Cautions

When using the KX-T7000 series, please note the following:
• If a problem occurs, unplug the extension line and connect to a known working phone. If the known working phone operates properly, have the defective phone repaired by a specified Panasonic Factory Servicenter. If the known working phone does not operate properly, check the Advanced Hybrid System and the internal extension wiring.
• Keep the unit away from heating appliances and electrical noise generating devices such as fluorescent lamps and motors.
• The unit should be kept free of dust, moisture and vibration, and should not be exposed to direct sunlight.
• Do not use benzine, thinner, or any abrasive powder to clean the cabinet. Wipe it with a soft cloth.
• Do not use any handset other than a Panasonic handset.

When you ship the product
Carefully pack and send it prepaid, adequately insured and preferably in the original carton. Attach a postage-paid letter, detailing the symptom, to the outside of the carton. DO NOT send the product to the Executive or Regional Sales offices. They are NOT equipped to make repairs.

Product service
Panasonic Servicenters for this product are listed in the servicenter directory. Consult with your authorized Panasonic dealer for detailed instructions.

WARNING:
TO PREVENT FIRE OR SHOCK HAZARD, DO NOT EXPOSE THIS PRODUCT TO RAIN OR ANY TYPE OF MOISTURE.

Accessory Order Information
• Replacement parts and accessories are available through your local authorized parts distributor.
• For ordering accessories, call toll free 1-800-332-5368.

Introduction

Who Should Use This Manual

This manual is designed for users of an Advanced Hybrid System, model number KX-TA624. It is to be used after the system is installed and System Programming is completed. The focus is Proprietary Telephones (PTs); KX-T7020/KX-T7030/KX-T7130/KX-T7135/KX-T7050/KX-T7055, Single Line Telephones (SLTs) and their features. The step-by-step procedures required to activate each feature are explained in detail. Illustrations of the KX-TA624 system and the required System Programming are provided separately in the Installation Manual.

How to Use This Manual

This manual consists of the following sections.

(Section 1) PT Overview
Provides configuration information on PTs. It also provides an illustration of each telephone, identifies their feature buttons, supplies background information on these feature buttons, and gives the initial settings.

(Section 2) Station Programming (Personal Programming)
Provides the steps required to assign features to PT flexible buttons and to the PT system.

(Section 3) Telephone Features
Provides background information on the PT and SLT features and lists the steps required to activate each feature.

(Section 4) DSS Console Features (KX-T7040)
Provides background information on the DSS Console features and lists the steps required to activate each feature.

(Section 5) Appendix
Provides PT Display Examples, a Feature Number List, Tone List, and other information.
Introduction

Features and Capabilities

KX-TA624 is a sophisticated and powerful system which fulfills your expectations of an office communications system. Some of the special features are listed below.

- **Automatic Callback Busy (Camp-On)** informs you when the selected outside (CO) line or the called party becomes idle.

- **Call Log, Incoming (— Option)** allows you to confirm the incoming outside call information on the display. You can also call back the caller by selecting one of the logged numbers. This feature is available only for the KX-T7030, KX-T7130 and KX-T7135.

- **Conference, Unattended** allows you to leave a conference and let the other two parties continue a conversation when you are in a conference with two outside parties. You can also return to the conference.

- **Data Line Security** prohibits various tones, such as a call waiting tone or hold recall tone, from sounding at an extension in the data communication mode. It also blocks overriding by other extensions, such as Executive Busy Override.

- **Direct Inward System Access (DISA)** allows external callers to call extensions in the system. If an optional card is installed, an outgoing message will greet the caller and give information about how to access an extension.

- **Doorphone and Door Opener (— Option)** enables a conversation between you and a visitor at the door. You can also unlock the door for a few seconds from your phone.

- **Executive Busy Override** allows you to enter into an existing conversation at an extension/outside (CO) line.

- **Message Waiting** allows you to leave a message notice for another extension. The message waiting lamp (MESSAGE indicator) gives visual indication that a message has been received.

- **Paralleled Telephone Connection** allows you to connect your PT in parallel with a single line telephone. Each telephone can have the same extension number so that you can use either telephone.

- **Voice Mail Integration (— Option)** has been upgraded to “APT Integration”. In addition to standard services (Custom Service, Automated Attendant Service, Voice Mail Service, Interview Service) for outside callers, proprietary telephone users can take advantage of:
  - **Live Call Screening** — you can monitor incoming calls like you would with a telephone answering machine. Take the call or let the caller leave a message.
  - **Two-Way Recording** — you can record conversations into your mailbox or someone else’s mailbox.
  - **Voice Mail Transfer** — you can easily transfer a caller to a mailbox.
Introduction

Terms Used in the Descriptions

Feature Numbers
A feature number is an access code for various features when programming or executing features using proprietary or single line telephones connected to the system. You can access available features by dialing the corresponding feature number (and additional parameter, if required).
The lists of feature numbers are shown in the Appendix (Section 5).

If you use a rotary telephone;
It is not possible to access features that have “×” or “#” in their feature numbers.

Tones
Various tone types, such as a Confirmation tone, Dial tone, Call Waiting tone, etc. are explained in the Appendix (Section 5).

Display
The PT display examples are given in each operation step, if required. The display information list is in the Appendix for your reference.

Programming References
The related and required programming titles are noted for your reference.
System Programming should be done by the extension which is connected to jack number 01. A KX-T7030, KX-T7130 and KX-T7135 can be used for this programming.
Station Programming is individual programming at your own proprietary telephone (PT).
You can customize the extension to your needs using any type of proprietary telephone.

Feature References
The related feature titles are noted for your reference.

Feature Buttons

PTs have the following types of Feature Buttons.
- Fixed Buttons
- Flexible CO Buttons
- Programmable Feature Buttons

Fixed Buttons

Fixed buttons have specific features permanently assigned to them. These default feature assignments cannot be changed. The following table lists the fixed buttons located on each PT model.

<table>
<thead>

❄: The button is not provided with an LED (Light Emitting Diode).
1.1 Configuration

Usage

**AUTO ANSWER/MUTE Button**
Used for answering an extension automatically, or turns the microphone off during a conversation.

**AUTO DIAL/STORE Button**
Used for System Speed Dialing or storing program changes.

**CONF (Conference) Button**
Used to establish a three-party conference.

**FLASH Button**
Sends an External Feature Access signal to the central office or host PBX to access their system features. If a PBX is not being used, this button can be used to disconnect the current call and start another call without hanging up.

**FWD/DND (Call Forwarding/Do Not Disturb) Button**
Used to program the Call Forwarding feature or set the Do Not Disturb (DND) feature.

**HOLD Button**
Used to place a call on hold.

**INTERCOM Button**
Used to make or receive intercom calls.

**MESSAGE Button**
Used to call back the message sender.

**MONITOR Button**
Used for a hands-free dialing operation.

**PAUSE Button**
Inserts a pause in speed dial numbers or in other numbers.

**REDIAL Button**
Used for Last Number or Automatic Redialing.

**SAVE Button**
Used for Saved Number Redialing.

**SP-PHONE (Speakerphone) Button**
Used for a hands-free speakerphone operation.

**TRANSFER Button**
Transfers a call to another extension or external destination.
1.1 Configuration

Flexible Buttons

Flexible Buttons do not have specific features permanently assigned to them. Features are assigned to Flexible Buttons through Station Programming. “Flexible Button Assignment” is addressed in Station Programming (Section 2). The four types of Flexible Buttons are as follows.

- **Flexible CO Buttons** (located on a PT only)
- **Flexible DSS Buttons** (located on a DSS Console only)
- **Programmable Feature (PF) Buttons** (located on a PT and DSS Console)
- **Flexible MESSAGE Buttons** (located on a PT except the KX-T7055)

The following table outlines the features that can be assigned to the Flexible Buttons.

<table>

“✔” indicates that the feature is available.

† Available when the KX-TA624 is connected to a Proprietary Telephone capable Panasonic Voice Processing System (one that supports APT Integration; KX-TV550/KX-TV880).
1.1 Configuration

Line Access Buttons

One of the following three types of CO buttons must be used to seize an outside (CO) line when making a call.

• Group-CO (G-CO) button
• Other-CO (O-CO) button
• Single-CO (S-CO) button

Conditions

• A flexible CO button can be assigned as a Line Access Button (G-CO, O-CO or S-CO) in Station Programming. Once a flexible CO button is assigned as a Line Access Button, it provides the line status using lighting patterns and color indication. Please refer to “LED Indication” in this section.
• You can set the G-CO and S-CO buttons on one telephone. Incoming and outgoing calls on the line are shown on the button in the following priority:
  S-CO > G-CO

Group-CO (G-CO) Button

To use outside (CO) lines efficiently, a group of outside (CO) lines (outside (CO) line group) can be assigned to a CO button. This button is referred to as Group-CO (G-CO) button. Any incoming calls from any outside (CO) line in the outside (CO) line group arrive at the G-CO button. To make an outside call, you can access an idle outside (CO) line in the group by simply pressing the assigned G-CO button.

Conditions

• The same line can be assigned as an S-CO button and G-CO button.
• The extension for making and/or receiving calls in outside (CO) line groups must be programmed.
• When your extension is assigned as the incoming call destination for an outside (CO) line, you cannot receive any incoming outside calls unless a G-CO, O-CO or S-CO button associated with the line is assigned.

Feature References

Feature Buttons — Flexible Buttons (Section 1.1 Configuration)
Outward Dialing, Line Access — Line Access, Outside (CO) Line Group
1.1 Configuration

**Other-CO (O-CO) Button**
Outside (CO) lines which are not assigned to S-CO or G-CO buttons can be assigned to a flexible CO button on a proprietary telephone. The assigned button serves as the O-CO button. An incoming call, on assigned outside (CO) lines, arrives at the O-CO button. To make an outside call, you simply press the designated O-CO button.

**Programming Reference**
- Station Programming (Section 2)
  Flexible Button Assignment — Other-CO (O-CO) Button

**Feature References**
- Feature Buttons — Flexible Buttons (Section 1.1 Configuration)
- Outward Dialing, Line Access — Line Access, Automatic

**Single-CO (S-CO) Button**
An S-CO button is an outside (CO) line access button. This allows you to access a specific line by pressing an S-CO button. An incoming call can be directed to an S-CO button.

**Conditions**
- Only one S-CO button can be assigned to an outside (CO) line.
- The same outside (CO) line can be assigned as an S-CO button and G-CO button.

**Programming Reference**
- Station Programming (Section 2)

1.1 Configuration

Initial Settings

Display Contrast Adjustment (KX-T7030, KX-T7130 and KX-T7135 only)

The CONTRAST selector is used to adjust the display contrast.

- **PT**
  - CONTRAST
    - HIGH
    - MID
    - LOW

  Adjust the CONTRAST lever to the desired setting (LOW/MID/HIGH).

When using the headset (KX-T7030, KX-T7130 and KX-T7135 only)

The Panasonic Advanced Hybrid System supports the use of a headset on a proprietary telephone (PT). When you use the headset (optional), you should switch the selection mode first.

- **PT**
  - HANDSET
  - HEADSET

  Adjust the HANDSET/HEADSET lever to “HEADSET”.
1.1 Configuration

Volume Control — Handset Receiver/Headset/Ringer/Speaker

Allows you to adjust the following volume settings as necessary.
— Handset Receiver volume
— Headset volume
— Ringer volume
— Speaker volume

To adjust the handset receiver volume

PT

HANDSET VOLUME

NORMAL • • • HIGH

Adjust the HANDSET VOLUME lever to the desired setting (three levels from NORMAL to HIGH).

To adjust the headset volume

PT

Be sure the headset is connected.

HANDSET VOLUME

NORMAL • • • HIGH

Adjust the HANDSET VOLUME lever to the desired setting (three levels from NORMAL to HIGH).

To adjust the ringer volume

PT

RINGER

HIGH • • • OFF
LOW

Adjust the RINGER Volume lever to the desired setting (OFF/LOW/HIGH).

To adjust the speaker volume

PT

VOLUME

MAX • • • MIN

Adjust the VOLUME Control lever to the desired setting (MAX to MIN).
1.1 Configuration

LED Indication

The Light Emitting Diode (LED) buttons indicate the line conditions with lighting patterns.

**Flashing light patterns**

— Item with an * is only available on a Single-CO button.

BLF on DSS Button

The Busy Lamp Field (BLF) indicator button is red when the corresponding extension is busy. This is available for flexible CO buttons assigned as DSS buttons on proprietary telephones and DSS buttons on DSS Consoles.
Section 2
Station Programming
(Personal Programming)

Contents
2.1 Station Programming Instructions ............................................. 2-2
2.2 Station Programming (Personal Programming) (A-Z) ... 2-6

<Note>
All illustrations used in these operating instructions are based on the KX-T7130/KX-T7135 model.
2.1 Station Programming Instructions

Station Programming allows you, the proprietary telephone (PT) user, to program certain features from your telephone individually. To program, you need to switch your telephone to the Station Programming mode. During the programming mode, your telephone is busy to outside callers. If you want to make a normal call operation, you must finish the programming mode.

Programming Mode Display

When you enter the Station Programming mode, the display shows the following message as the initial programming mode.

```
PITS-PGM NO? →
```

The display also gives you helpful or stored data information related to the programming steps. In this section, the display example in the programming steps are noted, if required. You can also refer to the “Display Examples” in the Appendix (Section 5).

To enter the Station Programming mode

```
PT

Be sure the telephone is idle and on-hook.

MEMORY

Set the MEMORY switch to “PROGRAM”.
```

To exit the Station Programming mode

```
PT

When the display shows the initial programming mode

MEMORY

Programmed is completed and the normal call operation resumes.

Set the MEMORY switch to “SET”.
```

When storing data

After pressing the STORE button to store data, you may hear one of the following tones.
— Confirmation tone (one beep): storage is completed.
— Confirmation tone (two beeps): the data is the same as the last entry.
— Alarm tone (three beeps): the entry is not valid.
2.1 Station Programming Instructions

To confirm the assigned data

— Be sure that you are in the Station Programming mode. Set the MEMORY switch to “PROGRAM”.

PT

- Enter the program access number.
  - 1: Preferred Line Assignment — Outgoing
  - 2: Preferred Line Assignment — Incoming
  - 3: Outside (CO) Line Ringing Selection
  - 4: Intercom Alert Assignment
  - 5: Call Waiting Tone Type Assignment
  - 6: Self-Extension Number Confirmation (KX-T7030, KX-T7130 and KX-T7135 only)
  - 7: Extension Password Set (Manager only)
  - 0: Date and Time Setting (Operator/Manager only)

• The display shows the programmed data.

<PT Display Example>
When you press “5”, the display shows:

C.W.Tone-1 — The Call Waiting tone is currently programmed to Tone 1.

— To exit the Station Programming mode, set the MEMORY switch to “SET”.
— If you wish to change the data, follow the programming procedure explained in this section.

* A program access number is required to program/confirm the data by Station Programming.
2.1 Station Programming Instructions

To confirm the assigned data on the Flexible button
— Be sure that you are in the Station Programming mode. Set the MEMORY switch to “PROGRAM”.

PT

Press HOLD.

- The display shows the initial programming mode.

• The display shows the current status.

— To exit the Station Programming mode, set the MEMORY switch to “SET”.
— If you wish to change the data, follow the programming procedure explained in this section.

To clear the data on the Flexible button
— Be sure that you are in the Station Programming mode. Set the MEMORY switch to “PROGRAM”.

PT

Press the desired Flexible button that you wish to clear.

Dial 2.

Press STORE.

- The STORE indicator lights.
- The display shows the initial programming mode.

— To exit the Station Programming mode, set the MEMORY switch to “SET”.
— The following outline contains the buttons and program access numbers used for Station Programming. Detailed operating instructions are explained in this section.

PT

Press the desired Flexible button you wish to assign as a One-Touch Dialing button and dial 2, or press the desired PF button.

Enter the desired number (extension number, phone number, etc.).

Press STORE.

• The STORE indicator lights.
• The display shows the initial programming mode.

<PT Display Example>

Not Stored

• Up to 24 digits can be stored.
• To erase an incorrect entry, press the TRANSFER (CLEAR) button. (The TRANSFER button becomes the CLEAR button during programming.)

— To exit the Station Programming mode, set the MEMORY switch to “SET”

Conditions

• The number can be an extension number, telephone number or feature number. Up to twenty-four digits can be stored in a One-Touch Dialing button.
• To store the telephone number of an external party, a line access code (9 or 81 through 86) must be stored as the first digit.
• You can store a number consisting of twenty-five digits or more by dividing and assigning it into two One-Touch Dialing buttons. In this case, the line access code should be stored in the first button.
• To store an account code, press * * and then enter the desired code. The account codes must be stored after the line access code.
• You can use 0 through 9, *, #, PAUSE and INTERCOM for storing.
  * #: change the dialing mode (Pulse to Tone)
  PAUSE: pause
  INTERCOM: secret
2.2 Station Programming (Personal Programming)

Other-CO (O-CO) Button (Assignment)

Allows you to assign a Flexible CO button as the Other-CO button.

— Be sure that you are in the Station Programming mode. Set the MEMORY switch to “PROGRAM”.

Press the desired Flexible CO button you wish to assign as the O-CO button.

Press STORE.

- The STORE indicator lights.
- The display shows the initial programming mode.

— To exit the Station Programming mode, set the MEMORY switch to “SET”.

Return to Message Waiting (MESSAGE) Button (Assignment)

Allows you to restore the message waiting feature to the Message Waiting (MESSAGE) button.

— Be sure that you are in the Station Programming mode. Set the MEMORY switch to “PROGRAM”.

Press the MESSAGE button you wish to restore.

Dial 3.

Press STORE.

- The STORE indicator lights.
- The display shows the initial programming mode.

— To exit the Station Programming mode, set the MEMORY switch to “SET”.

3.3 Operator/Manager Service Features
   (— for an Operator and Manager only) ......................... 3-127

<Note>
When setting “Idle Line Preference — Outgoing” or “Prime Line Preference”, you cannot access any PT features after going off-hook. To access PT features, press the INTERCOM button before or after going off-hook.

If you use a rotary telephone:
It is not possible to access features which have “*” or “#” in their feature numbers except for the ones can use “0” instead of “#”.

When the “Pickup Dialing (Hot Line)” feature is set on your single line telephone, the dialing sequence should be completed within a pre-determined time (Pickup Dial Waiting Time — default: 3 sec.) after lifting the handset.
To change the time, refer to System Programming in the Installation Manual.

Refer to Section 5 “Tone List” for tones.

All PT illustrations used in these operating instructions are based on the KX-T7130/KX-T7135 model.
3.1 Basic Operations

Making Calls

Intercom Calling

Allows you to make a call to another extension.

Any Telephone

Lift the handset or press SP-PHONE/MONITOR.

Enter an extension number (100 through 199) or press DSS.

• The INTERCOM indicator light turns green.

