-seconds

If the “Pickup Dial” feature did not work, hang up for 2 seconds, and lift the handset again.

- The 3 seconds may be changed to 1 second, 2 seconds or 4 seconds by programming. (See page 3-29)
- A rotary phone will not usable for Pickup Dial.
- Dialing (speed dialing and manual dialing) is possible within 3 (1, 2 or 4) seconds. When you program for an outside call, enter the line access number, [*], account code), and then the desired number.
- The pickup dial will not be activated by picking up the handset during a hold or when receiving a call.
- You can not dial “0” instead of pressing the “#” button.
- Up to 32 digits can be stored.
- The “*” button is used as the PAUSE.
## TROUBLESHOOTING

### During Installation

<table>
<thead>
<tr>
<th>PROBLEM</th>
<th>PROBABLE CAUSE</th>
<th>POSSIBLE SOLUTION</th>
</tr>
</thead>
<tbody>
<tr>
<td>Extension does not operate.</td>
<td>Bad printed circuit board (LC-Card)</td>
<td>Exchange printed circuit board for another printed circuit board.</td>
</tr>
<tr>
<td></td>
<td>Bad connection between the system and extension</td>
<td>Take that extension and plug it into the same extension port using a short telephone cord. If telephone does not work, connection between the system and the extension must be repaired.</td>
</tr>
<tr>
<td></td>
<td>A telephone with an A-Al relay is connected.</td>
<td>Use a 2 wires cord. Set the A-Al relay switch of the telephone to “OUT” or “OFF” position.</td>
</tr>
<tr>
<td></td>
<td>Bad extension</td>
<td>Take that extension and plug it into another extension port that is working. If the telephone does not work, replace the phone.</td>
</tr>
</tbody>
</table>

- **Improper reset operation**
  - Press the Reset Button.

- **Noise in external paging**
  - Induced noise on the wire between the System and the Amplifier.
  - Use a shielded cable as the connection wire between the System and Amplifier. A short shielded cable is recommended.

- **Volume distortion from external music source**
  - Excessive input level from external music source
  - Decrease the Output level of the external music source by using the Volume Control on the music source.

- **Speed dialing or One Touch Dialing does not function.**
  - Bad programming
  - Enter the line access code (9) or trunk group access code (81 through 88) into programming.

- **A dial tone (short tone continuously) was heard and telephone line hung up at once when accessing an outside during the speakerphone mode.**
  - The host PBX may have caused the line to hang up when the KX-T123211 was connected to it.
  - Use the handset instead of the speakerphone.

</tr>
</tbody>
</table>

## Reset Button

If the system does not operate properly, use the Reset Button.

- Before using the Reset Button, try the system feature again to confirm whether there definitely is a problem or not.
- Pressing the Reset button will cause the followings:
  1. Camp-on is cleared.
  2. Last number redial is cleared.
  3. Saved number redial is cleared.
  4. Calls on hold are terminated.
  5. Calls on exclusive hold are terminated.
  6. Calls in progress are terminated.
  7. Call park is cleared.
  8. Message Waiting is cleared.

Data that are stored in memory except above mentioned will not be cleared by use of the Reset Button.

### Note

If the system does not operate properly, push the Reset Button.

If the system does not work, switch the power off and on again after 5 minutes. If the system still does not work, switch the power off.

The following extensions will be directly connected to each of the central office lines (C.O.).

- Extension connected to jack number 01 ..... CO 1
- Extension connected to jack number 02 ..... CO 2
- Extension connected to jack number 09 ..... CO 5
- Extension connected to jack number 10 ..... CO 6
- Extension connected to jack number 17 ..... CO 9
- Extension connected to jack number 18 ..... CO10

If the automobile type battery is connected to the system, disconnect it.
DTMF Receiver Check

To set

until the desired DTMF receiver appears

until desired mode appears

Enable ................. default

Disable

* or

30 NEXT NEXT SELECT MEMORY END

A = ✗ : to assign to same of all 3 receivers
1 : receiver 1
2 : receiver 2
3 : receiver 3

To confirm

Dial any extension (100 through 199) and listen for that extension to ring.

Description

DTMF (Dual Tone Multi Frequency) Receiver enables tone telephones to dial within the system. To check the DTMF Receivers, activate the DTMF Receivers at a time and confirm if the receiver can receive tone signals.

Operation at Extension Connected to Jack Number 1.

To Remove DTMF Receive 2 and 3:

1. Set the System Program Switch on the KX-T123211 to the “PITS” position.
2. Dial (30) to enter the DTMF mode. “DTMF-R Selection” will be displayed.
3. Press the NEXT button. “DTMF-R NO?→” will be displayed.
4. Press the NEXT button, twice, or dial (2). “DTMF-R2 : Enable” will be displayed.
5. Press the SELECT button to change to “Disable”. “DTMF-R2 : Disable” will be displayed.
6. Press the MEMORY button.
7. Press the NEXT button, or press the SELECT button and then dial (3). “DTMF-R3 : Enable” will be displayed.
8. Press the SELECT button to change to “Disable”.
9. Press the MEMORY button.
10. Press the END button to return to the initial program mode.
11. Set the System Program Switch to the “SET” position.