Outward Dialing

Allows you to make a call to an external party using one of the following line access methods.

1.) Line Access, Automatic
2.) Line Access, Individual
3.) Line Access, Outside (CO) Line Group

Any Telephone

Lift the handset or press SP-PHONE/MONITOR.

Enter a line access code (9 or 81 through 86) or press CO.

Outside line dial tone

Dial the phone number.

Conditions

• There are three types of Line Preference for outgoing calls (Idle Line/No Line/Prime Line). Each preference can be selected by Station Programming.
• Helpful hints for the Hands-free (speakerphone) operation are noted in the “Hands-free Operation” feature.
• When the unit is not in use, the Liquid Crystal Display will show:
  — the month, day and present time
  — the month, day, year and day of the week
  — your extension number and name

3.2 Telephone Features

Account Code Entry

An account code is used to identify outside calls for accounting and billing purposes. The account code is appended to the “Station Message Detail Recording (SMDR)” call record. For incoming outside calls, account codes are not required. For outgoing outside calls, account codes are often required. You can enter account codes in the following four modes.

Verify - All mode: You must always enter a pre-assigned account code.
Verify - Toll mode: You can enter a pre-assigned account code so that you can override toll restriction.
Option mode: An account code can be entered when a record of the account code is required. It can be any number.
Forced mode: You must always enter an account code. It can be any number.

3.2 Telephone Features

Conditions

- In the Verify-All mode, you must always enter a pre-assigned account code when making any of the following calls unless one has previously been stored in memory.
  - a) Call Forwarding — to an Outside (CO) Line
  - b) Manual Dialing (Selecting an outside (CO) line)
  - c) One-Touch Dialing (PT only)
  - d) Pickup Dialing (Hot Line) (SLT only)
  - e) Personal Speed Dialing
  - f) System Speed Dialing
- In the Verify-Toll mode, you can enter a pre-assigned account code only when you need to override toll restriction.
- In the Option mode, you can record a calling or called party’s account code in the SMDR during a conversation or within thirty seconds after the other party hangs up.
- You do not need to make an account code entry when receiving incoming calls.
- You can clear and re-enter a number by pressing “* *” or the FWD/DND button while entering an account code.
- An account code can be stored into Memory Dialing (“One-Touch Dialing”, “Pickup Dialing (Hot Line)”, “System/Personal Speed Dialing”, “Call Forwarding — to Outside (CO) Line”). To store an account code, “* *” must be entered before the account code. Example (Pickup Dialing):
  - [Off-hook] [742] [Line Access Code] [* *] [Account Code] [Phone Number] [#]
  - [On-hook]
- If an entered account code does not match the pre-assigned account code in the verify-all mode, when making an outside call, a reorder tone is heard.
- An account code has four digits (0 through 9). FLASH, PAUSE, etc. cannot be used.

3.2 Telephone Features

Answering, Direct Outside (CO) Line

Allows you to answer an outside call by pressing a CO button. You do not have to lift the handset or press the SP-PHONE/MONITOR button.

To answer an incoming outside call

Press the CO which is flashing red rapidly.

- The indicator light turns green and a hands-free conversation is established.

Conditions

- Specify which line is connected when multiple incoming outside calls arrive at the same time.
- There are three types of CO buttons: Group-CO (G-CO) button, Other-CO (O-CO) button and Single-CO (S-CO) button. These can be assigned to flexible CO buttons by Station Programming.
- This feature is not available for the KX-T7050 and KX-T7055.

Hands-free Operation
### Automatic Callback Busy (Camp-On)

Allows you to receive callback ringing when the dialed line becomes idle. When you answer the callback ringing:

**For an extension:** The called extension starts ringing without dialing.  
**For an outside (CO) line:** The line is seized.

### Setting

**Any Telephone**

*If you hear a busy tone*

Dial 6.  
Confirmation tone and reorder tone  
Hang up or press SP-PHONE/MONITOR.  
Wait for the Camp-On recall.

**<PT Display Example>**

```
Callback Ext xxx
```

*extension number*

### Answering an intercom recall

**Any Telephone**

*If you hear the telephone ringing*

Lift the handset or press SP-PHONE/MONITOR.

**<PT Display Example>**

```
xxx: Tony
```

*extension number*

- You hear a ringback tone and the called extension rings automatically.
3.2 Telephone Features

Answering an outside (CO) line recall

Any Telephone

If you hear the telephone ringing

Lift the handset or press SP-PHONE/MONITOR.

Dial tone

Enter the phone number.

phone no.

<PT Display Example>

outside (CO) line number

CO x Free

Canceling

Any Telephone

Lift the handset or press SP-PHONE/MONITOR.

Condition

• If you do not answer within four callback ring signals (within 10 seconds), this feature will be canceled.
**Background Music (BGM)**

You can listen to background music through the built-in speaker of the telephone. An external music source, such as a radio, can be connected. The music stops whenever a call comes in, a page comes in, or you go off-hook.

**Setting / Canceling**

<table>
<thead>
<tr>
<th>PT</th>
</tr>
</thead>
</table>

**When the handset is on the cradle and the SP-PHONE/MONITOR button is off**

Dial 1.

- The display shows either of the following for five seconds depending on whether BGM is on or off:

  <PT Display Example>

<table>
<thead>
<tr>
<th>BGM on</th>
</tr>
</thead>
<tbody>
<tr>
<td>or</td>
</tr>
<tr>
<td>BGM off</td>
</tr>
</tbody>
</table>
3.2  Telephone Features

Busy Station Signaling (BSS)

The busy extension that you called will hear the assigned Call Waiting tone and know that you are waiting.

**Any Telephone**

*If you make an intercom call and hear a busy tone*

Dial 1.

**Wait for an answer and talk.**

**Conditions**

- To answer from the calling extension, see “Call Waiting” in this manual.
- If you hear a reorder tone when you set this feature, this feature cannot be operated with the called party. This feature is only available if the called extension has set the “Call Waiting” feature.

**Feature Reference**

Call Waiting
Call Forwarding — SUMMARY

Automatically transfers incoming calls to another extension or to an external destination. The following types are available.

<table>
<thead>
<tr>
<th>Type</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Call Forwarding — All Calls</td>
<td>All incoming calls are forwarded to another extension.</td>
</tr>
<tr>
<td>Call Forwarding — Busy/No Answer</td>
<td>All incoming calls are forwarded to another extension when you do not answer or your extension is busy.</td>
</tr>
<tr>
<td>Call Forwarding — to Outside (CO) Line</td>
<td>All incoming calls are forwarded to an outside (CO) line.</td>
</tr>
<tr>
<td>Call Forwarding — Follow Me</td>
<td>Allows you to set the “Call Forwarding — All Calls” feature from another extension.</td>
</tr>
</tbody>
</table>

Note: You can also set Voice Mail as the forwarding destination. Refer to “Voice Mail Integration for KX-TVS50/KX-TVS75/KX-TVS80/KX-TVS100/KX-TVS110” in this manual.

Conditions

- To cancel the Call Forwarding features, refer to “Call Forwarding — CANCEL” in this manual.
- Call Forwarding can only be extended to one target telephone. For example, extension A is forwarded to extension B, and if extension B tries to set Call Forwarding to extension C, an alarm tone will be heard and the setting will be rejected. If extension B has already set Call Forwarding to extension C, and extension A tries to set Call Forwarding to extension B, the setting will be also rejected.

- If the destination extension has already set “Do Not Disturb”, you cannot forward any calls to the extension.
- Setting a new “Call Forwarding” feature (All Calls, Busy/No Answer, etc.) cancels any other “Call Forwarding” features or the “Do Not Disturb (DND)” feature.
- If your entry is valid, confirmation tone 1 (one beep) is sent. If your entry is the same as previously programmed data, confirmation tone 2 (two beeps) is sent. Refer to the “Tone List” in the Appendix (Section 5).
- You can call the original extension from the Call Forwarding destination extension. (For example, Boss Secretary)
- Camp-On recall and Hold recall are not forwarded.
3.2 Telephone Features

- A flexible CO button on the KX-T7050 and KX-T7055 (no FWD/DND button provided) can be assigned as the FWD/DND button.

- The lighting patterns of the FWD/DND button are as follows.
  - Off: Both features are not set.
  - Red: DND mode
  - Flashing red slowly: FWD mode

- You can check the assignment by pressing the FWD/DND button while on-hook.

Programming Reference

- Station Programming (Section 2)
  Flexible Button Assignment — FWD/DND Button

Feature References

Call Forwarding — All Calls

You can re-direct all of your calls to another extension.

Setting

PT and SLT

Lift the handset or press SP-PHONE/MONITOR.

For a PT: Press FWD/DND.
For an SLT: Dial 71.

Dial 1. Enter the destination extension number (100 through 199).
Dial #.

Confirmation tone and dial tone

Hang up or press SP-PHONE/MONITOR.

• You may press the flexible button assigned as the FWD/DND button instead.

<PT Display Example>

FWD(All) Ext.xxx

extension number where the call is to be forwarded

• The FWD/DND indicator light flashes red slowly.
• Single line telephone users can dial “0” instead of “#”.

• You can check the assignment by pressing the FWD/DND button while on-hook.
Call Forwarding — Busy/No Answer

You can forward your calls to another extension when your extension is busy or if you do not answer the call within a pre-determined time.

Setting

PT and SLT

Lift the handset or press SP-PHONE/MONITOR.

For a PT: Press FWD/DND.
For an SLT: Dial 71.

Dial 2. Enter the destination extension number (100 through 199).
Dial #.

Hang up or press SP-PHONE/MONITOR.

<PT Display Example>

FWD (B/NA) Ext.xxx

extension number where the call is to be forwarded

• You may press the flexible button assigned as the FWD/DND button instead.

• The FWD/DND indicator light flashes red slowly.
• Single line telephone users can dial “0” instead of “#”.

Programming Reference

• System Programming — Installation Manual [202] Call Forwarding Start Time
3.2 Telephone Features

Call Forwarding — to an Outside (CO) Line

You can forward calls to an external party. System programming is required to execute this feature.

Setting

PT and SLT

<table>
<thead>
<tr>
<th>Setting</th>
<th>PT and SLT</th>
</tr>
</thead>
<tbody>
<tr>
<td>Lift the handset or press SP-PHONE/MONITOR.</td>
<td>For a PT: Press FWD/DND. For an SLT: Dial 71.</td>
</tr>
<tr>
<td>Enter the line access code (9 or 81 through 86).</td>
<td>Enter the phone number.</td>
</tr>
<tr>
<td>Dial #.</td>
<td>Confirmation tone and dial tone</td>
</tr>
<tr>
<td>Hang up or press SP-PHONE/MONITOR.</td>
<td></td>
</tr>
</tbody>
</table>

<PT Display Example>

- When you dial line access code “9”:
  - FWD(All) All COs
- When you dial line access code “81 through 86”:
  - FWD(All) CO Gx

- The FWD/DND indicator light flashes red slowly.

Conditions

- If an incoming outside call is forwarded to an outside (CO) line, the “Outside-to-Outside (CO-to-CO) Line Call Duration Time” is applied to the call and the line will be disconnected when it expires (default: 10 minutes). An alarm tone is sent to both parties fifteen seconds before the assigned duration time limit.
- Up to thirty-two digits (including the line access code) can be programmed.
- If a CPC signal is sent to an outside (CO) line before the assigned duration time limit, a call between two external parties will be disconnected.
- This feature cannot be used for incoming outside calls from lines assigned as “Normal”, by System Programming.
- An account code must be entered by pressing “× ×” and entering the account code after the line access code in the account code verify-all and forced modes.

Programming References

  [607] Call Forwarding to an Outside (CO) Line
Call Forwarding — Follow Me

You can set the “Call Forwarding” feature from the destination extension. This is useful if you forget to set “Call Forwarding — All Calls” before you leave your desk.

Setting

At the destination extension

- Lift the handset or press SP-PHONE/MONITOR.
- For a PT: Press FWD/DND.
- For an SLT: Dial 71.
- Enter your extension number (100 through 199).
- Dial 5.
- Dial #.
- Confirmation tone and dial tone
- Hang up or press SP-PHONE/MONITOR.

• You may press the flexible button assigned as the FWD/DND button instead.

<PT Display Example>

FWD(From) Extxxx

• The FWD/DND indicator light flashes red slowly at your extension.
• Single line telephone users can dial “0” instead of “#”.

Condition

• This feature can be canceled at your extension or the destination extension.
3.2 Telephone Features

Call Forwarding — CANCEL

There are two canceling methods for “Call Forwarding”. The canceling depends on the Call Forwarding type that has been assigned.

Canceling Call Forwarding at your (original) extension

For a PT: Press FWD/DND.
For an SLT: Dial 71.
Dial #.
Lift the handset or press SP-PHONE/MONITOR.
Hang up or press SP-PHONE/MONITOR.

FWD/DND Cancel

PT and SLT

For a PT: Press FWD/DND.
For an SLT: Dial 71.
Dial 0.
Dial #.
Confirmation tone and dial tone
Hang up or press SP-PHONE/MONITOR.

<PT Display Example>

- The FWD/DND indicator light turns off.
- Single line telephone users can dial “0” instead of “#”.

Canceling Call Forwarding at the destination extension — “Follow Me (All Calls)” only

Lift the handset or press SP-PHONE/MONITOR.
For a PT: Press FWD/DND.
For an SLT: Dial 71.
Enter your extension number.
Dial #.
Confirmation tone and dial tone
Hang up or press SP-PHONE/MONITOR.

FWD/DND Cancel

PT and SLT

For a PT: Press FWD/DND.
For an SLT: Dial 71.
Dial 0.
Dial #.
Confirmation tone and dial tone
Hang up or press SP-PHONE/MONITOR.

<PT Display Example>

- The FWD/DND indicator light turns off at your extension.
- Single line telephone users can dial “0” instead of “#”.

• You may press the flexible button assigned as the FWD/DND button instead.
Call Hold

Allows you to place a call on hold.

To place a call on hold

During a conversation

**PT**

- Press HOLD.
- Confirmation tone and dial tone

- You may replace the handset.
- The corresponding CO or INTERCOM indicator light flashes green slowly.

**SLT**

- Flash the hookswitch.
- Confirmation tone and dial tone

- You may replace the handset.

Retrieving a call on hold

**PT**

At the holding extension

- Press the CO or INTERCOM which is flashing green slowly.

- The CO or INTERCOM indicator light turns steady green.

**SLT**

At the holding extension

- Flash the hookswitch.

- If the handset is replaced, just off-hook to retrieve the call.
3.2 Telephone Features

Conditions

- To retrieve a call on hold at another extension, refer to “Call Hold Retrieve” in this manual.
- If a held call is not retrieved within a pre-determined time (default: 30 seconds), “Hold Alarm/Hold Recall” occurs. If the hold recall time is set to “Disable”, it will not be recalled.
- If a held outside call is not answered within thirty minutes, it will be automatically disconnected.
- When going off-hook:
  — Before recalling: A dial tone will be heard while the call is on hold. You may dial another telephone number.
  — While recalling: Only the first call on hold will be released and enter the conversation mode.
- You cannot hold a doorphone call.
- With outside calls, you can put multiple calls on hold. However, with intercom calls, you can put only one call on hold. One way around this is to use the Call Park feature.
- If a call is placed on hold for more than the programmed time, ringing or an alarm tone will be heard (Hold Recall/Hold Alarm) and the following displays will be shown. While the alarm tone is being sent, the LCD will flash.
  Example:
  — When holding extension 111, Mr. Brown: “111: Brown” will be displayed.
  — When holding outside (CO) line, CO 1: “Call on CO 1” will be displayed.
- If “Hold-2” or “Hold-3” is assigned by System Programming, you must dial “20” after flashing the hookswitch.
- Only an outside or intercom call can be placed on hold at one time.
  If you want to hold both calls, use the Call Park feature.

<td><strong>HOLD</strong></td>
</tr>
<tr>
<td>Press HOLD.</td>
</tr>
<tr>
<td></td>
</tr>
<tr>
<td><strong>HOLD</strong></td>
</tr>
<tr>
<td>Press HOLD again.</td>
</tr>
</tbody>
</table>

- The CO or INTERCOM indicator light flashes green moderately.
- The current call is placed on exclusive hold.

- The CO or INTERCOM indicator light flashes green slowly.
- The current call is placed on hold.

Retrieving a call on exclusive hold

<table>
<thead>
<tr>
<th>PT</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>CO</strong></td>
</tr>
<tr>
<td>or</td>
</tr>
<tr>
<td><strong>INTERCOM</strong></td>
</tr>
<tr>
<td>Press the CO or INTERCOM which is on exclusive hold.</td>
</tr>
</tbody>
</table>

- The CO or INTERCOM indicator light turns steady green.
- The held call is released.

Conditions

- If a held call is not retrieved within a pre-determined time (default: 30 seconds), Hold Alarm/Hold Recall occurs.
- If an outside call is placed on hold and not retrieved within thirty minutes, it will be automatically disconnected.
- With outside calls, you can put multiple calls on exclusive hold. However, with intercom calls, you can put only one call on exclusive hold.

3.2 Telephone Features

Call Information/Log, Incoming

Provides you with the caller’s telephone number and name simultaneously on the outside (CO) line assigned to receive Caller ID service* calls. If the call is not answered, the call information is automatically recorded.

Display Operation (— for the KX-T7030, KX-T7130 and KX-T7135)

While receiving an incoming outside call, the display shows the caller’s telephone number or name.

- If you want to see other information, press the Caller ID Selection button or press #.
- The display changes as follows.

```
JOHN WHITE (caller’s name)
↓
0111111111 (caller’s telephone number)
↓
Call on CO 1 (CO number)
```

1. Lift the handset or press the SP-PHONE button.

2. Press the Caller ID Selection button to see other information.
   - The display changes as follows.

```
JOHN WHITE (caller’s name)
↓
0111111111 (caller’s telephone number)
↓
CO 1 0:01’52 (call duration)
```

Conditions

- The Caller ID Indication button indicator light may turn on when a call is received.
- Even if you answer a call, the call information can be recorded by pressing the Caller ID Indication button during the conversation.
- You can modify and call back the logged numbers. Refer to the “Call Log, Incoming” feature.
- A caller’s name will not be displayed unless it is sent from the Central Office.
- System Programming determines which is displayed first, the name or number.
- You can program by System Programming whether or not to print out a Caller ID number on the SMDR.
- You can also program by System Programming whether or not to print out a Caller ID number on the SMDR before the call is answered.
- If “OUT OF AREA” is displayed, the call may be from out of the calling area.
- If “LONG DISTANCE” is displayed, it may be a long distance call.
- If “PRIVATE” is displayed, the caller chose not to reveal their information.