Confirmation of DTMF Receiver 1:

1. Set the DIALING MODE (located on the rear of KX-T123230 or KX-T123235) switch to the TONE position.
2. Set the POWER FAILURE (located on the rear of KX-T123230 or KX-T123235) switch to the ON position.
3. Dial the extension number (100 through 199).
4. If DTMF Receiver is bad, do the following procedure for removing the DTMF Receiver after the next step on this section.
5. Set the POWER FAILURE Switch to the OFF position.
   - To check DTMF Receiver 2, remove DTMF Receiver 1 and confirm that DTMF Receiver 2 is good by the procedures of “To Remove DTMF Receiver 1 and 3” and “Confirmation of DTMF Receiver 2”.
   - To check DTMF Receiver 3, remove DTMF Receiver 1 and confirm that DTMF Receiver 3 is good by the procedures of “To Remove DTMF Receiver 1 and 2” and “Confirmation of DTMF Receiver 3”.

**Table of System Features (cont.)**

**Dial Plan Codes:**
- **7:** Denotes the Primary Dial Plan Code.
- **Next Numbers:** Denote the secondary codes for additional features.

**System Features:**
- **Cancelled Executive Override Deny:** Cancels the overridedeny feature.
- **Executive Override Deny:** Enables or disables the override feature.
- **Cancelling Absent Message:** Cancels an absent message.
- **Message "Will Return Soon":** Sends a message indicating the user will return soon.
- **Message "Gone Home":** Sends a message indicating the user is gone home.
- **Message "Back at IO:00 AM:"** Sends a message indicating the user will be back at a specific time.
- **Message "Out Until 10/23"** Sends a message indicating the user will be out until a specific date.
- **Message "In a Meeting"** Sends a message indicating the user is in a meeting.
- **Electronic Station Lock:** Locks the extension.
- **Flexible Night Service:** Enables or disables flexible night service.
- **Station Program Clear:** Clears the station program.
SPECIFICATION

General Description

1. Capacity  Outsides (CO) Max. 12
   Stations Max. 32
2. Control Method  Stored Program CPU: 16 bits CPU
   Control ROM: 192 KB, Control RAM: 64 KB
3. Switching  Space Division CMOS Crosspoint Switch
4. Power Supplies  
   Primary  AC 120V 60Hz
   Secondary  Station Supply Volt: 26V
   Circuit Volt: +5V, +12V, -14V, -16V, ±7V
   Power Failure  Max. 6 outsides assigned to stations
   ⚠ System operation for several hours by recommended battery (car type batteries - consisting of two 12 VDC)
5. Dialing  
   Outward  Dial Pulse 10PPS, 20PPS
   Tone Dial
   Internal  Dial Pulse 10PPS, 20PPS
   Tone Dial
   Mode Conversion  DP-DTMF, DTMF-DP
6. Intercom paths  5
7. Outside (CO)-Outside (CO) paths  2
8. Connector  
   Outsides (CO)  Modular Jack (RJ-11)
   Station  Amphenol Connector
   Paging Output  Pin Jack (RCA JACK)
   External Music Input  two-conductors Jack (MINIJACK 9/64 inch diameter)
9. EXT Connsction  
   Cable  1 pair wire (Standard Telephone)
   3 pair wire (KX-T123235)
10. SMDR  
    [Station Message]  
    [Detail Recording]  Interface  RS-232C
    Output Equipment  Printer, Data Terminal
    Detail Recording  Data, Time, Ext. Number, CO Number, Calling Number, Calling Time, Account Code

Characteristics

   Standard Telephone  00 ohms including set Doorphone  20 ohms
2. Minimum Leak Resistance  15,000 ohms
3. Maximum Number of Station
   Instruments per Line  1 (KX-T123230, KX-T123220, KX-T123250, KX-T123235, KX-T61630, KX-T61631, KX-T61620, KX-T61650, KX-T61650/ KX-T30825 or Standard telephone)
4. Ring Voltage  70 Vrms at 20 Hz depends on Ringing Load
5. Primary Power  120 Vac, 60 Hz, 1.4 A maximum
6. Central Office Loop Limit  1600 ohms maximum
7. Environmental Requirements  0-40 C, 10%-90%
8. Hookswitch Flash Timing Range  204-1000 msec
In compliance with the requirements of Part 68 of the F.C.C. Rules and Regulations for connection of terminal system (this device is classified as terminal system) to the telephone network and for your convenience, the following information is presented:

1. Notification to the Telephone Company

Customers, before connecting terminal equipment to the telephone network, shall upon request of the Telephone Company, inform the Telephone Company of the particular line(s) to which such connection is made, the F.C.C. registration number and (see label on side of unit) ringer equivalence number of the registered terminal equipment. The REN is useful to determine the quantity of devices you may connect to your telephone line and still have all of those devices ring when your telephone number is called. In most, but not all areas, the sum of the REN's of all devices connected to one line should not exceed five (5.0). To be certain of the number of devices you may connect to your line, as determined by the REN, you should contact your local telephone company to determine the maximum REN for your calling area.

2. Direct connection to A Party-line or Coin-operated Telephone Lines is Prohibited

3. Incidence of Harm to The Telephone lines

Should Terminal Equipment cause harm to the Telephone Network, the Telephone Company shall, where practical, notify the customer that temporary discontinuance of service may be required. However, where prior notice is not practical, the Telephone Company may temporarily discontinue service forthwith, if such action is reasonable in the circumstances. In case of such unnotified temporary discontinuance of service, the Telephone Company shall:

(a) Promptly notify the customer of such temporary discontinuance of service.

(b) Afford the customer the opportunity to correct the situation which gave rise to the temporary discontinuance.

(c) Inform the customer of the right to bring a complaint to the Commission pursuant to the procedures set out in Subpart E of Part 68 of FCC Telephone Equipment Rules.
4. Compatibility of The Telephone Network and Terminal Equipment

(a) Availability of telephone interface information.
Technical information concerning interface parameters and specifications is not specified in FCC Rules, including the number of Ringers which may be connected to a particular telephone line, which is needed to permit Terminal Equipment to operate in a manner compatible with Telephone Company communications facilities, shall be provided by the Telephone Company upon customer's request.

The Telephone Company may make changes in its communications facilities, equipment, operations or procedures, where such action is reasonably required in the operation of its business and is not inconsistent with the rules and regulations in FCC Part 68 of the FCC Rules and Regulations. If such changes can be reasonably expected to render any customer Terminal Equipment incompatible with Telephone Company Communications Facilities, or require modification or alteration of such Terminal Equipment, or otherwise materially affect its use or performance, the customer shall be given adequate notice in writing, to allow the customer an opportunity to maintain uninterrupted service.
OTHERS

- Keep the unit away from heating appliances and electrical noise generating devices such as fluorescent lamps, motors and television. These noise sources can interfere with the performance of the EASA-PHONE.

- This unit should be kept free of dust, moisture, high temperature and vibration, and should not be exposed to direct sunlight.

- Never attempt to insert wires, pins, etc. into the vents or other holes of this unit.

- If there is trouble, disconnect the unit from the telephone line. Plug the telephone directly into the telephone line. If the telephone operates properly, do not reconnect the unit to the line until the trouble has been repaired by an authorized Panasonic Factory Service Center. If the telephone does not operate properly, chances are that the trouble is in the telephone system, and not in the unit.

- Do not use benzine, thinner, or similar solvents. Do not use abrasive powder to clean the cabinet. Wipe it with a soft cloth.
"WARNING — This equipment generates, uses, and can radiate radio frequency energy and if not installed and used in accordance with the instructions manual, may cause interference to radio communications. It has been tested and found to comply with the limits for a Class A computing device pursuant to Subpart J of Part 15 of FCC Rules, which are designed to provide reasonable protection against such interference when operated in a commercial environment. Operation of this equipment in a residential area is likely to cause interference in which case the user at his own expense will be required to take whatever measures may be required to correct the interference."

**WARNING:** TO PREVENT FIRE OR SHOCK HAZARD, DO NOT EXPOSE THIS PRODUCT TO RAIN OR MOISTURE.

</tr>
<tr>
<td>Class 7</td>
<td></td>
</tr>
<tr>
<td>Class 8</td>
<td></td>
</tr>
</tbody>
</table>

### Night Mode

- dial (0 through 9, *, or #)
- until the desired jack number (01 through 32) appears
- There is the phone number directory on page 7-1.

### Extension Name

<table>
<thead>
<tr>
<th>6 3</th>
<th>NEXT</th>
<th>NEXT</th>
<th>D</th>
<th>SELECT</th>
<th>MEMORY</th>
<th>END</th>
</tr>
</thead>
</table>

- until the desired letter appears
- dial (0 through 9, *, or #)
- until the desired jack number (01 through 32) appears

### Account Code Input Mode

<table>
<thead>
<tr>
<th>6 4</th>
<th>NEXT</th>
<th>NEXT</th>
<th>SELECT</th>
<th>MEMORY</th>
<th>END</th>
</tr>
</thead>
</table>

- Option / Forced
- until the desired jack number (01 through 32) appears

<table>
<thead>
<tr>
<th>Default all jack numbers</th>
<th>To make program change</th>
</tr>
</thead>
<tbody>
<tr>
<td>Jack number</td>
<td>01</td>