Feature References

Call Log, Incoming
Call Log Lock, Incoming in the Personal Area
Call Log Lock, Incoming in the Common Area (3.3 Operator/Manager Service Features)

* The Caller ID service provides you with the caller’s information, such as the name and telephone number, on the outside (CO) line assigned to receive Caller ID service calls. Refer to the Installation Manual.
Call Log, Incoming

If a call is not answered, the incoming outside call information from the Caller ID service* is automatically logged in the system and the Caller ID Indication button indicator lights. There are two kinds of call log areas available in the system. One is the personal area, which stores call logs for each extension. The other is the common area, which stores call logs for the system. A call comes directly to a certain extension is stored in the extension’s personal area. A call for multiple extensions and a call via the DISA Intercept Routing feature is stored in the common area. To check the caller’s information stored in the personal area, you need to assign the Caller ID Indication — Personal button. For common area, the Caller ID Indication — Common button is necessary. Up to 20 calls can be logged in each personal area and up to 300 calls in the common area. When the call log in the personal area is full (20 calls are stored), you can select how the 21st call is treated. Either a new call can be disregarded or the new call can overwrite the oldest call that have been already confirmed (Default: Record the new call.). As for the common area, only the operator or manager can control this. (Refer to “The 301st Call Log, Incoming in the Common Area Treatment” in section 3.3.)

Overwriting the call log in the personal area

Disregarding the 21st call in the personal area
Confirming and calling back

Display Operation (— for the KX-T7030, KX-T7130 and KX-T7135)

When the Caller ID Indication — Personal button indicator is red, there are new calls logged in the personal area. When the Caller ID Indication — Common button indicator is red, there are new calls logged in the common area.

1. Confirm the number of logged calls.

2. Press the **Caller ID Indication** button to see the incoming call information.
   - The new information that you have not confirmed will be displayed first.

3. You can confirm another caller’s information by pressing the **Caller ID Indication** button again.
   After displaying all of the new information, the old information you have already confirmed will be displayed.
   - To modify the telephone number, use the HOLD button to erase and “0 to 9, * and PAUSE” to add numbers from the first digit.
   - To clear the displayed information, press the TRANSFER button.
   - To clear all logged call information in the personal area, go off-hook and press 70#. As for the common area, only the operator or manager can clear all logged call information. (Refer to “Call Log, Incoming in the Common Area — CLEAR ALL” in section 3.3.)
   The display shows as follows.

   ![CID Log Clear](image)

   - To return to the initial display, go off-hook and on-hook.
     The display also returns to the initial display automatically if no operation is done for twenty seconds.
   - Pressing the Caller ID Selection — Personal button or # provides you with further information about the party stored in the personal area. Pressing the Caller ID Selection — Common button or # provides you with further information about the party stored in the common area.
     The display changes as follows.
3.2 Telephone Features

<Example>
If the information is stored in log 003,

- caller’s name
- caller’s number
- date and time

• Only twelve digits (or characters) of caller’s number (or name) can be displayed even though sixteen digits (or characters) of information may have been received. To scroll the display, press → (the FWD/DND button).

4. Confirm the displayed number and lift the handset or press the SP-PHONE button.

5. Press the Caller ID Indication button.
• You may press a CO button first to select a specified outside (CO) line.
  The last displayed number is dialed.
3.2 Telephone Features

Confirming the number of logged calls

**PT**

--- **In the Personal Area**

Press Caller ID Selection — Personal button while on-hook.

*<PT Display Example>*

New:002  Old:003

• The above information will be displayed for 3 seconds.

--- **In the Common Area**

Press Caller ID Selection — Common button while on-hook.

*<PT Display Example>*

New:002  Old:003

• The above information will be displayed for 3 seconds.

**Conditions**

- **PT** When “Disregarding the 21st call in the personal area” has been set and 20 calls are logged or all of the old information has been overwritten in the personal area, the Caller ID Selection — Personal button indicator lights and informs you that no more calls can be logged.

- **PT** System Programming determines who can check the caller’s information stored in the common area.

- **PT** If nobody has assigned the Caller ID Indication — Common button, a call directed to multiple extensions and a call via the DISA Intercept Routing feature will be stored in an extension’s personal area that is connected to the lowest jack number and the extension’s Caller ID Indication — Personal button indicator will light.

The 301st Call Log, Incoming in the Common Area Treatment
  (3.3 Operator/Manager Service Features)

* The Caller ID service provides you with the caller’s information, such as the name and telephone number, on the outside (CO) line, assigned to receive Caller ID service calls. Refer to the Installation Manual.
Call Log Lock, Incoming in the Personal Area

Allows you to lock the display of your extension so that the “Call Log, Incoming” feature is not shown on the display when you press the Caller ID Indication — Personal button, if you do not want others to see the information stored in the personal area. This feature also works as Electronic Station Lockout.

Locking

Lift the handset or press SP-PHONE. Dial 77. Enter the 4-digit lock code (0000 through 9999) twice. Dial #. Confirmation tone and dial tone. Hang up or press SP-PHONE.

Unlocking

Lift the handset or press SP-PHONE. Dial 77. Enter the same lock code you used to lock the extension. Dial #. Confirmation tone and dial tone. Hang up or press SP-PHONE.

Conditions

• The operator or manager can cancel this feature for all other extensions (Electronic Station Lockout — CANCEL ALL).
• “Remote Station Lock Control” overrides this feature. If the operator or manager sets Remote Station Lock on the extension you have already locked, you cannot unlock it.

3.2 Telephone Features

Call Park

Allows you to place a held call into a system parking area so that you can perform other tasks. The parked call can be retrieved by any extension user. Up to ten calls can be parked.

**PT and SLT**

_During a conversation_

**For a PT:** Press HOLD.
**For an SLT:** Flash the hookswitch. _For a PT: Press HOLD._

Ensure the call is held. _For an SLT: Flash the hookswitch._

Confirmation tone

and dial tone

Dial 22. Enter a parking zone number (0 through 9).

Confirmation tone

and dial tone

Enter a parking zone number (0 through 9). _Confirmation tone and dial tone._

- **If you hear a busy tone,** it indicates the specified parking zone is unavailable.

  **<PT Display Example>**

  Call Prked at x

  Parking zone number

  - You do not need to redial the feature number to change the parking zone. Just enter the parking zone number while hearing the busy tone.

  **<PT Display Example>**

  Park at x N/A

  Parking zone number

Retrieving a parked call

**Any Telephone**

Lift the handset or press SP-PHONE/MONITOR. _Lift the handset or press SP-PHONE/MONITOR._

Dial 52. Enter a parking zone number (0 through 9) where the call is parked.

Confirmation tone and dial tone _Confirmation tone and dial tone._

- **If there is no held call,** you will hear a reorder tone.

  **<PT Display Example>**

  No Held Call
3.2 Telephone Features

**Conditions**

- If a parked call is not retrieved within a pre-determined time (default: 30 seconds), “Hold Alarm/Hold Recall” occurs.
- If a parked call is not retrieved within thirty minutes, it will be automatically disconnected.
- This feature is useful when you want to hold more than one intercom call with a PT, or more than one intercom or outside call with an SLT.

3.2 Telephone Features

Call Retrieving from a TAM (Telephone Answering Machine)

Allows you to answer an incoming call received by a TAM.
System Programming is required to use this feature.

<table>
<thead>
<tr>
<th>Any telephone</th>
</tr>
</thead>
<tbody>
<tr>
<td>While the TAM is answering a call</td>
</tr>
<tr>
<td><img src="image" alt="Lift the handset or press SP-PHONE/MONITOR." /></td>
</tr>
<tr>
<td><img src="image" alt="Enter the TAM number." /></td>
</tr>
<tr>
<td><img src="image" alt="Busy tone" /></td>
</tr>
<tr>
<td><img src="image" alt="Dial 4." /></td>
</tr>
<tr>
<td><img src="image" alt="Talk." /></td>
</tr>
</tbody>
</table>

**Conditions**

- When you try to pick up a call and hear a reorder tone, the TAM is not answering the call or the dialed extension is not the TAM extension.
- A TAM number is the 3-digit extension number of the TAM.

**Programming Reference**

- System Programming — Installation Manual
  - [611] TAM (Telephone Answering Machine) Extension
Call Splitting

Allows you to talk to two different parties alternately. If a call is received while you are already on the line, you can place the current call on hold and have a conversation with the other party.

**Having a conversation while another call is on (exclusive) hold**

**PT**

*Between one extension and one outside (CO) line*

- Press HOLD.
- Press CO or INTERCOM.

- Repeating these operations (steps 1 and 2) alternates between the callers.

*Between two outside (CO) lines*

- Press HOLD.
- Press CO.

- Repeating these operations (steps 1 and 2) alternates between the callers.

*Between two extensions*

- Press HOLD.

- Pressing the HOLD button alternates between the callers.

**SLT**

- Flash the hookswitch.

- The first held call is released.
- Flashing this switch alternates between the callers.

**Condition**

- This feature does not work during a doorphone call or paging.

**Programming Reference**

**Feature References**

Call Hold
Call Hold, Exclusive
3.2 Telephone Features

Call Transfer — to Extension

Allows you to transfer a received call to another extension. There are two ways.

**Screened Call Transfer**: The destination confirms the transfer before sending.

**Unscreened Call Transfer**: The line is released after transferring the call without confirmation.

**Screened Call Transfer**

<table>
<thead>
<tr>
<th>PT and SLT</th>
</tr>
</thead>
<tbody>
<tr>
<td>During a conversation</td>
</tr>
<tr>
<td><img src="image" alt="Diagram of call transfer process" /></td>
</tr>
</tbody>
</table>

- For a PT: Press TRANSFER.
- For an SLT: Flash the hookswitch.
- Confirmation tone and dial tone
- Enter the destination extension number (100 through 199).
- Ring back tone
- Wait for an answer.
- Announce. Hang up or press SP-PHONE.

- • The other party is placed on hold.
- • The call is transferred.

**Unscreened Call Transfer**

<table>
<thead>
<tr>
<th>PT and SLT</th>
</tr>
</thead>
<tbody>
<tr>
<td>During a conversation</td>
</tr>
<tr>
<td><img src="image" alt="Diagram of call transfer process" /></td>
</tr>
</tbody>
</table>

- For a PT: Press TRANSFER.
- For an SLT: Flash the hookswitch.
- Confirmation tone and dial tone
- Enter the destination extension number (100 through 199).
- Ring back tone
- Hang up or press SP-PHONE.

- • The other party is placed on hold.
- • Ringing starts at the destination extension.
Call Transfer using a DSS button

Allows you to perform a Screened or Unscreened Call Transfer by using a DSS button. There are two operations, depending on whether or not One-Touch Transfer* is set.

* One-Touch Transfer allows you to hold an outside call and transfer it to an extension by pressing one key. This feature provides automatic hold and transfer, without pressing the TRANSFER button. System Programming is required to use this feature.

“With Transfer” mode

**PT**

During a conversation

Press the flexible button assigned as the DSS button.

• The other party is placed on hold and the destination extension is called immediately.

“Without Transfer” mode

**PT**

During a conversation

Press TRANSFER.

Press the flexible button assigned as the DSS button.
3.2 Telephone Features

Conditions

• If the destination extension does not answer the call within a pre-determined time (default: 30 seconds), “Transfer Recall” occurs.
• If there is no answer within thirty minutes after “Transfer Recall” starts, the line will be disconnected.
• When the dialed extension is busy, you may access the extension by dialing “1” (Busy Station Signaling) or “2” (Executive Busy Override) and going on-hook.
• If you want to return to the held call, press the TRANSFER button or corresponding CO or INTERCOM button before the destination extension answers.

<Example>

RCL: Ext 101

• A flexible CO button can be assigned as a DSS button.
• To use “One-Touch Transfer”, System Programming is required.
• If you want to return to the held call, flash the hookswitch before the destination extension answers.
• If “Hold-3” is assigned in System Programming, you must dial “20” after flashing the hookswitch.

3.2 Telephone Features

Call Transfer — to an Outside (CO) Line

Allows you to transfer a received call to an external party.

![Diagram of Call Transfer](image)

**Conditions**

- If a CPC signal is sent to an outside (CO) line before the assigned time limit, a call between two external parties will be disconnected.
- System programming is required to execute this feature.
- If a call between two external parties is established, an alarm tone is sent to both parties fifteen seconds before the assigned time limit (default: 10 minutes). “Hold Alarm/Hold Recall” is sent to the transferring extension fifty seconds before time out.
- If you want to return to the held call, press the TRANSFER button or corresponding CO or INTERCOM button before the destination party answers.
- If you want to join the conversation after transferring the call, press the corresponding CO button. A conference call is established.
- To change the party where the call is transferred before hanging-up, press the CO button whose indicator is flashing slowly to retrieve the call, then repeat the Call Transfer procedure.

Single line telephone users can dial “0” instead of “#”.

3.2 Telephone Features

To talk to the new party by terminating the current call

**PT**

While hearing a Call Waiting tone

<table>
<thead>
<tr>
<th>CO</th>
<th>INTERCOM</th>
</tr>
</thead>
</table>

Press the flashing CO or INTERCOM.

Talk to the new caller.

- The current call is disconnected.

**SLT**

While hearing a Call Waiting tone

| Hang up. | Lift the handset. | Talk to the new caller. |

Talk to the new caller.

- The current call is disconnected.

To talk to the new party by holding the current call

**PT**

While hearing the Call Waiting tone and the CO or INTERCOM indicator is flashing rapidly

<table>
<thead>
<tr>
<th>HOLD</th>
<th>CO</th>
<th>INTERCOM</th>
</tr>
</thead>
</table>

Press HOLD.

Press the flashing CO or INTERCOM.

Talk to the new caller.

- The current call is placed on hold.

**SLT**

While hearing a Call Waiting tone

| Flash the hookswitch. | Dial tone | Hang up. | Lift the handset. | Talk to the new caller. |

Talk to the new caller.

- The current call is placed on hold.

— If both the current call and new call are extension calls, you do not have to press the INTERCOM button.
3.2 Telephone Features

Conditions

- The default setting for Call Waiting is “disabled”.
- When Call Waiting is enabled, a Call Waiting tone is sent to the user under the following conditions.
  1) When an outside call is received.
  2) When another extension executes the “Busy Station Signaling (BSS)” feature, or
  3) When a doorphone call is received.
- Setting “Data Line Security” temporarily cancels this feature.
- You can change the desired Call Waiting tone for an incoming outside call and intercom call (Tone 1 or Tone 2). As for a doorphone call, Tone 1 is used as a Call Waiting tone (not changeable).
- If a Call Waiting tone is heard and the CO or INTERCOM indicator does not flash, this tone indicates Call Waiting from your telephone company. In this case, see “Call Waiting from a Central Office” or “External Feature Access”.
- If “Hold-2” or “Hold-3” is assigned in System Programming, you must dial “20” after flashing the hookswitch.
- You cannot transfer the new call while holding the current call. If you want to do so, first park the original call using the Call Park feature; then hang up; then take the new call.

3.2 Telephone Features

Caller ID Call Waiting

During a conversation, a Call Waiting tone offered by your Central Office informs you that there is a call waiting. If the Caller ID service provides you with a caller’s information, such as the name and telephone number, the new caller’s information will be displayed (flashing) on your extension (KX-T7030, KX-T7130 and KX-T7135 only) during the assigned time. You can answer the second call by disconnecting the first call or placing it on hold.

To talk to the new party by holding the current call

<table>
<thead>
<tr>
<th>PT</th>
<th>While talking to an external party</th>
</tr>
</thead>
<tbody>
<tr>
<td><img src="image" alt="Call Waiting tone" /></td>
<td><img src="image" alt="FLASH" /> Press FLASH.</td>
</tr>
<tr>
<td><img src="image" alt="FLASH" /> Press FLASH.</td>
<td>• You can return to the original caller.</td>
</tr>
<tr>
<td>• You can talk to the new caller.</td>
<td>• The new caller’s information is displayed (flashing).</td>
</tr>
</tbody>
</table>

<PT Display Example>

JOHN WHITE

To talk to the new party by terminating the current call

<table>
<thead>
<tr>
<th>PT</th>
<th>While talking to an external party</th>
</tr>
</thead>
<tbody>
<tr>
<td><img src="image" alt="Call Waiting tone" /></td>
<td><img src="image" alt="Hang up." /> Lift the handset.</td>
</tr>
<tr>
<td>• The new caller’s information is displayed (flashing).</td>
<td></td>
</tr>
</tbody>
</table>

<PT Display Example>

JOHN WHITE
Conditions

- You can program the new caller information display timer. If you do not press the FLASH button while the information is displayed (flashing), the display stops flashing. In this situation, the caller information is automatically recorded in your personal area and your Caller ID Indication — Personal button indicator lights if the call has been directed to your extension. A call directed to multiple extensions is automatically recorded in the common area and all corresponding Caller ID Indication — Common button indicators light. However in this case, if nobody has assigned the Caller ID Indication — Common button, the call information is recorded in an extension’s personal area that is connected to the lowest jack number and the extension’s Caller ID Indication — Personal button indicator lights.

- This feature is available during a conversation with an external party except for the following cases: (1) during a conference, (2) during holding a call, (3) during transferring a call, (4) during the Two-Way Recording, (5) during the Live Call Screening, (6) during an outside-to-outside (CO-to-CO) line call and (7) during DISA outgoing message.

- The TRANSFER button, HOLD button and Conference (CONF) button do not work while the new caller information is flashing.

- A contract with your Central Office may be required for the Call Waiting service. Consult the Central Office for details.

3.2 Telephone Features

Conference

During a two-party conversation, you can add a third party to make a three-party conference. The members of a conference may be three extensions, one extension and two outside (CO) lines, or two extensions and one outside (CO) line.

To establish a conference

**PT**

*During a two-party conversation*

1. Enter the phone number of the third party.
2. Talk to the third party.
3. Press CONF.
4. Confirmation tone (optional)

• The CONF indicator light turns steady red.
• The corresponding CO or INTERCOM indicator light turns green.

• You must dial the line access code (9 or 81 through 86) as the first digit when calling an external party.

• The current party is placed on hold.
• The CONF indicator light flashes red slowly.

**SLT**

*During a two-party conversation*

1. Flash the hookswitch.
2. Enter the phone number of the third party.
3. Talk to the third party.
4. Flash the hookswitch.
5. Dial 3.
6. Confirmation tone (optional)

• You must dial the line access code (9 or 81 through 86) as the first digit when calling an external party.

• The other party is placed on hold.
3.2 Telephone Features

To leave the conference

Any telephone

Hang up or press SP-PHONE.

- The other two parties may continue their conversation.
- If the other two parties are both outside (CO) lines, they will be disconnected.

To talk to the original party while holding the third party

SLT

Flash the hookswitch.  Confirmation tone (optional)  Talk to the original party.

To terminate one party and talk to the other

PT

Press the CO or INTERCOM of the party to remain connected.  Confirmation tone (optional)  Talk.

- A conversation with the desired party is established and the other party is disconnected.
3.2 Telephone Features

Conditions

• A conference call can also be established by “Executive Busy Override”.
• When a two-party call is changed to a three-party call or vice versa, a confirmation tone is sent to all parties. The tone can be disabled.
• Pressing a CO button which is not in the conference allows you to exit from the conference, leaving the other two parties connected unless they are both outside (CO) lines. If the other parties are both outside (CO) lines, they will be disconnected.
• If the third party does not answer, press the CO button or INTERCOM button to return to the second party.
• You can return to the original party before the third party answers by flashing the hookswitch.
• If “Hold-2” or “Hold-3” is assigned in System Programming, you must dial “20” after flashing the hookswitch.

Feature References

Conference, Unattended
Executive Busy Override — Extension
Executive Busy Override — Outside (CO) Line
Conference, Unattended

When you are in a conference with two outside parties, you can leave the conference call allowing the other two parties to continue their conversation.

To establish an Unattended Conference

During a conversation with two outside parties

PT

Press CONF to leave the conference.

- An outside-to-outside (CO-to-CO) line call between the other two parties is established.

To return to the conference

PT

Press the CO flashing green moderately.

Conditions

- System Programming is required to execute this feature.
- When an Unattended Conference is established, an alarm tone is sent to both outside parties fifteen seconds before the assigned time limit (default: 10 minutes). “Hold Recall” is activated at the extension that leaves the conference fifty seconds before the time out. The call is disconnected when the time out expires unless the extension returns to the conference.
- For example, if you are on-hook and hear “Hold Recall” during the Unattended Conference mode, the display will show “CO 2 & CO 3” for fifty seconds before the time out.

Hold Alarm/Hold Recall (→ See the Installation Manual.)
3.2 Telephone Features

Direct Inward System Access (DISA)

Allows an outside caller to access specific extensions, etc., as if the caller is an extension in the system. A DISA outgoing message gives outside callers assistance, such as listing the extension numbers or DISA built-in auto attendant (AA) numbers in the system. If the optional OGM/FAX Detection card is not installed, callers will only hear a beep instead of a message. This saves you having an operator. A pre-assigned DISA security code may be necessary, depending on the mode, to access the features directly.

None Security mode: Any caller can make outside or intercom calls without entering a DISA security code.

Trunk Security mode (default): You need to enter a DISA security code when making outside calls.

All Security mode: You need to enter a DISA security code when making any call. You also have the option of calling an extension or ring group using a one digit number (DISA built-in auto attendant number) via DISA calls.

Calling an extension by following the outgoing message

</tr>
<tr>
<td>Ringback tone and DISA outgoing message</td>
<td>One short beep</td>
<td>Enter a line access code (9 or 81 through 86).</td>
<td>Dial tone from the Central Office</td>
</tr>
</tbody>
</table>

Enter the DISA phone number. Ringback tone and DISA outgoing message. Enter the line access code (9 or 81 through 86). Enter the phone number of the external party.
3.2 Telephone Features

Calling an external party without an outgoing message

**Any Telephone**

*In None Security Mode*

- Enter the DISA phone number.
- Ringback tone and one short beep
- Enter a line access code (9 or 81 through 86).
- Dial tone from the Central Office
- Enter the phone number of the external party.

*In Trunk Security Mode*

- Enter the DISA phone number.
- Ringback tone and one short beep
- Dial \( \times \)
- Enter the pre-assigned DISA security code.
- One short beep
- Enter a line access code (9 or 81 through 86).
- Dial tone from the Central Office
- Enter the phone number of the external party.

*In All Security Mode*

- Enter the DISA phone number.
- Ringback tone and one short beep
- Dial \( \times \)
- Enter the pre-assigned DISA security code.
- One short beep
- Enter a line access code (9 or 81 through 86).
- Dial tone from the Central Office
- Enter the phone number of the external party.

**Conditions**

- An optional OGM/FAX Detection card is necessary for outgoing messages.
- When an incoming call is not answered before the “DISA Ringing Time before Intercept” (default: 20 seconds) expires, “Intercept Routing” starts or the call will be disconnected.
- “Intercept Routing” starts after the “DISA Waiting Time after OGM” expires (default: 5 seconds), if nothing has been dialed. The call is disconnected when the “DISA Ringing Time after Intercept” (default: 20 seconds) expires, or when there is no destination for “Intercept Routing”.
- This system supports up to ten programmable DISA built-in auto attendant (AA) numbers. Each number must be one digit. You can access an extension or a ring group by entering a 1-digit AA number.
- You can store up to four programmable DISA security codes. The number of digits of the codes can be programmed (default: 4 digits). Each code must be different.
- When the “Outside-to Outside (CO-to-CO) Line Duration Time Limit” expires, both lines are disconnected unless the caller re-tries or extends the time (default: 10 min.), if available. A warning tone is sent to both parties fifteen seconds before the time limit.
- If you dial the wrong DISA security code, three beeps will be heard. The call will be disconnected after three failed attempts. If you enter the security code a second and third time, you do not need to dial \( \times \).

</tr>
<tr>
<td>To set: Dial 4.</td>
<td>To cancel: Dial 0.</td>
<td>Hang up or press SP-PHONE/MONITOR.</td>
</tr>
<tr>
<td>Dial #.</td>
<td>Confirmation tone and dial tone</td>
<td></td>
</tr>
</tbody>
</table>

- When setting, the FWD/DND indicator lights.  
  **<PT Display Example>**  
  Do Not Disturb

- When canceling, the FWD/DND indicator light turns off.  
  **<PT Display Example>**  
  FWD/DND Cancel

- Single line telephone users can dial “0” instead of “#”.

**Conditions**

- A calling extension that has “Do Not Disturb (DND) Override” enabled can override your extension when the “Do Not Disturb (DND)” mode is set.
- DND also inhibits for paging.
- If the Call Forwarding feature has already been set, setting the DND feature will cancel Call Forwarding.
- The Timed Reminder alarm and Hold Recall features override this feature.
- A flexible CO button on the KX-T7050 and KX-T7055 (no FWD/DND button provided) can be assigned as the FWD/DND button.
- If the “Do Not Disturb (DND)” mode is set, you can still answer a call by pressing the CO button.
- The lighting patterns of the FWD/DND button are as follows.  
  Off: Both features are not set.  
  Red: DND mode  
  Flashing red slowly: FWD mode

| Call Forwarding | Do Not Disturb (DND) Override |
3.2 Telephone Features

Do Not Disturb (DND) Override

Allows you to call an extension even though the “Do Not Disturb (DND)” feature is set. System Programming is required to use this feature.

<table>
<thead>
<tr>
<th>Any Telephone</th>
</tr>
</thead>
<tbody>
<tr>
<td>If you make an intercom call and hear a Do Not Disturb (DND) tone</td>
</tr>
</tbody>
</table>

- DND tone
- Dial 2.
- Wait for an answer.

<PT Display Example>

101: DND

Conditions

- If you hear a reorder tone after dialing 2, the “Do Not Disturb (DND) Override” feature is not set at your extension.
- If you hear a busy tone after dialing 2, the line is busy. You can use the Automatic Callback Busy (Camp-On) feature.

Programming Reference

- System Programming — Installation Manual

Feature References

Automatic Callback Busy (Camp-On)
Do Not Disturb (DND)

### Door Opener

Allows you to unlock the door from your telephone.
Up to four door openers can be connected to the system.

#### To unlock the door from an assigned extension

**Any Telephone**

1. **Lift the handset or press SP-PHONE/MONITOR.**
2. **Dial 55.**
3. **Enter a door opener number (1 through 4).**
4. **Confirmation tone.**
5. **Hang up or press SP-PHONE/MONITOR.**

- The door is left unlocked for 5 seconds (default).

  **<PT Display Example>**

  ![Door Opener Display](image)  

  door opener number

#### To unlock the door while talking to the doorphone

**PT and SLT**

- **For a PT:** Dial 5.
- **For an SLT:** Flash the hookswitch and dial 5.
- **Hang up or press SP-PHONE/MONITOR.**

- The door is left unlocked for 5 seconds (default).

  **<PT Display Example>**

  ![Door Opener Display](image)  

  door opener number
3.2 **Telephone Features**

**Conditions**

- An optional Doorphone/Door Opener card is necessary for this feature.
- If you dial 5 again while the door is open, the door will stay open for another five seconds (default).
- You must program the extensions which can open the doors for the day, night and lunch modes.
- You can modify the door opener timer through System Programming.
- The door opener will open the door, even if a doorphone is not installed.

**Programming References**

- System Programming — Installation Manual
  - [703]–[705] Door Opener Assignment — Day/Night/Lunch
  - [709] Door Opener Timer
Doorphone Call

Allows you to have a conversation with a visitor at your doorphone.
Up to four doorphones can be connected to the system.

Calling an extension from a doorphone

**Any Doorphone**

Press the Doorphone button for one second.  
Wait for an answer and talk.

Answering a doorphone call

**Any Telephone**

When you hear the doorphone ring tone at the extension

Lift the handset or press SP-PHONE.

Calling a doorphone

**Any Telephone**

Lift the handset or press SP-PHONE.  
Dial 31.  
Enter a doorphone number (1 through 4).  
Confirmation tone  
Talk.

<PT Display Example>

Door Phone x  
doorphone number
3.2 Telephone Features

Conditions

- An optional Doorphone/Door Opener card and doorphones are necessary for this feature.
- If you do not answer an incoming doorphone call within fifteen or thirty seconds, the call will be canceled.
- You must program the extensions which can receive calls from each doorphone for the day, night and lunch modes.
- Any extension user can call a doorphone.
- Doorphone 1 and Doorphone 2 cannot receive calls simultaneously. When one is in use, an extension user cannot have a conversation with the other. This is the same for Doorphone 3 and Doorphone 4.
- Doorphones can also be used for the Room Monitor feature.

Programming References

- System Programming — Installation Manual

Feature References

Call Waiting
Room Monitor
**Electronic Station Lockout**

Allows you to lock your extension so that other users cannot make outside calls from your extension. This feature also works as Call Log Lock, Incoming in the Personal Area.

### Locking

**Any Telephone**

- Lift the handset or press SP-PHONE/MONITOR.
- Dial 77.
- Enter a 4-digit lock code (0000 through 9999) twice.
- Dial #.
- Confirmation tone and dial tone
- Hang up or press SP-PHONE/MONITOR.

**Display Example**

Locked : xxxx

- Single line telephone users can dial “0” instead of “#”.

### Unlocking

**Any Telephone**

- Lift the handset or press SP-PHONE/MONITOR.
- Dial 77.
- Enter the same lock code you used to lock the extension.
- Dial #.
- Confirmation tone and dial tone
- Hang up or press SP-PHONE/MONITOR.

**Display Example**

Unlocked

- Single line telephone users can dial “0” instead of “#”.
3.2 Telephone Features

Conditions

• If another user tries to access an outside (CO) line and presses a dial key from a locked extension, the user will hear a reorder tone and for PT users “Restricted” is shown on the display. However, calls can be made at a locked extension depending on system programming. System programming determines which COS number applies to calls at the locked extension.
• An extension assigned as an operator or manager can cancel this feature for all extensions (Electronic Station Lockout — CANCEL ALL).
• “Remote Station Lock Control” overrides this feature. If the operator or manager sets Remote Station Lock on the extension you have already locked, you cannot unlock it.
• The lock code must be four digits and must not have the “#” and “*” buttons.
• You can make intercom calls and receive intercom or outside calls at a locked extension.

Programming Reference

Feature References

Call Log Lock, Incoming in the Personal Area
Electronic Station Lockout — CANCEL ALL (3.3 Operator/Manager Service Features)
Remote Station Lock Control (3.3 Operator/Manager Service Features)
Toll Restriction — Station Lock Boundary Class
Emergency Call

Allows you to dial a pre-assigned emergency number after seizing an outside (CO) line. Up to five emergency dial numbers can be stored.

Dialing

Any Telephone

Lift the handset or press SP-PHONE/MONITOR.

Dial the line access code (9 or 81 through 86).

Dial tone

Dial the emergency number.

• You may press a CO button instead.

Conditions

• An emergency call is allowed even in the following cases,
  — Account Code – Verify (All) mode
  — Any toll restriction COS number
  — Electronic Station Lockout
• If your system is connected to a host PBX, you must dial the host PBX line access code after the line access code.

3.2 Telephone Features

Executive Busy Override — Extension

Allows you to connect to an existing intercom (extension) call. System Programming is required to use this feature.

**Any Telephone**

*If you make an intercom call and while hearing a busy tone*

Dial 2.  
Confirmation tone (optional)

A three-party conference is now established.

---

**To leave the conference**

**Any Telephone**

Hang up or press SP-PHONE.

The other two parties continue their conversation.

---

**To terminate one party and talk to the other**

**PT**

Press the CO or INTERCOM of the party to remain connected.

Confirmation tone (optional)

* If all three parties are extensions, this operation is not available.

---

**Conditions**

- This feature does not work when “Data Line Security” or “Executive Busy Override Deny” is set at either or both of the other parties.
- When a two-party call is changed to a three-party call or vice versa, a confirmation tone is sent to all parties. The tone can be disabled.

**Programming References**

Executive Busy Override Deny
3.2 Telephone Features

Executive Busy Override — Outside (CO) Line

Allows you to connect to an existing outside call or add a third party to your existing conversation. System Programming is required to use this feature.

**Conditions**

- This feature does not work when “Data Line Security” or “Executive Busy Override Deny” is set at the extension engaged in the existing outside call.
- When a two-party call is changed to a three-party call or vice versa, a confirmation tone is sent to all parties. The tone can be disabled.

External Feature Access
Hands-free Answerback
(— for KX-T7020/KX-T7030/KX-T7130/KX-T7135 only)

Allows you to answer an intercom call without lifting the handset.

Setting

<table>
<thead>
<tr>
<th>PT</th>
</tr>
</thead>
</table>

When the SP-PHONE and the AUTO ANSWER/MUTE indicators are off

AUTO ANSWER
MUTE

Press AUTO ANSWER/MUTE.

• The AUTO ANSWER/MUTE indicator turns on.

Canceling

<table>
<thead>
<tr>
<th>PT</th>
</tr>
</thead>
</table>

When the AUTO ANSWER/MUTE indicator is on

AUTO ANSWER
MUTE

Press AUTO ANSWER/MUTE.

• The AUTO ANSWER/MUTE indicator light turns off.

Conditions

- This feature does not work for incoming outside calls or doorphone calls.
- When an outside call is transferred to your extension, this feature is overridden and a ring tone is heard.
3.2 Telephone Features

Hands-free Operation
(— for KX-T7020/KX-T7030/KX-T7130/KX-T7135 only)

Allows you to dial and to talk to the other party without lifting the handset.

### Conditions
- Helpful hints for the Hands-free operation:
  - Use this unit in a quiet room for best performance.
  - If you and the other party talk at the same time, parts of your conversation will be lost. To avoid this, talk alternately.
- The hands-free mode is canceled if you do not start dialing within ten seconds.
- The KX-T7050 and KX-T7055 have MONITOR buttons instead of a SP-PHONE button. It can be used for hands-free dialing, etc., but it cannot be used for a hands-free conversation.
- You can enable the hands-free mode by pressing a CO or INTERCOM button.
3.2 Telephone Features

Intercom Calling

Allows you to make a call to another extension.

Using the handset

**Any Telephone**

Lift the handset. Enter the extension number (100 through 199). Talk. Hang up.

Using the Speakerphone

**PT**

Press SP-PHONE or INTERCOM. Enter the extension number (100 through 199). Talk. Press SP-PHONE.

Using a DSS (Direct Station Selection) button

**PT**

Lift the handset or press SP-PHONE/MONITOR. Press the flexible button assigned as a DSS button. Talk. Hang up or press SP-PHONE.

Conditions

- After dialing an extension number, you will hear one of the following tones.
  - **Ringback tone**: Indicates the destination extension is being called.
  - **Confirmation tone**: Indicates you can perform voice calling (e.g., Paging).
  - **Busy tone**: Indicates the destination extension is busy.
  - **Do Not Disturb (DND) tone**: Indicates the destination extension has set the “Do Not Disturb (DND)” feature.

- An extension number and a name, if programmed, are shown on a display PT during an intercom call.
- You can assign a DSS button on a flexible button through Station Programming. The stored number can be displayed by pressing the desired DSS button while on-hook.

3.2 Telephone Features

**Live Call Screening (LCS)** †

While a caller is leaving a message in your mailbox, you can monitor the message. If desired, you can answer the call while monitoring. There are two methods available. In both modes, when you are having a conversation, you will hear a Call Waiting tone if Call Waiting has been enabled.

**Hands-free mode:** You can monitor a message automatically through the telephone speaker at the same time.

**Private mode:** You will hear an alert tone while the caller is leaving a message.

**Preparation**
- Assign the Live Call Screening (LCS) button (Station Programming)
- Select the mode, either Hands-free or Private (Station Programming)
- Set the Password
- Set the LCS feature

**Flowchart of the Live Call Screening (LCS) Feature**

1. **To set LCS on**
   - Press the LCS button.
   - Enter the password.
   - **Hands-free Mode**
     - During a conversation
       - (Call Waiting Tone)
       - To monitor: (No operation)
       - To stop monitoring: Press the FLASH or the LCS Cancel button.
   - **Private Mode**
     - During a conversation
       - (Alert Tone)
       - To monitor: Press the SP-PHONE/MONITOR or LCS button.**
       - To stop the alert tone: Press the FLASH or LCS Cancel button.
2. **To answer the call**
   - Lift the handset.
   - To stop monitoring: Press the FLASH or the LCS Cancel button.
   - **To stop monitoring**
     - Hang up.
     - **To stop monitoring**
      - Hang up.

* **:** To hold the current call temporarily, press the HOLD button. To return to the held call, press the CO button whose indicator light flashes green slowly.
** **: If you lift the handset to monitor a message recording, the caller will be able to hear you. Even in this case, the message will still be recorded.
- The shaded areas are for the Hands-free operation.

† Available when the KX-TA624 is connected to a Proprietary Telephone capable Panasonic Voice Processing System (one that supports APT Integration; KX-TVS50/KX-TVS80).
### Setting the password

<table>
<thead>
<tr>
<th>PT</th>
<th>7 7 ×</th>
<th>password</th>
<th>#</th>
</tr>
</thead>
<tbody>
<tr>
<td>Lift the handset or press SP-PHONE/MONITOR.</td>
<td>Enter the password (000 through 999) twice.</td>
<td>Dial #.</td>
<td>Confirmation tone and dial tone</td>
</tr>
</tbody>
</table>

Hang up or press SP-PHONE/MONITOR.

**<PT Display Example>**

Password: xxx

• To change your password, you must follow the instructions below for “Canceling the password”.

### Canceling the password

<table>
<thead>
<tr>
<th>PT</th>
<th>7 7 ×</th>

<td>Confirmation tone and dial tone</td>
</tr>
</tbody>
</table>

Hang up or press SP-PHONE/MONITOR.

**<PT Display Example>**

Password Cancel

### Setting Live Call Screening

**<PT Display Example>**

LCS

• The Live Call Screening indicator light turns red.
3.2 Telephone Features

Canceling Live Call Screening

When the telephone is idle and on-hook:

Press the Flexible button assigned as the Live Call Screening button.

<PT Display Example>

LCS Cancel

• The Live Call Screening indicator light turns off.

In the Hands-free mode:

When callers are connected to your voice mailbox, the message recording is monitored automatically through your extension speaker. While monitoring in the Hands-free mode, the Live Call Screening indicator light flashes slowly.

Having a conversation with a party

Lift the handset or press SP-PHONE, or press the Live Call Screening button.

• The Live Call Screening indicator light turns red from flashing slowly.
• In the Keep Recording mode, the Two-Way Record indicator turns on. Pressing the Two-Way Record button cancels the recording and the light turns off.

Stopping the monitoring

Press FLASH or the Live Call Screening Cancel button.

• The Live Call Screening indicator light turns red from flashing slowly.
3.2 Telephone Features

In the Private mode:

Stopping the alert tone

Press FLASH or the Live Call Screening Cancel button.

Monitoring the message recording

Press SP-PHONE/MONITOR or the Live Call Screening button.

- To stop monitoring, hang up, press FLASH or the Live Call Screening Cancel button.
- If you lift the handset to monitor the message recording, the caller will be able to hear you. Even in this case, the message will still be recorded.

Talking to the party

Lift the handset or press SP-PHONE, or the flashing Live Call Screening button.
3.2 Telephone Features

**During a conversation with another party:**

When the extension user is having a conversation, the Call Waiting tone will be heard if Call Waiting has been enabled. The Live Call Screening indicator light flashes.

— **If you want to terminate the current call**

**Monitoring**

![Diagram](image)

- Lift the handset or press SP-PHONE, or the flashing Live Call Screening button.
- Hang up or press SP-PHONE/MONITOR.
- Press SP-PHONE/MONITOR or the Live Call Screening button.

• An alert tone is sent.

• Monitoring begins.

— **If you want to hold the current call**

**Monitoring**

![Diagram](image)

- Press SP-PHONE/MONITOR or the Live Call Screening button.
- Press HOLD.
- Hang up or press SP-PHONE/MONITOR.
- Press SP-PHONE/MONITOR or the Live Call Screening button.

• An alert tone is sent.

• Monitoring begins.

— **Having a conversation with a party**

![Diagram](image)

- Lift the handset or press SP-PHONE, or the flashing Live Call Screening button.
3.2 Telephone Features

Conditions

- A flexible CO or DSS button can be assigned as the Live Call Screening (LCS) button or the Live Call Screening (LCS) Cancel button.

- The Live Call Screening indicator shows the feature status as follows:
  - Red (steady). . . . . . . . . . . The Live Call Screening mode is on.
  - Off . . . . . . . . . . . . . . . . . . The Live Call Screening mode is off.
  - Flashing green slowly . . . Live Call Screening is active.*
  - Flashing green rapidly . . . An alert tone is ringing.**
  * The DSS button indicator flashes red slowly while Live Call Screening is active.
  ** The DSS button indicator flashes red moderately while an alert tone is ringing.

- The Two-Way Record indicator shows the feature status as follows:
  - On . . . . . . . . . . . . . . . . . . Recording the conversation.
  - Off . . . . . . . . . . . . . . . . . . Not recording.

- The operator and the manager can clear a password at any extension.

- During the Keep Recording mode, if you want to stop recording the conversation, press the Two-Way Recording button.

- With the KX-T7030, KX-T7130 and KX-T7135, you can assign the password using the display operation.

3.2 Telephone Features

Lockout
If one party in a conversation goes on-hook, both parties will be disconnected from the speech path automatically. A reorder tone is sent to the off-hook party before it is disconnected. No operation is necessary.

Log-In/Log-Out
Allows you to assign the Log-In mode or Log-Out mode within a hunting or ring group. When in the Log-Out mode, you can leave the group temporarily, preventing hunting calls from being sent to your extension. The lighting patterns of the Log-In/Log-Out button on a proprietary telephone and status are as follows.
- Off: Log-In mode
- Red: Log-Out mode

Log-In / Log-Out (Using the Log-In/Log-Out button)

Log-In / Log-Out (Using the feature number)

Any Telephone

<PT Display Example>

- Single line telephone users can dial “0” instead of “#”.

Lift the handset or press SP-PHONE/MONITOR.
Lift the handset or press SP-PHONE/MONITOR.
For Log-In mode: Dial 7360#.
For Log-Out mode: Dial 7361#.
Confirmation tone and dial tone
Hang up or press SP-PHONE/MONITOR.
3.2 Telephone Features

Conditions

- The default is “Log-In” mode.
- There should be at least one extension that is in Log-In mode.
- If every extension has logged out except one person, and that person tries to log out, their extensions will display “Not Valid”. In other words, the last member of the group cannot log out.
- The Log-In/Log-Out button can be assigned to a flexible CO button.

Programming References

- Single line telephone users can dial “0” instead of “#”.

Telephone Features 3-83
3.2 Telephone Features

Canceling using the MESSAGE button

PT

Lift the handset or press SP-PHONE/MONITOR.
Enter the extension number (100 through 199) where you left a message.
Press MESSAGE twice.
Confirmation tone and dial tone
Hang up or press SP-PHONE/MONITOR.

Checking and Selecting a message notification by the message receiver

If there is a message, the message waiting lamp (MESSAGE button indicator) light will be on.

PT

When the telephone is idle and on-hook

Press MESSAGE repeatedly until the desired message appears.

• The stored messages are shown on the display in the order they were received.
• When Tony at extension 123 left a message:

<PT Display Example>

123:Tony

Calling back the message notification sender

PT

Lift the handset or press SP-PHONE/MONITOR.
Press MESSAGE.
Talk.

• If you have more than one message at your extension, the line connects you to the selected message sender.
• The message is cleared after the conversation.
3.2 Telephone Features

Clearing all message notifications by the message receiver

**PT**

- Lift the handset or press SP-PHONE/MONITOR.
- Dial 700.
- Dial #.
- Hang up or press SP-PHONE/MONITOR.

- All messages are cleared.

**Conditions**

- Each extension can have a maximum of 8 simultaneous messages. If you try to set the ninth message, you will hear a reorder tone.
- If the MESSAGE indicator does not go out after calling the extension which left the message, another message is waiting.
- If multiple message notifications are left at your extension, call back is executed in the order received.
- If you select a specific message to call back, the other call backs will be executed in the order received, starting with the one selected.
  (ex.) 5 → 6 → 7 → 8 → 1 → 2 → 3 → 4

**Programming Reference**

- Station Programming (Section 2)
  Flexible Button Assignment — Return to Message Waiting (MESSAGE) Button

**Feature Reference**

Message Waiting for Another Extension
Message Waiting for Another Extension

Allows you to check messages left at another extension and call back the message sender. The Another Extension Message Waiting button light on your extension lets you know that another extension has a message waiting. You can call back the message sender by a simple operation. You can also clear all messages left at another extension. System Programming is required to use this feature.

Checking and Selecting a message notification at another extension

*If there is a message at another extension, the message waiting lamp light (Another Extension Message Waiting button indicator) will be on.*

**PT**

When the telephone is idle and on-hook

- Press the Flexible button assigned as an Another Extension Message Waiting button repeatedly until the desired message appears.
  - The stored messages are shown on the display in the order they were received.
  - When Tony at extension 123 left a message:

  <PT Display Example>

  123: Tony

Calling back the message notification sender for another extension

**PT**

Lift the handset or press SP-PHONE/MONITOR.

- Press the Flexible button assigned as an Another Extension Message Waiting button.
- Talk.

- If another extension has more than one message, the line connects you to the selected message sender.
- The message is cleared after the conversation.
3.2 Telephone Features

Clearing all message notifications at another extension

Conditions

- If the Another Extension Message Waiting button indicator does not go out after calling the extension which left the message, another message is waiting.
- If multiple message notifications are left at another extension, call back is executed in the order received.
- If you select a specific message to call back, the other call backs will be executed in the order received, starting with the one selected.
  (ex.) 5 → 6 → 7 → 8 → 1 → 2 → 3 → 4
- The Another Extension Message Waiting button indicator light will be on and off simultaneously with the MESSAGE button indicator on another extension.

Feature References

Message Waiting
Station Programming — Another Extension Message Waiting Button Assignment
(4.2 DSS Console Features)
**Message Waiting for Another Extension Lock**

Allows you to lock the Message Waiting for Another Extension feature so that another extension cannot check messages left at your extension.

### Locking

**Any Telephone**

Lift the handset or press SP-PHONE.  
Dial 70.  
Enter the 4-digit lock code (4000 through 9999) twice.  
Dial #.  
Confirmation tone and dial tone.  
Hang up or press SP-PHONE.

**<PT Display Example>**

Locked : xxxx

---

### Unlocking

**Any Telephone**

Lift the handset or press SP-PHONE.  
Dial 70.  
Enter the same lock code you used to lock the extension.  
Dial #.  
Confirmation tone and dial tone.  
Hang up or press SP-PHONE.

**<PT Display Example>**

Unlocked

---

### Conditions

- The operator or manager can cancel this feature for all other extensions (Electronic Station Lockout — CANCEL ALL).
- Another extension cannot clear message notifications at your extension while locked.
- Another Extension Message Waiting button indicator on another extension will light even if you have locked your extension, but another extension cannot check and call back messages left at your extension.
- Message Waiting feature at your extension is available even while locked.

### Feature References

Message Waiting for Another Extension
Electronic Station Lockout — CANCEL ALL (3.3 Operator/Manager Service Features)
3.2 Telephone Features

Microphone Mute
(— for KX-T7020/KX-T7030/KX-T7130/KX-T7135 only)
Allows you to turn off the microphone so you can consult privately with others in the room. You will still be able to hear the other party.

Setting

**PT**

*During a conversation in the handsfree mode*

AUTO ANSWER
MUTE

Press AUTO ANSWER/MUTE.

• The AUTO ANSWER/MUTE indicator light flashes red slowly.

Canceling

**PT**

*When microphone mute is established*

AUTO ANSWER
MUTE

Press AUTO ANSWER/MUTE.

• The AUTO ANSWER/MUTE indicator light turns off.

Condition

• This feature is only available during a hands-free conversation.

Mixed Station Dialing
Any telephone, either a KX-T7020/KX-T7030/KX-T7050/KX-T7055/KX-T7130/KX-T7135, single line rotary phone (10 pps, 20 pps) or single line touch tone telephone, may be used as an extension for the system.
One-Touch Dialing

Allows you to call a number or access a system feature with the touch of a button. This is done by storing an extension number, telephone number or feature number (up to twenty-four digits) in a One-Touch Dialing button.

Dialing

| Lift the handset or press SP-PHONE/MONITOR. | Press the flexible button assigned as a One-Touch Dialing button. |

Conditions

- The destination numbers are stored through Station Programming.
- You may press a CO button to select a desired outside (CO) line before pressing the One-Touch Dialing button.
- “Speed Dialing”, “One-Touch Dialing” and manual dialing can be used together.
- You can store a number consisting of twenty-five digits or more by dividing and storing it into two One-Touch Dialing buttons.
- The telephone number dialed will be displayed on the LCD. Use the FWD/DND (→) or CONF (←) button to scroll the display to either side.
- A pause is automatically entered after the stored line access code, 9 or 81 through 86, when dialing.
- To confirm the current status of the button, press the button while on-hook.

• System Programming — Installation Manual
  [008] Operator Assignment
## 3.2 Telephone Features

### Outward Dialing, Line Access — SUMMARY

An outside (CO) line can be accessed in the following ways.

<table>
<thead>
<tr>
<th>Line Access, Automatic</th>
<th>Dial the feature number (9).</th>
</tr>
</thead>
<tbody>
<tr>
<td>Line Access, Individual</td>
<td>Press a Single-CO (S-CO) button.</td>
</tr>
<tr>
<td>Line Access, Outside (CO) Line Group</td>
<td>Dial the feature number (8) and an outside (CO) line group number (1-6).</td>
</tr>
<tr>
<td></td>
<td>or Press a Group-CO (G-CO) button</td>
</tr>
</tbody>
</table>

### Conditions

- After dialing the feature number or pressing the CO button, you will hear one of the following tones.
  - **Dial tone**: Indicates an idle outside (CO) line is accessed.
    
    ![CO x](image)

    — is shown on a PT display. (x: outside (CO) line number)

  - **Busy tone**: Indicates the selected outside (CO) line is busy.
    
    ![CO in Use](image)

    — is shown on a PT display.

  - **Reorder tone**:
    1) Indicates the outside (CO) line you have attempted to access is not assigned.

    ![CO Not Assigned](image)

    — is shown on a PT display.

    2) Indicates access to outside (CO) lines is denied.

    ![Restricted](image)

    — is shown on a PT display.

- **Restricted** may be displayed on a PT display and a reorder tone may sound due to the following.
  - The extension has been locked by the owner (Electronic Station Lockout) or the operator/manager (Remote Station Lock Control).
  - The extension is restricted by the account code mode, “Verified - All”.
  - The extension is restricted from making toll calls (Toll Restriction).

- **PT** • The CO button assignment on your telephone can be re-arranged as required. Refer to the “Flexible Button Assignment” in Station Programming (Section 2).

- **PT** • An outside (CO) line which is not assigned to a CO button cannot be dialed.

Line Access, Automatic

Allows you to select an available outside (CO) line automatically.

Any Telephone

Lift the handset or press SP-PHONE/MONITOR.
Dial 9.
Dial tone
Enter the phone number.
Talk.
Hang up or press SP-PHONE.

• The selected CO indicator light turns green.
• The display shows the phone number.

Any Telephone

Dial 9.
Dial tone
Enter the phone number.
Talk.
Hang up or press SP-PHONE.

• The selected CO indicator light turns green.
• The display shows the phone number.
3.2 Telephone Features

Line Access, Individual

Allows you to select the desired outside (CO) line without dialing the line access code.

**PT**

- Lift the handset or press SP-PHONE/MONITOR.
- Press the CO assigned as a Single-CO button.
- Enter the phone number.
- Lift the handset or press SP-PHONE/MONITOR.
- Hang up or press SP-PHONE/MONITOR.

**Condition**

- You may skip off-hook and press the Single-CO (S-CO) button directly.

Line Access, Outside (CO) Line Group

Allows you to select an idle line within a designated outside (CO) line group.
Through programming, outside (CO) lines can be divided into six line groups.

**PT and SLT**

- Lift the handset or press SP-PHONE/MONITOR.
- For a PT: Press the CO assigned as the Group-CO button.
- For an SLT: Dial 8 and the outside (CO) line group number (1 through 6).
- Enter the phone number.
- Lift the handset or press SP-PHONE/MONITOR.
- Hang up or press SP-PHONE/MONITOR.

**Condition**

- You may press the Group-CO (G-CO) button directly without going off-hook.
Paging — SUMMARY

Allows you to make a voice announcement to several people at the same time. Your message is announced over the built-in speakers of proprietary telephones (PT) and/or an external speaker. The paged person can answer your page from a nearby telephone. You cannot be paged at a single line telephone, but you can answer a page, which is announced over nearby PTs or an external pager, from your single line telephone. There are three types of paging as shown below. You can select the appropriate type according to your needs.

<table>
<thead>
<tr>
<th>Type</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Paging — All</td>
<td>Paging through both the built-in speakers and an external pager.</td>
</tr>
<tr>
<td>Paging — External</td>
<td>Paging to an external pager.</td>
</tr>
<tr>
<td>Paging — Group</td>
<td>Paging to all groups (all extensions) simultaneously.</td>
</tr>
<tr>
<td></td>
<td>Paging to a particular group of extensions using the built-in speakers.</td>
</tr>
</tbody>
</table>

Conditions

- To answer the page, refer to “Paging — ANSWER”.
- The paged extension users hear a confirmation tone before the voice announcement.
- A confirmation tone is sent to the external pager (External Pager Confirmation Tone) before the voice announcement. The tone can be disabled.
- You can hear a confirmation tone before making the voice announcement.
- More than one person cannot use the paging feature at the same time.
- You cannot page extensions which have set the DND or Paging — DENY feature, or which are in use.

Programming References

Feature References

Do Not Disturb (DND)
Paging — ANSWER
Paging — DENY
Paging — All

Allows you to make a voice announcement to all extensions. Your message is announced over the built-in speakers of proprietary telephones (PT) and the external pager.

Any Telephone

Lift the handset or press SP-PHONE/MONITOR.
Dial 33*. Confirmation tone
Announce. Wait for an answer. Talk.

<PT Display Example>

Paging All

• You may dial “339” instead of “33*”.

Paging — External

Allows you to make a voice announcement over the external pager.

Any Telephone

Lift the handset or press SP-PHONE/MONITOR.
Dial 34. Confirmation tone (optional)
Announce. Wait for an answer. Talk.

<PT Display Example>

External Page

Conditions

• If the pager is in use, a busy tone will be heard.
• When the program [106] is set to “DISABLE”, the confirmation tone is not sent to the external pager.
Paging — Group

Allows you to select an extension group and make a voice announcement. You can select all extension groups simultaneously. The announcement can only be heard through the extensions’ built-in speakers.

To access all groups simultaneously

![Diagram for accessing all groups simultaneously]

- Lift the handset or press SP-PHONE/MONITOR.
- Dial 330.
- Confirmation tone
- Announce.
- Wait for an answer.
- Talk.

<PT Display Example>
Paging All Ext

To access a particular group of extensions

![Diagram for accessing a particular group]

- Lift the handset or press SP-PHONE/MONITOR.
- Dial 33.
- Dial the group number (1 through 8).
- Confirmation tone
- Announce.
- Wait for an answer.
- Talk.

<PT Display Example>
Paging Group X

Paged group number

Condition

- There is a maximum of eight extension groups.
Paging — ANSWER

Allows you to answer an announced page at any extension within the system.

### Any Telephone

- Lift the handset or press SP-PHONE/MONITOR.
- Dial 43.
- Confirmation tone
- Talk.

### Conditions

- You can hear a confirmation tone when the page is answered.
- If an outside call has been paged and transferred, you can answer the call by pressing the corresponding CO button whose indicator is flashing slowly.
### Paging and Transfer

You can transfer a call using the paging feature (Paging — All, Paging — External, or Paging — Group).

#### Using Paging — All

<table>
<thead>
<tr>
<th>PT and SLT</th>
<th>During a conversation</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>For a PT:</strong> Press TRANSFER.</td>
<td><strong>Dial tone</strong></td>
</tr>
<tr>
<td><strong>For an SLT:</strong> Flash the hookswitch.</td>
<td><strong>Dial 33</strong></td>
</tr>
</tbody>
</table>

- The other party is placed on hold.
- You may dial “339” instead of “33∗”.

<p>| | | | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>Wait for an answer.</td>
<td>Confirmation tone</td>
<td>Hang up or press SP-PHONE.</td>
<td></td>
</tr>
</tbody>
</table>

- The held party and the paged extension are connected and can start a conversation.
Using Paging — External: to an external pager

**PT and SLT**

**During a conversation**

```
<table>
<thead>
<tr>
<th>ACTION</th>
<th>DIAL TONE</th>
<th>CONFIRMATION TONE</th>
<th>ANNOUNCE</th>
</tr>
</thead>
<tbody>
<tr>
<td>For a PT: Press TRANSFER.</td>
<td>3</td>
<td>3</td>
<td></td>
</tr>
<tr>
<td>For an SLT: Flash the hookswitch.</td>
<td>4</td>
<td>4</td>
<td></td>
</tr>
</tbody>
</table>
```

For a PT: Dial 330.

- The other party is placed on hold.

**Using Paging — Group: to all extension groups**

**PT and SLT**

**During a conversation:**

```
<table>
<thead>
<tr>
<th>ACTION</th>
<th>DIAL TONE</th>
<th>CONFIRMATION TONE</th>
<th>ANNOUNCE</th>
</tr>
</thead>
<tbody>
<tr>
<td>For a PT: Press TRANSFER.</td>
<td>3</td>
<td>3</td>
<td></td>
</tr>
<tr>
<td>For an SLT: Flash the hookswitch.</td>
<td>330</td>
<td>3330</td>
<td></td>
</tr>
</tbody>
</table>
```

For an SLT: Dial 3330.

- The other party is placed on hold.

- The held party and the paged extension are connected and can start a conversation.
3.2 Telephone Features

Using Paging — Group: to a particular extension group

**Condition**

- If “Hold-3” is assigned in System Programming, you must dial “20” after flashing the hookswitch.

**Programming References**

- System Programming — Installation Manual
  - [104] Hold Mode Selection
  - [600] Extension Group Assignment
3.2 Telephone Features

Paging — DENY

A page sent to a built-in speaker can be denied by any extension in the system.

Setting

Dial 7341#. Lift the handset or press SP-PHONE/MONITOR. Hang up or press SP-PHONE/MONITOR.

<PT Display Example>
Paging Deny

Canceling

Dial 7340#. Lift the handset or press SP-PHONE/MONITOR. Hang up or press SP-PHONE/MONITOR.

<PT Display Example>
Paging Allow
3.2 Telephone Features

Paralleled Telephone Connection

Any extension can be connected in parallel with a proprietary telephone and a single line telephone. In the event of a power failure, CO1 and CO4 can be accessed using the single line telephones that are connected in parallel with the proprietary telephones to jack numbers 01 and 09 respectively. If the extension receives a call, ringing will be heard from the proprietary telephone and the single line telephone. You can answer the call by using either the proprietary telephone or the single line telephone. An answering machine, facsimile, MODEM (personal computer), etc., can be connected instead of a single line telephone.

System Programming is required to enable this feature.

Conditions

- A proprietary telephone LCD will show you a single line telephone is in use.
- The following features will not work with a single line telephone connected in parallel with a proprietary telephone.
  - Call Splitting
  - Caller ID Call Waiting
  - Conference
  - Door Opener while talking to the doorphone
  - External Feature Access
  - Pickup dialing
- A single line telephone connected in parallel with a proprietary telephone cannot make a call in the following cases.
  - The proprietary telephone is set to the BGM mode.
  - The proprietary telephone is receiving a page through the built-in speaker.
  - The proprietary telephone is set to the PROGRAM mode.
- A single line telephone connected in parallel with a proprietary telephone will not ring in the following cases.
  - The proprietary telephone is set to Hands-free Answerback.
  - The proprietary telephone is set to “Voice Call” in the Intercom Alert Assignment.
  - The proprietary telephone is receiving a call from a doorphone.

Programming Reference

- System Programming — Installation Manual
  [610] Paralleled Telephone Connection
Personal Speed Dialing

Allows you to store up to ten speed dial numbers at your extension. These numbers are available for your extension only.

Storing a phone number

Any Telephone

Lift the handset or press SP-PHONE/MONITOR.

Dial 2\(^*\). Enter the personal speed dial number (0 through 9). Enter the desired number.

Dial #. Confirmation tone

Hang up or press SP-PHONE/MONITOR.

Dialing

Any Telephone

Lift the handset or press SP-PHONE/MONITOR.

Dial #. Enter the personal speed dial number (0 through 9).

• You may dial “1 \(^*\)” instead of “#”.

Checking the stored personal speed dialing numbers (with a display PT only)

PT

Lift the handset or press SP-PHONE.

Dial 3\(^*\). Enter the personal speed dial number (0 through 9).

Dial #.
### Telephone Features

#### Conditions

- An account code must be stored by pressing “**×**” and entering the account code after the line access code in the account code verify-all and forced modes.
- You can store an extension number, telephone number, or feature number of up to twenty-four digits. Valid digits are “0 through 9”.
- A pause can be stored by pressing the “*” key. However, in the account code verify-all, verify-toll and forced modes, “*” is not regarded as a pause.
- To store the telephone number of an external party, a line access code (9 or 81 through 86) must be stored as the first digit.
- The number of Personal Speed Dialing numbers corresponds to the number of PF buttons assigned as One-Touch Dialing. (PF buttons are on a proprietary telephone.) You cannot assign both the One-Touch Dialing and Personal Speed Dialing features to the same number. For example, if you assign One-Touch Dialing to the PF 1 button and then Personal Speed Dialing 0, only the Personal Speed Dialing 0 feature will be assigned.
- A rotary telephone cannot use this feature.

#### Programming Reference

- Station Programming (Section 2)
  - Flexible Button Assignment — One-Touch Dialing Button
Pickup Dialing (Hot Line) (— Single Line Telephone only)

Allows you to make an outgoing call by just going off-hook.

**Storing a phone number**

<table>
<thead>
<tr>
<th>SLT</th>
<th>7 4 2</th>
<th>phone no.</th>
<th>7 4 2 #</th>
</tr>
</thead>
<tbody>
<tr>
<td>Lift the handset or press SP-PHONE/MONITOR.</td>
<td>Dial 742.</td>
<td>Enter the phone number.</td>
<td>Dial #.</td>
</tr>
<tr>
<td>Confirmation tone and dial tone</td>
<td>Confirmation tone and dial tone</td>
<td>Hang up or press SP-PHONE/MONITOR.</td>
<td></td>
</tr>
</tbody>
</table>

- You must dial a line access code (9 or 81 through 86) as the first digit when storing an external party phone number.

**Setting / Canceling**

<table>
<thead>
<tr>
<th>SLT</th>
<th>7 4 1 #</th>
<th>7 4 0 #</th>
</tr>
</thead>
<tbody>
<tr>
<td>Lift the handset or press SP-PHONE/MONITOR.</td>
<td>To set: Dial 741#.</td>
<td>To cancel: Dial 740#.</td>
</tr>
<tr>
<td>Confirmation tone and dial tone</td>
<td>Hang up or press SP-PHONE/MONITOR.</td>
<td></td>
</tr>
</tbody>
</table>

**Dialing**

<table>
<thead>
<tr>
<th>SLT</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>Lift the handset or press SP-PHONE/MONITOR.</td>
<td>Wait for an answer.</td>
</tr>
<tr>
<td></td>
<td>Talk.</td>
</tr>
</tbody>
</table>

**Conditions**

- This feature will not work if you answer an incoming call or retrieve a call on hold.
- Up to thirty-two digits, consisting of “0 through 9” and “*”, can be stored. The “*” button is used as a PAUSE. However, in the account code verify-all, verify-toll and forced modes, “*” is not regarded as a pause.
- An account code must be stored by pressing “* #” and entering the account code after the line access code in the account code verify-all and forced modes.
- During the waiting time after going off-hook, you can call another party and override this feature. You can change the waiting time between going off-hook and connecting with a called line by System Programming.
- A rotary telephone cannot use this feature.

**Programming Reference**

- System Programming — Installation Manual
  [203] Pickup Dial Delay Time
3.2 Telephone Features

Power Failure Transfer

During a power failure, each of the following outside (CO) lines will be connected to an assigned extension.

- Outside (CO) line 1: jack number 01
- Outside (CO) line 4: jack number 09

Conditions

- During a power failure, all features cannot be used except for incoming and outgoing outside calls from jack numbers 01 and 09.
- If jack numbers 01 and 09 are connected to proprietary telephones, disconnect the units and connect single line telephones.
P 3.2 Telephone Features

**Pulse to Tone Conversion**

Allows you to change the dialing mode from Pulse to Tone to access services that require tones, such as computer telephone services and Voice Mail.

<table>
<thead>
<tr>
<th>Any Telephone</th>
</tr>
</thead>
<tbody>
<tr>
<td>phone no. (Pulse mode)</td>
</tr>
<tr>
<td>Dial *#.</td>
</tr>
<tr>
<td>desired no. (Tone mode)</td>
</tr>
</tbody>
</table>

Enter the phone number (Pulse mode).
Dial *#.
Enter the desired number (Tone mode).

**Condition**

- You cannot change from Tone to Pulse dialing mode.
3.2 Telephone Features

Redial, Last Number

Automatically saves the last outside phone number dialed so that you can make a call to the same party later using a simple operation.

<table>
<thead>
<tr>
<th>PT</th>
<th>SLT</th>
</tr>
</thead>
<tbody>
<tr>
<td><img src="image" alt="Lift the handset or press SP-PHONE/MONITOR." /></td>
<td><img src="image" alt="Lift the handset." /></td>
</tr>
<tr>
<td><img src="image" alt="Press REDIAL." /></td>
<td><img src="image" alt="Dial ## or 80." /></td>
</tr>
</tbody>
</table>

Conditions

- Up to sixty-four digits can be stored and redialed. This does not include an outside (CO) line access code.
- If you hear a busy tone when attempting to redial, select another line and press the REDIAL button or feature number.
- The stored number will be replaced even if only one digit is dialed the next time an outside call is made. Dialing an outside (CO) line access code will not affect the stored number.
  - “*”, “#”, “PAUSE”, and “INTERCOM” (for secret dialing) are counted as one digit.
  - While calling or during a conversation, pressing the REDIAL button will disconnect the current call and redial the stored number in 3 seconds.
  - You can check the stored number. Press the REDIAL button while on-hook, and the stored number will be displayed.
Redial, Saved Number

Allows you to save the current external telephone number during a conversation, so that you can redial the same party later using a simple operation. The saved number can be redialed until another number is stored.

Storing

<table>
<thead>
<tr>
<th>PT</th>
<th>During a conversation or while hearing a busy tone</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>AUTO DIAL</td>
</tr>
<tr>
<td></td>
<td>STORE</td>
</tr>
<tr>
<td></td>
<td>Press AUTO DIAL/STORE.</td>
</tr>
<tr>
<td></td>
<td>SAVE</td>
</tr>
<tr>
<td></td>
<td>Press SAVE.</td>
</tr>
</tbody>
</table>

Dialing

| PT | Lift the handset or press SP-PHONE/MONITOR. |
|    | Press SAVE.                                  |

Conditions

- Up to sixty-four digits can be stored and redialed. This does not include an outside (CO) line access code.
- “*”, “#”, “PAUSE”, and “INTERCOM” (for secret dialing) are counted as one digit.
- A flexible button can be assigned as the SAVE button.
- You can check the stored number. Press the SAVE button while on-hook, and the stored number will be displayed.
- You can change the outside (CO) line when dialing. You may press a CO button to select an outside (CO) line directly after going off-hook before pressing the SAVE button.

Programming Reference

- Station Programming (Section 2)
  Flexible Button Assignment — SAVE Button
3.2 Telephone Features

Room Monitor

Allows you to monitor a room through a proprietary telephone with an AUTO ANSWER/MUTE button. The proprietary telephone you want to monitor should be prepared for monitoring beforehand. You can also monitor through a doorphone. You can use a proprietary telephone with an AUTO ANSWER/MUTE button and single line telephone with a MUTE button for monitoring.

Setting a monitored PT

At the monitored telephone

Lift the handset or press SP-PHONE.

Dial 7351#.

Confirmation tone

Hang up or press SP-PHONE.

Press AUTO ANSWER/MUTE.

• The AUTO ANSWER/MUTE button indicator is flashing.

<PT Display Example>

Room Monitor On

PT and SLT

For a PT: Press SP-PHONE and AUTO ANSWER/MUTE.

For an SLT: Lift the handset and press the MUTE button.

Enter the monitored extension number (100 through 199).

Talking with a person in the monitored room

Press AUTO ANSWER/MUTE or lift the handset.

Talk.
3.2 Telephone Features

Canceling a monitor temporarily

**PT**

At the monitored telephone

- AUTO ANSWER
- MUTE

Press AUTO ANSWER/MUTE.

- The AUTO ANSWER/MUTE button indicator turns off.

Canceling

**PT**

At the monitored telephone

- Lift the handset or press SP-PHONE.
- Dial 7350#.
- Confirmation tone
- Hang up or press SP-PHONE.

**<PT Display Example>**

Room Monitor Off

Monitoring through a doorphone

**PT and SLT**

For a PT: Press SP-PHONE and AUTO ANSWER/MUTE.

For an SLT: Lift the handset and press the MUTE button.

Dial 31. Enter the monitored doorphone number (1 through 4).

**Conditions**

- The doorphone access tone can be disabled by System Programming.
- The access tone will not be sent to the monitored PT.
- The paging access tone will also not be sent to the monitored PT.
- System Programming is required to monitor through a PT.
- This feature is not available for the KX-T7050 and KX-T7055.

**Programming References**

- [707] Doorphone Access Tone Selection
3.2 Telephone Features

Secret Dialing

Allows you to conceal all or part(s) of a “System Speed Dialing” or “One-Touch Dialing” number assigned to a flexible button which normally appears on the display.

### Conditions

- A secret code, “[” or “]” (pressing the INTERCOM button), are counted as one digit.
- You can conceal one or more parts of a telephone number.
- If the phone number “9-1-[201]-431-2111” has been stored, the display will show the following when the call is made.

  \[9-1-\{201\}...\]

- “201” is not shown on the display when you dial.

- You can program whether to print out the concealed number(s) on the SMDR or not by System Programming.
- Do not press the INTERCOM button before a line access number (9 or 81 through 86).

- Timed Reminder
- Voice Mail Integration

Clearing the current feature settings

Any Telephone

Lift the handset or press SP-PHONE/MONITOR.

Dial 79#.

Confirmation tone and dial tone

Hang up or press SP-PHONE/MONITOR.

<PT Display Example>

Ext Data Clear

• Single line telephone users can dial “0” instead of “#”. 
3.2 Telephone Features

Switching to Tone Alert

“Voice Call” (through the built-in speaker) which is set at the called party’s extension can be switched to “Tone Call” (ringing). This feature must be set beforehand at the called party’s extension by Station Programming.

Any Telephone

Lift the handset or press SP-PHONE/MONITOR. Enter an extension number (100 through 199). Confirmation tone Dial *. Ring back tone

Conditions

- This feature is not available for rotary telephones.
- Switching from “Tone Call” to “Voice Call” is not available.

Programming Reference

- Station Programming (Section 2)
  Intercom Alert Assignment
System Speed Dialing

Allows you to make a call using pre-programmed speed dial numbers. This system supports one hundred speed dial numbers which are available to all extension users.

**Conditions**

- System Speed Dial numbers must be stored by System Programming.
- “Speed Dialing”, “One-Touch Dialing” and manual dialing can be used together.
- You may press a CO button or dial a line access code to select a desired outside (CO) line before pressing the AUTO DIAL/STORE button or dialing *. 
- It is possible to change toll restriction COS number with this feature (Toll Restriction for System Speed Dialing). In this case, System Programming is necessary.
- A System Speed Dial number can be divided when stored.

**Feature Reference**

Toll Restriction for System Speed Dialing
3.2 Telephone Features

Time (Day/Night/Lunch) Service

This system supports the Day, Night and Lunch modes. The system operation for originating and receiving calls can be different in the day, night and lunch modes. “Time Service” can only be set by the operator and manager. For a PT user, even if your extension is not assigned as the operator or manager, you can use your display to check the current mode.

Confirming the current mode (with a display PT only)

When the telephone is idle

Press #.

• The display shows the current mode for 3 seconds.

Condition

• The Day/Night/Lunch mode is automatically switched at a predetermined time (default: 9:00 a.m. for every day, 5:00 p.m. for every night), if the automatic mode is selected.

Programming References

Feature References

Time (Day/Night/Lunch) Service Setting (3.3 Operator/Manager Service Features)
Time (Day/Night/Lunch) Service (→ See the Installation Manual.)
**Timed Reminder**

You can receive a ringback at your telephone to remind you of a meeting or appointment. Either one time or daily (everyday until canceled) is available at a pre-set time.

**Setting**

**Any Telephone**

Lift the handset or press SP-PHONE/MONITOR.

- **7 6**
- **hour**
- **minute**
- **0 or 1**

Dial 76. Enter the hour (01 through 12). Enter the minute (00 through 59).

For AM: Dial 0. For PM: Dial 1.

*1 or 2*
- **#**

Hang up or press SP-PHONE/MONITOR.

1 or 2

For a one time alarm: Dial 1.
For a daily alarm: Dial 2.

- Single line telephone users can dial “0” instead of “#”.

*1* An alarm will be heard at the preset time and then the setting is cleared.

*2* An alarm will be heard daily at the preset time until the setting is changed or canceled.

**Canceling**

**Any Telephone**

Lift the handset or press SP-PHONE/MONITOR.

- **7 6 2 #**

Dial 762#. Confirmation tone and dial tone

Hang up or press SP-PHONE/MONITOR.

- Single line telephone users can dial “0” instead of “#”.

**<PT Display Example>**

Alarm Cancel

- Single line telephone users can dial “0” instead of “#”.
3.2 Telephone Features

Checking the set time (with a display PT only)

<table>
<thead>
<tr>
<th>Lift the handset or press SP-PHONE/MONITOR.</th>
<th>Dial 763#.</th>
<th>Hang up or press SP-PHONE/MONITOR.</th>
</tr>
</thead>
<tbody>
<tr>
<td>PT</td>
<td>7636 #</td>
<td></td>
</tr>
</tbody>
</table>

- If “10:10 AM” has been set:
  - <PT Display Example>
  - Alarm 10:10AM — one time
  - or
  - Alarm 10:10AM* — daily

Stopping the alarm

<table>
<thead>
<tr>
<th>Lift the handset.</th>
<th>Dial tone 3</th>
</tr>
</thead>
<tbody>
<tr>
<td>PT</td>
<td>7636 #</td>
</tr>
</tbody>
</table>

- Pressing any key also stops the alarm.
- This tone confirms that you have a Timed Reminder.

Conditions

- Be sure the system clock is set correctly.
- The alarm continues for thirty seconds.
- If you receive an incoming call during the alarm, ringing starts after the alarm stops.
- If the alarm is set to sound during a conversation, the alarm will start after the conversation.
- If the operator, manager or you set a new time, the preset time will be cleared.
- If an alarm time has not been set, the display will show the following.

Toll Restriction Override

There are three types of toll restriction override.
• Toll Restriction Override by Account Codes
• Toll Restriction for System Speed Dialing
• Toll Restriction — Station Lock Boundary Class

Toll Restriction Override by Account Codes

Allows you to temporarily override toll restriction and make a toll call from a toll-restricted telephone assigned to the verify-toll mode. You can carry out this feature by entering a pre-assigned account code before dialing the telephone number. For the operation procedure, refer to “Account Code Entry”.

Conditions

• This feature changes the toll restriction COS number as follows.
  — When an account code is entered, the COS number is changed to the COS number 2. The COS numbers 1 and 2 will not be changed.
• If you do not enter an account code or enter an invalid one, a regular toll restriction check is done.
• You can enter an account code only when you need to override toll restriction.
• To override toll restriction in the option, forced or verify-all mode, use the Walking COS feature.

Programming References

Toll Restriction (→ See the Installation Manual.)
Walking COS
3.2 Telephone Features

Toll Restriction for System Speed Dialing

Allows you to change the toll restriction in “System Speed Dialing”. Normally, calls originated by “System Speed Dialing” are restricted depending on the extension’s toll restriction COS number. Once this option is set, the COS number is changed to the one assigned in the program [301]. You can select the toll restriction COS number by System Programming.

Programming Reference

• System Programming — Installation Manual
  [301] Toll Restriction — System Speed Dialing Boundary Class

Feature References

System Speed Dialing
Toll Restriction (→ See the Installation Manual.)

Toll Restriction — Station Lock Boundary Class

Allows assigning a toll restriction class when the Electronic Station Lockout or Remote Station Lock feature is set.
You usually cannot make an outside call at a locked extension, however if a toll restriction class is assigned in program [312], you can make an outside call at the locked extension.

Conditions

• The higher toll restriction COS number will take precedence.
  For example, if toll restriction COS number 4 is assigned to an extension and the station lock boundary class is 3, you are allowed to make a call with toll restriction COS 4.

**Two-Way Recording into Voice Mail**

Allows you to record a conversation into your mailbox or a specified mailbox.

**Recording into your mailbox**

- **During a conversation**
  - Press the Flexible button assigned as the Two-Way Record button.
  - The Two-Way Record indicator light turns red.

- **Stopping Recording**
  - Press the Flexible button assigned as the Two-Way Record button.
  - The Two-Way Record indicator light turns off.

**Recording into another mailbox**

- **During a conversation**
  - Press the Flexible button assigned as the Two-Way Transfer button.
  - Enter an extension number or press the desired DSS.
  - The Two-Way Transfer indicator light turns red.

- **Stopping Recording**
  - Press the Flexible button assigned as the Two-Way Transfer button.
  - The Two-Way Transfer indicator light turns off.

† Available when the KX-TA624 is connected to a Proprietary Telephone capable Panasonic Voice Processing System (one that supports APT Integration; KX-TVS50/KX-TVS80).
3.2 Telephone Features

Conditions

- A flexible CO or DSS button can be assigned as the Two-Way Record button or the Two-Way Transfer button.
- Pressing the Two-Way Record button sends an alarm tone, if an idle voice mail port is not available.
- Pressing the Two-Way Transfer button followed by an extension number sends an alarm tone, if an idle voice mail port is not available.

Programming Reference

- Station Programming (Section 2)

(4.2 DSS Console Features)
Voice Mail Integration for KX-TVS50/KX-TVS75/KX-TVS80/KX-TVS100/KX-TVS110

Allows you to forward your calls to your mailbox in a Panasonic Voice Processing System (VPS) equipment (KX-TVS50/KX-TVS75/KX-TVS80/KX-TVS100/KX-TVS110). A caller can leave a message in your mailbox. If you use a proprietary telephone which has a MESSAGE button, the button light will turn on to let you know you have messages. If you use a single line telephone, dial tone 3 will let you know you have messages when you go off-hook.

Setting Call Forwarding destination to Voice Mail

<table>
<thead>
<tr>
<th>PT and SLT</th>
<th>1 or 2</th>
<th>#</th>
<th>Confirmation tone and dial tone</th>
<th>Hang up or press SP-PHONE/MONITOR.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Lift the handset or press SP-PHONE/MONITOR.</td>
<td>Dial the Call Forwarding number. 1: Call Forwarding — All Calls 2: Call Forwarding — Busy/No Answer</td>
<td>Enter the Voice Mail extension number.</td>
<td>Dial #.</td>
<td>Confirmation tone and dial tone</td>
</tr>
</tbody>
</table>

• You may press the flexible button assigned as the FWD/DND button instead.
• Calls directed to you are automatically forwarded to your mailbox.
• Callers can leave their messages in the mailbox, according to the Voice Mail guidance.

Canceling Call Forwarding destination to Voice Mail

<table>
<thead>
<tr>
<th>PT and SLT</th>
<th>0</th>
<th>#</th>
<th>Confirmation tone and dial tone</th>
<th>Hang up or press SP-PHONE/MONITOR.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Lift the handset or press SP-PHONE/MONITOR.</td>
<td>Dial 0.</td>
<td>Dial #.</td>
<td>Confirmation tone and dial tone</td>
<td>Hang up or press SP-PHONE/MONITOR.</td>
</tr>
</tbody>
</table>

• You may press the flexible button assigned as the FWD/DND button instead.
3.2 Telephone Features

**Listening to a stored message**

You can listen to the messages stored in your mailbox easily. There are two operations to play back messages.

**Using the Message Waiting (MESSAGE) button**

<table>
<thead>
<tr>
<th>PT</th>
</tr>
</thead>
<tbody>
<tr>
<td>Lift the handset or press SP-PHONE/MONITOR. Press MESSAGE.</td>
</tr>
</tbody>
</table>

- You can listen to the stored message by following the Voice Mail prompts.

**By manual dialing**

<table>
<thead>
<tr>
<th>Any Telephone</th>
</tr>
</thead>
<tbody>
<tr>
<td>Lift the handset or press SP-PHONE/MONITOR. Enter the Voice Mail extension number.</td>
</tr>
</tbody>
</table>

- When you use an SLT, you will hear dial tone 3 if there are messages.
- You can listen to the stored message by following the Voice Mail prompts.

**Conditions**

- Voice Mail can be assigned as the destination for the following features.
  a) Call Forwarding — All Calls
  b) Call Forwarding — Busy/No Answer
  c) Intercept Routing
- Outside callers can leave messages in your mailbox. When an incoming outside call is received, the operator answers the call and transfers it to your extension.
  — If you set the “Call Forwarding” feature at the Voice Mail destination;
    The call will be forwarded to Voice Mail automatically.
  — If you do not set the “Call Forwarding” feature;
    The call will return to the operator. Then the operator will transfer the call to Voice Mail.
- An incoming call via DISA is automatically transferred to Voice Mail when the destination extension is assigned to “Intercept” and a Voice Mail extension is assigned as the Intercept Routing destination.
- You can also transfer the received outside calls to specific mailboxes so that callers can leave messages.
• A flexible button can be assigned as the FWD/DND button.
• If you set the Call Forwarding — Busy/No Answer feature, the FWD/DND button light will keep flashing. To stop this flashing, go off-hook and dial 716#.
• You will hear dial tone 3 if there are messages in your mailbox when you go off-hook. When you access voice mail, you have to listen to all of the new messages. If you do not listen to all of the messages, dial tone 3 will be eliminated and you will not know there are messages left in your mailbox the next time you go off-hook.

3.2 Telephone Features

Voice Mail Transfer †

You can transfer outside calls to the Voice Processing System so that callers can leave their messages in a desired extension mailbox. When you transfer an outside call to the designated extension:

— **If the extension has set the “Call forwarding” function whose destination is Voice Mail;**
  The call will be forwarded to Voice Mail.
— **If the extension has not set the “Call forwarding” function;**
  The call will return to you. You can then transfer the call to Voice Mail by simply following the operation below.

**Conditions**

- A flexible button can be assigned as the Voice Mail (VM) Transfer button.

**Programming References**

- Station Programming (Section 2)
  Flexible Button Assignment — Voice Mail (VM) Transfer Button

(4.2 DSS Console Features)

† Available when the KX-TA624 is connected to a Proprietary Telephone capable Panasonic Voice Processing System (one that supports APT Integration; KX-TVS50/KX-TVS80).

---

**PT**

If the call returns to you

Press the Flexible button assigned as the Voice Mail (VM) Transfer button. Enter an extension number or press DSS.

• The call will be transferred to Voice Mail.
• The caller can leave the message according to the Voice Mail guidance.

extension number

If the call returns to you

Press the Flexible button assigned as the Voice Mail (VM) Transfer button. Enter an extension number or press DSS.

• The call will be transferred to Voice Mail.
• The caller can leave the message according to the Voice Mail guidance.
## Walking COS

Allows you to use your calling privileges (TRS — Class of Service) at another extension. You may override restrictions which may be set at the extension.

### Making a call

**Any Telephone**

**At another extension**

Lift the handset or press SP-PHONE/MONITOR. **Dial 7**. **Dial your extension password.** Enter your extension number (100 through 199). **Dial #.** Confirmation tone and dial tone **Enter the phone number.**

**<PT Display Example>**

Set COS Extxxx

---

**Conditions**

- TRS Class of Service (COS) is used to define the feature. Each extension is assigned a TRS COS number.
- A rotary telephone cannot use this feature.

**Programming References**

- Operator/Manager Service Features
  - Extension Password Set (Manager only)
- System Programming — Installation Manual
  - TRS – Class of Service (COS) Assignment — Day/Night/Lunch

**Feature Reference**

Toll Restriction Override
The system supports one operator and one manager. Any extension can be appointed as the operator and jack number 01 is appointed as the manager. System Programming is required to assign the operator. The manager can program a few System Program (see following “Manager Programming”) with their extension password. The operator and manager can perform the following features.

1) Call Log, Incoming in the Common Area — CLEAR ALL
2) Call Log Lock, Incoming in the Common Area
3) Date and Time Setting
4) Electronic Station Lockout — CANCEL ALL
5) Live Call Screening Password Control
6) Outgoing Message (OGM)
7) Remote Station Lock Control
8) The 301st Call Log, Incoming in the Common Area Treatment
9) Time (Day/Night/Lunch) Service Setting
10) Timed Reminder, Remote (Wake-Up Call)
11) Extension Password Set (Manager only)

Programming Reference

- System Programming — Installation Manual
  [008] Operator Assignment
Manager Programming (Manager only)

The manager (jack number 01) can program the following System Programming with their extension password even when they do not know the system password for System Programming.

- [001] System Speed Dialing Entry
- [512] DISA Security Codes
- [530] DISA Security Codes Digit Selection

To enter the programming mode

1. Set to “PROGRAM” on the back of the telephone.
2. Press #.
3. Dial the extension password of jack number 01.
4. Be sure the telephone is idle and on-hook.

Programming sequence

After entering the programming mode

1. Enter the Program Address.
2. Enter the parameters.
3. Press the AUTO DIAL/STORE (STORE) button.
4. Press the HOLD (END) button.

After pressing the STORE button, you will hear one of the following tones.

**Confirmation tone (1 beep):** This informs you that storing is completed. You can continue programming by entering the same or another program address

**(2 beeps):** This informs you that the parameter has already been stored.

**Alarm tone (3 beeps):** This informs you that the entry is invalid.
3.3  Operator/Manager Service Features

To exit the programming mode

<table>
<thead>
<tr>
<th>PT</th>
</tr>
</thead>
<tbody>
<tr>
<td>When the display shows the initial programming mode</td>
</tr>
<tr>
<td>MEMORY</td>
</tr>
<tr>
<td>SET + PROGRAM</td>
</tr>
</tbody>
</table>

Set to “SET” on the back of the telephone.

Programmed is completed and the normal call operation resumes.

Conditions

- During the programming mode, your extension is treated as a busy extension.
- If you enter the wrong extension password, you will hear an alarm tone (3 beeps). Try again.

Programming References

Call Log, Incoming in the Common Area — CLEAR ALL

The operator or manager can clear all call information stored in the common area.

Setting

<table>
<thead>
<tr>
<th>PT</th>
<th>7 0 * * #</th>
<th>Hang up or press SP-PHONE.</th>
</tr>
</thead>
</table>

Lift the handset or press SP-PHONE. Dial 70*#. <PT Display Example>

Conditions

- This operation is not available while someone is checking a call information stored in the common area.
3.3 **Operator/Manager Service Features**

**Call Log Lock, Incoming in the Common Area**

The operator or manager can lock the displays of extensions so that the “Call Log, Incoming” feature is not shown on the displays when the Caller ID Indication — Common button is pressed. It prevents others from seeing the information stored in the common area.

**Locking**

Lift the handset or press SP-PHONE.

Dial 77. Enter the 4-digit lock code (0000 through 9999) twice.

Dial #.

Confirmation tone and dial tone.

Hang up or press SP-PHONE.

<PT Display Example>

Locked : xxxxx

Lock Code

**Unlocking**

Lift the handset or press SP-PHONE.

Dial 77. Enter the same lock code you used to lock the extension.

Dial #.

Confirmation tone and dial tone.

Hang up or press SP-PHONE.

<PT Display Example>

Unlocked

**Feature References**

Call Log, Incoming
Call Log Lock, Incoming in the Personal Area
3.3  Operator/Manager Service Features

Date and Time Setting

When the current time setting is wrong, you can adjust it by the following procedure.

Setting

— Be sure that you are in the Station Programming mode. Set the MEMORY switch to “PROGRAM”.

<table>
<thead>
<tr>
<th>PT</th>
<th>year</th>
<th>month</th>
<th>day</th>
<th>day of the week</th>
</tr>
</thead>
<tbody>
<tr>
<td>0</td>
<td>Enter the year (last 2 digits).</td>
<td>Enter the month (01 through 12).</td>
<td>Enter the day (01 through 31).</td>
<td>Enter the day of the week.</td>
</tr>
<tr>
<td>&lt;PT Display Example&gt;</td>
<td>980715</td>
<td>6</td>
<td>07:52</td>
<td>1</td>
</tr>
</tbody>
</table>

Enter the time (01 through 12). Enter the minute (00 through 59). Dial 0 or 1. Press AUTO DIAL/STORE.

- The STORE indicator light turns on.

— To exit the Station Programming mode, set the MEMORY switch to “SET”.

3-134  Telephone Features
3.3 **Operator/Manager Service Features**

**Electronic Station Lockout — CANCEL ALL**

The operator or manager can cancel Electronic Station Lockout at all extensions.

**Setting**

— Be sure that you are in the Station Programming mode. Set the MEMORY switch to “PROGRAM”.

— To exit the Station Programming mode, set the MEMORY switch to “SET”.

**Condition**

- This feature also cancels Call Log Lock, Incoming in the Personal Area and Message Waiting for Another Extension Lock at all extensions.

**Feature Reference**

Call Log Lock, Incoming in the Personal Area  
Electronic Station Lockout  
Message Waiting for Another Extension Lock
3.3 Operator/Manager Service Features

Live Call Screening Password Control †

The operator or manager can clear the Live Call Screening password on any extension.

Clearing the Live Call Screening password

— Be sure that you are in the Station Programming mode. Set the MEMORY switch to “PROGRAM”.

PT

Dial #2.

Dial the extension number where you want to clear the password.

Press STORE.

• The STORE indicator lights.

<PT Display Example>

123:Cancel?

• To erase an incorrect entry, press the TRANSFER (CLEAR) button. (The TRANSFER button becomes the CLEAR button during programming.)

— To exit the Station Programming mode, set the MEMORY switch to “SET”.

Condition

• If the extension user forgets their pre-set password, they can ask the operator or manager to clear the password.

Feature Reference

Live Call Screening (LCS)

† Available when the KX-TA624 is connected to a Proprietary Telephone capable Panasonic Voice Processing System (one that supports APT Integration; KX-TVS50/KX-TVS80).
3.3 Operator/Manager Service Features

Outgoing Message (OGM)

The operator or manager can record or play back the outgoing message. This is played when a caller accesses the DISA feature.

Two Outgoing Messages (OGM 1 and OGM 2) are available for DISA 1 and DISA 2.

Recording a message

— Be sure that you are in the Station Programming mode. Set the MEMORY switch to “PROGRAM”.

![PT Diagram]

- Dial 9.
- Lift the handset. 
- Dial 0 for both OGM 1 and OGM 2.
- Dial 1 for OGM 1.
- Dial 2 for OGM 2.
- Record a message (up to 30 seconds).
- Press AUTO DIAL/STORE.
- Confirmation tone
- Time counter (seconds)

<PT Display Example>

Record 1&2:00

- The STORE indicator light turns steady red.
- If you exceed the time (30 seconds), recording is stopped automatically.

— To exit the Station Programming mode, set the MEMORY switch to “SET”.

3.3 Operator/Manager Service Features

Playing back a message
— Be sure that you are in the Station Programming mode. Set the MEMORY switch to “PROGRAM”.

*PT*

| 3 or 4 | Dial 4 for OGM 2. |

<PT Display Example>

<table>
<thead>
<tr>
<th>Time counter (seconds)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Playback 1:00</td>
</tr>
</tbody>
</table>

- The STORE indicator light turns off.
- The message is played back.

— To exit the Station Programming mode, set the MEMORY switch to “SET”.

Feature Reference
Direct Inward System Access (DISA)
3.3 Operator/Manager Service Features

Remote Station Lock Control

The operator or manager can remotely lock or unlock a desired extension. You can lock outside calls.

**Locking**

Lift the handset or press SP-PHONE/MONITOR. Press the flexible button assigned as the Station Lock button.

**<PT Display Example>**

Locked Ext101

- The Station Lock button indicator turns red.

**Unlocking**

Lift the handset or press SP-PHONE/MONITOR. Press the Station Lock button whose indicator lights red.

**<PT Display Example>**

Unlocked Ext101

- The Station Lock button indicator turns off.
3.3 **Operator/Manager Service Features**

**Conditions**

- This feature overrides the “Electronic Station Lockout” feature. If “Electronic Station Lockout” has already been set by the extension user and this feature is set afterwards, the extension user cannot cancel the lock. Only the operator or manager can cancel the lock.
- Extension passwords must be assigned to the operator and manager extensions beforehand.
- The Electronic Station Lockout — CANCEL ALL feature can cancel this feature.
- An extension user can make a call at the locked extension depending on system programming. System programming determines which COS number applies to a call at the locked extension.

<td>Hang up or press SP-PHONE.</td>
</tr>
</tbody>
</table>

<PT Display Example>
Incoming Log On

Disregarding the 301st call in the common area

<table>
<thead>
<tr>
<th>PT</th>
<th>7 3 7 2</th>
<th>#</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>Lift the handset or press SP-PHONE.</td>
<td>Dial 7372.</td>
<td>Dial #. Confirmation tone and dial tone</td>
<td>Hang up or press SP-PHONE.</td>
</tr>
</tbody>
</table>

<PT Display Example>
Incoming Log Off

Conditions

- When “Disregarding the 301st call in the common area” has been set and 300 calls are logged or all of the old information has been overwritten, the Caller ID Selection — Common button indicator lights and informs you that no more calls can be logged.

Feature Reference

Call Log, Incoming
3.3 Operator/Manager Service Features

**Time (Day/Night/Lunch) Service Setting**

This system supports the Day, Night and Lunch modes. The system operation for originating and receiving calls can be different in the Day, Night and Lunch modes. Toll restriction can be programmed to prevent unauthorized toll calls for each mode.

**Changing Day, Night or Lunch mode in manual or automatic mode**

<table>
<thead>
<tr>
<th>PT</th>
<th>7 8 1 #</th>
<th>or</th>
<th>For Manual-Day mode</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>7 8 2 #</td>
<td>or</td>
<td>For Manual-Night mode</td>
</tr>
<tr>
<td></td>
<td>7 8 3 #</td>
<td>or</td>
<td>For Manual-Lunch mode</td>
</tr>
</tbody>
</table>

- Lift the handset or press SP-PHONE/MONITOR.
- For manual-day mode: Dial 781# or press the DSS button assigned as the Day button.
- For manual-night mode: Dial 782# or press the DSS button assigned as the Night button.
- For manual-lunch mode: Dial 783# or press the DSS button assigned as the Lunch button.

- The display shows one of the following depending on whether the service is in the Day, Night or Lunch mode.
  - **<PT Display Example>**
  - Day Mode
  - Night Mode
  - Lunch Mode

- The assigned button indicator turns on.

**Canceling the manual Day, Night or Lunch mode and returning to the automatic mode**

Lift the handset or press SP-PHONE/MONITOR.
Dial 780#.
Hang up or press SP-PHONE/MONITOR.

**Confirming the current mode (with a display PT only)**

When the telephone is idle
Press #.

- The display shows the current mode for 3 seconds.
3.3 Operator/Manager Service Features

**Conditions**

- The day/night/lunch mode can be changed either automatically at a predetermined time (default: 9:00 a.m. for every day, 5:00 p.m. for every night) or manually at any time by System Programming.
- Even if the automatic mode has been selected by System Programming, the operator or manager can change the day, night and lunch modes manually.
- The following programs have separate day, night and lunch programming.
  1) Delayed Ringing Assignment
  2) Door Opener Assignment
  3) Doorphone Ringing Assignment
  4) Flexible Outward Dialing Assignment
  5) Flexible Ringing Assignment
  6) Outside (CO) Line Mode
  7) TRS – Class of Service (COS)
- If the lunch mode is set using feature number 783# in the automatic mode, the mode will not be changed until the lunch mode is canceled using feature number 780#. The day and night modes are automatically changed at the programmed time even if feature number 780# is not entered.
- Feature number 780# is not accepted in the manual mode.
- One of the day, night or lunch button indicators on the DSS console lights red to display the current mode.
- If the day, night or lunch mode is changed manually in the automatic changing mode and the manager starts System Programming, the manual setting will be canceled after System Programming is completed. It will return to the automatic day, night or lunch mode.

Alarm Cancel
Checking the time setting (with a display PT only)

**PT**

- Lift the handset or press SP-PHONE/MONITOR.
- Dial 764.
- Dial the desired extension number (100 through 199).
- Dial #.
- Confirmation tone and dial tone

- Dial 763#.
- Hang up or press SP-PHONE/MONITOR.

- If “10:10” has been set:
  - **<PT Display Example>**
  - **Alarm 10:10AM** — one time
  - or
  - **Alarm 10:10AM** — daily

**Conditions**

- Be sure the system clock is set correctly.
- There is no limit to the number of the extensions who can set Timed Reminder at the same time.

**Feature Reference**

Timed Reminder
3.3  Operator/Manager Service Features

Extension Password Set (Manager only)

The manager can assign a password to each extension. The assigned password can be used for the Walking COS feature. The assigned password for the manager (jack number 01) can also be used for the Manager Programming.

Setting

— Be sure that you are in the Station Programming mode. Set the MEMORY switch to “PROGRAM”.

<table>

<Note>
All paired telephone illustrations used in the operating instructions are based on the KX-T7130/KX-T7135 model.
4.1 Configuration

With a Direct Station Selection (DSS) Console, model KX-T7040, you can make or transfer calls and access system features with the touch of a button. The DSS Console must be connected to a Panasonic Advanced Hybrid System and paired with a PT. System Programming is required to designate the jack numbers of the DSS Console. With a paired telephone, you can carry out the following operations using the DSS Console.

- Direct access to an extension (Direct Station Dialing)
- Quick access to an external party (One-Touch Dialing)
- Quick access to a system feature (One-Touch Access for System Features)
- Easy transfer to an extension (Call Transfer)
- Direct access to an Another Extension Message Waiting (Message Waiting)
- Quick setting and cancel the Live Call Screening (Live Call Screening (LCS)†)
- Quick setting of the Two-Way Recording into Voice Mail (Two-Way Recording into Voice Mail‡)
- Quick setting of the Voice Mail Transfer (Voice Mail (VM) Transfer†)
- Quick access to the day mode (Time (Day/Night/Lunch) Service) (Operator and Manager only)
- Quick access to the night mode (Time (Day/Night/Lunch) Service) (Operator and Manager only)
- Quick access to the lunch mode (Time (Day/Night/Lunch) Service) (Operator and Manager only)
- Quick setting of the Remote Station Lock Control (Remote Station Lock Control) (Operator and Manager only)

Conditions

- The KX-T7040 and Proprietary Telephone (PT) should be placed side by side on your desk.
- A single line telephone cannot be utilized with the KX-T7040.
- For System Programming, please refer to the Installation Manual.

Programming References

- System Programming — Installation Manual

  [112] DSS Console Indication Mode

† Available when the KX-TA624 is connected to a Proprietary Telephone capable Panasonic Voice Processing System (one that supports APT Integration; KX-TVS50/KX-TVS80).
4.1 Configuration

Location of Controls

DSS Buttons with a Busy Lamp Field (BLF) (01 through 32):
These are used to access extensions. The BLF indicates the busy or idle status of each extension in the system. These buttons can also be changed to other feature buttons.

PF (Programmable Feature) Buttons (01 through 16):
These buttons are provided with no default settings. With a paired telephone, you can program the buttons as other feature buttons.

<Back View>

Connects to the KX-TA624 System.
4.2 DSS Console Features

Station Programming

PF buttons are provided with no default settings, while each DSS button has a default setting as follows.
- DSS 01–24: extension numbers 101–124
- DSS 25–32: no default settings

To meet your various needs, DSS buttons can be changed to other feature buttons. Every DSS or PF button can be assigned to another extension number, telephone number or feature number by Station Programming.

Conditions

- DSS buttons can be changed to any of the following feature buttons by Station Programming.
  a) Another DSS Button (Every DSS button can be assigned to another extension number.)
  b) One-Touch Dialing/One-Touch Access Button
  c) Another Extension Message Waiting Button
  d) Live Call Screening (LCS) Button†
  e) Live Call Screening (LCS) Cancel Button†
  f) Two-Way Record Button†
  g) Two-Way Transfer Button†
  h) Voice Mail (VM) Transfer Button†
  i) Day Button (Operator and Manager only)
  j) Night Button (Operator and Manager only)
  k) Lunch Button (Operator and Manager only)
  l) Station Lock Button (Operator and Manager only)

- PF buttons can be changed to One-Touch Dialing/One-Touch Access buttons by Station Programming.

- When the STORE button is pressed after programming, you will hear beep tones as follows.
  — One beep: The entry is different from the one that was stored previously.
  — Two beeps: The entry is the same as the previously stored one.

- You can check the stored data by pressing the desired button while on-hook. The data will be displayed.

4.2 DSS Console Features

**Extension Number Assignment**

You can assign a desired number to a DSS button.

— Be sure that you are in the Station Programming mode. Set the MEMORY switch to “PROGRAM”.

<table>
<thead>
<tr>
<th>PT and DSS Console</th>
</tr>
</thead>
<tbody>
<tr>
<td>[DSS Console]</td>
</tr>
<tr>
<td>Press the desired DSS button.</td>
</tr>
</tbody>
</table>

Repeat these steps to program numbers for other DSS buttons.

— To exit the Station Programming mode, set the MEMORY switch to “SET”.

**One-Touch Dialing Assignment**

You can assign a DSS or PF button as a One-Touch Dialing button. The number can be an extension number or a telephone number. Up to twenty-four digits can be stored in each memory location.

— Be sure that you are in the Station Programming mode. Set the MEMORY switch to “PROGRAM”.

<table>
<thead>
<tr>
<th>PT and DSS Console</th>
</tr>
</thead>
<tbody>
<tr>
<td>[DSS Console and Paired telephone]</td>
</tr>
<tr>
<td>Press the desired DSS button (on the DSS Console) and dial 2 (on the paired telephone), or press the PF button (on the DSS Console).</td>
</tr>
</tbody>
</table>

Repeat these steps to program numbers for other DSS or PF buttons.

— When you assign an outside phone number, you must enter a line access code first.

— To exit the Station Programming mode, set the MEMORY switch to “SET”.
4.2 DSS Console Features

One-Touch Access Assignment for System Features

You can assign a desired feature to a DSS or PF button.

— Be sure that you are in the Station Programming mode. Set the MEMORY switch to “PROGRAM”.

![Diagram showing DSS Console and Paired telephone](image)

PT and DSS Console

Press the desired DSS button (on the DSS Console) and dial 2 (on the paired telephone), or press the PF button (on the DSS Console).

Enter the desired feature number.

Press AUTO DIAL/STORE.

Repeat these steps to program numbers for other DSS or PF buttons.

• If you wish to access the “Paging — All” feature, enter feature number 33×.

— To exit the Station Programming mode, set the MEMORY switch to “SET”.

Another Extension Message Waiting Button Assignment

You can assign a DSS button as an Another Extension Message Waiting button.

— Be sure that you are in the Station Programming mode. Set the MEMORY switch to “PROGRAM”.

![Diagram showing DSS Console and Paired telephone](image)

PT and DSS Console

Press the desired DSS button.

Dial 95.

Enter the desired extension number (100 through 199).

Press AUTO DIAL/STORE.

Repeat these steps to program numbers for other DSS buttons.

— To exit the Station Programming mode, set the MEMORY switch to “SET”.

4-6 DSS Console Features
4.2 **DSS Console Features**

**Live Call Screening (LCS) Button Assignment †**

You can assign a DSS button as the Live Call Screening (LCS) button.

— Be sure that you are in the Station Programming mode. Set the MEMORY switch to “PROGRAM”.

![PT and DSS Console](image)

Press the desired DSS button you wish to assign as the Live Call Screening button. Dial 92. Press AUTO DIAL/STORE.

— To exit the Station Programming mode, set the MEMORY switch to “SET”.

**Live Call Screening (LCS) Cancel Button Assignment †**

You can assign a DSS button as the Live Call Screening (LCS) Cancel button.

— Be sure that you are in the Station Programming mode. Set the MEMORY switch to “PROGRAM”.

![PT and DSS Console](image)

Press the desired DSS button you wish to assign as the Live Call Screening Cancel button. Dial 93. Press AUTO DIAL/STORE.

— To exit the Station Programming mode, set the MEMORY switch to “SET”.

† Available when the KX-TA624 is connected to a Proprietary Telephone capable Panasonic Voice Processing System (one that supports APT Integration; KX-TVS50/KX-TVS80).
4.2 DSS Console Features

Two-Way Record Button Assignment †

You can assign a DSS button as the Two-Way Record button. This allows you to record a conversation into your voice mailbox.

— Be sure that you are in the Station Programming mode. Set the MEMORY switch to “PROGRAM”.

<table>
<thead>
<tr>
<th>PT and DSS Console</th>
</tr>
</thead>
<tbody>
<tr>
<td>[DSS Console]</td>
</tr>
<tr>
<td></td>
</tr>
</tbody>
</table>

Press the desired DSS button you wish to assign as the Two-Way Record button. Dial 90. Enter the Voice Mail extension number. Press AUTO DIAL/STORE.

— To exit the Station Programming mode, set the MEMORY switch to “SET”.

Two-Way Transfer Button Assignment †

You can assign a DSS button as the Two-Way Transfer button. This allows you to record a conversation into a desired mailbox.

— Be sure that you are in the Station Programming mode. Set the MEMORY switch to “PROGRAM”.

<table>
<thead>
<tr>
<th>PT and DSS Console</th>
</tr>
</thead>
<tbody>
<tr>
<td>[DSS Console]</td>
</tr>
<tr>
<td></td>
</tr>
</tbody>
</table>

Press the desired DSS button you wish to assign as the Two-Way Transfer button. Dial 91. Enter the Voice Mail extension number. Press AUTO DIAL/STORE.

— To exit the Station Programming mode, set the MEMORY switch to “SET”.

† Available when the KX-TA624 is connected to a Proprietary Telephone capable Panasonic Voice Processing System (one that supports APT Integration: KX-TVS50/KX-TVS80).
4.2 DSS Console Features

**Voice Mail (VM) Transfer Button Assignment**†

You can assign a DSS button as the Voice Mail (VM) Transfer button.

— Be sure that you are in the Station Programming mode. Set the MEMORY switch to “PROGRAM”.

![PT and DSS Console]

<table>
<thead>
<tr>
<th>[DSS Console]</th>
<th>[Paired telephone]</th>
<th>[Paired telephone]</th>
<th>[Paired telephone]</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>9</td>
<td>4</td>
<td>ENTER Voice Mail extension no.</td>
</tr>
</tbody>
</table>

Press the desired DSS button you wish to assign as the VM Transfer button. 

Dial 94. 

Enter the Voice Mail extension number. 

Press AUTO DIAL/STORE. 

— To exit the Station Programming mode, set the MEMORY switch to “SET”.

† Available when the KX-TA624 is connected to a Proprietary Telephone capable Panasonic Voice Processing System (one that supports APT Integration; KX-TVS50/KX-TVS80).

**Day Button Assignment (Operator and Manager only)**

You can assign a DSS button as the Day button. Simply pressing the assigned button sets the day mode.

— Be sure that you are in the Station Programming mode. Set the MEMORY switch to “PROGRAM”.

![PT and DSS Console]

<table>
<thead>
<tr>
<th>[DSS Console]</th>
<th>[Paired telephone]</th>
<th>[Paired telephone]</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>4</td>
<td>AUTO DIAL</td>
</tr>
</tbody>
</table>

Press the desired DSS button. 

Dial 4. 

Press AUTO DIAL/STORE. 

— To exit the Station Programming mode, set the MEMORY switch to “SET”.
4.2 **DSS Console Features**

*Night Button Assignment (Operator and Manager only)*

You can assign a DSS button as the Night button. Simply pressing the assigned button sets the night mode.

— Be sure that you are in the Station Programming mode. Set the MEMORY switch to “PROGRAM”.

![PT and DSS Console](image)

— To exit the Station Programming mode, set the MEMORY switch to “SET”.

*Lunch Button Assignment (Operator and Manager only)*

You can assign a DSS button as the Lunch button. Simply pressing the assigned button sets the lunch mode.

— Be sure that you are in the Station Programming mode. Set the MEMORY switch to “PROGRAM”.

![PT and DSS Console](image)

— To exit the Station Programming mode, set the MEMORY switch to “SET”.

### 4.2 DSS Console Features

**Station Lock Button Assignment (Operator and Manager only)**

You can assign the Station Lock button to a DSS button for the remote station lock control feature.

— Be sure that you are in the Station Programming mode. Set the MEMORY switch to “PROGRAM”.

**PT and DSS Console**

<table>
<thead>
<tr>
<th>[DSS Console]</th>
<th>[Paired telephone]</th>
<th>[Paired telephone]</th>
<th>[Paired telephone]</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Press the desired DSS button.

Dial 7.

Enter the desired extension number (100 through 199).

Press AUTO DIAL/STORE.

Repeat these steps to program numbers for other DSS buttons.

— To exit the Station Programming mode, set the MEMORY switch to “SET”.

**Station Programming Cancel**

*To cancel after programming*

**PT and DSS Console**

<table>
<thead>
<tr>
<th>[DSS Console]</th>
<th>[Paired telephone]</th>
<th>[Paired telephone]</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
<td>AUTO DIAL</td>
</tr>
</tbody>
</table>

Press the DSS or PF button which you wish to cancel.

Dial 2.

Press AUTO DIAL/STORE.

• The number is canceled.
4.2 DSS Console Features

Direct Station Dialing

An extension can be called and accessed, by simply pressing a DSS button. The BLF shows if the extension is engaged.

One-Touch Dialing

The stored number is dialed automatically by pressing a programmed DSS or PF button.

One-Touch Access for System Features

You can access system features by pressing a programmed DSS or PF button.
4.2 DSS Console Features

Call Transfer
A call can be transferred to an extension using a DSS button.

Without Transfer

<table>
<thead>
<tr>
<th>PT and DSS Console</th>
<th>During a conversation</th>
<th>[Paired Telephone]</th>
<th>[DSS Console]</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>TRANSFER</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Press TRANSFER.</td>
<td>Press the desired DSS button.</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

With Transfer
An outside call can be transferred to an extension using a one-touch operation. The One-Touch Transfer feature must be set by System Programming.

<table>
<thead>
<tr>
<th>PT and DSS Console</th>
<th>During a conversation</th>
<th>[DSS Console]</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Press the desired DSS button.</td>
<td></td>
</tr>
</tbody>
</table>

- The other party is placed on hold and the destination extension is called.

### Conditions

- If the displayed characters exceed sixteen digits, “&” is shown on the right-hand side of the display.
- The duration time display is only shown when you make or receive an outside call. The Count start time for outgoing calls can be programmed as desired.
- When you confirm key programming, be sure to press the button while on-hook.

Troubleshooting

If a power failure occurs...

Your system enables a conversation between a specific outside (CO) line and extension (Power Failure Transfer) and supports system data backup.

**Power Failure Transfer**

A specific extension can be automatically connected to a specific outside (CO) line. This provides outside (CO) line calls between the following extension and outside (CO) line.

Outside (CO) line 1 is connected to extension jack number 01.
Outside (CO) line 4 is connected to extension jack number 09.

- All other conversations will be disconnected during a power failure.
- Proprietary telephones (PT) cannot be used during a power failure. A single line telephone will work in the event of a power failure. Connect the single line telephone to the above jack.
- When power is restored after a power failure, your system automatically restarts, maintaining as much of the previous system data as possible.
